**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-  
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATUR-  
DAY, THE 6TH OF OCTOBER 1894.**

DURING practically the whole of the previous week a barometric depression had existed in the north of the Bay, which had gradually deepened into a feeble cyclonic storm and had passed inland near Puri, moving in a west-north-westerly direction into the Central Provinces. It afterwards commenced to recurve, and on the 20th of September, or the last day of that week, its centre was nearly midway between Seoni and Jubbulpur. From the 29th to the 30th of September, or the first day of the week under review, the storm had advanced about 100 miles in a northerly direction, and its centre was between Saugor and Sutna. It then began to move in a north-easterly direction, and from the 30th of September to 1st of October it had advanced over 150 miles, and was midway between Sutna and Benares, while on the 2nd it had again advanced in a north-easterly direction and had broken up against the Himalayas, probably to the north of Bihar. Hence, as this storm moved at first in a northerly direction to the west of the province, and then in a north-easterly direction towards the north-western districts of Bengal, specially towards the west of Bihar and Chota Nagpur, it continued to give somewhat disturbed weather to a considerable part of Bihar, Chota Nagpur and Bengal generally. Hence, though on the 30th of September and on the 1st of October rainfall was rather local and in most cases light, on the 2nd it was becoming more general, and rather heavy falls were reported in the north of the Province, while the falls continued to increase in heaviness on the 3rd, 4th and 5th instants though at the close of the week rainfall was again becoming local.

While, however, the first storm was advancing in a north-easterly direction towards the Himalayas, where it broke up on the 2nd, another feeble depression was forming in the Bay. On the 1st pressure had fallen over the whole province, the fall being rather rapid in Orissa, where it exceeded a twentieth of an inch, and where pressure was in defect by amounts ranging up to 0.189 inch at Cuttack. On this day ordinary but rather strong monsoon winds only prevailed over the whole Bay. On the 2nd a further slow to moderate fall of pressure occurred over the whole province, the fall exceeding a twentieth of an inch at the stations in the north-west angle of the Bay, and pressure became below the normal by amounts ranging up to 0.229 inch at Balasore and Saugor Island, and 0.220 inch at False Point and Cuttack. A very decided cyclonic circulation of winds also set up round the north-west angle of the Bay, the centre of the circulation being to the south of Saugor Island and to the east of False Point, but the wind force in connection with this circulation was light. The depression commenced to move in a north-westerly direction almost as soon as it was formed, and the centre of the feeble storm passed between Saugor Island and Balasore on the evening of the 2nd, and at 8 A.M. of the 3rd the centre was between Chaibassa and Balasore, and nearer the former station than the latter. On the 4th the feeble depression had again moved in a north-westerly direction, and was to the west of Hazaribagh, but it was apparently beginning to fill up. On the 5th the small cyclonic storm had advanced about 250 miles in a north-westerly direction, and its centre was near Lucknow, and the depression at the centre of the storm was greater and the gradients were steeper, and the storm was giving heavy rain in the North-West Provinces, though the falls were lighter in Bengal. On the 6th the storm had advanced in a northerly direction, and it had broken up against the Himalayas probably not very far from Naini Tal.

With the formation of the depression on the 2nd and the commencement of its inland advance on the evening of this day, another feeble burst of monsoon winds began to flow over Bengal, and hence from the 3rd instant rainfall again was general over the whole province; this general rainfall continued on the 4th and 5th, while on the 6th it was again becoming decidedly local.

*Pressure.*—Owing to the low pressure attending the two barometric depressions previously described, the mean pressure for the week has been largely below the normal, and indeed at the majority of stations the defect has exceeded a tenth of an inch. The defect has been largest at the western stations, which have been most directly under the influence of the depressions, and at such stations as Balasore, Midnapore, Raniganj, Bankura, Ranchi, Chaibassa, Arrah, Buxar and Dehri the defect has exceeded 0.15 inch, while in the east of the province at Chittagong, Narayanganj Jalpaiguri, &c., the defect has only equalled about 0.08 inch. In Assam also the average defect has only equalled 0.086 inch.

*Temperature.*—The variations of temperature from the normal for the week have been small, and for the whole of Bengal the mean temperature has only been a tenth of a degree in defect. In the case of Assam the average mean temperature has been 0.4° in excess.

*Rainfall.*—Owing to the action of the two depressions, rainfall has been heavier than usual during the week. Chota Nagpur has received the large average fall of 2.82 inches, or about three times the normal fall for the week, while in all other divisions the falls have equalled from about one inch to an inch and a half, and the falls have been decidedly above the normal, except in the case of East and North Bengal. In all divisions, even in East and North Bengal, the number of rainy days in the week has been rather largely in excess of the normal.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following:—South-West Bengal 163 per cent., North Bengal 58 per cent., East Bengal 88 per cent., Bihar 130 per cent., Orissa 113 per cent., and Chota Nagpur 297 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 142 per cent. of the normal.

In Assam during the week Silchar has received 4·02 inches of rain, Dhubri 1·50 inches, and Sibsangor 1·05 inches.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 6th of October 1894:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.								
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th May 1894.	
			Of highest of each day.	Of lowest of each day.	Of mean of each day.		Average.	Normal average.	Variation.	Average number in week.	Normal average number in week.	Variation.	Average.	Normal average.	Average.	Normal average.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently equal; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

APPENDIX TO

# The Calcutta Gazette.

WEDNESDAY, OCTOBER 10, 1894.

## NOTICES TO MARINERS.

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 185.

[Second Publication.]

KOREA, SOUTH COAST—BATE GROUP.

*Breakers reported north-east of Remi island.*

THE British Admiralty has given notice (No. 469 of 1894) that breakers have been reported in a position N. E. by E. (N.  $56^{\circ}$  E.), distant  $2\frac{1}{2}$  miles, from Remi island.

Approximate position, to be considered doubtful, lat.  $34^{\circ} 1' N.$ , long.  $126^{\circ} 25\frac{1}{2}' E.$

**AUSTRALIA—HERVEY BAY.**

*Fairway buoy away from position.*

THE Portmaster, Brisbane, has given notice (No. 14 of 1894) that the Fairway buoy marking the northern entrance to Hervey bay is away from its position, and is supposed to have been run down.

A small buoy has been placed to mark the position temporarily, which will be replaced as soon as practicable with a large conical buoy, painted black and carrying a staff and cylinder.

The buoy will be visible five miles in clear weather.

**NEW ZEALAND, SOUTH ISLAND—WESTPORT.**

*Signal flagstaff moved, beacons, and alterations in night signals.*

THE British Admiralty has given notice (No. 456 of 1894) that, on 19th June 1894, the signal flagstaff at the entrance to Buller river, Westport, would be moved to a position on the western breakwater, 2,100 feet within the outer extremity.

Approximate position, lat.  $41^{\circ} 44' 20'' S.$ , long.  $171^{\circ} 36' 5'' E.$

A new beacon, 50 feet high, has been erected on the former site of the signal flagstaff.

Leading lights for entering the harbour are shown from two beacons, bearing when in line S. by E.  $\frac{1}{2}$  E. (S.  $17^{\circ}$  E.), and situated on the west bank of the river within the breakwater.

The front light, shown from a white beacon, is *green* when the bar is safe; and *red* when it is not safe.

The rear light, *white*, is shown from a white beacon with a red band. This beacon is 50 feet high, and has a semaphore attached, which will be used when required for the guidance of vessels entering or leaving the harbour.

The undermentioned night signals are shown from the signal flagstaff on the western breakwater, in addition to the general bar; and danger signals for all New Zealand ports:—

1. The *white* harbour light only, signifies—Wait.
2. A *green* light over the *white* light:—Bar safe for vessels of less than 9 feet draught.
3. Two *green* lights over the *white* light—Bar safe for vessels of 9 feet draught.
4. A *green* light under the *white* light:—Bar safe for vessels of 11 feet 6 inches draught.
5. A *green* light above, and a *green* light below, the *white* light:—Bar safe for vessels of 14 feet draught.

The signals to take the bar will be shown from the signal flagstaff on the west breakwater.

Masters of vessels of more than 10 feet draught are requested to signal their draught of water, when arriving off the harbour entrance after half ebb; and of 10 feet draught or less when arriving at low water.

H. J. S. COTTON,  
Chief Secy. to the Govt. of Bengal.

#### NOTIFICATION—No. 1718A.D.

*The 12th October 1894.*—In continuation of the notification dated the 6th September 1894, it is hereby notified that Mr. F. Trafford, Assistant Conservator of Forests, passed in Forest Procedure and Accounts at the Departmental Examination of Assistant Magistrates and others held in May 1894.

H. J. S. COTTON,  
Chief Secy. to the Govt. of Bengal.

#### REVENUE DEPARTMENT—(LAND REVENUE.)

#### NOTIFICATION—No. 737T.B.

*The 11th October 1894.*—Under the powers conferred upon him by section 101 (1) of the Bengal Tenancy Act VIII of 1885, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to order that a survey shall be made and a record of rights prepared in respect of all lands included within the external boundaries of thanas Sitamarhi and Pupri and of Tappa Bhatsala and Chakla Nai within the Bisara Pargana in the district of Muzaffarpur.

The particulars to be recorded in the survey and record of rights shall be the following:—

The name of each proprietor with the character and extent of his interest.

The situation, quantity and boundaries of the proprietor's private lands as defined in Chapter XI of the Act.

The name of each tenant.

The class to which he belongs, that is to say, whether he is a tenure-holder, raiyat holding at fixed rates, occupancy raiyat, non-occupancy raiyat, or under-raiyat; and if he is a tenure-holder, whether he is a permanent tenure-holder or not, and whether his rent is liable to enhancement during the continuance of his tenancy.

The situation, quantity, and boundaries of the land held by him.

The name of his landlord.

The rent payable.

The mode in which that rent has been fixed, whether by contract, by order of a Court, or otherwise.

If the rent is a gradually increasing rent, the time at which, and the steps by which, it increases.

The special condition and incidents, if any, of the tenancy.

C. E. BUCKLAND,  
*Secy. to the Govt. of Bengal.*

#### NOTIFICATION—No. 739T.R.

*The 11th October 1894.*—The following officers are appointed to be Assistant Settlement Officers in the district of Muzaffarpur, with effect from the dates on which they may join their appointments:—

- (1) Mr. C. A. Bell, i.c.s.
- (2) Maulvi Shah Muhammad Azam, Officiating Deputy Magistrate and Deputy Collector.
- (3) Maulvi Muhammad Yusaf Ali, Officiating Deputy Magistrate and Deputy Collector.
- (4) Babu Charu Chandra Kumar, Officiating Deputy Magistrate and Deputy Collector.
- (5) Babu Bhupendra Nath Gupta, substantive *pro tempore* Sub-Deputy Collector.
- (6) Babu Rai Krishna Bahadur, substantive *pro tempore* Sub-Deputy Collector.
- (7) Mr. Ram Comal Gupta, substantive *pro tempore* Sub-Deputy Collector.
- (8) Maulvi Syed Ali Mazhar, Officiating Sub-Deputy Collector.

C. E. BUCKLAND,  
*Secy. to the Govt. of Bengal.*

#### NOTIFICATION—No. 742T.R.

*The 11th October 1894.*—The following officers, who have been appointed Assistant Settlement Officers in the district of Muzaffarpur, are authorised, under section 3 (17) of the Bengal Tenancy Act VIII of 1885, to discharge the functions of a Revenue Officer in that district under the provisions of the said Act so far as they relate to Revenue Officers:—

- (1) Mr. C. A. Bell, i.c.s.
- (2) Maulvi Shah Muhammad Azam, Officiating Deputy Magistrate and Deputy Collector.
- (3) Babu Charu Chandra Kumar, Officiating Deputy Magistrate and Deputy Collector.
- (4) Maulvi Muhammad Yusaf Ali, Officiating Deputy Magistrate and Deputy Collector.
- (5) Babu Bhupendra Nath Gupta, substantive *pro tempore* Sub-Deputy Collector.
- (6) Babu Rai Krishna Bahadur, substantive *pro tempore* Sub-Deputy Collector.
- (7) Mr. Ram Comal Gupta, substantive *pro tempore* Sub-Deputy Collector.
- (8) Maulvi Syed Ali Mazhar, Officiating Sub-Deputy Collector.

These officers are also vested with the powers of a Settlement Officer under rule 1, Chapter VI of the Rules under the Bengal Tenancy Act.

C. E. BUCKLAND,  
*Secy. to the Govt. of Bengal.*

#### NOTIFICATION—No. 762T.R.

*The 14th October 1894.*—Babu Ashutosh Chatterjee, Sub-Deputy Collector, Hooghly, is authorized to discharge the functions of a Revenue Officer, under Chapter X of the Bengal Tenancy Act VIII of 1885, for the purpose of making a survey and preparing the record of rights in Estate Kanoor, No. 1100, in the district of Hooghly, and is vested with the powers of a Settlement Officer under rule 1, chapter VI of the Rules under that Act.

C. E. BUCKLAND,  
*Secy. to the Govt. of Bengal.*

## NOTIFICATION—No. 769T.R.

*The 14th October 1894.*—With reference to the notification, dated the 29th February 1892, published at page 254, Part I, of the *Calcutta Gazette* of the 2nd March 1892, and the notification, dated the 19th June 1894, published at page 707, Part I, of the said *Gazette* for the 27th June 1894, Babu Pyari Mohon Basu, Deputy Collector, is authorized to discharge the functions of a Revenue Officer under section 3 (17) of the Bengal Tenancy Act VIII of 1885, and is vested with the powers of a Settlement Officer under rule 1, chapter VI, of the Rules framed by Government under the Act, in respect of the tenures and estates noted below, *vice* Mr. Dwija Das Dutta, transferred to Muzaffarpur:—

1. Putni taluks, &c., situated within the zamindari and putni taluk of Babu Kali Krishna Tagore in pargana Idilpur, station Mendigunge in the district of Backergunge.

C. E. BUCKLAND,  
*Secy. to the Govt. of Bengal.*

## NOTIFICATION—No. 750T.R.

*The 11th October 1894.*—The following rules to regulate the account of expenditure on drainage schemes sanctioned under Act VI (B.C.) of 1880, which have been approved by the Lieutenant-Governor, are published for general information in supersession of the rules published in the *Calcutta Gazette* of the 9th January 1884, under notification dated the 3rd idem :—

*Rules for the account of expenditure on Drainage Schemes sanctioned under Act VI (B.C.) of 1880.*

1. In the following rules the word “scheme” means any project or portion of a project sanctioned by the Government under section 54 of the Act as a separate scheme.
2. Expenditure on any scheme for the drainage and improvement of any tract of land under Act VI (B.C.) of 1880 will be incurred on estimates adopted by the Commissioners appointed under the Act and sanctioned by Government.
3. The expenditure will be incurred partly by the Public Works Department and partly by the Civil Department. The expenditure in the Civil Department will be in respect of compensation for lands taken for the purposes of the Act, and for damage inflicted in carrying out the scheme, salaries of officers, servants and establishments, and cost of surveys and valuations (other than those made by officers of the Public Works Department), whether antecedent or subsequent to the preparation of the scheme and plans.
4. On the vouchers on which such expenditure is incurred it will be distinctly stated for what particular scheme the payments are made, and no voucher shall be paid at the treasury unless it is first passed by the Collector of the district as a charge to a particular scheme under the Act.
5. The expenditure will be passed by the Accountant-General to charge of a special advance head to be opened for each scheme upon his accounts, and an account of all the transactions under each such account (opening and closing with a balance) will be forwarded by him to the Collector at the end of each quarter for communication to the Commissioners. The account should be made up in such detail as to show the *general* nature of the expenditure included in it, such as “surveys,” “compensation for land,” &c.
6. The accounts of expenditure in the Public Works Department will similarly be kept separately for each “scheme,” the charges being in the first place passed to debit of a special advance head to be opened upon the books of the Examiner.
7. A quarterly account of the expenditure so charged will be prepared by the Examiner, and by him transmitted to the Accountant-General for communication to the Collector and the Commissioners. This account will show the general nature of the expenditure only, such as “establishments,” “works,” “stores” or any other similar particulars.

8. At the end of each quarter the total charge upon the Examiner's books will be transferred to those of the Accountant-General, which will show under a separate advance account for each scheme, the total expenditure for each quarter both in the Civil and Public Works Departments. The quarterly charge thus transferred should agree with the total of the quarterly statement of expenditure which is furnished by the Examiner to the Accountant-General with reference to rule 9.

9. At the end of each quarter, until the work is finally completed, the officer in charge of the works will, as required by section 27, make a detailed report, not later than the 15th of the following month, to the Drainage Commissioners through the Collector, of the progress of the works and the expenditure thereupon, so far as known to him, from the date to which the next preceding report has been brought down. He will submit his statement of expenditure to the Examiner of Public Works Accounts not later than the 15th of the following month, and the Examiner is to forward his quarterly statement of expenditure to the Accountant-General not later than the 25th of the following month.

10. The quarterly account received from the Accountant-General by the Commissioners will be received as the statement of the accounts of Government in respect of each scheme. They will on receipt be examined by the Commissioners against the register of sanctioned charges (for Civil Department), and be compared with the quarterly report of the officer in charge of the works (for Public Works Department). The Commissioners will report to the Accountant-General objections they may have to raise to the accounts, whether in respect of their completeness in point of the detail required for their purposes, or in respect of their accuracy.

11. It shall be the duty of the Accountant-General to meet such criticisms, as far as consistent with the facts, by adjustments which will appear in the succeeding quarterly accounts. But the Accountant-General is the final authority in respect of the correctness of the account.

12. A copy of the certificate of completion of work required by section 28 of the Act will be sent by the officer in charge of the work to the Accountant-General, who will thereupon calculate the interest due up to date of completion, and add it to the total cost charged in his books to the advance head, for recovery from the persons concerned.

13. The interest shall be made up by reckoning for interest the total of the net expenditure shown in each quarterly account from the end of the quarter to which it appertains.

14. A complete account will now be made up by the Accountant-General in such detail as the Drainage Commissioners may require, but not in greater detail than that of the quarterly account. This complete account shows the total recoverable under the Act.

15. The Accountant-General will at the same time draw up a statement, agreeing with the above, showing the quarterly totals in the following form:—

QUARTER ENDING.	AMOUNT OF EXPENDITURE.			Amount of interest till (a specified date).
	Civil.	Public Works.	Total.	
1	2	3		5

The complete account, together with this statement, will be communicated by the Accountant-General to the Collector for communication to the Commissioners, and will be subscribed by the Accountant-General as a certificate under section 27 of the Act.

16. When the repairs and maintenance charges of a drainage scheme are capitalized under clause 4, section 48, the cost of establishment to be retained for realizing the drainage dues after the date of capitalization should also be capitalized for the number of years required for the collection work, and the present value of the capitalized amount should be added to the capitalized debt for apportionment, and interest at 5 per cent., as prescribed in the law, is to be charged on the total amount from the date of capitalization.

17. The present value of the capitalized cost of the establishment will be calculated on the annuity payable monthly at 5 per cent. simple interest for the number of years required for the collection work.

**O. E. BUCKLAND,**  
*Secy. to the Govt. of Bengal.*

## GENERAL DEPARTMENT.

## DECLARATION—No. 3403.

*The 16th October 1894.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the Training School at Dhap Ragunathganj, pargana Monthona, zilla Rangpur, it is hereby declared that for the above purpose a piece of land measuring, more or less, eleven bighas eight cottahs and twelve chitaks of standard measurement, bounded on the North by public road, on the East by a road leading to Satgara, on the South by land of Radha Madhab Acharji, and on the West by the east bank of a pond of Ahladini Dasi, is required within the aforesaid village of Dhap Ragunathganj.

## PART I A.

### Orders and Notifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

THE following order, issued by the Government of India in the Legislative Department, is republished for general information.

H. J. S. CORTON,  
Chief Secy. to the Govt. of Bengal.

#### NOTIFICATION.

Simla, the 12th October 1894.

No. 21.—The following Statute is published for general information:

#### UNIFORMS ACT, 1894.

[57 AND 58 VICTORIA, CHAPTER 45.]

*An Act to regulate and restrict the wearing of Naval and Military Uniforms.*

[25TH AUGUST, 1894.]

Be it enacted by the Queen's Most Excellent Majesty, by and with the advice and consent of the Lords Spiritual and Temporal, and Commons, in this present Parliament assembled, and by the authority of the same as follows:

Short title.

1. This Act may be cited for all purposes as the Uniforms Act, 1894.

2. (1) It shall not be lawful for any person not serving in Her Majesty's Military Forces to wear without Her Majesty's permission the uniform of any of those forces, or any dress having the appearance or bearing any of the regimental or other distinctive marks of any such uniform: Provided that this enactment shall not prevent—

Military uniforms not to be worn without authority.

(a) A member of a band from wearing at or for the purpose of a public performance by the band at any time within six years after the passing of this Act any dress which, at the passing of this Act, is the recognised uniform of the band, unless the dress is an exact imitation of the uniform of any of Her Majesty's military forces; or

(b) Any persons from wearing any uniform or dress in the course of a stage play performed in a place duly licensed or authorised for the public performance of stage plays, or in the course of a music hall or circus performance, or in the course of any *bona fide* military representation.

(2) If any person contravenes this section he shall be liable on summary conviction to a fine not exceeding five pounds.

3. If any person not serving in Her Majesty's Naval or Military Forces wears without

Penalty for bringing contempt on uniform.

Her Majesty's permission the uniform of any of those forces, or any dress having the appearance or bearing any of the regimental or other distinctive marks of any such uniform in such a manner or under such circumstances as to be likely to bring contempt

upon that uniform, or employs any other person so to wear that uniform, or dress, he shall be liable on summary conviction to a fine not exceeding ten pounds, or to imprisonment for a term not exceeding one month.

Interpretation.

4. In this Act—

The expression “Her Majesty’s Military Forces” means the regular forces, the reserve forces, and the auxiliary forces within the meaning of the Army Act, other than the naval coast volunteers and naval volunteers.

The expression “Her Majesty’s Naval Forces” means the Navy, the naval coast volunteers, and the naval volunteers.

Commencement.

5. This Act shall come into operation on the first day of January one thousand eight hundred and ninety-five.

S. HARVEY JAMES,  
*Secretary to the Govt. of India.*

The following orders, issued by the Government of India, in the Home Department, are published for general information.

H. J. S. COTTON,  
*Chief Secy. to the Govt. of Bengal.*

## NOTIFICATIONS.

### ESTABLISHMENT.

*Simla, the 12th October 1894.*

No. 540.—In Home Department Notification No. 496, dated the 21st September 1894, replacing the services of Mr. A. P. Pennell at the disposal of the Government of Bengal, for “29th November next” read “date on which he may be relieved of the charge of the Thongwa District.”

### MEDICAL.

*The 11th October 1894.*

No. 631.—Surgeon-Major F. F. Perry, Professor of Surgery in the Lahore Medical College, at present officiating as Ophthalmic Surgeon and Professor of Ophthalmic Surgery in the Medical College, Calcutta, has obtained furlough on private affairs for six months, with effect from the date on which he may be relieved of his duties.

### ECCLESIASTICAL.

*The 12th October 1894.*

No. 283.—The services of the Reverend J. Taylor, Chaplain of the Church of Scotland on the Bengal Establishment, are replaced at the disposal of the Government of the North-Western Provinces and Oudh, with effect from the 30th October 1894, or the subsequent date on which he may be relieved of his duties as officiating Senior Chaplain of the Church of Scotland, Calcutta.

J. P. HEWITT,  
*Offg. Secy. to the Govt. of India.*

The following orders, issued by the Government of India in the Finance and Commerce Department, are republished for general information.

H. J. S. COTTON,  
*Chief Secy. to the Govt. of Bengal.*

## NOTIFICATIONS.

### ACCOUNTS AND FINANCE.

#### PUBLIC DEBT.

*Simla, the 8th October 1894.*

No. 5080.—[In the following Notification “Notes” means “Promissory Notes of the Government of India,” and includes “Stock Certificates issued in lieu thereof” and “Loan Certificates with coupons attached.”]

Whereas all outstanding Notes of the following Four per cent. Loans are now under notice of discharge and are liable to be discharged on the dates shown against them, that is to say:—

Four per cent. Loan of 1842-43	...	...	November 1st, 1894.
“ “ “ 1st May 1865 (Calcutta portion)	...	...	December “ “
“ “ “ “ (remaining “ )	...	...	} December 31st, 1894.
“ “ “ 1835-36	...	...	
“ “ “ 1854-55	...	...	
“ “ “ Sicca Rupee Loan of 1832-33	...	...	
Reduced four per cent. “ 1879	...	...	...]

It is hereby notified that Proprietors of any such Notes will be allowed the option of tendering them for transfer to the  $3\frac{1}{2}$  per cent. Loan of 1893-94 on the following terms :—

- (1) The new Note will be of the same amount as the old Note, except in the case of Notes of the Sicca Rupee Loan of 1832-33, in which case the excess over an even hundred of rupees will be paid in cash and the new Note will be issued for the balance only.
- (2) The new Note will bear interest from 31st December 1894.
- (3) Except in the case of the Loans of 1879 and 1842-43, interest will be adjusted to 29th June 1894 inclusive, that is to say—

*Loans of 1832-33 and 1865.*—By payment of  $10\frac{1}{2}$  annas per cent. in addition to the payment (if any) due and payable on May 1st, 1894.

*Loan of 1835-36.*—By payment of one rupee per cent. in addition to the payment (if any) due and payable on March 31st, 1894. But if the interest instalment due on September 30th, 1894, has been paid before tender, the tenderer will be required to refund one rupee per cent.

*Loan of 1854-55.*—No payment after that due and payable on June 30th, 1894 will be made.

- (4) In the case of the Loans of 1879 and 1842-43, interest will be allowed up to their respective half-yearly dates—July 15th, 1894, and July 31st, 1894—and no further adjustment will be required.
- (5) In all cases the tenderer will be required to abandon all claim for interest between the above dates, namely, 29th June, 15th July or 31st July (as the case may be) and 31st December 1894.
- (6) Notes may be tendered for transfer at the Public Debt Office, Bank of Bengal, Calcutta, or at any other Bank (including the Bank of England) or Treasury to which they are for the time being enfaced for payment of interest. Notes so tendered must bear the following endorsement duly signed :—  
“Received the amount of this Note by transfer to the  $3\frac{1}{2}$  per cent. loan of 1893-94 under Notification of October 8th, 1894.”
- (7) The Governor-General in Council reserves to himself the right to withdraw this Notification at any time when he deems fit to do so, and he will in any case withdraw it as soon as it is known that the aggregate balance outstanding for discharge is reduced to one crore of rupees.
- (8) The Secretary of State will issue a Notification in London stating the terms on which Notes of the Four per cent. Loans above mentioned will be received for transfer by the Bank of England.

*Simla, the 16th October 1894.*

No. 5204.—Whereas under the Notification of this Department, No. 3257, dated the 30th June 1894, all outstanding Promissory Notes of the Government of India and Stock Certificates of the Four per cent. Loan of 1842-43 are under notice of discharge on the 1st November 1894, it is hereby notified that the said Notes will be received for discharge from and after this day at the Public Debt Office, Bank of Bengal, Calcutta, and will be discharged in full, including interest up to October 31st, inclusive, as soon as they can be examined and passed for payment. Nothing in this Notification affects the terms of the Notification No. 5080, dated the 8th October 1894, whereby proprietors of such Notes and Certificates have the option of tendering them for transfer to the Three and a half per cent. Loan of 1893-94.

By order of the Governor-General in Council,

STEPHEN JACOB,  
*Offg. Secy. to the Govt. of India.*

#### LEAVE AND APPOINTMENTS.

*The 12th October 1894.*

No. 5156-P.—Mr. G. D. Pudumjee, Assistant Accountant-General, Bengal, is granted privilege leave for sixteen days, with effect from 16th October 1894.

#### SEPARATE REVENUE.

##### STAMPS.

##### JUDICIAL, &c.

*Exemptions and reductions under the Act.*

*The 11th October 1894.*

No. 5086-S. R.—In exercise of the power conferred upon him by section 35 of the Court Fees Act (VII of 1870), the Governor-General in Council is pleased to direct that when a record-of-rights is being prepared under Chapter X of the Bengal Tenancy Act, 1885, in pursuance of an order made otherwise than under section 101, clause (d) of the latter Act, and any application is made under section 104, sub-section (2) of that Act for a settlement

of rent, the fee payable on such application shall not exceed the sum of eight annas for each tenant making, or joining or joined in such application.

*No. 5087-S. R.*—In exercise of the power conferred upon him by section 35 of the Court Fees Act (VII of 1870), the Governor-General in Council is pleased to remit the fees other than those referred to in Notification No. 5086S.R., of this date, chargeable on applications or petitions of objection referring to any entry made or proposed to be made in a draft record-of-rights prepared under Chapter X of the Bengal Tenancy Act, 1885: Provided that such applications or petitions (a) are presented before the publication of such draft under section 105, sub-section (1) of the latter Act, and (b) do not relate to any dispute referred to in section 106 of that Act.

STEPHEN JACOB,  
*Offg. Secy. to the Govt. of India.*

---

#### MUNICIPAL AND LOCAL.

##### NOTIFICATION.

*No. 4039L. S.-G.—The 16th October 1894.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is likely to be required to be taken up by Government at the expense of the District Board of Shahabad for a public purpose, viz., for the construction of a Pound building in the village of Nawanagar, pargana Bhojpur, zilla Shahabad, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 cottahs and 5 dhurs of standard measurement is likely to be required. The land is bounded on the North by Police outpost garden; on the East by Nasriganj-Dumraon road No. 2; on the South by the garden of Bandhu Sonar; and on the West by the garden of Goga Sonar.

This declaration is made, under the provisions of section 4 of Act I of 1894, to all whom it may concern.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

Patna Collector's Office, the 12th September 1894.

GOPI KRISHNA LALL, for Collector.

#### Advertisement of sale.

NOTICE is hereby given that the undermentioned plots of canal surplus land no longer required by Government, in the district of Shahabad, will be put to sale at 11 o'clock on the 30th October 1894.

The purchasers of the several plots of land will be subject to the following conditions:—

1. If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.
2. If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount must be immediately deposited; if the balance be not paid by the noon of the 15th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.
3. The plots of land will be sold revenue free to the highest bidders.
4. The purchasers will have to respect the right of the raiyats and collect rent from them in accordance with the rent-roll prepared and filed with the record of the case.
5. The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale—

Consecutive lot number.	Name of district.	Name of pargana and mauza.	Approximate area of lot in bighas.	Land excluded from sale from each lot.	Commencement and termination of lot.	Boundary of lot.

Shahabad Collectorate, Arrah, the 12th September 1894.

C. A. OLDFHAM, Collector.

## Advertisement of Sale.

situated in  
the Muzaffar-

pur Collectorate.

The purchasers of the several plots of land will be subject to the following conditions:—

## Conditions.

1st.—The amount of bid should not be less than the price shown against each lot. The lots will be sold to the highest bidders with or subject to an annual revenue shown against each lot.

2nd.—One-fourth of the amount of bid must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled (the sum deposited being forfeited to Government), and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

3rd.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale:—

Statement of the Affairs of the Bank of Bengal for the week ending 9th October 1894.

LIABILITIES.					ASSETS.				

## Oudh Forest Department.

## BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

FROM this date the prices of sal beams and scantlings supplied from this depot will be as follows:—

BEAMS—21 feet length, at Rs. 2-10 per cubic foot.

22	"	"	2-12	"
23	"	"	2-14	"
24	"	"	3	"

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

SCANTLINGS—From 12 to 20 feet, at Rs. 2-8 per c. ft.

Under 12 and over 7 " 2-4 "

Under 7 feet " "

The above prices are for ordinary building purpose.

For *Planking Sleepers*, &c., special rates will be fixed by agreement.

The Department will still taken orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

*Second and Third Class Timber* will be sold and price fixed by agreement.

*Auction Sales* will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N.-W.P. and Oudh, Oudh Circle.

KANHYA LAL,

Sub-Assistant Conservator of Forests,  
Barhamghat Division.

Barhamghat, the 1st April 1886.

## Pure Sulphate of Quinine.

MANUFACTURED AT THE BENGAL GOVERNMENT  
CINCHONA PLANTATION.

THE price of this quinine is as follows:—

1 pound tin Rs. 16, or, post free, Rs. 16-12.

1 " " " 8, " " " 8-8.

1 " " " 4, " " " 4-8.

Analysis shows this quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanical Garden, Sibpur, near Calcutta. It can be had either white or coloured pink.

## Cinchona Febrifuge.

Cinchona Febrifuge can be purchased by all Government officers and by any one taking six pounds at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates:—per four-ounce tin, Rs. 2, ans. 8; per eight-ounce tin, Rs. 5; per pound tin, Rs. 10. The general public can be supplied by the Superintendent, Botanic Garden, for *Cash only* at the undernoted rates:—per four-ounce tin, Rs. 3; per eight-ounce tin, Rs. 6; per pound tin, Rs. 12. This medicine is also sold by the principal European and native druggists in Calcutta. Postage four annas per 4 oz. tin, eight annas per 8 oz. tin, and twelve annas per pound tin, in addition to the foregoing rates.

G. STOKES, Collector.

## Notice.

NOTICE is hereby given that on or about 2nd July 1894, 20 gold coins, worth Rs. 13-8, were found in the old village site of Brahuranakraka, Kavali taluk, Nellore district, Madras Presidency.

All persons claiming the treasure or any part thereof are required to appear personally or by agent before the undersigned on the 4th April 1895 at Nellore and establish their claims to it.

P. J. POPE,

Assistant Collector, for Collector.

The 6th October 1894.

## No. 31.

SEALED tenders for the supply to the Madras Commissariat of country manufactured soap for one year, from 1st April 1895 to 31st March 1896, will be received by the Commissariat Storekeeper-General at Madras up to 12 noon on the 7th December 1894, and then and there opened in the presence of all parties who may choose to attend. Particulars of the quantities and the stations where required are given in the tender form.

2. No tenders will be received except on forms obtainable from the Commissariat Storekeeper-General at Madras, which, as well as any information required regarding the contract, will be given on application to the Commissariat Storekeeper-General at Madras up to 4 o'clock p.m. on the 6th December 1894. No addition or alteration must be made in the tender forms.

3. Seals of tenderers will not be accepted; they should have their marks verified by witnesses.

4. Covers to be superscribed "Tender for the supply of country manufactured soap."

5. The tenders may be for the requirement of all the stations or of one or any number of them, but the term of contract must be as noted above and the rate an average for the whole period. The Commissary-General shall have the power to accept a tender in whole or in part, or to reject a tender without assigning any cause for so doing; but, in the event of the tender being accepted in part only and the tenderer failing to take up the contract, the whole earnest-money deposited will be confiscated.

6. Each tender must be accompanied with earnest-money in Government promissory notes or Bank of Bengal or Treasury receipt\* for an amount equal to 2 per cent. of the value at the tendered rate of one year's supply of the quantity tendered for, but the earnest-money of any one tender need not exceed Rs. 175. Tenders without earnest-money will not be attended to.

7. Earnest-money will be confiscated if the tenderer withdraws from his tender.

8. A sample of the soap to be supplied can be inspected at any Commissariat Office.

(By order of the Commissary-General, Bangalore.)

B. GOMPERTZ, Lt.-Col., Asst. Comy.-Genl.,  
Commissariat Storekeeper-General.

Commissariat Storekeeper-General's Office, Madras,  
the 24th September 1894.

## No. 32.

SEALED tenders for the supply to the Madras Commissariat of Indian-grown black tea for one year, from 1st April 1895 to 31st March 1896, at the stations and in the quantities noted in the memorandum at foot, will be received by the Commissariat Storekeeper-General at Madras up to 12 noon on the 27th November 1894, and then and there opened in the presence of all parties who may choose to attend.

2. No tenders will be received except on forms obtainable from the Commissariat Storekeeper-General at Madras, which, as well as any information required regarding the contract, will be given on application to the Commissariat Storekeeper-General at Madras, up to 4 o'clock p.m. on the 26th November 1894. No addition or alteration must be made in the tender forms.

3. Seals of tenderers will not be accepted; they should have their marks verified by witnesses.

4. Covers to be superscribed "Tender for the supply of Indian-grown black tea."

5. The tender may be in part, but for not less than 5,000 lbs., or for the whole requirement. Government shall have the power to accept a tender in whole or in part, or to reject a tender without assigning any cause for so doing; but, in the event of the tender being accepted in part only and the tenderer failing to take up the contract, the whole earnest-money deposited will be confiscated.

6. Each tender must be accompanied with earnest-money in Government promissory notes or Bank of Bengal or Treasury receipt\* for an amount equal to 2 per cent. of the value at the tendered rate of the quantity of tea tendered for, but the earnest-money of any one tender need not exceed Rs. 2,000. Tenders without earnest-money will not be attended to.

7. Earnest-money will be confiscated if the tenderer withdraws from his tender.

8. Samples of the tea which each tenderer is prepared to supply should reach the Commissariat Storekeeper-General, Madras, at least one month previous to the opening of tenders, viz., on or before the 27th October 1894.

Memorandum of stations and quantities referred to in paragraph 1.

Stations.	Estimated quantities.	Amount of earnest-money.
<b>SCHEDULE I.</b>		
<i>Clause A.</i>		
(Deliverable at Madras.)	lbs.	Rs.
Madras Commissariat Storekeeper-General.	255,800	2,000
<i>Clause B.</i>		
(Deliverable at the different stations as noted below.)		
Rangoon ...	69,200	600
Wellington ...	20,000	180
Bangalore ...	38,800	840
Bellary ...	10,500	100
Secunderabad ...	69,000	600
Belgaum ...	26,500	250
Madras ...	21,500	190
<i>Clause C.</i>		
(Deliverable at Meerut.)		
Chief Commissariat Officer ...	255,300	2,000

(By order of the Commissary-General.)

B. GOMPERTZ, Lt.-Col., Asst. Comy.-Genl.,

Commissariat Storekeeper-General.

Commissariat Storekeeper-General's Office, Madras, the 24th September 1894.

No. 33.

SEALED tenders for the supply to the Madras Commissariat (Burma and India) of sugar for rations and hospital for one year, from 1st April 1895 to 31st March 1896, will be received by the Commissariat Storekeeper-General at Madras up to 12 noon on the 4th December 1894, and then and there opened in the presence of all parties who may choose to attend. Particulars of the quantities and the stations where required are given in the tender form.

2. No tenders will be received except on forms obtainable from the Commissariat Storekeeper-General at Madras, which, as well as any information required regarding the contract, will be given on application to the Commissariat Storekeeper-General at Madras up to 4 o'clock P.M. on the 3rd December 1894. No addition or alteration must be made in the tender forms.

3. Seals of tenderers will not be accepted; they should have their marks verified by witnesses.

4. Covers to be superscribed "Tender for the supply of sugar for rations and hospital."

5. The tender may be for one or both the descriptions and for supply of all the stations or of one or any number of them, but the term of contract must be as noted above and the rate for each description must be an average for the whole period. The Commissary-General shall have the power to accept a tender in whole or in part, or to reject a tender without assigning any cause for so doing; but, in the event of the tender being accepted in part only and the tenderer failing to take up the contract, the whole earnest-money deposited will be confiscated.

6. Each tender must be accompanied with separate earnest-money for each description of sugar in Government promissory notes or Bank of Bengal or Treasury receipt\* for an amount equal to 2 per cent. of the value at the tendered rate of one year's supply of the quantity of each description of sugar tendered for, but the earnest money of any one description of sugar need not exceed Rs. 2,000. Tenders without earnest-money will not be attended to.

\* The receipt may be for currency notes or cash.

7. Earnest-money will be confiscated if the tenderer withdraws from his tender.

8. Samples of the sugar to be supplied can be inspected at any Commissariat Office.

(By order of the Commissary-General, Bangalore.)

B. GOMPERTZ, Lt.-Col., Asst. Comy.-Genl.,

Commissariat Storekeeper-General.

Commissariat Storekeeper-General's Office, Madras, the 24th September 1894.

## The Standard Balers, Limited.

NOTICE is hereby given that an Extraordinary General Meeting of the above Company will be held at the Registered Office of the Company, No. 1, Clive Row, Calcutta, on Friday, the 26th October 1894, at 4 P.M., when the subjoined Resolution, which was passed at the Extraordinary General Meeting of the Company, held on the 4th day of October 1894, will be submitted for confirmation as a special Resolution.

### Resolution.

That the Company be wound up voluntarily under the provisions of the Companies Act, 1882 and 1887, and that Arthur Samuel Lovelock, Esq., of Messrs. Lovelock and Lewes, Chartered Accountants, be, and he is hereby appointed, Liquidator for the purpose of such winding up.

By order of the Directors,

SINCLAIR, MURRAY & Co., Managing Agents,  
The Standard Balers, Limited.

Calcutta, the 12th October 1894.

(702—1)

## The Indian Law Reports.

*Published under Authority.*

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta, Madras, Bombay, and Allahabad, and comprise four series—one, for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

*Terms of subscription payable annually in advance.*

For the complete series, including postage, Rs. 22-8.

	Without postage.	With postage.
	Rs. A. P.	Rs. A. P.

Remittances to be forwarded to the Accountant and Treasurer Bengal Secretariat, Writers' Buildings, Calcutta.		

All the wanting parts of the **INDIAN LAW REPORTS** (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Superintendent of Government Printing in Bengal, 10, Lyon's Range, Calcutta.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

### Notice.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

## INDIAN LAW REPORTS.

### NOTICE TO SUBSCRIBERS.

SUBSCRIBERS are hereby informed that, unless complaint of non-receipt of any number is made to the Publisher of the series within three months of the date of publication, the benefits of the subscription rates for copies lost in transit will not be allowed, and full rates will be charged. Each of the Madras, Bombay and Allahabad Series ...	1	0 0	1	0 0

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed:

1st.—Bay of Bengal Daily Report, giving meteorological observations taken at 28 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by post in Calcutta soon after 11 A.M. Price to subscribers in Calcutta Rs. 2 per mensem.

2nd.—Bengal Daily Report, containing observations taken at 48 meteorological stations in Bengal and Assam, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 8 A.M. observations of each day is printed in time for the evening mail, and is distributed to subscribers in Calcutta the same evening. This report for the present is only published during the south-west monsoon, i.e., from about May 15th to November 15th, or thereabouts. Price Rs. 2-8 per mensem, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 49 observing stations, and of rainfall recorded at 276 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report, including postage, Rs. 6 per annum, payable, in advance and of the Monthly Summary Rs. 2 per annum payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. PEDLER,  
Meteorological Reporter to the Govt. of Bengal.

### Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Press, except for Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement, notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil courts or offices, and for those forwarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, Office of the Legislative Department, Government of Bengal. Copies are available for purchase at MESSRS. THACKER, SPINK & CO., Government Place, Calcutta.

### RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE PRESIDENCY DIVISION FOR THE YEAR 1893-94.

#### GENERAL DEPARTMENT—MISCELLANEOUS.

*Darjeeling, the 16th October 1894.*

#### RESOLUTION—No. 108T.G.

#### READ—

The Annual General Administration Report of the Presidency Division for the year 1893-94.

Mr. H. C. Williams took charge of the Division after the close of the year, and in preparing the Report was under the disadvantage of writing without personal knowledge of the events of the year. He has compiled a useful but rather lengthy report. In future years it will be desirable to curtail remarks on those departments (such as Registration, Education, Excise, &c.) regarding which a separate departmental report is issued.

2. In only one district, Murshidabad, the Magistrate, Mr. Kennedy, was unchanged throughout the year. The districts of the 24-Parganas, Nadia, and Jessore were, however, governed by their former Magistrates, Messrs. Collier, Bernard, and Fiddian, for all but a small portion of the year, when they were absent on short leave. In Khulna, Mr. Brojendra Nath Dé ended his long tenure of office as Magistrate and went on leave in August, since when two officers

have held temporary charge. All these Magistrates have done well and deserve the commendation of Government. Rai Durgagati Banerjee Bahadur, Collector of Calcutta, is also favourably mentioned.

3. The information given in paragraphs 80, 86 and 87 of the Report regarding the Jessore Loan Company, the Khulna Trading Company, and the 46 small Insurance Companies in the Bâgerhat subdivision is curious and interesting. It appears that these Companies are a new class of ventures for the investment of native capital.

4. The Magistrate of Murshidabad appears from paragraph 123 to have suggested that the system of retaining village watchmen on service tenures should be upheld in Murshidabad, instead of advancing the introduction of paid chaukidars under the Chaukidari Act. This is opposed to the views of Government, which contemplate the gradual substitution of paid men for chakran chaukidars. In connection with chaukidars' pay, it is to be remarked that the reasoning of the Magistrate of Nadia (quoted in paragraph 126) is the result of a misapprehension. The panchayat is bound to pay the salary at the end of every quarter, and fifteen days after the quarter the chaukidars can complain to the Magistrate. But the payment is considered to be in arrear as soon as the quarter is over, and the efforts of Magistrates should be directed to seeing that the quarterly payments are made punctually.

5. The Officiating Commissioner remarks in paragraph 155 on the poor collections in khas mahals, and expresses his agreement with Mr. Westmacott in the view that Deputy Collectors are inclined to neglect revenue work for criminal. On the other hand, the Officiating Commissioner of Burdwan, Mr. Romesh Chunder Dutt, believes the reverse to be the case. Such generalizations are perhaps to be deprecated. What is necessary is that the distribution of work amongst the district staff should be more equal, and that the District Officer should satisfy himself that each officer performs the duty assigned to him.

6. The statistics given in paragraphs 158-59 of the Report regarding the cost and nature of material improvements in the khas mahals are valuable, and the Lieutenant-Governor desires that all Commissioners should give similar information in their annual report, especially with regard to improvements in the water-supply of villages. The smallness of the total amount expended in this way is to be regretted. Only in the 24-Parganas was there any considerable outlay under this head, consisting, as it did, of over three-fourths of the total expenditure in the Division. In the management of Wards' estates, however, there has been a wise liberality, and His Honour has much pleasure in noticing that in the Bhawanipur and Kasimbazar estates upwards of Rs. 19,000 and Rs. 12,000 respectively were spent with discretion and forethought upon works of improvement. The expenditure in the Bhawanipur estate was, however, largely devoted to clearing jungle in the Sundarbans—a useful investment of money, but not directly beneficial to the population already resident on the estate. The management of the Kasimbazar estate have also supported, at a cost of over Rs. 15,000, schools and dispensaries in different localities and a Zanana Hospital at Arnakali. When distress arising out of the floods of last year overtook pargana Sarail of this large estate, the Board of Revenue took a sound and liberal view of the situation; the postponement of rents and the grant of relief have been on a scale worthy of a large zamindar.

7. It is mentioned in paragraph 248 that in the district of the 24-Parganas over 300 miles of bridged and unmetalled roads are in the charge of the Local Boards, and that they are not kept in good condition. It is not usual to put roads of this class under the Local Boards. His Honour would observe that the opinion generally held in the Public Works Department is that metalling of roads should be done in the rains and earthwork in dry weather, and not the opposite, as is stated in paragraph 249. The efforts made by the District Board and the Municipality of Baraset, paragraph 305, to remove obstructions and restore the flow of water in the Soonti river were highly praiseworthy, and His Honour trusts that the other local bodies in the Division will follow this example.

8. The section on Education shows a decrease in the number of schools and of scholars, which is a subject of much regret. It is questionable if any other Division in the Province shows such bad results, but it is explained in paragraph 267 that the falling off in the number of lower primary schools

and their pupils is due to agricultural distress. Throughout the Division the schools were 255 fewer than in 1892-93, and the number of pupils, Muhammadan as well as Hindu, decreased by over 6,000, mostly in primary schools. The expenditure on education was smaller by nearly Rs. 28,000. Except in the case of secondary schools in Khulna, the decrease was apparent in every class of school and in every district.

9. With regard to the remarks in paragraph 340 of Mr. Williams on the absence of information on the sale of stamps and issue of money-orders, the Lieutenant-Governor considers that it is not incumbent on District Officers to visit post and telegraph offices with the object of making such enquiries. But Mr. Williams observes that information might well have been given as to the success which has attended the sale of quinine in post-offices, and that he previously in Bihar found the measure a successful experiment.

10. In paragraph 324 a reference is made to one of the important events of the year—the election in May 1893, by qualified municipalities of the Division, of a member as their representative for the Bengal Legislative Council. The anti-kine-killing movement is said to have spread very slightly to this Division, though the difficulty in Jessore of procuring pound-keepers, referred to in paragraph 349, was probably the effect of this movement, but it was apparently only local. The Commissioner is fortunate in being able to record that, as far as this Division was concerned, the relations of Hindus and Muhammadans were satisfactory and that there was no tension of feeling between them worthy of public notice.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

*Secretary to the Govt. of Bengal.*

ANNUAL GENERAL ADMINISTRATION REPORT OF THE PRESIDENCY  
DIVISION FOR 1893-94.

No. 63J.G., dated Calcutta, the 30th June 1894.

From—H. C. WILLIAMS, Esq., Officiating Commissioner of the Presidency Division,  
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the following report on the General Administration of the Presidency Division for the year 1893-94, with the statistical returns enumerated in annexure B to Government letter No. 544, dated 28th February 1892.

## I.—CHARGE.

2. Mr. E. V. Westmacott held the office of the Commissioner throughout the year under report. I took over charge from him on the 25th April 1894.

3. In the table below are given the names of the Magistrates and Collectors who served in this Division during the past year, the districts of which they were in charge, and the period for which they severally held office:—

DISTRICT.	Name of Officer.	PERIOD OF INCUMBENCY.			
		From—		To—	
24-Parganas	Mr. F. R. S. Collier	1st April	1893	26th August	1893.
	, J. H. Temple	27th August	"	26th September	"
	, F. R. S. Collier	27th September	"	31st March	1894.
Nadia ...	, J. H. Bernard	1st April	"	4th "	"
	, E. W. Collin	5th March	1894	31st "	"
Murshidabad	, J. Kennedy	1st April	1893	31st "	"
	, W. Fiddian	1st "	"	29th May	1893.
Jessore ...	, F. S. Hamilton	30th May	"	1st December	"
	, W. Fiddian	2nd December	"	31st March	1894.
	, C. Fisher	1st April	"	4th April	1893.
Khulna	, Brojendranath Dé	5th "	"	8th "	"
	, C. Fisher	9th "	"	4th May	"
	, Brojendranath Dé	5th "	"	16th August	"
	, C. H. Bompas	17th August	"	27th November	"
	, H. F. T. Maguire	28th November	"	31st March	1894.

4. From the above it will be seen that in no district, except Murshidabad, did one officer remain in charge throughout the year. Mr. Collier was away on short leave for one month, from the 27th August to 26th September 1893, and Mr. Temple acted for him. In Nadia Mr. Bernard went away on furlough on the 4th March 1894, and Mr. Collin took charge of the district. In Jessore Mr. Hamilton acted for Mr. Fiddian when he was away on furlough from the 30th May to 1st December 1893. The changes were very frequent in Khulna. Mr. Fisher was in charge of the district when Mr. Brojendranath Dé was on short leave in the beginning of the year, but he was suddenly called back to Khulna to be present during an enquiry made by Mr. Westmacott into the forgeries committed in the Collectorate there, from the 5th to 8th April 1893. Mr. Fisher held charge of the district from 9th April to 4th May 1893, when Mr. Brojendranath Dé resumed charge. He continued in office till 16th August 1893, when he went away on furlough, and was succeeded by Mr. C. H. Bompas. This gentleman held office until the 27th of November last, when Mr. H. F. T. Maguire relieved him, and he retained charge till the close of the year. However undesirable for administrative purposes these changes may be, they were apparently unavoidable.

5. The statement below shows the names of the officers and the period for which each held charge of the several subdivisions of the districts of this Division during the year:—

District.	Subdivision.	Name of Officer.	PERIOD OF INCUMBENCY.	
			From—	To—
1	2	3	4	5
24-Paraganas.	Barasat ...	Babu Mohesh Chunder Sen ...	1st April 1893	5th July 1893.
		" Bejoy Krishna Bose ...	6th July "	5th September "
		" Mohesh Chunder Sen ...	6th September "	22nd January 1894.
		" Bejoy Krishna Bose ...	23rd January 1894	29th March "
	Basirhat ...	" Chandi Das Ghosh ...	30th March "	31st "
		Maulvi Mahomed Abdulla	1st April 1893	31st "
		Babu Gopal Chunder Mukerjee	1st "	26th June 1893.
		" Radhakant Banerjee ...	27th June "	6th September "
	Diamond Harbour.	" Gopal Chunder Mukerjee	7th September "	22nd March 1894
		" Khagendranath Mitter ...	23rd March 1894	31st "
Nadia ...	Kushtia ...	" Rajaninath Chatterjee ...	1st April 1893	19th April 1893.
		" Purna Chundra Mitra ...	20th "	31st March 1894.
	Meherpur ...	" Mukunda Deb Mukerjee	1st "	19th July 1893.
		Mr. W. N. Delevingne	20th July "	31st March 1894.
Murshidabad.	Ranaghat ...	Babu Nobin Chunder Sen	1st April "	31st "
	Jangipur ...	" Nobokumar Chackerbutty	1st "	31st "
	Kandi ...	" Pran Kumar Ghose ...	1st "	31st "
	Narail ...	" Amirta Lal Mukerjee ...	1st "	31st "
Jessore	Magura ...	" Bopin Behari Mukerjee...	1st "	12th May 1893.
		Mr. C. Fisher	13th May "	13th September "
	Jhenidah ...	Babu Radhakant Banerjee ...	14th September "	31st March 1894.
		Mr. E. M. Konstam	1st April "	1st July 1893.
Khulna	Bangaon ...	" W. Maxwell	2nd July "	31st March 1894.
		Babu Monmotho Kumar Bose...	1st April "	18th July 1893.
	Satkhira ...	Mr. A. K. Ray	19th July "	31st March 1894.
		Babu Suresh Chunder Chatterjee	1st April "	18th "
Bagerhat ...		" Gati Krishna Neogy ...	14th March 1894	31st "
		" Kumudnath Mukerjee ...	1st April 1893	31st "

It will be seen that of the fourteen subdivisions in the districts of this Division there was no change in six, and none in either of the subdivisions of Murshidabad. In the other subdivisions there were permanent changes. In Barasat they were particularly numerous.

II.—TOURS AND INSPECTION OF OFFICES.

6. Mr. Westmacott spent 94 days on tour away from head-quarters. This period was distributed over nearly the whole year, as will appear from the following abstract:—

(a) Tour of Commissioner.

MONTH.	24-Paraganas.	Nadia.	Murshidabad.	Jessore.	Khulna.	Total.
1	2	3	4	5	6	7
1893.						
April ...	2	4	2	...	4	
May ...	1	5	...	...	...	
June ...	1	...	...	...	...	
July ...	1	...	...	...	7	
August ...	3	...	...	...	2	
November ...	4	...	...	...	...	
December ...	3	...	...	...	...	
1894.						
January ...	...	...	11	...	9	
February ...	...	16	6	...	...	
March ...	...	4	...	19	...	
Total ...	15	29	19	19	22	104

Of the total of 104 thus shown, ten days were spent partly in one and partly in another district. He could not go out in September and October owing to illness.

7. Of the 14 subdivisions Mr. Westmacott inspected 12 during the year, those in the district of Murshidabad having been inspected by him in the latter part of March 1893.

8. Of the 37 municipalities in the districts of this Division Mr. Westmacott inspected the following on the dates mentioned against their names:—

DISTRICT.	Name of Municipality.	Date of visit.
1	2	3
24-Parganas ...	Govardanga ...	21st April 1893.
	Baranagar ...	26th " "
	Barasat ...	13th May "
	Manicktolla ...	29th " "
	Basirhat ...	31st July "
	Taki ...	31st " "
	Naihati ...	15th Aug. "
Nadia ...	Ranaghat ...	20th May 1893 and 15th Feb. 1894.
	Krishnagar ...	22nd " "
	Nadia ...	8th Feb. 1894.
	Kushtia ...	10th " "
	Kumarkhali ...	11th " "
	Santipur ...	13th " "
	Birnagar ...	14th " "
Murshidabad ...	Meherpur ...	1st April 1893.
	Lalbagh ...	9th March 1894.
Jessore ...	Jessore ...	11th Jan. 1894 and 5th April 1893.
Khulna ...	Khulna ...	7th April 1893.
	Debhatta ...	30th July "
	Satkhira ...	1st Aug. "

When visiting them, he generally discussed with their Chairmen and Vice-Chairmen budget estimates and drainage schemes and other matters, and inspected some of the municipal trenching grounds.

9. While at Khulna in April 1893, the subject of the forgeries in the Collectorate there, which were reported to Government in this Office No. 28J.J., dated 11th April 1893, received his attention.

10. Besides the subdivisional offices mentioned above, Mr. Westmacott inspected all the Magistrates' and Collectors' offices in all their branches, treasuries, sub-treasuries, Registration offices, offices of the District and Local Boards, dispensaries at district or subdivisional head-quarters, jails, subsidiary jails and lunatic asylum. He paid special attention to the working of the court sub-inspectors' offices, the working of Benches, the attendance of Honorary Magistrates and the frequency of remands. Settlement operations also received a due share of his attention. The practice of employing amins on monthly pay was stopped and orders issued to employ them by the job as more likely to expedite matters. He also inspected the offices of the managers of wards' estates, some of the ganja and opium shops which were on his route, liquor depôts and distilleries. He also visited slaughter-houses, markets and some schools. While at Murshidabad in March last, he paid a visit to the punitive police outpost stationed at Shamnagar, where the villagers murdered three men of Mr. Hills, of Patkabari, but escaped punishment. He inspected some of the old cemeteries, especially one at Barasat, which he visited in company with Mr. Collier and the Ven'ble Archdeacon of Calcutta. He also visited some of

the Government estates and inspected the offices of the Collector of Calcutta, and made a partial inspection of the office of the Collector of Income-tax at the same place.

11. The orders of Government in respect of touring have been fully complied with by all the District Officers, except the

(b) Tours of Collectors.

Collectors of the 24-Parganas and Jessore. In the 24-Parganas the Collector and the Joint-Magistrate spent between them 89 days on tour, or one day less than the period prescribed by the rules. In Jessore the tour of the District Officers fell short by two days.

12. Mr. Collier, the Collector of the 24-Parganas, was out for 49 days and the Joint-Magistrate for 40 days. Their tour was distributed over all the months of the year, except May, September, and October. Mr. Collier says that his appointment as a member of the Select Committee on the Bill to amend the Bengal Municipal Act rendered it impossible for him to spend any more days on tour. All the subdivisional offices and treasuries were inspected twice during the year. Some of the sub-registry offices, most of the thanas and nearly all the municipal offices and dispensaries were visited. Mr. Collier also looked into the state of roads and communications and matters connected with the principal Government estates, inspected schools, enquired into the state of public feeling and public health, saw the state of crops and had interviews with the people of all classes. He, moreover, visited the Naihati cooly depôt and the jute mills at Shamnagar, Budge-Budge, and Baranagar.

13. The tour of the Collectors of Nadia extended over a period of 120 days, and was distributed over all months of the year, except February. Mr. Bernard was on tour for 112 days, and Mr. Collin, who took charge on the 5th March 1894, for eight days. Mr. Bernard visited all the subdivisional offices and sub-treasuries, thanas, sub-registry offices, municipalities and dispensaries. He looked into the state of roads and communications, the Government estates in Mehorpur and Kushtia subdivisions, inspected schools and pounds in many places, enquired into the state of public feeling and public health, saw the state of crops in different parts of the district and had interviews with the people of all classes. In October he visited Birnagar, Ranaghat, and Chakdaha Municipalities, accompanied by the Deputy Sanitary Commissioner of Bengal, and minutely examined the sanitary arrangements of these municipalities. Mr. Collin visited Ranaghat and Santipur and made an inspection of all the public offices at these places.

14. In Murshidabad Mr. Kennedy spent 120 days on tour. He inspected all the khas mahals and the principal villages in the district, and also the subdivisional offices, treasuries and sub-registry offices.

15. The District Officers of Jessore spent 118 days on tour, or two days less than the time prescribed by Government. Of these, Mr. Hamilton was out for 50 days and Mr. Fiddian for 68 days. Mr. Fiddian says that he could have made up the deficiency of two days in the total touring for the year had he not been laid up for some time by an accident, and also detained at headquarters for Mr. Westmacott's inspection. Mr. Hamilton was chiefly occupied with the inspection of subdivisional offices. He inspected some thanas, registry offices, and the Kotechandpur Municipal office, and made an enquiry about hemp drugs. Mr. Fiddian also inspected the subdivisional offices, police-stations, registration offices, schools, and other institutions and visited most parts of the district, except the Jhenidah subdivision, which was visited by Mr. Hamilton, and part of the Bangaon subdivision. Attention was given to the realisation of the arrears of chaukidars' pay, and for this purpose, whenever practicable, a notice was issued to all defaulting panchayats to meet him at the thana and pay up the arrears. The effect of this was to ensure in the majority of cases that the panchayats paid up the arrears on or before the date fixed. A marked improvement in the payment of chaukidars' salaries is said to have taken place, default for more than one quarter being quite exceptional, and in some police areas all have been paid up to date. Attention was also given to the registration of births and deaths. Registration of births has, as a rule, doubled in the year 1893 compared with 1892. Many enquiries were also made as to trade and commerce, the lines which traffic take, and the commodities dealt in. The result of prosecutions under section 110, Criminal Procedure Code, was found to have been beneficial as shown by a great decrease in burglaries, thefts, and dacoities.

16. The District Officers of Khulna spent 91 days on tour, or one day in excess of the period prescribed for this district. Of these, Mr. Fisher was out for 1 day, Mr. Brojendranath Dé for 8 days, Mr. Bompas for 17, and Mr. Maguire for 65 days. Mr. Fisher visited Bagerhat only. Messrs. Dé and Bompas each visited Bagerhat and Satkhira and made partial inspections. Mr. Bompas also inspected the thanas and outposts which lie in the way to these places. Mr. Maguire went round the whole district, stopping for nearly a week at the subdivisional head-quarters and for two or three days at each of the outlying thanas and making the usual inspections of khas tahsil offices, sub-registry offices, roads, schools and pounds. He attended several chaukidari parades and enquired about the state of the people generally. He also made enquiries about income-tax cases and outstills. His touring was not marked by any important occurrence.

(c) Tours of Subdivisional Officers.

17. The following table shows the time spent on tour by the Subdivisional Officers:—

DISTRICT.	Name of Officer.	Number of days.
1	2	3
24-Parganas ...	Subdivisional Officer of Barasat ...	111
	Ditto of Basirhat ...	97
	Ditto of Diamond Harbour.	91
Nadia ...	Ditto of Kushtia ...	106
	Ditto of Meherpur ...	107
	Ditto of Ranaghat ...	137
Murshidabad ...	Ditto of Jangipur ...	115
	Ditto of Kandi ...	100
Jessore ..	Ditto of Jheuidah ...	125
	Ditto of Magura ...	109
	Ditto of Narail ...	122
	Ditto of Bangaon ...	94
Khulna ...	Ditto of Satkhira ...	101
	Ditto of Bagerhat ...	102

It will be seen that all the Subdivisional Officers without a single exception more than fully complied with the orders of Government in respect of tours. Almost all of them appear to have visited all parts of their respective subdivisions. The tours of the Subdivisional Officers of the 24-Parganas, Jessore, and Khulna were generally well planned and useful. Amongst other things, they made enquiries about the state of the crops and the supply of food-grains, the health of the people, the condition of the roads and other communications, the relations between landlord and tenant, income-tax assessments and the working of the Chaukidari Act. They also inspected police-stations, outposts, sub-registry offices, schools and pathsalas, excise shops, pounds and khas mahals. While in the interior they also enquired into criminal and revenue cases. Mr. A. K. Ray, the Subdivisional Officer of Bangaon, is said to have submitted interesting diaries. The Subdivisional Officers of Nadia and Murshidabad are reported to have given due attention to all the usual subjects of enquiry and inspection. The Subdivisional Officer of Bagerhat in Khulna visited the greater part of his subdivision. I think every Subdivisional Officer should thoroughly visit every part of his subdivision in the course of the year.

18. With reference to paragraph 10 of Government Circular No. 4J.D., dated the 14th October 1891, I may mention that in the 24-Parganas the Subdivisional Officers of Barasat and Diamond Harbour have each a horse and the Subdivisional Officer of Basirhat a boat. In Nadia and Murshidabad the Subdivisional Officers and others who have to camp out keep horses. In Jessore the Subdivisional Officer of Jhenidah keeps horses, and the Subdivisional Officers of Magura and Narail have each a boat. In Bangaon Babu Manmatha Kumar Bose had a horse, but Mr. A. K. Ray, the present Subdivisional Officer, has none. He travelled by *ticca* boats and hired horses as occasion required. In Khulna the Subdivisional Officers have each a boat.

19. The district offices and treasuries in all the districts of the Division were inspected by my predecessor, Mr. Westmacott. Such irregularities as he found were pointed out in his inspection notes, and have since been remedied.

(d) Inspection of District Offices and Treasuries by—

(1) Commissioner.

All the District Officers inspected their offices and treasuries twice during the year. Their inspections did not disclose any serious irregularities in any department, except in

(2) Collectors.

Murshidabad. The chief defects noticed by the Collector of Murshidabad were in the Road Cess Department. The defects have, however, since been remedied.

20. Mr. Westmacott inspected all the subdivisional offices and treasuries during the year, except those in Murshidabad, which he had inspected in the latter part of March 1893. No serious irregularities were found.

(e) Inspection of Subdivisional Offices and Treasuries by—

(1) Commissioner.

All the subdivisional offices and treasuries were inspected twice during the year by the Collectors, the Barasat subdivisional office having been inspected once more by the Joint-

(2) Collectors.

Magistrate of the 24-Parganas. The results of these inspections were generally satisfactory.

### III.—WEATHER AND CROPS.

21. Statements Nos. I and II annexed to this report show the average rainfall and outturn of crops in each of the districts of this Division during the past three years. The average rainfall in the year under report was greater in all the districts compared with that in 1891-92 and 1892-93. The largest rainfall during the year was at Canning Town in the 24-Parganas, being 94.16 inches, and the smallest at Kandi in Murshidabad, where it was only 52.68 inches. The outturn of *aman* or winter crop in the 24-Parganas, Murshidabad, and Khulna was greater than that of the previous year, but the *bhadoi* or early rice and jute crop fell off in all the districts. Other crops are not grown in all the districts, and are not of much importance.

22. In the 24-Parganas the average rainfall in the year under report was greater than that of the previous year in all the subdivisions, except Diamond Harbour, where it was 66.58 against 88.24 in the preceding year. In June and July there were heavy rains, which submerged all the low lands in the southern part of the district. The result was that the transplantation of *aman* crop in the low lands was greatly impeded, and *rus* and jute standing on such lands were destroyed. This accounts for the average outturn of the *bhadoi* and jute crops being considerably less than that of the previous year. The *aman* crop on high lands, however, grew well, and its outturn was not below the average. The *rabi* and oilseed crops yielded a less outturn than in the preceding year, as the want of rain after sowing in October prevented the plants from thriving well.

23. In Nadia the average rainfall in the year under report was greater than that of the preceding two years in all subdivisions; but the uneven distribution during the year materially affected the cultivation and the outturn of different kinds of crops. During May and June, when the sowing and weeding operations of *bhadoi* paddy and other *bhadoi* crops were in progress, the weather was very unfavourable. The rainfall during those months being exceedingly heavy, the growth of the young crops was checked, while in some

Parts of the Kushtia and Meherpur subdivisions the crops on low lands suffered from accumulation of water. The rainfall from July to September was also abnormal, while the utter cessation of rains from October to March injuriously affected the *rabi* crops all over the district. On the whole, the outturn of all the important crops except wheat was less than that of the preceding year.

24. In Murshidabad the rainfall of the year was unusually heavy throughout the district. In the Sadar subdivision the rain, which fell in April, May, and the first-half of June, was favourable to all the crops generally, but the heavy downpour which commenced thereafter caused considerable damage to the paddy of low lands, indigo, mulberry, and sugarcane. In the Sadar 23·13 inches fell in June against 10·38 in the preceding year. The rains of August, September, and October did good to the standing crops. There was no rain from November to the middle of January, and the winter crops began to fall off. The little rain which fell in February and March improved the condition of mulberry and indigo. In the Sadar subdivision an average outturn of all crops, except winter crops, was obtained. In the Jangipur subdivision the low tract called *Bagri* reaped a splendid *bhadoi* crop, but the expectation of reaping a bumper crop of *aman*, which is the principal crop in the neighbouring tract (*Barh*), was not fully realised owing to incessant rains. A sixteen-anna crop was, however, obtained. The early growth of indigo was very promising, but constant rain spoiled the colour and reduced the ultimate outturn to 8 annas. The early-sown *kalai* was grazed down by cattle, as it produced no pods, while that late sown yielded a 6-anna crop. The total absence of winter rain caused the *rabi* outturn to be very limited, and in the case of wheat, insects damaged the roots. In the Kandi subdivision the total rainfall of the year under report was very little over that of the previous year. *Aman*, pulses and oilseeds were the only crops of which the outturn was better; that of all other crops was worse. This is ascribed to the untimely rainfall.

25. In Jessore the rainfall was abnormally high in May and June. The heavy fall of May interfered with the sowing of *aus* and *aman* and caused a large area to remain unsown, while that of June submerged the young *aus*, *aman*, and jute plants grown on low lands, and caused great injury to these crops as also to indigo. Incessant rains also greatly impeded the weeding operations, which are essential to *aus*, *aman*, and jute. Again, the absence of rain from the middle of November till the latter part of February much affected the *rabi* crops. Owing to these causes the outturn of the several crops of the year fell below the average. *Aus* or early rice crop yielded a 10-anna outturn against 18 annas in the previous year, while the outturn of *aman* fell below the average. *Aus* suffered more in Jhenidah and Narail subdivisions, while the outturn of *aman* was larger in the Narail and Bangaon subdivisions. Pulses, jute, indigo, and tobacco yielded a 9, 7, 4, and 12-anna outturn against 11, 16, 10 and 14 annas in the previous year.

26. In Khulna the average rainfall in the year under report was more than in either of the two previous years in all places of record, though in Lakhipur in the Satkhira subdivision it was almost the same as in the previous year. The highest rainfall during the year was at Rampal, viz., 93·81 inches. On account of heavy rainfall the low tracts in thanas Bagerhat and Mollahat, where *aman* and *boro* paddy are cultivated to a large extent, were entirely submerged, and those crops, as well as jute and sesamum, which also are largely grown in thana Mollahat, were almost totally lost. The outturn of *aus* was everywhere below the average, while that of *aman* exceeded the average in the Sadar, and was but little below it in the subdivisions. As a matter of fact, the winter rice crop varied a good deal in the different parts of the district. The heavy rains swamped the low lands, but spread abundant moisture over those occupying a higher position, and hence the rice on the higher lands did very well, while that on the lower levels was mostly lost. At the same time, the rice in the Sundarbans, which generally suffers from inundation by salt water, was saved by the heavy rain, and was nearly everywhere a bumper crop. The average outturn is therefore a mean between very good crops and rather bad ones.

## IV.—PUBLIC HEALTH.

27. The following table compares the recorded mortality in the districts of this Division during the past three years:—

DISTRICT.	Number of deaths from fever.			Number of deaths from cholera.			Number of deaths from other causes.			Total number of deaths from all causes.			Average of the year 1891 and 1892.
	1893.	1892.	1891.	1893.	1892.	1891.	1893.	1892.	1891.	1893.	1892.	1891.	
	10	11	12	13	14	15	16	17	18	19	20	21	
24-Parganas	31,684	33,164	28,185	1,561	8,742	7,082	7,654	6,152	6,518	41,101	48,058	44,785	46,921
Nadia	47,674	42,491	51,018	4,231	10,628	14,501	8,936	5,403	5,973	60,941	58,686	71,582	65,134
Murshidabad	39,572	31,825	31,705	4,390	4,617	4,362	5,545	4,237	4,542	44,627	40,678	40,599	40,639
Jessore	65,725	64,556	65,980	3,834	11,286	6,420	6,380	3,846	4,420	75,739	75,707	76,820	76,364
Khulna	26,148	28,544	24,247	1,270	3,961	2,824	6,705	4,777	3,642	32,123	37,286	30,713	33,999
Total	206,023	200,544	205,165	15,176	39,196	36,230	35,222	21,635	25,065	256,481	261,415	265,409	264,967
Ratio of death per mille of the population.	26.2	25.5	26.1	1.9	4.9	4.3	4.3	2.1	2.1	32.6	33.5	33.6	33.6

It will be seen that the figures for 1891-92 for the districts of the 24-Parganas and Khulna, as given in the reports for those years, differ considerably from those now furnished by the District Officers and reproduced in the present report. The discrepancies are apparently due to figures for those districts being furnished for calendar years instead of official years. Nevertheless, owing to defective registration, I cannot accept the statistics given in the above statement even as approximately correct, or base any argument upon them. As they stand, they show that the general health in the Division was slightly better than in the two preceding years. Taking the districts separately, the year was most unhealthy in Murshidabad and healthy in the 24-Parganas and Jessore compared with either of the two preceding years. In Nadia the year contrasted unfavourably with 1892, but favourably with 1891. In Khulna the year contrasted favourably with 1892, but unfavourably with 1891.

28. In the 24-Parganas the number of deaths from fever was less by 3.8 per cent., and from cholera by 82.1 per cent., while there was an increase of 21.4 per cent. in regard to deaths from other causes. The Magistrate thinks that deaths from fever were much under-registered during the year. He remarks that it is evident that the exceptional rainfall of the year (which extended from January to November) was attended in most parts of the district with an unusual increase of malarious fever which prevailed throughout the year; that the suburbs of Calcutta, notwithstanding their improved sanitary arrangements, had a large increase of fever; that at Kalighat, Alipore, and Chetla, in the Sadar subdivision, there were widespread outbreaks of malarious fever, and that there was an exceptionally great increase in the attendance at most of the dispensaries in the district, and the mortality too was heavy. Cholera of a sporadic form occurred throughout the district all the year round. The cases of small-pox during the year were fewer, the number of deaths from it being 116 against 375 in the preceding year. The total number of persons vaccinated during the year was 41,102, of which 138 cases were unsuccessful.

29. In Nadia the increase in the death-rate during the year was chiefly due to the greater prevalence of malarious fevers. The urban areas suffered as usual somewhat less than the rural areas, the ratio of death per mille of population being 33.41 against 37.34. Of the urban areas, the Meherpur town suffered the most, having a death-rate of 45.19 per mille of the population against 24.05 in 1892. The death-rates in the Kushtia and Kumarkhali towns were also much greater than in the previous year, the number of deaths being 103 from cholera during the year against 3 in 1892 in the former, and from fever 206 against 145 in the latter. Of the rural areas, Hanskhali, in the Sadar subdivision, furnished the highest death-rate, being 52.22 per mille against 36.51 in 1892, and thana Gangin, the lowest being 25.71 per mille against 35.33 in 1892. The greatest number of deaths occurred in the month of December (11,917), and the lowest number in March (2,280). The months of October, November, and December were, as is generally the case, the

unhealthiest in the year, and the number of deaths during these three months was more than one-half of the total number of deaths recorded during the year. Malarious fever of a virulent type prevailed throughout the whole district during the last three months of the year. The number of deaths from this cause was 47,674 against 42,491 in 1892, and the death-rate 29 per mille of the population against 25·84. Of this 25,590 deaths occurred during the months of October to December, and the remaining 22,084 deaths between the months of January and September, so that more than half the total number of deaths occurred during the last three months of the year. Cholera is shown as causing 4,331 deaths against 10,592 in 1892. The Kushtia subdivision had the highest death-rate, viz. 5·42, and the Ranaghat subdivision the lowest, viz. 0·37. Cholera generally becomes prevalent in many parts of the district during the months of March, April, and May, but in the year under report the number of deaths during these months was 39 only. It was prevalent during October, November, and December, and during that period it caused 4,181 deaths. The total number of deaths from small-pox was 26 against 1 in 1892. The deaths occurred from January to August. Dysentery and diarrhoea account for 267 deaths against 194 in 1892. Men suffered more than women, in the proportion of 9 to 5. The total number of deaths from injuries was 870 against 925 in 1892. They were chiefly caused by suicide and snake-bite. Suicides were more common among females than among males and in rural areas than in urban. Deaths from other causes were 7,773 against 4,483 in 1892. There were two deaths out of 136 admitted into the Krishnagar jail hospital.

30. In Murshidabad the total number of deaths returned was 48,527, or 38·79 per mille of the population—a number considerably in excess of the average of the past six years, and also in excess of any one year in that period. The total number of deaths reported from fever was 38,592, or 30·85 per mille of the population, against 31,825, or 25·46 per mille in 1892. This is by far the highest mortality recorded in the district. Although improved registration has no doubt much to say in accounting for this large increase, yet it cannot be denied that the year was exceptionally unhealthy in regard to malarious fever. The mortality from this was as usual especially heavy from October to April, and is attributed to the water-logged condition of the greater part of the district, the impure water-supply, the miserable physical condition of the majority of the population, their insufficient housing and clothing in the cold season, and the general absence of any healthy sanitary condition of any kind. The highest mortality from fever was in November, when 6,195 deaths were reported, and the lowest in June, when 1,890 deaths were reported. Thanas Assanpore and Manullabazar were most affected and thana Nowada the least. This district did not enjoy the comparative immunity from cholera like other districts, as this disease caused 4,390 deaths, or 3·5 per mille of the population against 4,617, or 3·67 per mille in 1892. It was present throughout the year in a sporadic form, but the mortality was small from January to August, while it broke out from September to December in an epidemical form, causing 4,295 deaths. The areas most affected were Burwa and Gorabazar thanas. As a rule there are two periods for the prevalence of cholera in this district—from March to May and from September to December. The year under report was marked by a total absence of epidemic cholera during the first portion of the year and by an unusual prevalence during the last portion. There were 6 deaths from small-pox against 24 in 1892. Four of these are reported from thana Bharatpore.

31. Judging by the mortuary statistics in Jessore, the year was healthier than its two immediate predecessors, but the Magistrate says that it was in reality more unhealthy. This, he says, is borne out by the fact that the total number of in-door and out-door patients treated at the charitable dispensaries amounted to 28,557 during the year against 18,812 in 1892 and 21,384 in 1891. So far as can be ascertained, heavy rainfall was the cause of the unhealthiness. Fever prevailed over the whole district all the year round, being worse during the months of September, October, and November, and reaching its highest in December with 12,577 deaths. The smallest number of deaths from this cause occurred in April, when only 2,998 deaths were registered. Out of the 63,725 deaths from fever, 31,345, or 49·2 per cent., were

reported in the last quarter of the year alone; 19,604 deaths, or 32·9 per mille of the population, occurred in the Sadar; 13,681 or 41·4 in Bangaon; 11,793 or 37·8 in Jhenidah; 10,182 or 33·5 in Magura; and 8,465 or 24·0 in the Narail subdivision. The ratio of deaths from fever was highest in the Bangaon subdivision and lowest in Narail. The total number of deaths from cholera was 3,624 compared with 11,286 in 1892, 6,420 in 1891 and 6,298, the average of the five years from 1888 to 1892. Thus in respect of this disease the year compares very favourably with its predecessors. The disease was present in every month of the year, but it was most prevalent in November and December, when 1,168 and 1,133 persons respectively were carried off by it. The total number of deaths from dysentery and diarrhoea was 112 against 114 in 1892. Deaths from small-pox numbered 2 against 1 in the preceding year. During the year vaccination was performed in 45,186 cases, of which the result was successful in 44,851, in 303 it was unsuccessful, and in 32 the result was unknown.

32. In Khulna the general health, as deduced from the mortuary returns for fever and cholera, has been fair and decidedly better than that of the immediately preceding two years, but there has been a considerable increase in the number of deaths from other causes. The number of deaths from fever was 24,148, or 20·05 per mille of the population, against 28,541, or 24·84 per mille in 1892, and 24,247, or 22·75 per mille in 1891. Cholera is shown as causing 1,270 deaths against 3,961 in 1892 and 2,824 in 1891. Deaths from this disease during the year are the smallest on record since the creation of the district. Deaths from small-pox were 2 against 8 in 1892; from bowel-complaints 99 against 105; from injuries 538 against 437; and from other causes 6,066 against 4,227.

#### V.—MATERIAL CONDITION OF THE PEOPLE.

33. As in the previous year, there was no improvement in the condition of the people during the year under report. From reading the various district reports it would seem rather to have deteriorated. The high price of food-grains, which prevailed during the last four years, pressed hardly on the landless classes and all persons with small fixed incomes. The agricultural classes did not feel the pinch so much, as they had the benefit of better prices for such crops as they harvested. The case was, however, different with the labouring classes who had scarcely any increase in their wages. The condition of the poorer middle or so-called *bhadra-luk* classes with limited incomes was bad, and in the present day it is naturally bound to become worse, as long as their false notions of respectability prevent them from taking to many remunerative callings and also from learning to help themselves. They spend more than they can afford on marriages and other social ceremonies, and to meet these charges, generally have recourse to the money-lender, with the inevitable result that they ultimately lose such rent-free lands as they happened to possess. This is evident from the large increase in the number of sales of immovable property, mortgage-deeds and bonds for money registered during the year in all the districts of this Division, except the 24-Parganas, where the majority of the people are purely agriculturists. The so-called poverty of the people is, however, of course only comparative, at least judging by what I have seen in the short tour I have taken in this Division compared with the state of affairs in North Bihar.

34. The southern part of the 24-Parganas, which consists of low lands, suffered considerably during the year from the effect of floods caused by excessive rains, especially in June and July. There was a total or partial failure of crops in some parts of the Diamond Harbour subdivision from the same cause. The distress was greatest in villages Moheswara, Protapbaria, and Hariharpur, in Government estate Kamarpole, and in thana Bankipur, where a sum of Rs. 4,000 was advanced to the raiyats under the Agriculturists Loans Act for the cultivation of the *boro* paddy and for enabling them to tide over temporary difficulties. Most of the raiyats of the Government estate Bil-Bulle also suffered from poor crops owing to heavy rains submerging their lands.

35. In Murshidabad the continued high price of articles of food, caused partly by successive bad crops of previous years, materially reduced the condition

of the people, especially of the middle class who mostly earn their livelihood by service. The labouring classes get sufficient employment and would earn more if they were not so accustomed to subsist partly on doles given by a good many of the zamindars. The actual cultivators are steadily improving in condition owing to the continued high prices of their produce.

36. In Jessore none of the important crops did well owing to an unfavourable distribution of the rainfall, as the early and heavy rains prevented the sowing of paddy in many places, and the want of rain later on in the season crippled the cold-weather crops. As the crops of previous seasons were also inadequate in many parts of the district, there has for some time been a tendency towards straitened circumstances. The one article of produce which gives some stability to the condition of the people in this district is *gur* made from the juice of the toddy palm, and the sugar which is manufactured therefrom. The outturn of these commodities was good during the past season. In the centre, south and part of the west of the district, the *gur* industry is regarded as the most important business. An average householder may possess 150 to 200 toddy trees, and throughout the cold weather he is seen busily engaged in all the processes, from tapping the trees to selling the *gur* or manufacturing sugar out of it. The high prices of food-grains have been most felt by the landless classes, and to a less extent by the poorer classes of agriculturists, who, after meeting the claims of their landlords and other creditors, had only a small stock of grain left for home consumption. Owing to bad harvests the landlords have had special difficulty in collecting their rents during the year.

37. In Khulna the state of the people depends mainly on their crops. Last year the winter rice, which is the chief staple food, was not a good crop, and in the early part of the year there was some distress on this account. In some parts of the Bägerhat subdivision, specially in thana Mollahat, which is chiefly dependent on the *boro* rice crop, matters were not improved by the general failure of crops. But the winter rice generally has been excellent, and the high prices which have ruled must have tended still further to improve the condition of the people. These remarks apply chiefly to the cultivating classes. The middle classes who do not work at agriculture have suffered from the high prices and the overstocked state of the labour market.

#### VI.—EMIGRATION AND IMMIGRATION.

38. *24-Parganas*.—As remarked in previous years, there is generally little or no emigration from the districts of this Division. During the year under review the total number of persons registered under the provisions of Act XXI of 1883 and Act I of 1882 for the colonies and the labour districts of Assam, Cachar, and Sylhet, was 1,987 and 3,229 respectively as compared with 1,285 and 4,288 in the previous year. Of the total number of persons who emigrated during the year, only 25 belonged to this district, and the rest to Bihar, the North-Western Provinces, the Sonthal Parganas, and other districts. No emigrants left for Jamaica during the year. Except in one case in which one person was convicted, no cases of abuse or misdemeanour on the part of recruiters were brought to notice.

39. *Nadia*.—There was the usual exodus of labourers during the harvest season from this district to the Sunderbans and neighbouring districts. Coolies from up-country were at work on railway lines.

40. *Murshidabad*.—There was no emigration from or immigration into this district during the year.

41. *Jessore*.—As in other years, people from different parts of the district visited the Sunderbans in the harvesting season to reap paddy. There they received as their remuneration a share in the crop harvested. *Nalwas* and fishermen also visited the Sunderbans—the former to collect reeds for preparing mats, and the latter to fish. Tappers of date trees also visited other districts in the tapping season. As in other years, a few Kabulis visited the district to sell cloth and fruits. Hawkers from Shahabad also came in winter to sell winter clothes. Coolies from Bihar and elsewhere also came to make roads and dig tanks.

42. *Khulna*.—There was the usual influx of labourers from Nadia, Jessore, Backergunge, and Faridpur in the transplanting and reaping season. They

are generally paid in kind, and the rate in ordinary years is one-fifth or one-sixth of the produce reaped. In the Bâgerhat subdivision the partial local distress, and the general distress in the neighbouring districts of Faridpur and Backergunge, caused an unusually large number of labourers to flock to the south of the subdivision. There was thus great competition, and the rate was reduced to one-fifteenth, and in some place to one-sixteenth, of the produce reaped. Various labourers also came to cut firewood and timber in the Sunderbans.

#### VII.—PRICES OF FOOD AND LABOUR.

43. Statements Nos. III and IV showing the prices of food and labour during the last fortnight in March 1894 in the several districts of this Division are annexed.

44. It will be seen that the price of common rice, which is the staple food in this Division, was almost stationary in Nadia and Khulna, less in the 24-Parganas and Murshidabad, and higher in Jessore, as compared with the two preceding years. The price of salt in all the districts has remained almost stationary during the last three years, although with the exception of Khulna it was slightly higher last year than in the previous years. The price of wheat and gram fell off considerably in every district save Khulna, but these articles are not commonly consumed.

45. The figures of the statement cannot, however, be accepted as representing the prices of food-grains throughout the year, inasmuch as all kinds of food-grains ruled high from April to October. In the 24-Parganas the price of common rice ranged from 10 to 13 seers a rupee from the beginning of the year. Owing to the damage caused to the *aman* paddy by the heavy rains of June and July, there was a further subsequent rise in prices, but after harvest the price of common rice fell, the outturn of *aman* paddy not being below the average. In Jessore the price of common rice is gradually rising. Compared with the previous year, there was very little fluctuation in cost during the first two months of the year, but in the subsequent months it rose, and would have risen still higher, but for the import of a large quantity of rice from Birbhum, Burdwan, and Dinajpur. As stated in last year's report, prices in this district and Khulna are no longer restricted to local causes. The development of the railway system equalises to a great extent prices. In the subdivisions of Khulna and Satkhira the price of rice was lower than in the two preceding years, while at Bâgerhat it was the same as in 1892-93, but lower than in 1891-92.

46. As regards the wages of labour, both superior and common, they were almost the same as in the past two years in the districts of Nadia and Jessore. In the 24-Parganas, Khulna, and Murshidabad, a slight increase has taken place in the wages of blacksmiths, both superior and common, and in Murshidabad in the wages of carpenters also. As they are in a manner fixed by local custom, the rise or fall in the price of food-grains has no appreciable effect on them.

47. In the 24-Parganas and Nadia there was a slight rise in the wages earned by coolies, while in Khulna they decreased.

#### VIII.—MANUFACTURES AND MINES.

48. The chief manufactures of this Division are cotton twist and yarn, gunny-bags and cloth, paper, ice, shellac and lac-dye, indigo, silk, sugar, and molasses.

49. The manufacture of cotton twist and yarn, gunny-bags and cloth, sugar, paper, silk, ice, shellac and lac-dye is confined to the district of the 24-Parganas, in which there were 58 mills, presses, and factories, against 49 in the previous year. Of these, 9 are owned by Government, the rest belonging to companies or private individuals. 72,833 operatives in all were employed in these factories; of these, 67,569 were adults and 5,264 children. Among the adults 58,668 were males and 8,901 females, and of the children 4,902 were boys and 362 girls.

50. The following statement gives the value of the outturn returned by the owners of the mills, presses, &c., during the last two years:—

ARTICLES.	OUTTURN.			REMARKS.
	1893-94.	1892-93.	1891-92.	
	2	3		
	Rs.	Rs.	Rs.	
Gunny-bags and cloth	1,61,98,071	1,00,37,674	1,17,47,836	
Cotton twist and yarn	3,51,51,812	68,24,017	68,90,697	
Rice ...	No information furnished.	58,000	2,38,123	
Paper ...	12,05,873	10,49,167	10,18,697	
Lac ...	9,50,000	10,00,000	12,00,000	
Tannery ...	No information furnished.			

According to these figures the year was a successful one for gunny-bags and paper and also for cotton twist and yarn.

51. The following remarks, made by the Manager of the Baranagar Jute Factory, point to an unfavourable condition of the jute trade:—

“The year 1893-94 commencing on 1st August 1893 has been so far most unprofitable to all concerned in the manufacture of jute. The report of a short jute crop induced speculators, balers and mills to pay famine prices for the raw material, and, although higher rates were obtained for manufactured goods, this rise in price was never sufficient to enable manufacturers to cover costs. Several concerns began to work ‘short time’ very early in the year, and one closed its works altogether, finding that the working loss would be greater than the standing cost. The associated mills entered into an agreement to work only five days per week for three months from 2nd April 1893. In face of the very unremunerative state of the trade, the Hastings mill has been worked day and night for some time. The opinion of the Jute Mills Association is dead against night and day work, and a number of the associates is strongly in favour of memorialising the Government of India, with a view of having the Indian Factories Act amended and the limits of the working day fixed, so that no jute mill should be able to work except between the hours of 6 A.M. and 6 P.M. If women and children could be employed only between these hours, it would have the desired effect.

“The almost complete stoppage of wheat shipment from India during the year under review has been very prejudicial to the gunny trade, the export demand, although good, being scarcely sufficient to take off even the diminished production.”

52. With regard to the manufacture of cotton twist and yarn, the Secretary to the Dunbar Cotton Mill writes as follows:—

“*Cotton.*—When the financial year 1892-93 closed, cotton prices were at a point midway between the inflated values which were reached in February 1893 and the lower basis established on the expectation of a large American crop in the following May. The sterling prices of Indian cotton followed those of American closely, but when in July last the closing of the Indian mints put an artificial value on the rupee, and exchange rose nearly to 1s. 4d., a proportionate decline in the rupee value of Indian cotton took place.

“The crop of Indian cotton season in 1893-94 has been above the average in point of quantity in the Bengal circle, but quality has been indifferent, while the Bombay crop shows fair quality, but is short in quantity. Price has been moderate.

“*Yarn.*—At the close of the financial year 1892-93 the prospect of Government taking measures to raise the exchange value of the rupee had caused difficulty in financing business with China and hampered the yarn export trade to that country, on which local mills have largely depended. When the mints were closed in June 1893, and all the evils of a fluctuating exchange were fastened on to our trade with silver-using countries in an accentuated form, the trade with China was at once stopped. This has been a terrible blow to the local yarn trade, as the mills have now to depend almost entirely on local consumption. Fortunately owing to the excellent crops which were produced last year over the greater part of India, consumers were

able to spend more money on clothing, and an unusual local demand for yarn ensued. This enabled mills to clear their stocks, but left prices still low. At this moment it seems that this local demand has been supplied, and as China, owing to the vagaries of exchange, is still almost closed to the trade, stocks are accumulating and prices falling, and all margin of profit has disappeared."

53. The outturn of the paper mills at Titaghur was 7,717,588lbs. against 6,714,673lbs. in the previous year. The manufactures consisted of white printing, *badami* and coloured paper, blotting paper, cartridge, foolscap and water-marked stamp paper of the value of Rs. 12,05,873 against Rs. 10,49,167 in the previous year. The raw materials used were rags, straw, grasses, old gunnies, jute, hemp, bagging and waste papers, &c.

54. Besides the mills and factories mentioned above, there are several mills in the suburbs of Calcutta, but no statistics regarding their outturn are available. Considerable improvement is said to have been made in the working of the 16 oil mills at Sarupganj in the district of Nadia. The prejudice against the use of the mill oil has almost been removed, and the demand for the oil has so much increased of late that the proprietor is thinking of increasing the number of mills.

55. Indigo is largely manufactured in the districts of Nadia, Jessore, and Murshidabad. The table below shows the state of this industry during the last three years:—

DISTRICT.	Number of factories.			Produce in maunds.			Value in rupees.			REMARKS.
	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	
1	2	3	4.	5	6	7	8	9	10	11
Nadia ... ..	63	65	62	1,240	2,130	6,519	2,51,065	5,44,790	12,67,080	
Murshidabad ... ..	23	23	25	1,641	1,357	2,189	4,21,577	4,11,705	3,95,965	
Jessore ... ..	17	20	27	478	1,116	3,090	1,20,096	3,33,042	5,05,026	
Total ...	103	108	114	3,359	4,603	11,807	7,92,738	12,90,527	21,68,071	

It will be seen that the number of factories at work during the year under review remained the same in Murshidabad, while it has decreased in Nadia and Jessore. Compared with the two previous years, the value and outturn of indigo were very poor in the latter two districts, especially in Jessore, where the crop was almost a total failure. In Nadia the excessive rainfall at the manufacturing season injuriously affected the outturn, which would otherwise have been far better. In Jessore the short outturn is due to untimely heavy rains, from the beginning to the middle of the season, which damaged the October plants. Mr. P. Smith, the proprietor of the Kathuli Concern in Nadia, has termed the season a most ruinous one. Probably the manufacture of indigo is gradually dying away as in most districts of Bengal. The Meherpur subdivision in the district of Nadia is still the principal seat of this industry. There are six large concerns in this subdivision as reported in paragraph 84 of the previous year's report.

56. The manufacture of silk is principally carried on in the districts of the 24-Parganas and Murshidabad. The following table compares the state of this industry during the last three years:—

DISTRICT.	Number of filatures.			Produce in lbs.			Value in rupees.			REMARKS.
	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	
1	2	3	4	5	6	7	8	9	10	11
24-Parganas ... ..				Information not furnished.			53,719	52,908	55,015	
Murshidabad ... ..	63	66	64	576,389	333,621	300,140	33,94,573	27,24,100	22,88,043	

In the 24-Parganas there was a small increase in the value of the outturn compared with the previous year, while there was a large increase both in the value and the outturn in Murshidabad. According to the Collector, the trade is, however, declining in this district.

57. The manufacture of silk cloth at Mirzapore in the Jangipur subdivision in Murshidabad is losing ground year by year. During the year under

report 7,004 pieces of silk cloth were manufactured against 10,941 pieces of the previous year, the value realised being Rs. 51,450 against Rs. 91,083. The high price during the year is said to have materially affected the manufacture and sales. There are other places in this district, viz. Baluchar, Hariharpara, and Daulatabad, where silk cloths are manufactured on a small scale, but the Collector has no information regarding their manufacture and sale.

58. Sugar is manufactured in all the districts of this Division, except Murshidabad. The managers of the sugar mill at Cossipore in the 24-Parganas have not supplied any statistics of their operations. The manufacture of sugar by the native process continues in the Basirhat and Barasat subdivisions in the 24-Parganas, and in Basirhat the season seems to have been a good one. The following table compares the state of this industry in the districts of this Division during the last three years:—

DISTRICT.	Number of factories.			Outturn.			Value.		REMARKS.	
	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.	1891-92.	1893-94.	1892-93.		
1	2	3	4	5	6	7	8	9	10	11
24-Parganas ...	229	175	Not furnished.	92,546	75,800	Not furnished.	Rs. 6,62,907	Rs. 5,68,500	Rs. Not furnished.	These figures apply to the Basirhat sub-division only.
Nadia ...	No statistics available.									
Murshidabad ...	174	174	167	258,036	319,170	431,181	20,79,532	19,05,429	27,89,508	
Jessore ...	Not furnished.			18,160	17,431	21,824	1,38,497	1,56,879	1,52,768	
Khulna ...										

These figures are entirely guess-work and cannot be much relied on, but apparently in the 24-Parganas there was a considerable increase in the outturn as well as in the value of sugar. In Jessore there was a decrease in outturn, but increase in value, while in Khulna there was an increase in the outturn, but decrease in the value. The Collector of Jessore observes: "The rainy weather in February and March greatly interfered with the tapping of the date trees, and thus affected the outturn. The price of sugar rose in consequence by about a rupee in the maund. The fall in the value of the rupee had also to do with the increase in the value of sugar, as sugar made out of India could not compete successfully with the home-made product." In Khulna the decrease in value is said to be due to an increase in outturn.

59. In Jessore, besides the native factories, there were three English refineries—one at Kotechandpur and one at Chaugatcha belonging to Mr. Newhouse, and one at Taherpur belonging to Rai Dhanput Singh Bahadur. The refineries at Kotechandpur produced 15,269 maunds of sugar against 11,596 maunds in the preceding year, while those at Chaugatcha and Taherpur produced 19,600 maunds and 17,100 maunds against 14,584 maunds and 33,252 maunds respectively. The cause of decrease in the outturn at the Taherpur factory appears to be that the work was stopped for a long time for reasons not stated.

60. The principal centres of date sugar in the district of Nadia are Santipur, Chakdoha, Kishenganj, Daulatganj, Alamdanga, and Munshiganj. No statistics are available regarding their outturn.

61. Sugarcane is largely cultivated in the Kushtia subdivision and in part of Moherpur in Nadia. In the Kushtia subdivision Messrs. Renwick and Company let out 1,369 sugarcane mills on hire during the year under report against 1,750 in the preceding year. The decrease in the number of mills let out has been attributed to the bad outturn of sugarcane. The rate of monthly hire for each mill was Rs. 26-6. In Murshidabad molasses are manufactured in the Kandi subdivision. The outturn during the year is estimated at 2,400 maunds, valued at Rs. 11,400, against 4,000 maunds, valued at Rs. 12,000, of the previous year. The heavy decrease is explained to be due to the sugarcane deteriorating in quality owing to the same kind of sugarcane being cultivated from year to year on the same plots. In Khulna the outturn during the year was 68,543 maunds, valued at Rs. 1,91,611, against 41,346 maunds, valued at Rs. 93,028, in the previous year. It will be seen that there was an increase in outturn as well as in value.

62. The other manufactures of the Division are noted below:—

The brass foundry at Moheshganj in Nadia manufactures iron screws and other requisites for indigo factories. The year

Brass-work.

having proved very unfavourable to the business, the orders received were very few, and consequently there was no improvement in its working during the year under report. Brass utensils of a common kind are manufactured in the Sadar subdivision of Nadia and in Jessore. In Murshidabad bell-metal and brass utensils of superior kinds are manufactured in considerable quantities, in Berhampur, Kandi, and Baranagar.

Santipur *dhotis* and *saris* are in much demand for their fine texture.

Dhotis, saris, &c.

The cotton wrappers of Kushtia and Kumarkhali are very largely used by the poorer classes on account of their cheapness. The manufacture of cotton cloths is also carried on in the districts of Murshidabad, Jessore, and Khulna, but the industry is gradually dying away, being unable to compete with foreign manufactures.

The clay figures of Ghurni, a part of the Krishnagar town, are very much appreciated both here and abroad. A fine

Pottery and clay figures.

kind of pottery with a black glaze is made at Khanjya in Khulna, but its price is too high for ordinary purchasers. A coarser imitation of it is made at Toleswar, which being cheap has a ready sale. Pottery of common kind is also manufactured in Jessore and Murshidabad.

The ivory industry in Murshidabad, which was at one time very flourishing, is now almost extinct, the manufacture being carried on only to a small extent in Khagra, Manullabazar, and Daulatabad.

Shell bracelets and blankets are manufactured in Murshidabad, and sticks, sandalwood boxes, teapots of buffalo horn and mats of reeds in Khulna.

63. There are no mines in any of the districts of this Division.

#### IX.—TRADE AND COMMERCE.

64. 24-Parganas.—The table below shows the export and import traffic registered along the 11 main trade routes of the district during the past two years:—

ARTICLES.	FROM MUFASSAL TOWARDS CALCUTTA.		FROM CALCUTTA TOWARDS MUFASSAL.

Cotton piece-goods, value.	81,252	72,992	16,99,069	16,87,281

The total weight of traffic into Calcutta from the interior shows an increase of about five lakhs of maunds as compared with the previous year. The increase was mainly in rice, wheat, oilseeds, firewood, jute, lime and salt. Paddy, sugar, *gur*, oil and iron show a decrease. In the outward trade from Calcutta to the interior there was a large increase in paddy and a small increase in *gur*, jute, tobacco and cotton, while there was a large decrease in rice, oilseeds and lime.

65. The above figures do not, however, include the whole internal trade of the district. They do not also include the large railway traffic or the boat traffic on the Hooghly or on the Baliaghatta canal. It seems therefore hardly safe to base any general conclusion on statistics, which only show a portion of the trade of the district, and the utmost that can be said is that as far as they go trade was about as brisk as in the previous year.

66. *Nadia*.—Trade in this district is carried by river, rail and road. The chief articles of export from it are indigo, jute, oilseeds, wheat, gram, pulses, sugar, tobacco, fish and poultry. The chief imports are cotton piece-goods, rice, paddy, salt, *ghi*, kerosine oil, cocoanut oil, spices and flour. The tables below show the value and quantities of the principal staples of traffic exported from this district to Calcutta and imported from Calcutta to this district during the ten months from April 1893 to January 1894 :—

TABLE I.

*Showing Exports from Nadia to Calcutta.*

Rice.	Paddy.	Wheat.	Gram and pulses.	Other food-grains.	Jute, raw.	Gunny-bags.	Linseed.	Mustard.	Cotton, raw.	Silk, raw.	Sugar, refined.	Sugar, unrefined.	Tobacco, unmanufactured.
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Mds. 1,11,772	Mds. 17,088	Mds. 1,42,623	Mds. 8,21,600	Mds. 8,677	Mds. 4,22,436	Mds. 85,063	Mds. 2,59,000	Mds. 20,218	Mds. 3,021	Mds. 1,102	Mds. 10,330	Mds. 58,623	Mds. 26,781

TABLE II.

*Showing Import to Nadia from Calcutta.*

COTTON PIECE-GOODS.		COTTON TWIST.		Salt.	Gunny-bags.	Kerosine oil.
European.	Indian.	European.	Indian.			
1	2	3	4	5	6	7
Rs. 27,32,573	Rs. 2,400	Mds. 19,187	Mds. 757	Mds. 2,33,664	Mds. 4,13,948	Mds. 1,22,369

The above figures, it is stated, have been taken from the statistical statements from April to December 1893 supplied by the Statistical Department of the Bengal Secretariat on the 24th April last, and also from the statement for January 1894, published in the *Calcutta Gazette* of the 2nd May 1894. The statements furnish important statistics of trade carried on in the district by all kinds of routes, and if the figures are intended to be embodied in the general administration and the annual trade reports, the publication of these statistical statements for each official year should be completed in time to enable the District Officers to include the figures in their annual reports which are due on the 1st June of each year. As, however, this is not likely to be done, it would be better perhaps if the figures for the calendar year were embodied in the reports, and the District Officers commented on them and compared them with the figures of the previous year. At present the different modes of dealing with the figures obtained in different ways from different sources discount very much the usefulness of such figures.

67. The table below shows the rail-borne traffic in the district during the year 1893 compared with 1892. The figures, it is stated, have been taken from

the revenue statistics of the Eastern Bengal State Railway supplied by the Manager :—

ARTICLES.	EXPORTS.		IMPORTS.	
	1893.	1892.	1893.	1892.

Indigo ... ..	63	...	...	...
Turmeric ... ..	410	...	...	...
Total ...	56,559	53,223	42,607	28,620

In 1893 the exports and imports of all kinds amounted to 56,559 and 42,607 compared with 53,223 and 28,620 in 1892. Both heads show an increase which is especially marked under imports. Under exports, trade was brisk in gram and pulse, seeds and some other minor articles. In imports in rice, gram and pulse and miscellaneous goods, the increase is attributed to the partial failure of crops in the district during the year under report. The import of cotton (manufactured) and kerosine oil also shows some increase.

68. The following statement shows the total amount of import and export trade carried along the Nadia rivers during the past two years:—

	Imports.	Exports.
	Mds.	Mds.
1892-93 ...	4,61,919	7,58,812
1893-94 ...	5,28,857	6,53,665
Increase ...	66,938	...
Decrease ...	...	1,05,147

There was thus under this head an increase in the imports during the year, while the exports show a falling off. The increase in imports was chiefly under the head of rice and paddy and was mainly due to the partial failure of paddy crops during the year. There was also some increase in the importation of oil, oilseeds, and coal and coke. The decrease in the exports was noticeable under the heads of pulse and gram, firewood, iron, jute and bamboos, and is ascribed to the partial failure of the jute and *rabi* crops.

69. *Murshidabad*.—The table below gives the details of the export trade in this district during the last two years:—

ARTICLES.	1892-93.	1893-94.
	Mds.	Mds.
Rice in husk ... ..	1,10,370	81,095
Do. not in husk ... ..	2,45,300	5,45,877
Wheat ... ..	90,205	36,781
Gram and pulse ... ..	5,16,407	55,177
Jute ... ..	1,78,508	2,50,282
Linseed ... ..	92,676	88,762
Mustard ... ..	12,560	4,369
Total ...	12,46,026	10,62,343

Compared with the preceding year, there was a large increase in the export of rice not in husk and in jute. This is attributed partly to good crops and partly to the high prices which prevailed in several districts during the year under report. On the other hand, the export in rice in husk, wheat, gram and pulse and mustard shows a marked decrease. The decrease under the head of rice in husk naturally follows the large increase in the export of rice not in husk, and under the other heads it is ascribed to the shortness of winter crops in general.

70. The articles imported into this district are piece-goods, sugar, salt, twist yarn, cocoanut oil, kerosine oil and coals. The above articles are all imported from Calcutta, except coal, which comes from Raniganj.

71. The table below shows the principal articles of export by the rivers during the past two years. The toll office is at Jangipur in the north of the district:—

ARTICLES.		1892-93.	1893-94.
		Mds.	Mds.
Rice and paddy	...	65,455	1,18,414
Wheat	...	32,976	30,906
Pulse and gram	...	39,474	48,639
Jute	...	52,594	1,14,008
Coal	...	31,565	49,859
Total		2,22,064	3,61,826

It will be seen that there was a marked increase in the export of all these articles, except wheat, in which there was a slight decrease.

72. The following statement shows the chief articles of import by river in this district and the extent to which they were imported during the year as compared with the preceding year:—

ARTICLES.		1892-93.	1893-94.
		Mds.	Mds.
Mustard	...	35,583	26,219
Tobacco	...	13,098	15,090
Firewood	...	7,363	18,724
Lime	...	5,924	14,508
Coal	...	16,840	6,172
Rice and paddy	...	6,494	18,678
Pulses and grain	...	4,269	14,964
Total		89,571	1,14,355

The above shows that there was a marked increase in the import of all articles, except mustard and coal, in which there was a large decrease.

73. The river-borne traffic of this district is confined as a rule to some months during the rains; its briskness gradually ceases with the subsidence of the water of the Bhagirathi. During the year under report, however, the river remained navigable nearly throughout the year, and Messrs. Hoare, Miller and Company's steamer carried on exports and imports from Calcutta to Jeaganj without much difficulty.

The articles of export and import up and down the river consisted of rice, paddy, wheat, pulses and grain, mustard and other oilseeds, jute, cotton, silk and silk goods, sugar, tobacco, vegetables, dyes, brass and brass utensils, *ghi*, salt, spices, oil, firewood, lime, coal, timber, and other miscellaneous goods.

74. The Collector has not been able to furnish any statistics of the rail-borne traffic in the district, as he did not get them from the Railway authorities. He does not mention whether he has asked for such information.

75. *Jessore*.—There was no change in the important means of communications of this district during the year under report. There are no offices in this district for the registration of traffic except the railway stations. The railway figures, however, do not of course correctly represent the trade statistics of the district. These are collected through the police or the sub-executive staff, who have to depend entirely on the mere *ipse dixit* of the traders, who again are careful not to give actual figures for fear of the income-tax.

76. The figures shown in the following two tables roughly exhibit the import and export trade of the district. They have, however, no strong claim to be regarded as accurate:—

ARTICLES.	IMPORT.	
	1892-93.	1893-94.
1	2	3
Piece-goods ...	10,32,200 Rs.	9,30,198 Rs.
Salt ...	1,78,452 Mds.	1,69,992 Mds.
Rice ...	2,50,156 "	4,92,950 "
Cocconut oil ...	10,000 "	15,645 "
Kerosine oil ...	50,000 "	41,115 "
Spices ...	1,24,000 "	1,18,703 "
Hardware ...	18,650 Rs.	27,159 Rs.
Potato ...	30,000 Mds.	31,414 Mds.

Piece-goods show the largest decrease, while rice shows the largest increase. The decrease in the import of piece-goods is attributed to the increase in their price owing to the fall of the value of the rupee and the rise in the price of jute, while the increase in the import of rice is said to be due to a succession of bad harvests. The fluctuations in the import under the other heads are attributed to general causes. It is stated that a good deal of Burma rice was imported into the Magura subdivision from Calcutta, and that a large quantity of rice from Birbhum, Burdwan, and Dinajpur also found its way into this district, besides the usual importations from Backergunge. Paddy is also said to be largely imported from Khulna.

77.

ARTICLES.	EXPORT.	
	1892-93.	1893-94.
1	2	3
	Mds.	Mds.
Gur ...	3,31,178	3,30,000
Sugar ...	2,73,115	2,28,500
Indigo ...	1,198	478
Rice ...	58,436	23,300
Oilseeds ...	38,500	49,800
Pulses ...	93,400	87,500
Tobacco ...	9,044	8,300
Jute ...	2,31,732	1,20,000
Chillies ...	4,820	2,000
Fish ...	14,900	19,000

Besides the above, paddy is also exported from the bhil district in the north to Nadia and places on the west. All the articles of export, with the exception of oilseeds and fish, show a decrease, and in each case the poorer outturn is said to have been the cause. The increase in the export of oilseeds is ascribed to a better outturn, and in the export of fish to the fact that the local prices were lower than in the previous year.

78. As stated in the previous year, the Bengal Central Railway has greatly facilitated traffic. Local products find a ready market in Calcutta through its medium, while foreign articles are imported at a lesser cost. Whenever the local market is found dull for any home product, the commodity begins to be exported.

79. From this district Calcutta gets its fair share of food. Flocks of goats and sheep are brought up here and sent to Calcutta along the Jessore-Calcutta road. Dealers penetrate to most parts of the district and buy up poultry. During the last cold season truck loads of turtles, which had been caught in the bhils, were despatched by rail to Calcutta for consumption by the lower classes. The turtles come into the bhils with the river water at times of flood, and when the water recedes they are found in the shallows and caught.

80. The following is a balance sheet of the Jessore Loan Company on the 31st March 1894:—

Detailed heads of income.	Amount.		Detailed heads of expenditure.	Amount.	
1	2		3	4	
	Rs.	A. P.		Rs.	A. P.
1. Deposit ...	1,93,005	0 0	1. Establishment, &c. ...	4,647	10 3
2. Debts recovered ...	1,42,795	11 3	2. Expenses for the management of immovable property.	570	11 3
3. Interests realised ...	33,950	11 9	3. Rent, &c., paid ...	6,915	4 3
4. Rent, cesses, &c. ...	8,003	10 9	4. Loans given ...	2,86,158	0 0
5. Unpaid dividend ...	429	6 0	5. Repayment of deposits	75,621	0 0
6. Reserve fund ...	1,028	0 0	6. Interests paid ...	23,217	4 0
7. Income-tax recovered.	300	0 0	7. Dividend ...	12,726	3 0
8. Pleaders' fees realised.	127	6 6	8. Purchase of immovable property.	13,700	0 0
9. Other miscellaneous receipts.	89	3 9	9. Law expenses ...	768	8 3
10. Cash in hand at the beginning of the year.	1,10,765	4 6	10. Repayment of other deposits.	89	3 0
			11. Refund of excess interests realised.	238	8 0
			12. Sale of promissory notes.	2,500	0 0
			13. Closing balance ...	63,342	2 6
Total ...	4,90,494	6 6	Total ...	4,90,494	6 6

The Loan Company is apparently in a flourishing condition.

81. *Khulna*.—The following table gives particulars of the import trade of the district during the past year compared with the year before:—

ARTICLES.	1892-93.	1893-94.
Piece-goods ...	6,96,671 Rs.	7,43,980 Rs.
Gunny-bags ...	4,806 No.	46,795 No.
Salt ...	1,54,884 Mds.	1,11,851 Mds.
Cotton twist and yarn ...	30,868 "	3,491 "

From the above it appears that the trade in piece-goods and gunny-bags was very brisk during the year, while that in cotton twist and salt shows a large falling off. Other important imports are kerosine oil, iron-ware, gram, wheat, fancy goods and potatoes, but no statistics are available as to their quantity or value.

82. The following table shows particulars of the export trade of the district during the past two years:—

ARTICLES.	1892-93.	1893-94.
Rice in husk ...	20,26,740 Mds.	7,40,562 Mds.
Do. not in husk ...	4,42,468 "	5,45,479 "
Pulses ...	15,200 "	3,600 "
Jute ...	94,131 "	63,388 "
Linseed ...	2,500 "	.....
Sugar ...	1,56,879 "	18,160 Mds.
Molasses ...	93,028 "	61,543 "
Hides ...	40,249 Rs.	36,326 Rs.
Gunny-bags ...	.....	974 No.

Besides the above, cocoanuts, betel-nuts, fish, tobacco, *sundri* logs, mats, reeds and honey were largely exported to Calcutta and other districts.

83. It will be seen that there was a large decrease under all the heads of export, except rice not in husk, in which there was a marked increase. The figures given for unhusked rice in 1892-93 are said to have been wrong. One market, that of Bardal, is said to have exported 14,00,000 maunds that year against 1,25,000 maunds in the year under report. The figures for 1892-93 are altogether excessive, as the market is not large enough to have so great an export. It is, however, observed that the figures showing the export of rice are far below the actual figures. Much it is stated is sent to Backergunge, cleaned and re-exported, and much is sent direct in boats to Calcutta from the Sunderbuns without coming under the notice of the authorities. No explanations have been furnished regarding the fluctuations under the other heads.

84. The statement below shows the rail-borne traffic of the district during the year compared with 1892:—

ARTICLES.	1892.				1893.			
	Imported.		Exported.		Imported.		Exported.	
	Tons.	Freight in rupees.	Tons.	Freight in rupees.	Tons.	Freight in rupees.	Tons.	Freight in rupees.
1	2	3	4	5	6	7	8	9
Hotel-nuts ...	38	87	1,003	3,578	.....	.....	1,173	3,790
Coal ...	4,040	7,900	87	421	7,338	12,720	1	4
Cotton, manufactured	810	2,817	.....	.....	321	987	6	24
Do. raw ...	.....	1	14	85	1	5	3	15
Gunny-bags and cloths	18	57	27	99	13	40	0	29
Grain and pulses	100	240	226	401	50	124	440	851
Hides and skins	1	1	104	343	.....	.....	170	545
Jute, unscrewed	.....	.....	9,088	34,552	.....	.....	7,137	28,011
Kerosine oil	230	516	4	2	172	302	2	4
Metals and manufactures	119	352	32	120	75	252	14	54
Oil	309	609	.....	.....	168	373	.....	.....
Provisions	232	497	240	552	320	1,263	280	602
Rice	8	24	2,502	5,708	633	1,400	634	1,143
Salt	188	385	9	20	107	213	.....	.....
Seeds	9	20	494	934	11	10	502	1,082
Sugar	61	140	4	7	45	150	5	5
Tobacco	167	409	4	11	10	33	168	600
Unclassified	687	2,430	982	3,638	576	2,208	671	2,753
Total	7,897	16,393	15,230	50,469	9,845	20,353	11,284	39,480

The only heads calling for any remark are the large increases in imports under coal and rice, and in exports under tobacco, and the decreases in imports under cotton manufactured, salt and tobacco, and in exports under jute unscrewed, and rice.

85. The following statement shows the transactions of the Khulna Loan Company, Limited, for the calendar year 1893:—

RECEIPTS.				EXPENDITURE.			
		Rs.	A. P.			Rs.	A. P.
Deposits received	...	99,505	1 6	Loans advanced		1,08,216	8 0
Debts recovered	...	58,610	9 3	Deposits repaid		59,434	7 0
Interest realised		15,721	11 6	Interest paid		10,425	8 0
Costs of suits realised		569	11 0	Dividend paid		1,866	1 0
Discount		183	7 3	Printing charges		14	12 0
Miscellaneous		53	8 6	Establishment		313	15 6
P'loaders' fees realised...	...	21	11 0	Contingencies		10	0 0
Amount refunded	...	740	0 0	Income-tax		133	14 11
				Postage		7	0 0
				Stationery and contingencies		41	14 9
				Law charges	...	250	6 0
				Costs of office building		1,804	9 3
				House-rent	...	70	0 0
				Miscellaneous	...	762	2 0
Total	...	1,73,405	12 0	Total		1,83,351	7 0
Balance of last year	...	14,734	3 0	Cash balance		4,788	8 0
GRAND TOTAL	...	1,88,139	15 0	GRAND TOTAL	...	1,88,139	15 0

The business of the Company has increased considerably during the year. The receipts have risen from Rs. 1,53,464 in 1892 to Rs. 1,73,405-12 in 1893, and the disbursements from Rs. 1,47,076-11-3 to Rs. 1,83,351-7. The Company has advanced in public estimation. During the year under review it spent Rs. 1,804-9-3 in providing an office building, and has declared a dividend at the rate of 15 per cent., which was the same as in the preceding year.

The table below shows the liabilities of the Company on the 31st March 1894:—

		Rs.	A. P.
Capital	...	15,000	0 0
Deposit	...	2,16,393	6 9
Interest	...	1,293	12 6
Dividend	...	27,052	5 0
Total	...	2,59,739	8 3

The rate of interest charged during the year was the same as before, viz. from 12 annas to Re. 1-9 per cent. per mensem.

86. The Khulna Trading Company was established in 1891. The statement below shows the transactions of the Company during the year 1893:—

RECEIPTS.				EXPENDITURE.			
		Rs.	A. P.			Rs.	A. P.
Shares realised	...	407	0 0	Contingencies		10	0 0
Money realised by the sale of mohurs	...	382	12 0	Law charges		22	2 3
Interest realised	...	31	2 0	Contingency		1	11 0
Advance money realised	...	625	0 0	Postage	...	3	2 6
Proceeds of the sale of bricks	...	523	13 0	Printing charges		8	0 0
				Establishment	..	68	2 0
				Stamps	...	6	8 0
				Advance money	..	745	0 0
				Mohurs bought	..	340	14 0
				Cost of making bricks	..	947	7 0
				Miscellaneous	.	0	14 0
Total	...	1,969	11 0	Total	...	2,153	13 3
Balance of last year	...	323	7 0	Cash balance	...	139	4 9
GRAND TOTAL	...	2,293	2 0	GRAND TOTAL	...	2,293	2 0

The Company has only newly started and is not carrying on an extensive business.

87. It is stated that 46 so-called Insurance Companies were started in the subdivision of Bagerhat. Many of them have been and many have not been registered under the Act. The general principle appears to be that a small sum is realised as the price of the share, which it is stated goes to the promoter. Then the share-holder nominates an old woman, and when she dies a sum of money is to be collected from each of the other share-holders and paid to the share-holder whose nominee has died. It is very doubtful if this death gift will be easy to collect. This seems to me to be an unusual kind of gambling and about as untrustworthy as the insurances made on the lives of children in Europe. The Companies, it is stated, are all of recent institution.

88. As already stated, comment on most of the figures supplied is of very little use, as no comparison is possible. It should be settled clearly what figures and for what period are to be produced in this report; then possibly a little more uniformity may be obtained.

#### X.—ADMINISTRATIVE CHANGES.

89. The following administrative changes which took place during the past year may be mentioned as deserving of notice:—

- (1) The abolition of the Barrackpore and Dum-Dum subdivisions and their amalgamation with the Barasat subdivision in the district of the 24-Parganas.
- (2) The transfer of the rural sub-registry office from Manicknagar to Habra, and the establishment of a new sub-registry office at Deganga in the 24-Parganas.
- (3) The establishment of a Municipal Bench of Honorary Magistrates at Khurda in the Barasat subdivision in the 24-Parganas with third class magisterial powers.
- (4) The abolition of the police outpost at Navadwipa in thana Kotwali of the Sadar subdivision in Nadia and the substitution of town chaukidars.
- (5) The abolition of the police outpost at Damukdia in thana Nowpara of the Kushtia subdivision in Nadia.
- (6) The transfer of estate No. 3474, Pirpur, from the district of Nadia to Pabna.
- (7) The abolition of the outpost at Alfadanga in Narail subdivision in Jessore and of the outpost at Gopalnagar and the Garapota police-station.
- (8) The opening of a joint sub-registry office at Sripur in Jessore.
- (9) The transfer of the duty of supervising petty settlements under the Tenancy Act from the Director of the Department of Land Records and Agriculture to the Commissioner of Division.
- (10) The raising of the rates of duty on ganja.
- (11) The reduction of fees for registration of documents from 12 annas to 8 annas for value up to Rs. 50.

90. As regards change No. 4, Mr. Garrett, the Officiating Collector of Nadia, observes that, considering that Navadwipa is a large municipality and that several big *mêlas* are held there annually, the propriety of abolishing the outpost there, whereby it is removed seven miles from any police-station, appears to be at the least doubtful. I am inclined to agree with him, as not only will the police-station be seven miles away, but it is on the other side of the Bhagirathi as Navadwipa is on the west bank of the river, and geographically belongs to the Burdwan district.

91. Regarding change No. 7, Mr. Fiddian, the Collector of Jessore, observes that, considering the outlying nature of the locality and the turbulent character of the people, the experiment is a doubtful one.

92. With reference to change No. 8, Mr. Fiddian observes that it has added to the convenience of the people and increased registration.

## XI.—STATISTICAL ENQUIRIES.

93. Besides the usual enquiries relating to vital statistics, the price-lists under the Bengal Tenancy Act and the agricultural statistics required by the Director of Land Records and Agriculture, the only statistical enquiry worth noticing was that made during the year in Murshidabad about the use of hemp drug (ganja) and its effects on the persons using it. On the requisition of the Director of Land Records and Agriculture, statistical enquiries regarding horses and ponies, locusts and insect-pests were made during the year in the districts of this Division. Enquiries were also made regarding hailstone and injuries done by sugarcane pressing mills.

94. Mr. Fiddian, the Collector of Jessore, observes that there has been a marked improvement of late in his district in the collection of vital statistics, the registration of births having doubled in 1893 as compared with the previous year. This, I presume, is due to the subject being properly attended to.

## XII.—CIVIL JUSTICE.

95. The following statement shows the number of suits instituted, disposed of and pending in each district of this Division during the past calendar year as compared with 1892:—

DISTRICT.	Instituted.		Disposed of.		Pending.	
	1892.	1893.	1892.	1893.	1892.	1893.
1	2	3	4	5	6	7
24-Parganas ... ..	35,127	35,860	36,950	36,876	4,934	5,293
Nadia ... ..	19,977	20,296	20,249	20,668	1,549	1,177
Murshidabad ... ..	16,151	15,425	16,035	15,277	1,708	1,856
Jessore ... ..	27,494	26,849	28,943	28,076	2,694	2,677
Khulna ... ..	13,949	14,603	14,537	14,632	1,345	1,316
Total ...	112,698	113,033	116,714	115,529	12,230	12,319

In the 24-Parganas there was an increase of 2·08 per cent. in the number of suits instituted and a decrease of 0·2 per cent. in the number disposed of. In Nadia there was an increase of 1·5 per cent. in the number instituted and of 2·06 per cent. in the number disposed of. In Murshidabad there was a decrease of 4·4 in the number instituted and of 4·7 in the number disposed of. In Jessore there was a decrease of 2·3 per cent. in the number instituted and of 2·9 per cent. in the number disposed of. In Khulna there was an increase of 4·6 per cent. in the number instituted and of 0·6 in the number disposed of.

96. The statement below shows the number and nature of each class of suits instituted during the past year as compared with the preceding year:—

DISTRICT.	NUMBER OF SUITS.—							
	For money or movables.		Suits under the rent law.		Title and other suits.		TOTAL.	
	1892.	1893.	1892.	1893.	1892.	1893.	1892.	1893.
1	2	3	4	5	6	7	8	9
24-Parganas ...	18,626	17,892	14,437	15,128	2,064	2,840	35,127	35,860
Nadia ...	13,673	13,277	5,767	6,126	809	1,265	20,249	20,668
Murshidabad ...	9,161	8,196	6,027	5,706	847	1,375	16,035	15,277
Jessore ...	11,294	10,398	14,935	14,430	1,265	2,021	27,494	26,849
Khulna ...	6,131	5,637	7,944	7,955	1,012	1,040	14,537	14,632
Total ...	57,885	55,400	49,110	49,345	5,997	8,541	1,13,442	113,286

There was a falling off in the suits for money or movables in all districts, except Khulna, while title and other suits show an increase. The suits under the rent law also show an increase in the 24-Parganas, Nadia, and Khulna, while in the other two districts there was a slight decrease. In Jessore the decrease in the suits for money or movables and the increase in the number of title

suits are mainly attributed to the fact that mortgage suits, which in the preceding year had been classed as "suits for money or movables," were classed as title suits during the year under report. The decrease in the number of rent suits is said to be possibly due to the settlement of disputes between raiyats and zamindars. The fluctuations in the other districts have not been explained.

97. The statement below shows the manner in which suits were disposed of during 1893 as compared with the year preceding:—

DISTRICT.	Withdrawn and decided <i>ex-parte</i> .		Contested.		Percentage of contested cases.	
	1892.	1893.	1892.	1893.	1892.	1893.
1	2	3	4	5	6	7
24-Parganas ...	29,414	29,755	7,536	7,121	20·3	19·3
Nadia ...	16,310	16,502	3,939	4,166	19·4	20·1
Murshidabad ...	12,956	12,207	3,079	3,070	19·2	20·0
Jessore ...	23,027	22,441	5,916	5,635	20·4	20·0
Khulna ...	11,539	11,588	2,998	3,044	20·6	20·8
Total ...	93,246	92,493	23,468	23,036	20·1	19·9

In the 24-Parganas 46 per cent. of the cases were decided *ex-parte*, more than one-third of the total number were withdrawn, while less than one-fifth of the number were contested. The average duration of contested rent suits and of those decided *ex-parte* was 142 and 85 days respectively against 126 and 76 in the year preceding. In Jessore the number of suits disposed of was less than in 1892. The decrease in the disposal is said to be due to decrease in the institutions. The average duration of suits (contested and uncontested) for money or movables, rent suits and title and other suits during the year was 74, 78, and 175 days respectively against 77, 100, and 190 days in the preceding year.

### XIII.—CRIME.

98. The number of cognizable offences reported in this Division during the year was 15,216 compared with 15,859 in the preceding year, showing a decrease of 643 cases. The decrease occurred in the 24-Parganas, Murshidabad, and Jessore, but mainly in the first-named district, in which offences under all classes have fallen off. In Murshidabad the decrease is noticeable in cases against property, and especially under the head of burglary. The decrease in Jessore occurred chiefly in dacoities and other serious offences against property, and is said to be due to the fact that a large number of local bad characters were proceeded against under section 110, Criminal Procedure Code, and their cases were generally tried on the spot. In Nadia and Khulna, on the other hand, there was an increase in the number of cases reported. In the former district the increase occurred chiefly in the number of offences under class III, but this increase was partly discounted by a decrease under other classes. In Khulna the increase chiefly occurred in offences against persons.

99. The number of cases declared false was 718 compared with 774 in 1892, and not 793, as shown in the report for the previous year, which was

apparently a mistake. Taking the districts separately, there were 130 false cases in the 24-Parganas, 122 in Nadia, 134 in Murshidabad, 215 in Jessore, and 117 in Khulna, against 199, 127, 135, 197, and 116, respectively. The decrease was thus marked in the 24-Parganas. Prosecutions were instituted in 65 cases, or 9.0 per cent., against 75, or 9.6 per cent. (and not 112, or 14.1 per cent.) in the previous year. Of these, 18 were instituted in the 24-Parganas, 20 in Nadia, 10 in Murshidabad, 9 in Jessore, and 8 in Khulna, compared with 23, 25, 5, 15, and 7, respectively. The number of cases in which convictions were obtained was 7 in the 24-Parganas, 4 in Nadia, 3 in Murshidabad, 4 in Jessore, and 1 in Khulna, against 15, 4, 1, 4, and 2, respectively, in 1892. The Nadia and Khulna figures are bad. Writing on this subject, the Magistrate of Jessore observes that many cases declared false are not palpably and undeniably false, but only probably so, and that this prevents an extensive use of section 560, Criminal Procedure Code. He states that compensation was given in only 20 cases in 1893. The number, though small, is much better than in Nadia, where it was awarded only in 4 cases. It is to be much regretted that more use is not made by Magistrates generally of the valuable powers awarded in this section.

100. The total number of cases in which the police abstained from making enquiry was 1,737, or 11.4 per cent., compared with 1,743, or 10.9 per cent. in 1892, showing a slight decrease. Of the total number of cases, 462 were in the 24-Parganas, 384 in Nadia, 473 in Murshidabad, 270 in Jessore, and 148 in Khulna, compared with 436, 485, 336, 380, and 150, respectively, in the year preceding. It will be seen that there was a marked increase in Murshidabad, and decrease in Nadia and Jessore. The cases were as usual mostly petty ones, attempts and cases in which no property was stolen, or the property stolen could not be identified, or the offenders were unknown. In Jessore and Khulna the power of refusing enquiry seems on the whole to have been exercised with discretion. In Nadia 42 cases were investigated under orders of the Magistrate after the police had refused enquiry.

101. The total number of persons arrested during the year was 13,897 compared with 14,365 in 1892. Of these, 13,428 were sent up for trial against 13,890, and 8,732 convicted against 8,893 in the previous year, the percentage of convictions being 65.0 against 64.4 in the preceding year. As regards the several districts, the percentage was 68.1 in the 24-Parganas, 68.8 in Nadia, 69.7 in Murshidabad, 56.1 in Jessore, and 58.6 in Khulna.

102. The total number of true cases of murder in this Division during the year was 52 against 59 in 1892. Of these, 16 were in the 24-Parganas, 2 in Nadia, 7 in Murshidabad, 16 in Jessore, and 11 in Khulna, against 24, 4, 7, 16, and 8, respectively, the decrease in the 24-Parganas being marked. The number in which convictions were obtained was 11 against 15. Of these, 4 were in the 24-Parganas, 1 in Murshidabad, 3 in Jessore, and 3 in Khulna, as compared with 7, 2, 2, and 3, respectively, in the preceding year. In Nadia in no cases were convictions obtained during the year, though in 1892 one case ended in conviction. The result in Murshidabad was especially bad.

103. The number of true cases of dacoity was 25 against 36. Of these, 11 were in the 24-Parganas, 2 in Nadia, 3 in Murshidabad, 8 in Jessore, and 1 in Khulna, compared with 10, 2, 8, 16, and 0 in the previous year. The decrease in Murshidabad and Jessore is satisfactory. The number of cases which ended in conviction was 10 against 7. Of these, 2 were in the 24-Parganas, 0 in Nadia, 3 in Murshidabad, and 5 in Jessore, against 3, 1, 0, and 3, respectively, in 1892. The results in Murshidabad and Jessore are especially good.

104. There was a marked increase of 97 cases of rioting during the year, the figures being 381 compared with 284 in 1892. Of the 381 cases, 77 occurred in the 24-Parganas, 53 in Nadia, 37 in Murshidabad, 126 in Jessore, and 88 in Khulna, compared with 74, 46, 33, 51, and 80, respectively, in the previous year, showing an increase in all the districts. Though the number in Jessore was specially large, no explanation has been furnished by the Magistrate regarding it, but I observe that in the previous year there was a large decrease. The cases were chiefly due to disputes about land and fisheries. The majority of them was of a petty description. In five cases only did loss of life occur: four of these were in the 24-Parganas, and the remaining one in Khulna.

105. In none of the districts was there any caste or religious disturbance between the Hindus and the Muhammadans. In Nadia two sects of Muhammadans in Kushtia quarrelled about rubrics, and were convicted and fined. Two factions of Muhammadans also quarrelled in the Hanskali jurisdiction of the Sadar subdivision of the same district about the slaughter of a cow at the *Bakr Id*, and those who rescued the cow from slaughter were fined and imprisoned.

106. In the 24-Parganas proceedings under section 107, Criminal Procedure Code, were taken against 219 persons, of whom 92 were bound down. Fifty-seven more were bound down under section 106, Criminal Procedure Code, in addition to other punishments inflicted on them. Proceedings under section 110, Criminal Procedure Code, were also taken against 41 persons, of whom 21 were ordered to give security for good behaviour. In Nadia there were 22 cases under section 107, and 14 cases under section 106, Criminal Procedure Code. In the former 42 persons were bound down, 36 for one year and 6 for six months each, while in the latter 43 persons were bound down, 40 for one year and 3 for six months. In Murshidabad there were 12 cases during the year, 7 under section 106 and 5 under section 107, Criminal Procedure Code. In these 45 persons were bound down, 10 under section 106 and 35 under section 107, Criminal Procedure Code. In Jessore 133 cases were instituted under section 107, Criminal Procedure Code, and 184 under sections 109 and 110, Criminal Procedure Code. In the former 727 and in the latter 131 persons were bound down during the year. In Khulna there were 135 cases under section 107, Criminal Procedure Code, and 20 under section 106, Criminal Procedure Code. In the former 355 and in the latter 74 persons were bound down during the year to keep the peace. The extra police force employed at Baharbania has been removed.

107. There were 16,397 cases of non-cognizable crime reported in this Division during the year under review compared with 16,847 in the previous year, showing a decrease of 450 cases. The decrease occurred in the 24-Parganas, Nadia, and Khulna, while the two other districts showed an increase. The decrease in the 24-Parganas has not been explained. In Nadia it is said to be mainly due to a decrease of about 400 prosecutions under the Municipal Act, of 74 cases under class I, as fewer chaukidars were prosecuted, most of them having been departmentally dealt with, a procedure which is far more preferable, and of 42 cases under the Hackney Carriage Act. The decrease in Khulna is attributed to the fact that in the early part of the year the people were poor owing to bad crops, and could not afford to spend so much on litigation.

108. In Murshidabad the increase in the number of cases is said to have occurred chiefly under the head of cattle trespass and breach of contract. In Jessore the increase is observable in all classes of offences, except class V, where there was a decrease. The increase is marked in classes I, IV, and VI and in offences under special laws. The Magistrate has not been able to account for the increase in class IV, as it was not a year of marked prosperity when people are fond of resorting to the Courts in petty cases. The increase in class VI is attributed to the comparatively larger number of institutions under Chapter VIII of the Criminal Procedure Code. As regards the increase in offences under special laws, it is stated that the provisions of these laws were duly enforced during the year, and that there was a marked increase under the head of cattle trespass.

109. The number of cases in which the police were employed to make enquiries was 802, or 4·8 per cent., as compared with 4·4 per cent. in 1892. Of the 802 cases, 341 were in the 24-Parganas, 43 in Nadia, 69 in Jessore and 349 in Khulna. In Murshidabad in not a single case were the police employed to make enquiries. Any increase in this procedure is most strongly to be deprecated, and from the above it appears that in the 24-Parganas and Khulna cases were sent far too readily for police enquiry.

110. The number of persons against whom processes were issued was 18,534 against 17,660, and the number that actually appeared before Magistrates was 12,827 compared with 13,032. This is said to be probably due to the compromise out of Court of petty cases of assault, &c., after the issue of summons. The number of persons convicted was 6,586, or 51·4 per cent., compared with 55·4 in 1892.

## XIV.—POLICE.

111. The following statement shows the strength of the police force employed in the several districts of this Division:—

DISTRICT.	District Superintendent.	Assistant Superintendent.	Inspectors.	Sub-Inspectors.	European constables.	Head constables.	Constables.	Town chaukidars.
1	2	3	4	5	6	7	8	9
24-Parganas	1	1	5	36	2	133	979	51
Nadia ...	1	...	4	33	...	51	505	94
Murshidabad	1	1	4	32	...	76	497	97
Jessore ...	1	...	5	33	...	42	394	29
Khulna ...	1	...	8	21	..	42	258	55
Total ...	5	2	21	155	2	344	2,633	326

The above shows that, compared with 1892, there was an increase of one head constable in the 24-Parganas and a decrease in the number of constables employed during the year in three out of the five districts. This is due to the substitution of chaukidars for the watch and ward of certain towns in place of constables, and to the reduction of the force on account of the abolition of certain outposts.

112. The numbers punished were as follows:—

## Dismissed—

	1892.	1893.
Inspectors ...	...	...
Sub-Inspectors ...	2	3
Head constables ...	1	6
Constables ...	94	82
Total ...	97	91

The increase in dismissals in the higher ranks is very unsatisfactory. Two sub-inspectors and two head constables were dismissed in Nadia alone.

113. Punished departmentally—

	1892.	1893.
Sub-Inspectors ...	73	84
Head constables ...	158	125
Constables ...	341	469
Total ...	572	678

There was a considerable increase in the number of constables punished departmentally, especially in the 24-Parganas, Nadia, and Murshidabad districts.

114. Punished judicially—

	1892	1893
Sub-Inspectors ...	2	...
Head constables ...	2	2
Constables ...	43	53
Total	47	55

The number of constables punished judicially also shows an increase.

115. The numbers rewarded during the year were as follows:—

	1892.	1893.
By promotion ...	3	4
By money rewards ...	310	379
Total ...	313	383

With the increase in punishments, it is satisfactory to note an increase in rewards. They were given freely in the 24-Parganas district. Nadia also shows a substantial increase.

116. In Murshidabad Inspector Aghore Nath Chowdhry received a special reward of Rs. 1,335 from Louis Payenne and Company for detecting a heavy burglary committed in their office at Berhampur. In Jessore Inspector Mohim Chandra Das received a money reward of Rs. 200 from the Inspector-General of Police, Lower Provinces, for successfully working out two dacoity cases and an important Government currency note forgery case which occurred during the year. Sub-Inspector Protap Chandra Mitter of this district was also granted by the District Magistrate a reward of Rs. 100 for the arrest of an important absconder in a double murder case.

117. The table below shows the number that left the force:—

	1892.	1893.
On pension ... ..	36	39
On gratuity ... ..	11	6
By resignation without pension or gratuity ... ..	127	156
By dismissal ... ..	97	91
By discharge ... ..	27	23
By desertion ... ..	16	14
By death ... ..	100	97
Total ... ..	414	426

There was a considerable increase in the number of those who resigned during the year compared with the preceding year.

118. There were 15,216 cases of cognizable crime in this division during the year under report compared with 15,859 in 1892. Of these 11,854 were enquired into by the police against 12,582. The number of cases in which convictions were obtained was 6,994, or 59·0 per cent., compared with 52·9 per cent. in the preceding year. Deducting cases under class VI, the percentage of convictions was 36·4 compared with 30·6 in 1892. The result shows an improvement and is satisfactory.

119. The following table shows the action of the police in the matter of the recovery of stolen property:—

	Amount of property stolen.	Amount recovered.	Percentage of recovery.
	Rs.	Rs.	
24-Parganas . . .	43,988	11,137	25·3
Nadia . . .	26,291	6,937	26·3
Murshidabad . . .	41,610	13,328	32 0
Jessore . . .	55,823	16,206	29·0
Khulna . . .	20,999	3,961	18·8
Total ..	1,88,711	51,569	27·3

The amount of property stolen has fallen from Rs. 2,09,657 to Rs. 1,88,711, but the amount recovered shows a large increase, being Rs. 51,569 against Rs. 39,284 in 1892. The percentage of recovery was 27·3 as compared with 18·7 in the preceding year. Taking the figures for what they are worth, there has been a marked improvement in the percentage of recovery in every district, except the 24-Parganas, and, although the recovery is generally a matter of chance, yet as the police get blamed when the percentages are low, it is only fair they should get credit when the reverse is the case, as in the year under review.

120. Except in Nadia, the conduct of the police in this Division is reported on the whole to have been satisfactory. The Magistrate of Nadia observes that the general conduct of the police of his district was not satisfactory, as there were several instances of serious misconduct amongst superior officers which had to be dealt with upon their merits with some severity. In this district

a charge of extortion was laid against a head constable of Bhuluka thana. It was, however, proved false, and the complainant was prosecuted under section 211, Indian Penal Code, but was discharged for want of sufficient evidence. In Jessore great difficulty was experienced in getting men to fill up vacancies.

121. The following statement shows the number of rural police in the several districts of this Division, the number punished, and the number rewarded:—

	Number of rural police.	Number punished.	Number rewarded.
24-Parganas ...	3,351	1,244	25
Nadia ...	3,436	1,090	28
Murshidabad ...	3,911	529	39
Jessore ...	3,879	945	30
Khulna ...	2,037	1,096	27
<hr/>			
Total ...	16,614	4,904	149
<hr/>			

122. The above shows that there was a decrease in the number of chaukidars punished during the year compared with the figures for 1892, being 4,904 against 5,739, while the number of chaukidars rose from 16,607 to 16,614. The decrease occurred in all the districts, except Nadia and Khulna, where there was an increase. The decrease was more marked in the 24-Parganas and Jessore, while the increase in Nadia was considerable. The proportion of chaukidars rewarded compared with those punished is as usual infinitesimal. Till good work is better rewarded than it is at present, it is hopeless to expect it, or to induce a better class of men to become chaukidars. Some chaukidars in Nadia did especially good work. As usual, the punishments were chiefly for non-attendance at thanas and for not reporting crime.

123. In Murshidabad there are still many chaukidars under Regulation XX, the largest number of them being in the Kandi subdivision. Proposals were made to introduce Act VI of 1870 (as amended by subsequent enactments) throughout the subdivisions, as the chakran chaukidars were reported to be generally bad characters, whom it is not possible to look after properly. But the Magistrate on local enquiries found that the chaukidars under Act VI of 1870 in this subdivision were of no better class and bore no better characters than the chakran chaukidars, and that if these men were removed no advantage would be gained, but on the contrary they being deprived of their lands might quite possibly take to thieving. The difficulty of controlling so large a body of men can be best met by reducing their number as deaths occur, and making over their lands to those village chaukidars who have not enough, or returning them to the zamindars and assessing them for the chaukidari fund, as directed by section 49 of the Act.

124. Very little progress has been made in this Division in improving the status of the chaukidars by the appointment of men of better caste and position in society. The appointment has been held from time immemorial by men of the lowest castes, such as *Káorás*, *Bágdís*, *Muchís*, *Doms*, &c., and men of better position hold aloof and do not come forward willingly to accept appointments as chaukidars. Till they are paid the equivalent of the ordinary rates of pay it is hopeless to expect a real improvement.

125. No instance of chaukidars having been employed by the police on menial and degrading duties has been reported in any of the districts of this Division. In Nadia complaints of such employment have been made in one or two cases, but in one case the charge could not be proved, and in another on enquiry it was found to be false. It is, however, believed by some officers that in places chaukidars are still so employed by the police, but this abuse, it is observed, will diminish in proportion to the attention paid to it by the inspecting officers.

126. The salaries of chaukidars in this Division vary from Rs. 3 to Rs. 6 a month, the majority of them getting Rs. 4. In all districts, except Nadia, they are now paid regularly. In Nadia it appears that 988 chaukidars

were in arrears from four to six or more months. Writing on this subject, Mr. Garrett, the Officiating Magistrate of this district, observes:—

“I do not think that the four-monthly period should be included in the table of arrears, as chaukidars can only be paid every quarter under the law, and the arrears at the end of the quarter can only be realised within a month.

“Arrears can only count from the fifth month. The law might be amended, as this is a hardship to chaukidars.

“The stupendous total of 988 men in arrears signifies nothing. According to the law there would be only 33 men in actual arrears.”

127. On the whole, the chaukidars are said to have worked well during the year in all the districts of this Division. Some of them were rewarded for arresting offenders and for good service in connection with criminal cases. They have received much attention and many have got an increase of pay. They are also, it is stated, beginning to feel more independent of both the police and the panchayets.

#### XV.—CRIMINAL JUSTICE.

128. As reported in previous years, criminal justice is administered by the Sessions Courts, Stipendiary Magistrates, Benches of Honorary Magistrates, and Honorary Magistrates sitting singly. The total number of cases tried at the Sessions during 1893 was 289 against 271 in the preceding year. Of these, 198, or 68·5 per cent., were convicted compared with 67·9 per cent. in 1892. Taking the districts separately, the percentage of conviction was 68·5 in the 24-Parganas, 69·2 in Nadia, 62·5 in Murshidabad, 71·6 in Jessore, and 69·0 in Khulna, as compared with 70·8, 68·2, 64·7, 55·7, and 77·7, respectively. The best results were obtained in Jessore and the worst in Murshidabad. No explanation of the low percentage has been given by the Magistrate, but it is satisfactory to note that all round there has been some improvement.

129. There were 70 Stipendiary Magistrates in this Division at the close of the year. Of these, 21 were in the 24-Parganas, 19 in Nadia, 8 in Murshidabad, 13 in Jessore, and 9 in Khulna. Of these Stipendiary Magistrates, 50 exercised first class, 14 second class, and 6 third class powers. The number of Benches in this Division was 47 against 43 in the previous year. They were composed of 436 Honorary Magistrates. These were distributed as follows:—

DISTRICT.	Number of Benches.	Number of Honorary Magistrates.
24-Parganas	... 18	184
Nadia	... 12	105
Murshidabad	... 5	81
Jessore	... 8	95
Khulna	... 4	36
Total	... 47	501

130. During the year 1893 Benches were established at Baduria, Taki, and Khurda in the 24-Parganas and at Chanduria in Khulna. Those at Baduria and Taki being established late in the year, no sittings were held during 1893.

131. Of the Benches, 19 exercised second class and 28 third class powers. The number of Honorary Magistrates who were authorised to sit singly was 38. Of these, 3 exercised first class, 27 second class, and 8 third class powers. In Khulna there is now no Honorary Magistrate with power to sit singly, the one vested with such powers having resigned during the year. The attendance of the Honorary Magistrates with a few exceptions was fairly regular, and they promise to play a most useful part in the administration of justice, especially the Magistrates empowered to sit singly. Among these latter Babus Moni Lal Banerji and Preonath Mullick of Alipore in the 24-Parganas are again said to have rendered substantial service. Pandit Rakhal Chandra Tewari of Diamond Harbour and Maulvi Golam Quassim of Basirhat in the same district are also reported to have been punctual and assiduous in the performance of their duties. Another gentleman, Babu Rajani Kanto Ghose, who sat singly at Narail in the district of Jessore, appears to have done good work, and to have materially helped

the Subdivisional Officer. In Khulna the attendance of Honorary Magistrates is said to be on the whole not satisfactory. The general excuse given for bad attendance on the Benches is that only petty and uninteresting cases are made over to Honorary Magistrates to try. This is, however, often unavoidable, as cases which can be disposed of at one or two sittings must be made over to them, as owing to distance and other reasons Honorary Magistrates will not, as a rule, attend two or three times following.

132. The following table shows the number of cases decided by Stipendiary Magistrates as well as by Benches and Honorary Magistrates sitting singly:—

DISTRICT.		Decided by Stipendiary Magistrates.		Decided by Benches and Honorary Magistrates.	
		1892.	1893.	1892.	1893.
24-Parganas	...	11,600	10,229	4,442	3,946
Nadia	...	2,757	2,398	2,223	2,185
Murshidabad	...	2,067	1,606	767	1,178
Jessore	...	2,446	2,682	550	589
Khulna	...	1,687	1,690	435	411
Total	...	20,557	18,605	8,417	8,309

The three first-named districts have shown a decrease for the last three years in the number of cases tried by Stipendiary Magistrates. In Murshidabad there has been a marked increase in the work done by Honorary Magistrates for the same period.

133. The following statement shows the results of trials as regards persons:—

DISTRICT.	PERSONS PUT ON TRIAL.		CONVICTED.		PERCENTAGE OF CONVICTIONS.		REMARKS.
	1892.	1893.	1892.	1893.	1892.	1893.	
1	2	3	4	5	6	7	8
24-Parganas	19,066*	17,736	14,804	13,221	77·6	76·2	* Figures shown in this statement include those for suburbs, whereas in the report for the previous year the district figures exclusive of suburbs were given.
Nadia	6,547	6,067	4,550	3,874	71·2	63·8	
Murshidabad	3,671	3,651	2,195	2,301	59·7	63·	
Jessore	5,020	5,909	2,504	3,293	50·0	55·2	
Khulna	3,580	3,792	1,782	1,967	53·4	51·9	
Total	37,884	37,155	25,925	24,656	68·4	66·3	

The results show a falling off in all districts, except Murshidabad and Jessore, where there has been an improvement.

134. The following table shows the number of witnesses examined during the year compared with the year preceding:—

DISTRICT.	Number of witnesses examined.		Number detained for more than two days.	
	1892.	1893.	1892.	1893.
24-Parganas	24,961	21,579	1,339	1,330
Nadia	11,954	12,365	317	484
Murshidabad	9,508	8,590	861	432
Jessore	14,791	17,281	417	334
Khulna	9,656	10,772	322	283
Total	70,870	70,587	3,256	2,863

The number of witnesses examined has not decreased in the same proportion as the number of cases or of persons put on trial, so it is satisfactory to note that the percentage of detentions is the same as in the previous year, viz. 4·5.

In Nadia there has been a marked increase in the number detained over two days, which should have been explained.

135. The following statement shows the number of remands granted in A form cases during the year under report:—

DISTRICT.	Number disposed of on first day.	NUMBER POSTPONED—							Number pending at the close of the year.
		Once.	Twice.	Three times.	Four times.	Five times.	Six times.	Over six times.	
1	2	3	4	5	6	7	8	9	10
24-Parganas ... ..	6,274	802	378	148	73	54	22	17	24
Nadia ... ..	204	172	167	97	39	23	17	8	...
Murshidabad ... ..	283	255	118	64	28	22	8	10	25
Jessore ... ..	190	197	142	81	35	23	10	11	14
Khulna ... ..	178	143	113	71	38	17	7	13	30
Total ...	7,187	1,569	918	455	213	130	64	59	93

The percentage of cases remanded six times and over to total number of cases disposed of was 1·1 as in the preceding year. With less cases the remands should have decreased, and the increase under columns 6, 7, 8, and 9 in the 24-Parganas, columns 4, 5, 6, 7, 8, and 9 in Nadia, columns 4, 5, 6, 7, and 9 in Khulna are to be regretted. Murshidabad has shown marked improvement.

136. The table below shows the number of reconvictions in the several districts of this Division during the past two years:—

DISTRICT.	1892.	1893.
24-Parganas	194	75
Nadia	60	68
Murshidabad	64	51
Jessore	27	44
Khulna	23	24
Total	368	262

The number of reconvictions shows a large falling off. This occurred chiefly in the 24-Parganas.

137. The following statement shows the amount of criminal fines imposed and realised in the several districts during the past two years:—

DISTRICT.	Imposed.		Realised.	
	1892.	1893.	1892.	1893.
	Rs.	Rs.	Rs.	Rs.
24-Parganas ...	62,302	55,830	56,882	48,944
Nadia ...	19,166	18,866	15,619	13,848
Murshidabad ...	10,146	11,348	10,003	10,169
Jessore ...	14,917	17,664	12,075	16,223
Khulna ...	8,491	16,233	8,603	10,687
Total ...	1,15,022	1,19,941	1,03,182	99,871

There was an increase in the amount of fines imposed in all districts, except the 24-Parganas and Nadia. The increase was more marked in Khulna, the amount imposed being Rs. 16,233 against Rs. 8,491 in the previous year. The amount of fines realised shows a total decrease in the 24-Parganas and Nadia; but the percentage of realisations was especially unsatisfactory in Nadia and Khulna, being 73·4 and 65·8 per cent. respectively. Special efforts must be taken to enforce prompt realisations.

138. During the year under report compensation, amounting to Rs. 50, was paid in four cases of frivolous and vexatious complaints in the Nadia district against Rs. 170 in five cases in 1892. In Jessore the amount paid was Rs. 1,899 compared with Rs. 1,095 in the year preceding. None of the other District Officers have furnished information on this subject.

139. The table below shows the number of cases in which whipping was awarded during the year as compared with the year preceding:—

DISTRICT.	1892.	1893.
24-Parganas ...	124	73
Nadia ...	30	20
Murshidabad ...	9	12
Jessore ...	13	25
Khulna ...	4	7
Total ...	180	137

There was a marked decrease in the 24-Parganas and Nadia, but an increase in the other districts. In eight cases in the 24-Parganas it was inflicted in addition to other punishments.

140. The number of European British subjects brought to trial during the year was 11 compared with 29 in 1892. Of these, five were convicted and six acquitted. All of these cases occurred in the 24-Parganas.

141. From none of the districts of this Division were any cases under Act X of 1891 (an Act to amend the Indian Penal Code and the Code of Criminal Procedure, 1882) reported during the year under review.

#### XVI.—REGISTRATION OF DOCUMENTS.

142. The following table shows the working of registration offices in this Division during the past two years:—

DISTRICT.	NUMBER OF DOCUMENTS REGISTERED.		1892-93.		1893-94.	
	1892-93.	1893-94.	Receipts.	Expenditure.	Receipts.	Expenditure.
1	2	3	4	5	6	7
			Rs.	Rs.	Rs.	Rs.
24-Parganas ...	73,020	70,116	85,582	38,907	76,667	39,464
Nadia ...	22,248	24,062	27,876	17,500	27,707	18,598
Murshidabad ...	11,315	13,399	18,567	8,957	19,420	10,447
Jessore ...	82,920	90,423	80,805	41,864	72,666	45,028
Khulna ...	40,063	44,949	41,197	23,264	40,860	26,505
Total ...	229,566	242,949	2,54,027	1,30,492	2,37,320	1,40,042

The total number of documents registered during the year shows an increase of 13,383 as compared with that in the preceding year. The increase occurred in all the districts, except the 24-Parganas, where there was a decrease, in spite of the fact that an additional sub-registry office was opened at Deyganga in the Barasat subdivision. This decrease was chiefly in instruments of sales and of mortgages of the value of less than Rs. 100 and in bonds, and is accounted for by the fact that in the preceding year owing to widespread agricultural distress an unusually large number of such documents were registered. There was also a noticeable decrease under the head of leases other than perpetual in this district, but it was to a great extent counterbalanced by the increase in perpetual leases.

143. In Nadia the increase occurred under the heads of sales, mortgages, perpetual leases and bonds. Under the first two heads it is attributed to the distress of the middle class landholders and the high price of food-grains and failure of crops during the last few years, and the general unwillingness of money-lenders to advance loans on simple money bonds. The increase under the head of perpetual leases is said to be due to the fact that people in general, even the cultivators, nowadays prefer to have such leases instead of temporary ones. The increase under the head of bonds is ascribed to general poverty and distress among the people owing to failure of crops.

144. In Murshidabad the increase was chiefly under the heads of sales, mortgages and leases. Under the first two heads it is attributed to more lands having changed hands, and to the natural growth of registration consequent on the increased confidence of the public in its advantages. The increase in leases is said to be mainly due to the resettlement of tenures by several zamindars of the district, including the Maharani Svarnamayi of Kasimbazar.

145. In Jessore the increase occurred in the following classes of documents:—

- |                                 |               |
|---------------------------------|---------------|
| 1. Perpetual leases.            | 3. Mortgages. |
| 2. Leases for one year or less. | 4. Bonds.     |

In the first, third, and fourth classes of documents, the increase is attributed to bad harvests and to a rise in the price of food-grains, while in the second class it is said to be due to new settlements. Another cause of increase in the number of perpetual leases is said to be the growing tendency on the part of money-lenders to prefer taking a perpetual lease of the borrower's holding or a part of it instead of a bond for the money lent, the money lent being entered as the premium on the lease. If the borrower repays the money, the *mahajan* returns the lease. If he does not repay, the *mahajan* need not go into court, but retains the lease. In some cases, it is stated, both a bond and a perpetual lease without premium are executed. The cultivator, in order that he may be able to grant a perpetual lease, styles his holding an intermediate tenure.

146. In Khulna the increase in the number of documents registered is attributed partly to scarcity in the early part of the year and partly to the general progress of registration, which is naturally aided by the reduction of fees.

147. The total receipts during the year show a decrease in all districts, except Murshidabad, while the expenditure on the other hand shows an increase everywhere. The falling off in the receipts is due to the reduction during the year of *ad valorem* fees from annas twelve to annas eight for value up to Rs. 50. In the 24-Parganas it is also ascribed to the falling off in the number of registrations. The increase in Murshidabad is accounted for by the large increase in the number of documents registered during the year. The decrease in receipts is so large that there will have to be a very marked increase in the number of registrations, if the receipts are in future to be as high as they have hitherto been.

148. The increase in expenditure is said to be mainly due to a higher scale of commission paid to Sub-Registrars owing to the larger number of documents registered and to the increased allowances paid for their establishments.

149. On the whole the working of the department during the year appears to have been satisfactory.

#### XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND THE LAND REVENUE ADMINISTRATION.

150. The number of estates of each class borne on the revenue-roll of the several districts during the years 1892-93 and 1893-94 are as follows:—

YEAR.	Class I— Permanently- settled estates.	Class II— Temporarily- settled estates.	Class III— Estates held direct by Government.	Total.
1	2	3	4	5
1892-93 ...	9,281	725	251	10,257
1893-94 ...	9,281	722	252	10,255
Difference...	...	—3	+1	—2

There were inter-transfers from one class to another in Jessore and Khulna. Two estates from this Division were transferred to other Divisions. Six estates (Sauderbuns lots) were removed from the revenue-rolls of the 24-Parganas on

account of their non-settlement, being proclaimed as protected forests, and five estates were added, owing to the settlement (a) of three Sunderbun grants, (b) of a piece of land previously occupied by a post office, (c) and of another piece of Government land. Hence there was a decrease of one estate in the roll. One estate in Nadia was released to a private proprietor, and two estates in Murshidabad, formerly struck off the revenue-roll through mistake, were brought on it again, resulting in a net decrease of two estates in the Division.

151. The following table shows the demand, collections, remissions and balances of land revenue during the past two years:—

Year.	Arrear demand.	Current demand.	Total.	Arrear collection.	Current collection.	Total.	Remission.	Balances.	Percentage of collections on demand.
1	2	3	4	5	6	7	8	9	10
1892-93 ...	Rs. 1,02,769	Rs. 50,96,967	Rs. 51,99,726	Rs. 73,153	Rs. 49,78,677	Rs. 50,51,830	Rs. 7,614	Rs. 1,40,282	97.1
1893-94 ...	1,46,919	51,01,468	52,48,387	96,623	49,58,534	50,55,157	25,747	1,67,483	96.3

Compared with the preceding year, the results cannot be considered good, as while current collections and the percentage of collections on demand fell off, remissions and balances increased. The uncollected balance at the close of 1892-93 amounted to Rs. 1,40,282, but the amount now shown as arrear demand is Rs. 1,46,919. The increase is due to additions in the *hustabood jamas* of some of the estates which had a retrospective effect.

152. The percentage of collections in each class is exhibited in the following statement:—

CLASS OF ESTATES.	1892-93.						1893-94.					
	Arrear demand.	Arrear collections.	Percentage of collections.	Current demand.	Current collections.	Percentage of collections.	Arrear demand.	Arrear collections.	Percentage of collections.	Current demand.	Current collections.	Percentage of collections.
1	2	3	4	5	6	7	8	9	10	11	12	13
I.—Permanently-settled estates.	Rs. 17,887	Rs. 17,834	99.7	Rs. 44,42,805	Rs. 44,07,700	99.2	Rs. 33,508	Rs. 33,408	99.9	Rs. 44,41,844	Rs. 43,86,824	98.7
II.—Temporarily-settled estates.	27,813	26,125	93.9	3,00,811	2,85,106	94.8	26,774	25,028	93.5	3,13,177	2,89,925	92.5
III.—Estates held direct by Government.	57,069	29,194	51.1	3,44,351	2,85,871	83.0	66,037	58,127	44.0	3,46,447	2,81,785	81.3
Total ...	1,02,769	73,153	71.1	50,96,967	49,78,677	97.6	1,46,919	96,623	65.7	51,01,468	49,58,534	97.2

The prescribed standard for the collection of arrear demands is cent. per cent. The results in the permanently-settled estates were good, being 99.9 per cent.; those in the temporarily-settled estates were 93.5, or nearly the same as last year, but those in the Government estates were very unsatisfactory, being 44 against 51.1 in 1892-93. In no district was the prescribed standard attained to, the nearest approach being made by Jessore and Khulna, where 96.7 and 95.6 per cent. respectively were collected. On the other hand, the districts of the 24-Parganas and Murshidabad show very poor results. In the previous year also these same districts occupied the same positions. The low percentage in the 24-Parganas is chiefly due to the failure of crops in consequence of excessive rain during the year under report. The tenants suffered considerably and were unable to pay. The raiyats in two Government estates in the Basirhat subdivision also stopped payment—in one on account of an appeal preferred to the High Court against the decision of the Special Judge rejecting the prayer of the raiyats to get the assessment fixed at the recent settlement reduced, while in the other the raiyats applied to the Subdivisional Officer for remission of

their rents on the ground of poverty caused by the failure of crops. That officer after an enquiry rejected their application. They then combined and withheld payment, but steps are being taken to make them pay. A heavy sum was also not realised from certain town lot-holders in the Government estate, Port Canning, who hold the lots at a loss owing to the failure of the place as a port. The question of a general reduction of the rate of rent in this estate is under consideration.

153. The Collector of Murshidabad attributes the short collections to the failure of the rabi crops in many Government estates. The current collections also, for the reasons noted above, were not up to the mark.

154. The collections in the estates under direct management in each district are shown in the statement below:—

*Statement showing the state of collections from khas mahals in the Presidency Division during 1893-94.*

DISTRICT.		Cu		col		lection.		Total	Percentage of current collection on current demand.		Percentage of current collection on current demand in 1893-94.
									10	11	
		Rs.		Rs.	Rs.	Rs.	Rs.				
24-Parganas ...	43	2,60,326	65,149	3,25,475	2,11,304	21,909	2,33,213	81.1	83.6	71.6	83.7
Calcutta	1	13,804	19	13,823	13,823	13	13,836	99.7	99.4	99.7	99.6
Nadia		16,183	2,998	19,171	13,347	2,810	15,957	83.4	87.3	83.3	88
Murshidabad	63	30,016	13,024	43,040	30,659	9,253	39,911	68.8	66.4	68.7	66.8
Jessore	76	4,361	694	5,075	4,060	567	4,626	92.8	81.7	91.3	87.5
Khulna	33	16,677	3,863	20,540	13,583	3,776	17,359	81.4	97.7	84.4	78.9
Total	252	3,46,447	86,637	4,33,084	2,81,785	33,137	3,14,922	81.3		73.8	83.01

The number of estates under direct management during the year under report was 252 with an annual rental of Rs. 3,46,447 against 251 with a rental of Rs. 3,44,351 in the preceding year. The number of estates slightly varied in four districts.

155. The lands of two estates in the 24-Parganas could not be traced, and with the Board's sanction they were removed from the revenue-roll; hence the decrease of two estates in this district. The decrease of one estate in Nadia is due to the transfer on account of temporary settlement of two estates from the list of khas mahals to class II and the transfer of one estate from class II to class III. In Murshidabad there was an increase of two estates in consequence of the entry in the revenue-roll of two diluviated estates formerly struck off through mistake. The increase in Jessore is due to the purchase of two estates by Government at a sale for arrears of revenue. The increase in the rental is owing to the settlement of some vacant holdings and resettlement of others at enhanced rates. Compared with the preceding year, the current demand increased in all districts, except Calcutta and Jessore. The decrease in Calcutta is due partly to the redemption of the revenue of certain holdings and partly to the acquisition of lands for public purposes. That in Jessore is due to the transfer of an estate from class III to class II in consequence of its settlement with the proprietor. The percentage of current collections on current demand reached the fixed standard (90 per cent.) in Calcutta and Jessore. The 24-Parganas and Khulna collected a little over 81 and Nadia over 82 per cent. The poorest result is shown by Murshidabad, where the collections amounted to only 68.8 per cent. With regard to the arrear collections, the results were very bad, except in

Khulna, where they reached 97·7 per cent. They were especially bad in the 24-Parganas, being only 33·6 per cent. Explanations of the bad results have been already given. If the irrecoverable balances were excluded from the current demand, the percentage would show some improvement. Considering the reduced condition of the tenantry in most districts owing to the failure of crops in successive years, the financial result of the management of khas mahals in the Division may on the whole be accepted as fair; but I have no doubt, from what I have seen, that Mr. Westmacott's views, that so many Deputy Collectors are inclined to neglect revenue work for criminal and thus cause these bad results, are correct. The absence of personal responsibility is far more marked in revenue than in judicial work.

156. The remissions granted during the year under report amounted to Rs. 25,747 against Rs. 7,614 in the preceding year. The bulk of the remissions was granted to the tenants of some Government estates in the 24-Parganas, who were unable to pay owing to the destruction of their crops. The remissions are classified thus:—

		Rs.
Nominal remissions	...	4,686
Remissions of grace	...	20,760
Ditto of right	...	301

The nominal remissions were on account of lands wrongly included in Government estates, and in some cases of lands remaining unsettled because of diluvion and desertion. Deaths, desertion of raiyats, relinquishments of holdings, poverty of raiyats, &c., were the causes of remissions of grace, while the remissions of right were granted in certain khas mahals on account of double assessment and diluvion of jôts.

157. There has been no material change either in the agency or mode of management of estates under direct management. The cost of management of khas mahals in the several districts is shown below:—

		Rs.
24-Parganas	...	26,109
Nadia	...	649
Murshidabad	...	2,577
Jessore	...	Nil
Khulna	...	686
Total	...	30,021

158. The amounts expended on the Government estates in this Division for miscellaneous (including agricultural) and sanitary improvements are Rs. 35,212 and Rs. 5,287 respectively, as shown below:—

	Miscellaneous, including agri- cultural im- provements.	Sanitary improvements
	Rs.	Rs.
24-Parganas	.. 32,792	4,148
Nadia	.. 385	680
Murshidabad	.. 938	304
Jessore	.. 518	...
Khulna	.. 579	155
Total	... 35,212	5,287

159. The details of the improvements effected are given below. Rupees 29,972 were spent on the Orphangunge market in the 24-Parganas, on the extension of the revetment wall along Tolly's nala, on the construction of

godowns and drains and on repairs to roads and sheds. Rupees 455 were spent in repairing the tahsil cutcherries in the Diamond Harbour and Basirhat subdivisions and Rs. 822 on repairs of village roads. The re-excavation of the tank in the Subdivisional Officer's residence in Barasat cost Rs. 440. Rupees 648 were spent on the construction of a *pucka* ghat for a tank at Port Canning and Rs. 455 for additional boundary pillars in two Government estates. The construction and repairs of cutcherry houses and roads, sinking of wells, and clearing wells and tanks in certain khas mahals were the improvements effected in Nadia and Murshidabad. In Jessore the re-excavation of the post office tank was completed during the year at a cost of Rs. 318, and a cutcherry house constructed at Rs. 200. The re-excavation of tanks, erection of boundary pillars, and repairs of cutcherry houses disposed of the allotment in Khulna.

160. *Sanitary improvements.*—Rupees 2,984 were expended in filling up a tank in Government estate Panchannogram in the 24-Parganas, Rs. 840 in re-excavating a tank in Port Canning and in clearing jungle and drains in the above estate, &c. The improvements in the other districts consisted of the construction of culverts, the excavation of tanks, the sinking of wells, the clearing of jungle, tanks, &c.

161. Besides the above, Rs. 2,996 were spent in the 24-Parganas and Rs. 2,074 in Murshidabad on agricultural public works. They comprised the construction and repairs of embankments in the former district and the re-excavation of tanks in the latter.

162. No new staples were cultivated in any Government estates in the Division, the raiyats being averse to experiments. In Nadia a small area was sown with wheat, but for want of rain in December and January last the experiment proved a failure. No agricultural improvements or experiments were effected in any district and no new machinery was introduced.

163. In the 24-Parganas 62 schools were maintained in the Government estates at a cost of Rs. 2,034. In Nadia there are five schools, including a night school, situated in the khas mahals, one of which is exclusively for Christian girls, and is supported and managed by the Church Missionary Society. Rupees 343 were allotted to this district, the whole of which was utilised.

164. In Murshidabad nine schools were maintained, of which one was an upper primary with 31 pupils and eight lower primary with 176 pupils, and one girls' school with 21 girls. The total expenditure for maintaining them was Rs. 535, including Rs. 103 expended for purchase of benches.

165. Four primary and two secondary schools were maintained in Jessore at a cost of Rs. 36 and Rs. 34 respectively, and in Khulna 16 stipendiary schools with 447 pupils were maintained at a cost of Rs. 1,703 against 11 with 321 pupils in the previous year. Besides 11 others were paid by results, and one unaided school was kept up in this district.

166. The condition of the raiyats in the khas mahals is reported to be on the whole fairly good, though in parts they suffered from the loss of the winter paddy crops owing to the heavy rainfall during the year. No cases of desertion of raiyats from Government estates are reported from any district.

167. The work of inspection of accounts of Government estates was duly attended to by the Collectors, Khas Mahal Deputy Collectors and Sub-divisional Officers. Mr. Westmacott also examined the accounts of several khas mahals during his tour.

168. The percentage of registration under section 62 of the Land Registration Act in the several districts is shown below:—

DISTRICT.	1891-92.	1892-93.	1893-94.
24-Parganas	3.15	3.9	4.3
Calcutta	5.1	6.9	5.2
Nadia	11.6	8.5	11.07
Murshidabad	4.9	4.3	4.7
Jessore	2.2	2.1	6.06
Khulna	17.7	18.4	20.4
Total	5.1	5.2	6.1

169. Seven hundred and thirty-three estates including shares became liable to sale for non-payment of revenue demands. Of these, 107, or 14·5 per cent., were actually sold against 15·2 in the previous year. The falling off in the percentage and the large exemptions granted by Collectors, who afforded all possible facilities to defaulters to pay up their arrears before the sale days, tend to show that the sale law was not worked with undue rigour. The causes of defaults which brought about sales are disputes among co-sharers, indebtedness of proprietors, and the unprofitable nature of the estates.

170. The following table shows the settlements effected in each district of the Division during the year:—

*Statement showing the settlements effected during the year 1893-94.*

DIVISION.	District.	ORIGINAL SETTLEMENT.		RESETTLEMENT.				SUMMARY SETTLEMENTS.				SETTLEMENT FOR DISPOSAL.	
		Number.	Net revenue.	Number.	Net revenue.	Increase.	Decrease.	Number.	Net revenue.	Increase.	Decrease.	Number.	Estimated revenue.
1	2	3		4	5	6	7	8	9	10	11	12	
Presidency	24-Parganas ...	2	Rs. 85	6	Rs. 952	Rs. 631	Rs. ...	7	Rs. 202	Rs. 2	Rs. ...	8	Rs. 2,090
	Nadia ...	...	...	16	1,785	417	759	...	...	...	...	22	12,809
	Murshidabad ...	...	...	5	1,333	53	312	5	1,051	...	...	16	13,541
	Jessore ...	...	...	7	1,339	349	243	...	...	...	...	5	66
	Khulna ...	...	...	...	...	...	...	...	...	...	...	...	...
	Sundarbans ...	5	4,590	2	604	301	...	5	2,026	...	...	146	11,561
	Total ...	7	4,681	36	6,913	1,761	1,314	17	3,279	2	...	197	30,977

Seven original settlements took place, viz., two in the 24-Parganas and five in the Sundarbans, yielding a net revenue of Rs. 4,681. Resettlements were effected in every district, except Khulna, and the net increase to the revenue demand amounted to Rs. 407. The decrease in Nadia is chiefly attributed to diluvion in all the estates, with the exception of one fishery mahal which was settled at a reduced jama owing to want of competition. That in Murshidabad has not been explained. Seventeen summary settlements were effected during the year against two in the preceding year. The rates adopted in these settlements were generally those fixed in previous settlements.

171. The relations between landlords and tenants continued on the whole to be fairly satisfactory, though manifestations of ill-feelings and strained relations broke out here and there and had to be checked by the timely interference of the local authorities. It is reported from Khulna that the practice on the part of one zamindar of purchasing the rights of under-tenants of another zamindar noticed in the last report gave rise to disputes, though no case of actual breach of the peace came to light. In the Bangaon subdivision in Jessore the relations between certain landlords and their tenants were somewhat strained, the raiyats, it is said, having never paid rent except through the Court. There was, however, no disturbance calling for the interference of the law. In Murshidabad three cases of strained relations between landlords and tenants were reported during the year. In the Sadar subdivision the raiyats of the village Shamnagar murdered the Dewan, a peon, and a muhurir of their zamindar, Mr. Hills, of Patkabari. An additional police force had to be posted in the village at the cost of the raiyats in order to prevent further disturbances. It seems, however, that the quarrel was with the deceased, and not with Mr. Hills. In the second case the raiyats of the zamindar, Babu Gobinda Jeban Hazra, of Panchgram, in the Kandi subdivision, strongly opposed the zamindar's attempt to enhance their rent. There was every likelihood of a breach of the peace, but timely interference prevented it. In the third case the raiyats of Rai Jogendro Narain Raya, of Lalgola, in the Jangipur subdivision, combined together to put pressure on him not to let his zamindari in ijara to Messrs. Jardine, Skinner and Company on the expiry of the term of the present settlement, but to keep it khas.

*Road and Public Works Cesses.*

172. The following table shows the demands, collections, balances, and remissions of cesses in the several districts of the Division:—

DISTRICT.	DEMAND.			COLLECTIONS.				BALANCES.			Deduct remissions.	Net arrear.	Percentage of net balance on gross demand.
	Current.	Arrear.	Total.	Current including previously paid in advance.	Arrear.	Advance for future years.	Total.	Current.	Arrear.	Total.			
1	2	3	4	5	6	7	8	9	10	11	12	13	14
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
24-Parganas ... ..	2,37,880	37,584	2,75,468	2,06,940	34,380	4,043	2,45,371	31,640	3,199	34,839	785	84,064	12'36
Nadia ... ..	1,87,145	8,304	1,95,449	1,41,970	7,589	4,390	1,53,959	15,175	674	15,849	220	15,629	8'45
Murshidabad ... ..	1,46,101	31,110	1,77,211	1,24,395	18,795	5,931	1,49,021	30,726	14,315	35,041	1,018	34,023	19'1
Jessore ... ..	1,85,941	48,378	2,34,319	1,46,530	48,063	6,343	1,94,835	40,411	5,315	45,726	456	45,270	16'3
Khulna ... ..	1,43,320	19,463	1,61,773	1,30,156	16,628	3,600	1,46,384	13,164	3,813	15,979	1	15,978	9'8
Total ... ..	8,09,387	1,44,783	10,14,190	7,46,591	1,18,414	23,795	8,88,980	1,31,116	26,318	1,47,434	2,480	1,44,953	14'2

There has been a considerable increase in the annual cess demand compared with the preceding year. This is especially marked in Nadia, but is shared by all the districts in the Division, and is due to complete revaluations of the districts of Nadia and Murshidabad and partial revaluations in the other districts. The proportionate collections of current demand have fallen off slightly, while those of the arrears show some improvement compared with the preceding year, being 86 and 81·8 per cent. against 86·2 and 78·9 respectively. A large portion of the arrears is due from the districts of Jessore and Murshidabad. The bulk of them is due on account of rent-free tenures, and cannot be realised owing to the difficulty in tracing out the owners and their properties.

173. In the 24-Parganas the increase in the current cess demand is due to the valuations and revaluations of certain estates and tenures having been completed during the previous year, and to the revision of valuation of hāts and fairs under section 79 of the Cess Act.

174. In Nadia the revaluation took effect from 1st April 1893. The cess demand arrived at by the general revaluation of the district amounted to Rs. 1,58,504, of which Rs. 1,359 had to be reduced on objection and appeal. The net demand for realisation was therefore Rs. 1,57,145.

175. In Khulna the valuation and revaluation of 69 tenures and estates sanctioned by the Board were taken in hand in March 1892, and completed in March 1894. This has resulted in an increase of Rs. 17,000 to the annual cess demand of the district.

## XVIII.—ATTACHED ESTATES, INCLUDING COURT OF WARDS.

176. There were altogether six estates under the management of the Court of Wards during the year under report, viz.—

24-Parganas	...	{ Bhowanipur. Baranagar. Jainagar.
Murshidabad	...	Kasimbazar.
Khulna	...	{ Saidpur Trust Estate. Satkhira Estate.

177. A portion of Miss M. D. J. Courjon's estate in the district of the 24-Parganas, consisting only of a house in Calcutta, No. 29, Theatre Road, and the Chanchra road estate in Jessore made over to Government by the late Raya Kali Prosad, zamindar of Bagchar, for the maintenance of the Daitala and Nilganj bridge over the river Bhairab, continue to be managed by the Collectors of those districts. There is nothing special to note in respect to these estates.

178. Of the three estates in the district of the 24-Parganas, Bhawanipur is comparatively large and important, comprising 20 entire revenue-paying estates, 17 portions of estates, 4 patnis and 38 tenures. The affairs of this

estate are in a satisfactory condition. Out of a total demand of Rs. 4,13,413, including current demand of Rs. 1,63,789, a sum of Rs. 1,96,340, being 119·8 per cent. of the current demand, was realised, and Rs. 23,820 remitted during the year, leaving a balance of Rs. 1,93,253. This result is better than that of any previous year since the assumption of the charge of the estate by the Court of Wards. Out of the outstanding balance of Rs. 1,93,253, Rs. 39,400 are reported to be bad and irrecoverable, and of this Rs. 24,105 have since the close of the year been written off under proper sanction. The recovery of Rs. 7,367 is said to be doubtful and disputed, Rs. 8,533 are doubtful but not disputed, and the rest, Rs. 1,37,953, good and are in process of recovery.

179. Rupees 19,000 were spent during the year for the following improvements within the estate, viz., the reclamation of about 1,902 bighas of land, the excavation of four tanks and construction and repair of 12 miles of kutchra roads. Rupees 250 and Rs. 650 were also spent for the support of schools and maintenance of dispensaries.

180. Out of the lands reclaimed by the estate during the last two years, settlement of 3,700 bighas has already been made, and the settlement of a further area of 5,400 bighas is expected to be concluded shortly.

181. A sum of Rs. 32,920 was invested in Government securities, and of Rs. 5,005 in purchase of lands.

182. The condition of the tenantry of this estate is fair.

183. It is satisfactory to notice that the ward, Barada Prosad Rai Chowdhuri, who, as reported in paragraph 220 of the last year's report, has been removed to Bankipore, has shown a marked improvement in his education and conduct under the guardianship of the present tutor-guardian, Babu Jnanendra Lal Roy.

184. As regards the other estates in the district nothing special has been noticed by the Collector. Their management continues to be fair as before.

185. Kasimbazar is the only estate managed in this district. It is the most important charge in the Division and is the property of the minor, Ashutosh Nath Rai. Its collections were not satisfactory during the year. Out of a total demand of Rs. 6,22,515, viz., current Rs. 3,51,491 and arrear Rs. 2,71,024, only Rs. 1,96,739, or 31·6 per cent., on the total demand were collected, leaving a balance of Rs. 4,23,038 after deduction of remission amounting to Rs. 2,738. The percentage has greatly fallen off, being only 31·6 against 53·7 of the preceding year, and 61·3 of the year 1891-92. This is chiefly due to the very heavy loss of crops in pargana Sarail, the largest mahal of the estate, caused by the unusually high flood of the year. The failure of crops in the pargana during 1892-93, as reported in paragraph 222 of the previous year's report, followed by a heavy loss in the year under report, consequent on the high flood of the year, has materially affected the circumstances of the tenantry, and it has necessitated the distribution of agricultural loans and gratuitous relief amongst them. The amounts sanctioned by the Board for the purpose, viz., Rs. 8,000 for tuccavi loan and Rs. 5,000 for gratuitous relief, are being now distributed. The scarcity will, it is hoped, be over in July, when a new harvest of *aus* and *jute* crop is to be gathered.

186. The survey and settlement operations in the pargana which commenced in December 1889 were closed in 1892-93. They effected an assessment of about Rs. 5,20,000 in the rent-roll of the estate, showing an increase of Rs. 1,68,509, or 47·9 per cent. on the old *hustabood*. This assessment has been mainly obtained by the assessment of the excess lands found in the possession of the *raiya*ts, and a very small portion by raising the lower rates of rent to those prevailing in other villages for similar classes of lands with similar advantages. The new *jamabandi* came into force from the 1st of Baisak 1300 B.S. corresponding with April 1893, but errors and omissions having been discovered therein, arrangements have been made under the orders of the Board of Revenue, Lower Provinces, for the correction of the settlement records. The work began on the 18th February last under the personal supervision of the manager of the estate, and is now in progress.

187. A survey of the mahals, situated in the Rangpur, Burdwan, Birbhum and Murshidabad portions of the estate, under the Bengal Tenancy Act, was

sanctioned during the year, but the operations have been postponed owing chiefly, among other reasons, to the financial embarrassment of the estate consequent on the failure of crops in pargana Sarail referred to above.

188. During the year two houses, Nos. 135 and 136, Canning Street, Calcutta, were purchased on behalf of the estate for Rs. 2,30,000. In effecting the purchase, Government securities to the nominal value of Rs. 1,68,000 standing in the name of the minor had to be sold. The investment, however, has proved to be a lucrative one, the houses being let out at Rs. 1,225 a month, or Rs. 14,700 per annum, which yields interest at the rate of nearly  $6\frac{1}{2}$  per cent. on the capital invested. No other material additions were made to the estate during the year.

189. During the year the estate contributed Rs. 5,805 towards the maintenance of schools and pathshalas, and Rs. 9,291 in support of charitable dispensaries established by it in different localities, inclusive of the cost of the maintenance of the Arnakuli Zenana Hospital established at Berhampore. This institution is likely to benefit the public, and is, I find on a recent inspection, doing well and becoming popular.

190. A sum of Rs. 12,228 was also spent during the year on works of improvement, chiefly consisting of excavation and re-excavation of tanks, and partly of construction and repairs of roads and culverts in localities where their want was felt by the tenants of the estate. Rupees 104-12 were expended in horticultural experiments and improvements within the estate.

191. An European tutor has been appointed during the year, and the minor seems to have made fair progress, considering all things. It is a great pity he was not properly taught in his younger days.

192. As the Khagra minors of the Purnea district are living with their mother in Murshidabad, the Collector of the latter district has been directed to look after them and to supervise their expenditure. The estate is being managed from Purnea.

193. Of the two estates in the district of Khulna, Saidpur is a Trust Estate and is managed directly by the Collector of the district. Most of the estate is let out in patni,

Khulna.

the rest being managed khas. The annual demand from the patni mahals is Rs. 1,48,966 and from khas mahals Rs. 35,710. The total demand of the year, including cesses and interest, was Rs. 2,99,044, viz., Rs. 2,20,890 on account of patni and Rs. 78,154 on account of khas mahals. Out of this Rs. 1,78,424, viz., Rs. 1,46,507 from patnis and Rs. 31,917 from khas mahals, were collected during the year, leaving a balance of Rs. 73,723 and Rs. 42,405 after the deduction of remissions amounting to Rs. 660 and Rs. 3,832 respectively. Of the total balance of Rs. 1,16,128, Rs. 70,461 have since the close of the year been collected, and there remains a balance of Rs. 45,668 on account of the year. The percentage of total collections on total demand was 59.66 per cent.

194. The decrease in collections on account of the patni mahals is reported to be due to the fact that the second patni sale-day falls outside the year and the patnidars need not pay till then. As no compulsory steps for realisation can be taken before, necessarily a large balance remains outstanding every year. The khas mahal collections were bad partly owing to unavoidable changes in the tahsil establishment at Daulatpur at the latter end of the year, which is the season for collections, and partly to the incompetence of the newly-appointed tahsildars and of the naib who has since resigned. The Collector has since submitted a proposal for a revision of establishment resulting in a saving, and this has been sanctioned. It is hoped that with this establishment the affairs of the estate will be better managed.

195. The estate contributes Rs. 60,000 per annum to the Mohsin Endowment Fund. During the year under report Rs. 45,000 only could be paid. The balance has been paid since the close of the year. The estate also contributes Rs. 2,245 and Rs. 698 annually to schools and dispensaries situated within its zamindari in the districts of Khulna and Jessore.

196. The affairs of the Satkhira estate continued to be in the same bad state as last year. The Court is in charge of a fractional share only, and the difficulties of management, necessarily very great, have been increased by the incompetence of the manager. To this incompetence is due the fact that no

figures concerning the estate could be obtained. The manager has since resigned and a new officer, who has only very recently taken charge, has been appointed in his place.

## XIX.—EXCISE.

197. The following statement shows the total excise revenue realised in each district of this Division during the past two years :—

DISTRICT.	NUMBER OF LICENSES.		Increase.	Decrease.	REVENUE.		Increase.	Decrease.
	1892-93.	1893-94.			1892-93.	1893-94.		
1	2	3	4	5	6	7	8	9
					Rs.	Rs.	Rs.	Rs.
24-Parganas ...	1,097	1,132	35	...	4,18,610	4,29,263	10,653	...
Calcutta ...	1,136	999	...	137	24,99,497	25,72,405	72,908	...
Nadia ...	249	262	13	...	1,16,547	1,20,239	3,692	...
Murshidabad ...	318	424	106	...	1,56,561	1,55,400	...	1,161
Jessore ...	355	308	...	47	90,870	88,170	...	2,700
Khulna ...	141	143	2	...	75,575	75,377	...	198
Total ...	3,296	3,268	156	184	33,57,660	34,40,854	87,253	4,059
Net decrease ...		28	Net increase ...		83,194			

It is satisfactory to observe that though there has been a decrease of 28 licenses the revenue has continued to expand throughout the Division, though three of the six districts show a decrease. Of those, one (Murshidabad) also showed a falling off last year. The net increase has been Rs. 83,194. To this improvement Calcutta contributed Rs. 72,908, or 87·6 per cent., a satisfactory result, especially as it has followed an increase of Rs. 2,24,513 in the preceding year. Almost the whole of the increase was obtained from country rum and imported liquor. The large expansion of the revenue from rum in the preceding year was, as stated in the last report, due to the prohibition of the import of duty-paid rum into Bengal. This prohibition was withdrawn by Government in February 1893 on the representation of the exporters and the Government of the North-Western Provinces, but the export has nevertheless continued as before, full duty being paid in Calcutta instead of in the place of export. The increase from imported liquors is due to the enhancement of the fees for wholesale and retail licenses from Rs. 50 and Rs. 600 to Rs. 300 and Rs. 1,000 respectively in Calcutta. The increase in the other two districts, viz. the 24-Parganas and Nadia, was principally due to the rise in the rate of duty on ganja levied from 1st April 1893, and to high competition in the former district for the settlement of opium shops. The decrease in the revenue in Murshidabad, Jessore, and Khulna is attributable to a smaller consumption of country spirits owing to the straitened circumstances of the people caused by successive bad harvests. In Murshidabad the high selling price of opium affected the sales prejudicially. Consumers are said to have obtained their supply from other districts where it is sold cheaper.

198. The statement below shows the results under each head of exciseable articles during the last two years:—

Exciseable articles.	NUMBER OF LICENSES.		Increase.	Decrease.	REVENUE.		Increase.	Decrease.
	1892-93.	1893-94.			1892-93.	1893-94.		
1	2	3	4	5	6	7	8	9
					Rs.	Rs.	Rs.	Rs.
1. Country spirits.	368	383	15	...	14,41,716	14,49,454	7,738	...
2. Rum ...	11	10	...	1	4,16,481	4,34,472	17,991	...

12. Ganja ...	384	394	10	...	4,42,480	4,56,449	13,969	...
13. Opium ...	653	708	55	...	6,55,632	6,63,282	7,650	...
14. Miscellaneous.	31	...	...	31	1,232	1,535	303	...
Total ...	3,296	3,260	118	146	33,57,660	34,40,854	94,941	11,747
Net decrease ...		28	Net increase ...		83,194			

Except the three exciseable articles, viz. madat, chandu, and "methylated spirits," all heads show an increase in revenue, far the largest being under "imported liquor." The fluctuations under the principal heads are explained below.

199. *Country spirits*.—In 1892-93 the increase in the revenue from this article amounted to Rs. 43,470. During the year under report the increase amounted to Rs. 7,738 only, four districts, viz. the 24 Parganas, Jessore, Khulna, and Murshidabad, showing a decrease. As explained before, the comparative poverty of the people during the year under report on account of bad harvests stood in the way of increased consumption. In Calcutta there was an increase of Rs. 11,935. Looking to the last triennial settlement, in which there was a keen competition among the vendors, and the result of the year's administration, the trade in this article here appears to have continued to be profitable.

200. *Rum*.—Calcutta is the only district where rum was imported during the year. The increase in this district of Rs. 18,041, though not very great, is still remarkable, considering the fact that this article showed an increase of Rs. 1,90,563 in the preceding year. The payment of full duty on this article in Calcutta instead of at the place of export in the North-Western Provinces accounts for the improvement.

201. *Imported wines*.—As observed before, enhancement of the fees for wholesale and retail licenses for the sale of these wines in Calcutta chiefly brought about an increase in revenue. It is said that the petty wholesale and retail dealers, who chiefly deal in cheap foreign liquor, have found their occupation gone, being unable to pay the enhanced fee, and the whole trade has, as was to be desired, concentrated in the hands of respectable and substantial tradesmen.

202. *Ganja*.—There was an increase in the revenue in all districts owing to better prices being obtained at the time of settlement and the enhancement of the rate of duty. Consumption shows a decrease, which is a subject of congratulation, owing to the enhancement of price and to a smaller quantity having been exported to Mauritius. The Collector of Nadia reports that dearness of food and illicit dealings are the causes of decreased consumption.

203. *Opium*.—In the majority of the districts there was an increase in the revenue due to the settlement of certain shops at enhanced fees. In some districts consumption fell off owing to the reduced circumstances of the people. The Collector of Murshidabad suspects that opium smuggling is carried on in his district, but he has been unable to procure a conviction in any case. As stated already, consumers of opium in this district obtain their supply from other places at a cheaper price. As stated in the preceding report, the demand for opium in Calcutta is largely met by illicit means, both contraband and duty-paid opium being systematically imported here from Bihar and the North-Western Provinces. The Collector says that the complete eradication of smuggling is impossible. The temptations are very great, and the facilities and ease with which opium can be transmitted and passed from hand to hand are enough to induce persons to brave the chances of detection and punishment. The illegal trade is said to flourish with impunity and baffles the vigilance and scrutiny of the excise and police officers.

204. *Madak and chandu*.—The decline in the revenue under these two heads is apparently due to the prohibition of smoking these drugs on the premises of the shops. This has been productive of more harm than good. It has led to a decrease of revenue with no corresponding advantages, as the effect has been to start private smoking dens instead of public ones in many places. The decrease under the head “country-made methylated spirits” is said to be due to heavy increase in the import of foreign methylated spirits. The cause of this increase has not been satisfactorily accounted for.

205. The excise administration in the Division has on the whole been satisfactory. In Calcutta it has been attended with marked success. Not only has there been an increase of revenue, but this increase (continued from the previous year) has been accompanied by a decrease in the number of licenses, and in some cases, *e.g.* ganja, by a decrease in consumption.

206. There has been no change in the protected area, nor did anything of importance requiring special notice occur during the year. The sub-charchitta system in force in Backergunge was introduced in the 24-Parganas in August 1893.

207. The following table compares the consumption of salt in the two saliferous districts of this Division during the past two years:—

DISTRICT.	1892-93.	1893-94.	Increase.	Decrease.	REMARKS.
1	2	3	4	5	6
	Mds.	Mds.	Mds.		
24-Parganas ...	1,58,947	1,67,789	8,842	...	
Khulna ...	1,13,055	1,18,671	5,616	...	
Total ...	2,72,002	2,86,460	14,458	...	

There was an improvement in both the districts compared with the preceding year, though the decrease of that year has not been fully made up, and this was prevalent throughout every quarter of the year in both districts, except during the fourth quarter in the 24-Parganas, when there was a slight decrease. The Collector of this district ascribes the increased consumption to the good harvest collected during the year and to increased activity displayed by the police in enforcing the penal clauses of the Salt Act. The Collector of Khulna observes that the figures show a very slight increase over those of

1891-92, when the sales amounted to 1,18,038 maunds, and that consumption during the year under report may be considered to be about the normal.

208. The number of cases instituted for offences against the salt laws is shown below :—

		1892-93.	1893-94.	Increase.
24-Parganas	...	137	412	275
Khulna	...	30	42	12

Both the Collectors attribute the increase to greater activity and vigilance of the police officers in detecting cases. Mr. Collier, the Collector of the 24-Parganas, says that in the south of the district, where there is salt water close to every house, the temptation to manufacture salt is so strong that it can only be kept in check by constant raids on the part of the police, and adds that "this is not a desirable state of things, but apparently there is no help for it as long as the duty on salt is in force."

209. The table below shows the quantity of salt confiscated and the fines and forfeitures realised and rewards paid in each district during the two years :—

DISTRICT.	QUANTITY OF SALT CONFISCATED.		FINES AND FORFEITURE REALISED.		REWARDS PAID.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7
	Mds. s.	Mds. s.	Rs.	Rs.	Rs.	Rs.
24-Parganas ...	20 24	39 27	537	1,740	887	877
Khulna ...	9 26	18 15	134	207	67	156
Total ...	30 10	58 2	671	1,947	954	1,033

The quantity of salt confiscated in each district was nearly doubled. Nearly Rs. 800 adjudged as rewards remained unpaid in the 24-Parganas at the close of the year, as cases in which they were awarded were only decided in the latter part of the year. The Collector reports that, as an encouragement to the police and informers, the entire amount of the fines and forfeitures has been invariably distributed as rewards. In Khulna the rewards paid amounted to Rs. 156 against Rs. 67 disbursed in the preceding year. The Collector says that rewards have been paid in all cases tried under sections 16 to 19 of the Salt Act.

#### XX.—STAMPS.

210. The following table shows the result of the administration of the stamp revenue in this Division during the year as compared with that of the preceding year :—

YEAR.	RECEIPTS.				CHARGES.			REMARKS.
	Sale of court-fee stamps, including plain papers used with such stamps.	Sale of non-judicial stamps.	Miscellaneous receipts.	Total.	Refunds.	Other charges.	Total.	
1	2	3	4	5	6	7	8	9
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
1893-94 ...	27,83,967	15,44,286	10,133	43,38,386	76,667	47,697	1,24,364	
1892-94 ...	26,83,697	15,77,464	8,898	42,69,059	74,067	46,527	1,20,594	
Increase	94,270	12,682	...	44,088	...	880	...	
Decrease	...	...	2,550	...	2,600	...	1,770	

The net increase was therefore Rs. 46,458.

211. As in the preceding year, the sale of both judicial and non-judicial stamps shows an increase, Calcutta contributing the largest share in the Division. The income from this district amounted to nearly 23½ lakhs. The revenue from the other districts is shown below:—

	Rs.
24-Parganas	6,71,647
Nadia	3,34,232
Murshidabad	2,66,264
Jessore	4,26,724
Khulna	3,16,490

212. As regards judicial stamps, there was an increase in two districts, viz. Calcutta and Murshidabad, and a decrease in the others. The increase in Calcutta is ascribed to the payment of nearly Rs. 45,000 for probate duty in respect of the estate of the late Sir William Mackinnon. The improvement in Murshidabad is possibly due to an increase of civil litigation. The decrease in sales in Nadia, Jessore, and Khulna is on account of the institution of a smaller number of probate and certificate cases and of civil and criminal suits generally. The decline of civil litigation is attributed to the reduced circumstances of the people caused by bad harvests. The decrease in the 24-Parganas was only nominal.

213. Except in the 24-Parganas, where the decrease was small, there was an increase in the sale of non-judicial stamps in all districts. The high price of food which led many cultivators to contract debts led to the execution of a large number of deeds. This helped the sale to a certain extent. The sale of receipt stamps shows a marked improvement, especially in Calcutta, which is attributed by the Collector mainly to the severity with which unstamped receipts and brokers' notes are dealt with by his office. The briskness of the jute trade has also contributed towards this increase. The increase in the other districts is due to a stricter observance of the rules requiring shopkeepers and *mahajans* to affix receipt stamps to their accounts.

214. The following statement shows the result of the action taken by the civil and revenue officers and the prosecutions instituted for infringement of the stamp laws:—

YEAR.	ACTION TAKEN BY CIVIL COURTS ON UNSTAMPED OR INSUFFICIENTLY STAMPED DOCUMENTS.		ACTION TAKEN BY COLLECTORS ON UNSTAMPED OR INSUFFICIENTLY STAMPED DOCUMENTS.		PROSECUTIONS INSTITUTED FOR INFRINGEMENT OF THE STAMP LAWS.					REVENUE.
	Number of cases.	Duty and penalty levied.	Number of cases.	Duty and penalty levied.	Number of cases.	Persons brought to trial.	Convicted.	Fines imposed.	Rewards paid.	
1	2	3	4	5	6	7	8	9	10	11
1892-93	208	Rs. 2,325	568	Rs. 8,115	123	110	98	Rs. 1,082	Rs. 273	
1893-94	178	1,532	474	6,334	73	72	60	755	265	
Increase	...	...	...	...	...	...	...	...	...	
Decrease	30	793	94	1,781	50	38	38	327	108	

There was a decrease under all the heads during the year under review, Murshidabad alone showing an increase. In the preceding year a very large number of contracts relating to District Boards were impounded and dealt with under section 39 of the Stamp Act in Calcutta. The decrease in Nadia is attributed to a stricter observance of laws by the people. Similar incidents in 1893-94 mainly account for the falling off, but poor success was obtained in the prosecution of cases, the results being bad in Nadia. Rewards also were not disbursed with sufficient liberality. The attention of Collectors has been drawn to this important point. The administration of the stamp revenue in this Division was on the whole satisfactory.

## XXI.—INCOME-TAX.

215. The subjoined table shows the gross demand, remission, net demand, collection and balance of income-tax in the several districts of this Division, including Calcutta, during the year 1893-94:—

DISTRICT.	Gross demand.	Remission.	Net demand.	Collection.	Balance.	Collection in the year 1892-93.	DIFFERENCE BETWEEN COLUMNS 5 AND 7.				REMARKS.
							Increase.	Decrease.	Percentage of increase.	Percentage of decrease.	
1	2	3	4	5	6	7	8	9	10	11	12
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	...	...	
24-Parganas ...	81,686	5,693	75,993	68,780	7,213	73,941	...	5,191	...	7	
Calcutta ...	19,68,813	77,479	18,91,334	17,70,462	1,20,872	17,21,665	48,767	...	2·8	...	
Nadia ...	59,000	1,071	48,928	48,778	157	44,378	4,406	...	10·	...	
Murshidabad ...	57,720	1,008	56,712	56,483	227	55,094	1,459	...	2·6	...	
Jessore ...	44,142	2,270	41,872	41,104	768	40,438	670	...	1·6	...	
Khulna ...	24,234	1,834	22,400	21,070	1,330	21,735	...	665	...	3·1	
Total ...	22,36,601	89,418	21,47,183	20,16,045	1,30,538	19,67,189	49,446	...	2·5	...	

The gross demand amounted to Rs. 22,36,601 against Rs. 21,27,000 in the preceding year, showing an increase of Rs. 1,09,601, or 5·1 per cent. The increase occurred in all the districts, except the 24-Parganas and Khulna, which showed a decrease of Rs. 4,681 and Rs. 584 respectively as compared with the preceding year, but it was principally in Calcutta, where it amounted to Rs. 1,08,000.

216. The percentage of remission on the gross demand was 4· against 3·6 in the previous year. The figures for each district as compared with the previous year are shown below:—

	1893-94.	1892-93.
24-Parganas ...	6·9	2·6
Calcutta ...	3·9	3·7
Nadia ...	2·1	2·005
Murshidabad ...	1·8	1·4
Jessore ...	5·1	5·5
Khulna ...	5·3	3·3

The percentage exceeded 5· in the 24-Parganas, Jessore, and Khulna. The high percentage in the 24-Parganas is said to be mainly due to the change in the circumstances of the assessee since the date of assessment. In Jessore it is due to the decline of business owing to the repeated failure of crops during the past two years, and in Khulna it is chiefly attributed to the fact that the original assessments were not carefully made by the assessor.

217. The total number of objections filed during the year was 4,332 against 3,405 in the preceding year. The following table shows the percentage of objections to assessments in the several districts compared with the previous year:—

	1893-94.	1892-93.
24-Parganas ...	17·4	8·8
Calcutta ...	11·3	9·5
Nadia ...	10·3	9·4
Murshidabad ...	9·1	6·5
Jessore ...	14·7	14·3
Khulna ...	15·9	13·1

It will be seen that the percentage of objections increased in every district. In the 24-Parganas the increase is said to be due to the fact that individual notices on post-cards were issued to all the assessee in the year under notice. In Jessore the majority of the objectors were petty money and paddy lenders whose business suffered much owing to the prevailing high price of food-grains. In the remaining districts the increase is attributed chiefly to enhanced assessments made by the assessing staff.

218. The net demand amounted to Rs. 21,47,183 against Rs. 20,50,106, showing an increase of Rs. 97,077, or 4·7 per cent. Taking the districts

separately, there was a decrease in the final demand in the 24-Parganas and Khulna, which amounted to Rs. 8,079 and Rs. 1,236 respectively, while in the remaining districts there was an increase of Rs. 1,06,392, as shown below:—

			Rs.
Calcutta	...	...	99,703
Nadia	...	...	4,528
Murshidabad	...	...	1,284
Jessore	...	...	877
Total			1,06,392

The increase was noticeable in Calcutta and Nadia, the percentages being 5·6 and 10·2 respectively on the final demand of the preceding year. Mr. Fiddian, the Collector of Jessore, observes on the subject: "The fact that in spite of some unfavourable circumstances arising out of the repeated failure of crops for the last two years and the consequent straitened circumstances of the people, the final demand not only did not fall off, but made an appreciable advance, is a satisfactory feature of the administration." The falling off in the 24-Parganas is attributed partly to the decline of the sugar and castor oil manufacturing business and partly to the failure of jute crops and the damage done to the fisheries in the salt-water lakes and to the brick-burning concerns by the heavy rains in the early part of the year. The decrease in Khulna is mainly due to the depression in trade owing to the failure of crops in 1892-93.

219. The percentage of collections on the net demand was 93·9 against 95·9 in the preceding year. The percentage in each district was as follows:—

			1893-94.	1892-93.
24-Parganas	...	...	90·4	87·9
Calcutta	...	...	93·6	96·09
Nadia	...	...	99·6	99·9
Murshidabad	...	...	99·6	99·3
Jessore	...	...	98·1	98·6
Khulna	...	...	95·8	94·4

The percentage was more than 95 in every district, except the 24-Parganas and Calcutta. In the 24-Parganas the low percentage of collections is attributed partly to the heavy arrears under Part I, chiefly due from the European employes of local mills, and partly to the fact that assessments were made too late to admit of any legal steps being taken for recovery of the dues before the expiry of the year. The short collections in Calcutta are said to be due to the fact that the assessments were not completed till the end of March last.

220. The incidence of the tax, excluding Calcutta, was Re. 1 to every 30 persons, and in Calcutta Re. 1 to every four persons as in the previous years.

221. As regards complaints, the Collector of Khulna reports that while on tour he everywhere received complaints that the assessor did not see the assesses, and that the first notice they received of assessment was the attachment of their property. In the other districts no complaints against the working of the Act were brought to notice other than those embodied in the objections.

222. There was no apparent change in the public feeling towards the tax which continues to be unpopular. The hardship is most felt by the assesses under the lowest class to which most of the defaulters belong. The possibility of the minimum taxable limit being raised to Rs. 1,000 has excited much interest among the educated class of the community.

223. From what I have seen in appeal cases, I am not sure that sufficient care is taken by the assessors in ascertaining the reasons for enhanced assessments. These seem to be often raised without any satisfactory reason being adduced. Profits of shops and of traders are often exaggerated by people out of ignorance or malice, and although it is the business of assesses to keep proper accounts, the absence of such accounts should not be taken as grounds for enhancement of the tax, though it supplies *prima facie* good grounds against any reduction of the same.

## XXII.—MONETARY ARRANGEMENTS.

224. The table below shows the receipts and disbursements of the sub-divisional treasuries during the past year as compared with those of the preceding year :—

DISTRICT.	RECEIPTS.		DISBURSEMENTS.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas ... ..	7,01,564	7,48,739	6,81,597	7,44,301
Nadia ... ..	9,42,649	8,60,220	9,14,149	8,70,933
Murshidabad ... ..	5,77,714	7,60,754	5,72,183	8,26,673
Jessore ... ..	6,34,866	6,23,897	6,31,094	6,29,635
Khulna ... ..	8,73,771	8,80,722	8,45,159	8,28,224
Total ... ..	37,30,564	38,74,332	36,44,182	38,99,766

The figures given for the 24-Parganas show the transactions of the sub-treasuries at Barasat, Basirhat, and Diamond Harbour only, those at Barrackpore and Dum-Dum having been abolished during the year, and the figures given for Murshidabad show the transactions of the Jangipur and Kandi sub-treasuries only, the sub-treasury at Lalbagh having been closed from 1st July 1892.

225. It will be seen that there was an increase both in the total receipts and disbursements during the year compared with those of 1892-93. The increase as regards the receipts occurred in the 24-Parganas, Murshidabad, and Khulna, and as regards the disbursements in the 24-Parganas and Murshidabad only. In the 24-Parganas there was a large increase both in the receipts and disbursements at Barasat, which is ascribed to a large portion of the transactions of the two abolished sub-treasuries having been transferred there. There was also a considerable increase in the disbursements at Basirhat, which is said to be due to an increase in the transactions relating to civil deposits.

226. In Murshidabad the subdivision of Lalbagh having been abolished, the figures for 1892-93 differ from those shown in last year's report. In the two other subdivisions there was an increase in receipts as well as in payments. In Jangipur the increase is said to be solely due to the payment of supply bills and telegraphic orders of payment issued by the Accountant-General, Bengal, for which a larger remittance was made to this subdivision. In Kandi the increase is said to represent ordinary fluctuations, and no ostensible cause is assigned for it.

227. In Khulna the increase in the receipts was small and is said to be chiefly due to the fact that much of the forest revenue was paid in at the sub-treasuries.

228. In Nadia and Jessore, on the other hand, there was a decrease both in receipts and disbursements. In the former district the decrease in receipts is attributed partly to the decreased sale of stamps and to the fact that fewer and smaller remittances were received from other districts. The decrease in the disbursements is said to be due to a falling off in payments under the heads "Judicial deposits" and "Public Works Department."

229. In Jessore the decrease both in receipts and disbursements occurred chiefly at Jhenidah and Narail. At the former sub-treasury the decrease in receipts is ascribed to the decrease in the receipts from the civil courts, the absence of the recovery of agricultural loans which had been fully paid up in the previous year, and to the payment of income-tax by the traders at Kotechandpur direct to the Sadar treasury. The decrease in receipts at Narail is said to be due to a diminution in the stamp and excise revenue. The

decrease in the disbursements, which include remittances to the district treasury, is said to be due to the decrease in the receipts.

230. The following table shows the working of the Post Office Savings Banks during the past two years in the districts of this Division :—

DISTRICT.	AMOUNT DEPOSITED.		AMOUNT WITHDRAWN.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas ...	5,99,299	6,13,323	5,17,345	6,57,955
Nadia ...	3,29,033	3,45,300	2,70,704	2,60,514
Murshidabad ...	1,56,486	1,86,310	1,22,157	1,40,653
Jessore ...	1,94,081	2,01,670	1,37,205	1,67,595
Khulna ...	1,27,328	1,22,450	1,02,668	98,016
Total ...	14,06,227	14,69,053	11,50,079	13,24,733

It will be seen that in the 24-Parganas, Murshidabad, and Jessore there was an increase both in the amount deposited and the amount withdrawn. In Nadia the amount deposited shows an increase, while there was a decrease in the amount withdrawn. In Khulna both accounts show a decrease. No explanations have been furnished by the Collectors of the 24-Parganas, Nadia, and Murshidabad regarding the fluctuations in their districts. The increase in Jessore is attributed to the fact that the people are becoming more and more familiar with the advantages and the security afforded by the system. Its benefits are said to be understood even by domestic servants who have begun to lodge their savings in the bank. The improvement is satisfactory, but the large drawings show that the people were not very prosperous generally. In Khulna the decrease in the deposits is said to be probably due to the scarcity in the early part of the year which reduced the savings. The decrease in the withdrawals, it is observed, cannot be explained.

231. The table below shows the amount of money-orders issued and paid in the districts of this Division during the past two years:—

DISTRICT.	ORDERS ISSUED.		ORDERS PAID.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas ...	29,48,339	31,92,744	22,14,565	25,92,296
Nadia ...	8,21,500	8,63,131	14,29,414	15,00,960
Murshidabad ...	7,86,335	8,50,505	Not furnished by the Postal Department.	
Jessore ...	8,52,348	7,78,924	8,15,783	9,39,463
Khulna ...	7,76,749	8,62,196	5,63,900	5,02,506
Total ...	61,85,271	65,47,500	50,23,662	55,34,225

The above statement shows that in the 24-Parganas and Nadia there was an increase both in the amount of money-orders issued and paid. In Murshidabad and Khulna there was an increase in the amount of the orders

issued, while the amount of money-orders paid in Khulna shows a decrease. The amount of orders issued in Jessore shows a decrease, while the amount of orders paid shows a large increase as compared with 1892-93. The increase in the 24-Parganas and Murshidabad has not been explained; that in Nadia is said to be due to the better appreciation of the system by the public in general. In Jessore the large decrease in the value of orders issued is to a certain extent attributed to the high prices of food-grains, which, by rendering living more expensive, left less for remittance to home and friends. I doubt, however, whether there are very many foreigners living in the Nadia district. The increase in the value of orders paid is said to be due to the brisk sugar trade in the last quarter of the year. As regards Khulna the increase of money-orders issued is said to be probably due to the development of the system in general, but the Collector has not been able to give any definite opinion on the subject, having no means of examining the figures in detail. The decrease in the value of orders paid is said to be perhaps due to the dullness of the rice trade early in the year in the Bagerhat subdivision.

232. The table below shows the receipts and issues of currency notes in the districts of this Division during the past two years:--

DISTRICT.	1892-93.		1893-94.	
	Received.	Issued.	Received.	Issued.
1	2	3	4	5
	Rs.	Rs.	Rs.	Rs.
24-Parganas	24,96,640	22,10,660	29,20,260	28,11,400
Nadia ...	12,08,925	12,43,720	8,40,180	8,90,755
Murshidabad ...	11,57,685	11,67,600	12,30,395	12,88,990
Jessore ...	7,91,225	7,70,050	6,17,450	7,32,070
Khulna ...	4,70,170	4,66,000	3,57,990	4,03,025
Total ...	61,24,645	58,58,030	59,66,275	61,26,240

In the 24-Parganas and Murshidabad there was an increase both in the receipts and issues of currency notes, while all the other districts show a decrease. No explanation has been furnished regarding the large increase in the 24-Parganas. That in Murshidabad is said to be due to the supply of notes of lower denominations from the Currency Office for the payment of salaries to officers and to the remittance of surplus notes for higher values to the reserve treasury at Calcutta. It is also stated that the payment of land revenue is generally made in notes by the big zamindars in this district, and that the Maharani Svarnmayi of Kasimbazar generally obtains, by paying currency notes, remittance transfer receipts on account of land revenue due from her for estates lying in other districts. The decrease in Nadia has not been explained. It is stated that of Rs. 8,90,755 worth of currency notes issued from the treasury in this district, Rs. 3,30,540 were remitted to the reserve treasury and Rs. 5,60,215 paid to the public. In Jessore the decrease in the receipts is said to be apparently due to the restriction imposed by the Accountant-General, Bengal, in regard to the issue of notes of higher value, except for the payment of salaries and pensions. The decrease in the issues is also ascribed to the same cause, as also to the larger remittance to the reserve treasury. The decrease both in the receipts and issues of currency notes in Khulna is said to be chiefly due to the money-order system becoming year by year more and more popular.

233. The supply of copper coins was sufficient everywhere to meet the demands of the public.

## XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

234. The Eastern Bengal State Railway, including branches to Budge-Budge, Canning, and Diamond Harbour, runs for 124½ miles in the 24-Parganas district. The proposal to construct a stream tramway from Barasat to Basirhat is still under consideration of the District Board.

235. In Nadia the scheme for the construction of a steam tramway from Ranaghat to Krishnagar *via* Santipur, which was under the consideration of Government, has been approved of in March last, with the proviso that the line should give way to a railway in the event of its being decided hereafter to make a railway between Ranaghat and Krishnagar. Government has also expressed its willingness to make over to the District Board for the purpose the embankment of the abandoned Ranaghat-Bhagwangola Railway on condition that the surplus profits of the tramway in excess of 4 per cent. are divided equally between the State and the owners of the tramway.

236. In Murshidabad the Azimganj and Nalhati branch was taken over by the East Indian Railway from 1892. The Company is acquiring 34 bighas of land for an extension of the riverside sidings of the Azimganj station.

237. In Jessore and Khulna no new railways were constructed during the year. The portions of the Bengal Central Railway which pass through those districts were maintained.

238. In the 24-Parganas the circular canals (10 miles in length) and Tolly's nala, including Kaorapuker khal (37 miles), were maintained at a cost of Rs. 42,838 during the year against Rs. 43,231 in the previous year, while the gross revenue from tolls in these two canals was Rs. 4,07,471 against Rs. 4,63,994 in 1892-93. The Sunderbuns channels yielded a gross income of Rs. 5,495 from tolls against Rs. 4,955 in the year preceding. There are also two khals of an aggregate length of 17 miles in this district. That between Mograhat railway station and Jainagar is navigable all the year round and is in fair condition. No expenditure was incurred on it during the year. The Sorisa khal is navigable only in the rains. A sum of Rs. 375 was spent for clearing silt from this khal.

239. A sum of Rs. 35,615 was spent in maintaining 220 miles of schedule D and two miles of tuccavi embankments against Rs. 30,915 in the previous year. These are reported to be efficiently maintained. Rupees 10,875 were spent in constructing new sluices and retired lines of embankments.

240. There are 68 drainage and irrigation sluices, of which 46 are maintained by Government, 4 by the Calcutta Corporation, and 18 by the zamindars and raiyats concerned. All these sluices are reported to be in good order. The Churial khal drainage works consisting of a drainage channel (9½ miles long) effected the drainage of 134 villages covering an area of nearly 31 square miles.

241. During the year 22 cuts were allowed in different places in the embankments, of which 20 were for drainage and 2 for irrigation purposes. Besides 10 surreptitious cuts were made in the embankments, but the offenders were not detected.

242. The District Board spent during the year Rs. 16,755 on original works, which consisted mostly in improving roads, Rs. 1,348 in making sanitary arrangements in the fairs at Sagur and Hurwa. This amount has since been realised from the proprietors. They also spent Rs. 465 on improving the drainage of some of the culverts on the Grand Trunk Road, Rs. 8,200 in re-excavating tanks at Hurwa and Nowra, Rs. 1,039 in improving the drainage of the Soonti nadi, and Rs. 2,181 on arboriculture.

243. In Nadia the District Board spent Rs. 3,503 on original works, viz., roads and inspection bungalows, Rs. 1,044 on the construction of wells and excavation of tanks, and Rs. 860 on arboriculture.

244. In Murshidabad the District Board spent Rs. 12,935 on original works, viz., roads, buildings, bridges and culverts. An iron bridge across the Jibanti river was completed during the year at a total outlay of Rs. 4,975. A sum of Rs. 727 was spent on constructing two *mar* boats to facilitate communication, Rs. 1,363 on constructing wells and excavating tanks, Rs. 510 on improving and maintaining certain drainage cuts, and Rs. 248 on arboriculture.

245. In Jessore the District Board spent Rs. 923 on petty original works. Rs. 797 on excavating tanks, Rs. 1,330 on arboriculture, and Rs. 2,436 on repairing *dák* and inspection bungalows. Rupees 9,846 were also spent on repairs to

Government buildings, and Rs. 919 in constructing a dead-house at the Sadar station.

246. In Khulna a building for the office of the Deputy Conservator of Forests, Sunderbun Division, was constructed at a cost of Rs. 10,000. Rupees 2,791 were spent by the Khulna Municipality for the improvement of the town and Rs. 501 by the Satkhira Municipality on completing the excavation of a tank at Palashpole. The District Board spent Rs. 1,250 in sinking wells and excavating tanks and Rs. 2,611 on constructing the third section of the Khulna-Satkhira road and the latter end of the Nehalpur-Gourambhug road, and Rs. 1,298 on constructing iron bridges on the Kaliganj-Debhatta and Satkhira-Pathelghatta roads. The construction of iron bridges over the dead river Jamuna and the Dantbhanga bil was taken in hand during the year, but was not completed.

#### XXIV.—COMMUNICATIONS.

247. In the 24-Parganas  $85\frac{1}{3}$  miles of the Provincial roads were maintained at a cost of Rs. 66,087. The average expenditure per mile was Rs. 774 against Rs. 1,042 in the previous year. With the exception of some portions of the Calcutta-Jessore and Diamond Harbour roads, the rest of the roads are in very fair order.

248. The maintenance of  $141\frac{1}{2}$  miles of the district metalled and bridged roads cost the Board Rs. 66,786, or Rs. 472 per mile, against Rs. 469 in the previous year. The average expenditure per mile is considered very low for their annual upkeep. The roads have, however, been kept up in passable order throughout the year. A sum of Rs. 15,881 was spent in maintaining  $254\frac{3}{4}$  miles of unmetalled but bridged roads and 59 miles of unmetalled roads with temporary bridges, showing an average expenditure of Rs. 50 per mile against Rs. 40 in the previous year. These roads are under the direct management of the several Local Boards, but are not maintained in a satisfactory condition. There are  $992\frac{1}{2}$  miles of village roads under the several Local Boards, and a sum of Rs. 15,959 was spent for their repairs against Rs. 13,468 in the previous year at an average cost of Rs. 16 per mile.

249. In Nadia there were, as in the previous year, 129.5 miles of metalled roads and 591 miles of unmetalled roads. Besides this, six roads aggregating 38.08 miles in length were under construction during the year, of which one measuring 1.44 mile in length was completed. The total expenditure on the upkeep of the district roads amounted to Rs. 42,170 during the year against Rs. 36,897 of the preceding year. On the metalled roads the expenditure was larger than in the previous year by Rs. 10,355. This is due to the Board's resuming during the year the repairs of the Kristnaganj-Baramesia, Chuadanga-Jhonidah and Chuadanga-Meherpur roads, all of which had been abandoned for many years back. The outlay on repairs of unmetalled roads showed a decrease of Rs. 5,082, and is attributed by the Collector to the fact that in the last winter, when earthwork was in progress on these roads, Mr. Westmacott objected to the work being done during the dry months, as in his opinion the earthwork in connection with the repairs should as a rule be done in the rains.

250. There were 526 miles of village roads under the several Local Boards. The expenditure on these roads amounted to Rs. 2,259 during the year against Rs. 2,850 of the previous year. Mr. Garrett observes:—"The year was a trying one as regards its effect on metalled roads. The rain in the first half was heavy and unseasonable, and it interfered greatly with the repairs of metalled roads. In the latter half an utter absence of rains told very hardly on these roads, increasing the wear and tear of metalling on them. The floods were worse than usual; but they did not do much harm to the roads of the district. Some interest is taken in arboriculture in this district, as 932 trees of different kinds were transplanted on the roads during the year and 1,187 seedlings planted out in five nurseries. Rupees 818-1-3 were spent in all."

251. In Murshidabad there were  $543\frac{1}{2}$  miles of district roads. The expenditure incurred on the maintenance of 24 miles of bridged and metalled roads was Rs. 11,193; that on 213 miles of unmetalled but bridged roads was Rs. 9,573; on  $100\frac{1}{2}$  miles of unmetalled roads with temporary bridges Rs. 4,168; and on 206 miles of low level roads Rs. 6,757. Out of 1,152 miles of village

roads, 551 miles were repaired at a cost of Rs. 9,137. An iron bridge was built across the Jibanti on the Kandi road at a cost of Rs. 4,975. I have seen the metalled road between Berhampore and Jeaganj and have found it in first-rate order.

252. During the year a ferry steamer of Messrs. Hoare, Miller and Company plied for some four or five months between Berhampore and Azimganj. A steamer of the same Company carried on river-borne traffic in passengers and goods between Calcutta and Jeaganj nearly the whole of the year. This steamer went up to Jangipur during some months of the rains. Much inconvenience is at present felt for want of a regular steamer service between Azimganj and Baluchar throughout the whole of the year owing to the shallowness of the river in the hot weather.

253. In Jessore the chief means of land communications are as follows:—

- (1) The Bengal Central Railway from Khulna to Calcutta.
- (2) The branch line from Bangaon to Ranaghat.
- (3) Forty-one miles of the Jessore-Calcutta road (Provincial).
- (4) Fifty-five district roads extending over a length of 488 miles.
- (5) Numerous village roads under the several Local Boards extending over about 434 miles. To this 13 miles were added during the year.

254. The actual outlay on the Jessore-Calcutta road was Rs. 2,845 on original works and Rs. 13,710 on repairs. Original works on the district and village roads were executed at a cost of Rs. 5,096 and Rs. 2,279 respectively. The total outlay on repairs and maintenance of district and village roads was Rs. 39,102. The Local Boards of Magura and Narail have begun the work of constructing tow-paths along the banks of the Navaganj river. The work is in progress.

255. On the whole, the state of the roads of this district is reported to be good and creditable to the District Engineer. Rupees 1,330 were spent on planting out trees on the sides of different roads.

256. Three steamers plied in this district during the year—one belonging to the Flotilla Company, which ordinarily works between Nawapara and Benodepur and runs up to Magura during the rains, and two belonging to Rai Dhanput Singh Bahadur, one of which plies between Jhinkergatcha and Kotechandpur and the other between Jhinkergatcha and Kapilmoni on the river Kobaduk. Owing to confusion in the affairs of their proprietor the last-mentioned two steamers ceased to work for sometime, but are again working. The Chandpur steamer runs at present to Tarpur only, navigation beyond that place not being feasible owing to the shallowness of the river.

257. Khulna is a river district, and communication is principally carried on by means of the numerous rivers and creeks which are to be found everywhere. At the same time there are about 18 miles of railway, 410 miles of district roads and 562 miles of village roads.

258. District and village roads were repaired at a cost of Rs. 33,309. The average cost per mile of village roads was Rs. 23. This includes repairs and renewals to temporary bridges.

259. There are steamer services between Khulna and Kachua in this district and between Jhinkergatcha and Kapilmoni, the greater part of which is in this district. There are also services between Khulna and Keshubpur and Nawapara and Narail which are of use to some of the people in the district. Most of the traffic is carried on by country boats.

#### XXV.—WORKING OF THE PURI LODGING-HOUSE ACT.

260. As reported last year, the Puri Lodging-house Act is in force only in the town of Navadwipa, or Old Nadia, and its provisions were not extended to any other town during the year under review.

261. Since the introduction of the Act, the Municipal Commissioners of the town have had the control and management of the funds raised under its provisions; but since the close of the year the formation of a Managing Committee under rule 2 of the model rules under the Lodging-house Act has been sanctioned by Government to assist the District Magistrate in carrying out the working of the Act. During the year under report all arrangements

for the sanitation of the town on the occasion of fairs were made by the Municipality.

262. The rate of fee levied on every lodger for whom accommodation is provided was reduced during the year from 8 annas to 4 annas with a view to induce the big *mohants* to take out licenses, but the object has not yet been attained. They still oppose the working of the Act, and during the last *Dhulat melu* these men and owners of private houses lodged several pilgrims with or without a charge. The Magistrate is, however, trying to break through the opposition.

263. The annexed statement drawn up in the form prescribed in paragraph 2 of Government Circular No. 9M. (Municipal), dated 23rd February 1893, gives a detailed working of the Act during the year 1893-94.

Statement showing the working of the Lodging-house Act during 1893-94.

Serial number.	Name of place where Act is in force.	LICENSED LODGING-HOUSES.		PROSECUTIONS.		INCOME.										EXPENDITURE.														
		Number.	Number of lodgers for whom accommodation provided.	Number of cases disposed of.	Number of persons accused.	Number of persons convicted.	Number of persons acquitted.	Imposed.	Amount of fines Realised.	Opening balance.	Fees for licensing and regulating lodging-houses.	Fees for issue of Health Officer's certificates.	Other fees (if any).	Fines.	Contributions from other funds.	Miscellaneous.	Total (excluding opening balance).	Total (including opening balance).	Health Officer's pay and allowances.	Establishment.	Contingencies.	Establishment for collection and supervision.	Dispensaries and other medical expenditure.	Conservancy.	Construction.	Repairs.	Contribution to other funds.	Miscellaneous.	Closing balance.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31
27	Nadia or Naradwipa.	85	2,100	1	1	:	1	:	:	Rs. A. P. 36 4 9	Rs. A. P. 730 0 0	Rs. A. P. 50 0 0	:	:	:	Rs. A. P. 789 0 0	Rs. A. P. 833 4 9	Rs. A. P. 189 9 0	:	:	:	Rs. A. P. 47 1 6	Rs. A. P. 603 14 3	Rs. A. P. 116 5 6	Rs. A. P. 11 14 3	:	Rs. A. P. 277 8 9	:	Rs. A. P. 231 5 3	

It will be seen that last year 85 houses were licensed against 79, and that they supplied accommodation to 2,100 pilgrims against 1,215 in the previous year. Rupees 739 were realised as fees for the issue of licenses against Rs. 660-8, and Rs. 50 as fees for the Health Officer's certificate against *nil* in the preceding year. The amount of fees would have been greater had local assistance been given as readily as it was given by the Municipal Commissioners before the last general election which came off on the 22nd December last. The new Commissioners have given indication of obstructiveness, which is expected gradually to die out as soon as the new Committee takes up the work in right earnest. From the statement it appears that Rs. 406-0-6 were spent in excess of the receipts. These were evidently met from the Nadia Municipal Fund.

264. On the whole it appears that the successful operation of the Act is still a work of time, and it is doubtful whether the opposition offered by the *mohants* will entirely disappear in the course of a few years.

265. There was only one prosecution under the Act during the year under report, but the accused was acquitted.

XXVI.—EDUCATION.

266. Statement No. XXX showing the state of education in this Division during the year under report is annexed.

267. The following table summarises the statistics of educational institutions of all classes for the past two years:—

CLASS OF INSTITUTION.		1892-93.		1893-94.	
		Schools.	Pupils.	Schools.	Pupils.
Public Institutions—					
Secondary	{ High English	...	78	77	12,664
	{ Middle	...	161	161	11,708
	{ " vernacular	...	217	223	12,970
Primary	{ Upper	...	620	514	19,855
	{ Lower	...	4,371	4,089	17,467
Special			88	75	609
Female			361	396	10,089
Total Public Institutions		...	5,761	5,536	185,232

CLASS OF INSTITUTION.	1892-93.		1893-94.	
	Schools.	Pupils.	Schools.	Pupils.
Private Institutions—				
1. Advanced teaching—				
(a) Arabic or Persian ...	5	141	2	25
(b) Sanskrit ...	72	749	69	700
2. Elementary teaching—				
(a) Vernacular only or mainly ...	17	134	17	166
3. Teaching the Koran only ...	5	96	2	21
4. Other schools not conforming to the departmental rules ...	...	...	...	...
Total Private Institutions	99	1,120	90	912
GRAND TOTAL	5,880	192,243	5,625	186,164

Taking the Division as a whole, the results of the year are not favourable. There was a net decrease of 255 schools with 6,079 pupils. The decrease in the number of pupils has occurred in all classes of institutions, both public and private, except middle English and female schools and elementary vernacular. Middle vernaculars, though they show a decrease in pupils, have increased in the number of schools which is hardly a source of congratulation. The lower primary schools alone fell off by 282 with 5,669 pupils, owing generally to agricultural distress, aggravated by cholera and fever. Upper primary decreased by six schools with 459 pupils. Middle English and female schools gained by 10 and 35 with 496 and 1,065 pupils respectively.

268. The Division comprises an area of 12,052 square miles with a population of 7,853,566 souls, of whom 3,956,405 are males and 3,897,161 females. The number of schools during the year being 5,625, there was on the average one school for every 2·1 square miles. Reckoned at the conventional rate of 15 per cent., the number of male children of a school-going age would be 593,460, and the number of female children 584,574. The number of pupils actually at school was 172,169 males and 13,995 females, or 29·01 and 2·3 per cent. respectively of all boys and girls of a school-going age. It appears that Jessore shows the lowest percentage, viz. 19·9, in the proportion of the boys actually at school to boys of a school-going age, while the 24-Parganas shows the highest, viz. 43·8.

269. The following table compares the expenditure on education during the past two years:—

HEADS OF CHARGES.	1892-93.					1893-94.				
	From public sources.			From private sources.	Total expenditure.	From public sources.			From private sources.	Total expenditure.
	Provincial revenues.	District funds.	Municipal funds.			Provincial revenues.	District funds.	Municipal funds.		
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Secondary education...	70,882	44,046	4,761	3,50,402	4,70,091	70,386	44,381	3,402	3,55,250	4,73,419
Primary ditto ...	15,001	63,962	4,090	2,57,436	3,44,235	13,063	61,208	8,371	2,18,538	3,01,778
Female ditto ...	11,719	3,902	2,250	32,118	47,989	11,012	4,331	1,895	38,346	56,204
Special ditto ...	21,506	...	510	10,200	38,315	23,456	...	380	17,186	41,002
Scholarships ...	10,142	2,341	...	141	12,028	9,481	2,538	...	284	12,303
Buildings ...	2,085	630	254	1,670	4,044	3,041	797	210	784	5,432
Furniture and apparatus	1,030	939	401	...	2,360	272	686	120	63	1,140
Miscellaneous ...	7,615	8,018	798	6,464	22,895	10,848	6,370	710	9,989	27,917
Superintendence ...	37,160	28,785	...	...	65,915	34,052	30,434	...	...	64,486
Total ...	1,78,000	1,54,553	13,540	6,04,541	10,11,603	1,77,431	1,50,742	15,008	6,40,440	8,83,081

The total expenditure from all sources except municipal funds decreased by Rs. 27,922, viz., from Provincial revenues by Rs. 1,529, from district funds by Rs. 3,811, and from private sources by Rs. 24,101. The expenditure from municipal funds increased by Rs. 1,519. The decrease from Provincial revenues is due to the policy of the gradual withdrawal of State aid from secondary and primary education and of throwing upon the people and the municipalities these responsibilities. The municipalities have contributed more largely their shares towards primary education, though not to the extent wished for. During the year under review they raised their contribution towards primary education from Rs. 4,936 to Rs. 8,371. The District Boards had to curtail their expenditure owing to the inadequacy of funds. The diminution in private contributions is the largest, and is attributed mainly to agricultural distress.

270. The subjoined table compares the schools of different classes under the control of the District Boards during the past two years:—

DISTRICT.	SCHOOLS.													
	1892-93.							1893-94.						
	Aided.	Middle vernacular.		Aided primary.		Total.	Aided girls'.	Aided.	Middle vernacular.		Aided primary.		Total.	
	Middle English.	Managed by District Board.	Aided by District Board.	Upper.	Lower.			Middle English.	Managed by District Board.	Aided by District Board.	Upper.	Lower.		
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
24-Parganas ... ..	16	3	32	76	708	14	630	18	3	32	65	890	14	1,019
Nadia ... ..	31	3	13	59	437	39	582	39	3	12	29	370	52	532
Murshidabad ... ..	13	...	11	37	485	...	563	15	...	13	47	471	9	555
Jessore ... ..	10	3	29	103	601	86	808	21	3	28	105	541	84	782
Khulna ... ..	15	2	33	70	1,121	18	1,208	18	2	31	82	767	28	928
Total ... ..	94	11	118	364	3,442	161	4,100	100	11	116	358	3,044	187	3,816

271. The total number of schools under the control of the District Boards fell off by 374. The decrease is shared by all districts, except the 24-Parganas, where there was an increase of 80. Aided middle English schools increased by 6 and girls' schools by 26, while aided middle vernacular schools fell off by 2. The increase in girls' schools was shared by all districts, except the 24-Parganas, where the number remained unchanged. The middle English and middle vernacular schools remained stationary in the 24-Parganas, increased in Murshidabad and decreased in Nadia, while the former increased in Jessore and Khulna and the latter decreased. The upper and lower primary schools decreased by 6 and 398 respectively. The loss in the first-named occurred in the 24-Parganas, while that in the latter was shared by all districts, except the 24-Parganas, the largest decrease (viz. 354) having occurred in the district of Khulna. The decrease in upper primary schools is said to be due to the District Board changing the rules in regard to rewarding these schools, while that in lower primary schools in Khulna is attributed to the scarcity of the last year which, though it did not affect the schools of the higher and middle schools, seriously affected the schools used by the children of the poorer classes.

272. The following table compares the number of pupils in all classes of institutions district by district:—

DISTRICT.	1892-93.										1893-94.				
	In public institutions.					In private institutions.					In public institutions.				
	Secondary school.	Primary schools.	Special schools.	Total.	Advanced.	Elementary.	Total.	Secondary school.	Primary schools.	Special schools.	Total.	Advanced.	Elementary.	Total.	Grand.
				5	6	7	8				12	13	14	15	
24-Parganas	12,376	54,911	250	67,731	298	139	407	68,138	12,238	57,713	171	70,122	220	84	70,406
Nadia	8,144	20,713	123	29,000	267	...	297	29,267	7,848	19,189	97	27,133	262	...	27,395
Murshidabad	6,304	17,308	129	23,837	216	...	216	24,053	4,998	18,232	117	23,345	67	...	23,412
Jessore	6,467	27,527	106	34,100	...	91	161	34,261	6,168	23,691	94	30,253	87	132	30,472
Khulna	5,492	32,015	148	37,655	62	...	69	37,724	6,160	28,100	139	34,399	80	...	34,479
Total	37,893	152,474	756	191,123	890	230	1,120	192,243	37,359	147,284	600	185,222	725	187	186,164

It will be seen that there was a general decline in the number of pupils attending institutions of every description. In public institutions the number of pupils in secondary schools decreased in all districts, except Khulna, where

there were 617 more. There was also a decrease in the number of pupils in primary schools in all districts, except the 24-Parganas and Murshidabad, where they increased by 2,802 and 924 respectively. The pupils in special schools decreased in all districts. In private institutions the number of pupils in advanced teaching declined in all districts, except Jessore and Khulna. The pupils in elementary teaching diminished in the 24-Parganas, but increased in Jessore.

273. The following table compares the results of the Entrance examination in this Division for the past two years :—

1893.				1894.			
Number of competing schools.	Number of successful schools.	Number of candidates.	Number of passed candidates.	Number of competing schools.	Number of successful schools.	Number of candidates.	Number of passed candidates.
1	2	3	4	5	6	7	8
76	73	660	450	76	69	635	301(a)

(a) Excluding three private candidates.

The percentage of success has gone down from 68·2 to 47·2. This is said to be in keeping with the general failure at the last examination, as only 41 per cent. of the candidates passed against 68 per cent. in the previous year. Of the 301 passed candidates 294 were Hindus, 6 Muhammadans, and 1 Christian.

274. No information has been given regarding the Krishnagar College in Nadia and Berhampore College in Murshidabad. In Jessore the Narail Victoria College had on the 31st March 1894 a roll number of 73 pupils, of whom 66 were in the second-year class and 7 in the fourth-year class. In the last B.A. and F.A. examinations 3 and 11 candidates respectively passed from this College. There are arrangements for foot-ball, cricket and indigenous games for boys in this College. The zila school at Khulna is in a satisfactory state. It had on the 31st March 1894 a roll number of 201 pupils.

275. The results of the Middle English and Middle Vernacular Scholarship examinations are given in the following table :—

Class of schools.	Number of competing schools.	Number of successful schools.	Number of candidates.	Number passed with—	
				Middle English certificate.	Middle Vernacular certificate.
Middle English schools ...	115	100	404	184	45
Middle Vernacular schools	161	124	492	20	243
Total ...	276	224	896	204	288

The percentage of success in Middle English and Middle Vernacular Scholarship examinations declined from 80·9 and 68·2 to 56·5 and 53·4 respectively. This heavy decline is said to be mainly due to the extreme unhealthiness of the season, especially about the time when the examination was conducted.

276. The following table exhibits the comparative statistics of primary Primary education. schools for the past two years :—

		1892-93.		1893-94.	
		Schools.	Pupils.	Schools.	Pupils.
Upper primary schools for boys—					
Aided by Government or by District or Municipal Boards					
...	...	408	19,523	493	19,081

				Schools.	Pupils.	Schools.	Pupils.
Lower primary schools for boys—							
Aided by Government or by District or Municipal Boards				...	...	...	...
Unaided				...	...	...	...
Total				...	...	...	...
GRAND TOTAL				...	...	...	...

Primary schools, both aided and unaided, show a diminution of 6 schools with 459 pupils. The aided lower primaries also show a decrease of 582 schools with 8,581 pupils. The unaided lower primaries, however, gained by 100 schools with 2,912 pupils, principally in Khulna. The net loss is therefore 288 schools with 6,128 pupils, and is shared by all the districts, except the 24 Parganas and Murshidabad. In addition to the general causes already explained at the outset of this section, the loss is attributed in Nadia to the fixing of Rs. 5 as the minimum amount of reward payable to a *guru* which caused the weak schools to disappear, and to the insufficient allotment made by the District Board in Khulna, to the abolition of the chief *guru* system, and to the want of local knowledge on the part of the Board Sub-Inspectors, who joined their posts only two months before the close of the year, and in Jessore to the apathy of the people, especially the lower class Muhammadans, who preponderate in this district and who are averse to sending their children to schools for instruction. This last reason is not always brought to notice, but it is one which seems to have considerable force.

277. The following table shows the comparative statistics of attendance in, and expenditure on, primary schools for the past two years :—

	1892-93.							1893-94.							
	Number of schools on the 31st March.	Number of pupils on the rolls on the 31st March.	EXPENDITURE -					Number of schools on the 31st March.	Number of pupils on the rolls on the 31st March.	EXPENDITURE--

The total expenditure on primary education from all sources except municipal funds decreased by Rs. 42,457, viz., from Provincial revenues by Rs. 2,238, from district funds by Rs. 4,756, and from private sources by Rs. 38,898, of which Rs. 20,294 decreased in Khulna alone owing to agricultural distress. The expenditure from municipal funds increased by Rs. 3,435. The decrease in the district fund expenditure is partly due to the exclusion of the amount of uncashed cheques.

278. The following table shows, district by district, the allotment made for primary education during the year under report and the expenditure incurred therefrom :—

DISTRICT.	ALLOTMENT—			EXPENDITURE—			SCHOOLS OF DIFFERENT CLASSES AIDED FROM PRIMARY FUNDS.			PUPILS ATTENDING SCHOOLS.			Cost per school in rupees.	Cost per pupil in annas.

[This table excludes the municipal area.]

The expenditure both on non-Board and Board schools fell short of the allotments in all the districts of the Division by Rs. 1,894 and Rs. 15,761 respectively. The average cost per school in the Division increased from Rs. 19 in the previous year to Rs. 19·8, and per pupil from annas 10 to annas 10·7 in the year under review. The average cost per school rose in all the districts, except the 24-Parganas, where it diminished by 3·5 without loss of efficiency. The average cost per pupil shows a decrease in the 24-Parganas and an increase in all other districts.

279. The following table compares the results of the upper and lower primary scholarship examinations for boys during the past two years :—

DISTRICT.	Number of schools on 31st March.		Number of competing schools.		Number of candidates.		Number passed.		Scholarship gained.		REMARKS.
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.

... { Lower	4,371	4,089	1,302	1,104	3,720	3,390	1,069	803	89	...	

The number of competing upper primary schools fell off by 49, but it is satisfactory to note that the percentage of success has risen from 58·3 to 63·1. Eight middle schools sent up 22 candidates to this examination, of whom 15 came out successful. These passes have not been included in the above statement. The number of competing lower primary schools decreased by 108. Comparing the results of the lower primary scholarship examination, it appears that the percentage of success in the 24-Parganas was 19·7, in Nadia 39·03, in Murshidabad 35·7, in Jessore 36·2, and in Khulna 18·9.

280. The following table compares the statistics of native girls' schools for the past two years :—

GIRLS' SCHOOLS.	1892-93.		1893-94.	
	Schools.	Pupils.	Schools.	Pupils.
Aided by Government or by District or Municipal Boards ...	294	7,760	321	8,570
Unaided ...	67	1,264	75	1,519
Total ...	361	9,024(a)	396	10,089(b)
Girls in boys' schools ...	...	4,096	...	4,061
GRAND TOTAL ...	...	13,120(a)	...	14,150(b)

(a) Includes 136 boys in girls' schools.  
(b) Includes 279 boys in girls' schools.

The total number of girls' schools increased by 35, and the pupils by 1,065, inclusive of an increase of 143 boys in girls' schools. The number of girls reading in boys' schools of all classes fell off by 35.

281. The following statement compares the results of the upper and lower primary scholarship examinations for girls :—

DISTRICT.		1892-93.		1893-94.	
		Number passed.	Scholarships gained.	Number passed.	Scholarships gained.
1		2	3	4	5

Khulna	Upper ...	2	...	...	...
	Lower ...	13	4	15	4
Total	Upper ...	4	...	4	...
	Lower ...	50	11	56	9

The number of passes in the upper primary scholarship examination remained the same as in the preceding year, while the number of passes in the

lower primary scholarship examination remained unchanged in the 24-Parganas and increased in the other districts, except Jessore, from which not a single girl passed, the total number increasing by 6; but the number of girls who won scholarships declined from 11 to 9.

282. The following table gives the number of Muhammadan pupils and their percentage to the total number of pupils in the different classes of schools for the past two years:—

CLASS OF SCHOOLS.		1892-93.			1893-94.		
		Total number of pupils.	Number of Muham- madan pupils.	Percentage of Muham- madan pupils on total number of pupils.	Total number of pupils.	Number of Muham- madan pupils.	Percentage of Muham- madan pupils to total number of pupils.
1		2	3	4	5	6	7

GRAND TOTAL	...	192,243	54,857	28·5	186,164	49,843	26·7

The number of Muhammadan pupils decreased by 5,014, or by 1·8 per cent. The decrease was in public as well as private institutions. With the exception of middle English and upper primary schools, Muhammadan pupils decreased in all the public institutions, the largest diminution, viz. 4,810 pupils, taking place in the lower primary schools for reasons already explained under the head of primary education. The Muhammadan pupils fell off in the advanced private institutions and the Koran schools, but increased slightly in the elementary schools.

283. The following table shows the share which the Muhammadan candidates took at the various departmental examinations :—

DISTRICT.	1892-93.			1893-94.		
	Middle scholarship examination.	Upper primary.	Lower primary.	Middle scholarship examination.	Upper primary.	Lower primary.
1	2	3	4	5	6	7
24-Parganas ...	9	10	55	12	15	61
Nadia ...	7	5	81	3	7	60
Murshidabad ...	15	12	68	8	19	68
Jessore ...	17	20	86	11	14	38
Khulna ...	16	9	28	5	13	15
Total ...	64	56	318	39	68	242

There is a decrease in the middle and lower primary scholarship examination certificates gained by Muhammadan students, but the number of passes at the upper primary scholarship examination shows some increase. The largest decrease in the number of passes at the middle scholarship examination occurred in Khulna, and in those at the lower primary scholarship examination in Jessore. One Muhammadan candidate stood first in the Murshidabad district at the middle vernacular scholarship examination, and obtained a Government as well as the Mosley scholarship. Another Muhammadan candidate obtained a middle vernacular scholarship from Jessore and another from Khulna. An upper primary scholarship was obtained by a Muhammadan pupil from each of the districts of the 24-Parganas, Nadia, and Khulna.

284. At the last University Entrance examination two Muhammadan students passed from the 24-Parganas and one from each of the other districts.

285. Of indigenous education, the most important is the advanced teaching in Sanskrit which is carried on in *tols*. The number of *tols* and pupils during the year was as follows :—

DISTRICT.	Tols.	Pupils.
24-Parganas ...	21	229
Nadia ...	33	262
Murshidabad ...	3	67
Jessore ...	9	62
Khulna ...	3	80
Total ...	69	700

286. The most important *tols* are the following :—

- (1) The *Mulajore tol* in the 24-Parganas maintained from the proceeds of an endowment made by the late Babu Prossonno Kumar Tagore, C.S.I., of Calcutta.
- (2) The *Navadvipa tols*. The maintenance allowance, amounting to Rs. 2,400, was paid to the pupils in the *Nyaya* and *Smriti tols* only.
- (3) The *Victoria Jubilee tol* at Berhampore founded by Srimati Arnakali Devi of Kassimbazar.

287. In the preceding year five advanced schools for teaching Arabic or Persian with 141 pupils were returned from Murshidabad alone. During the year under review two such schools with 25 pupils have been returned from

Jessore only. As in the previous year there was one Koran school with seven pupils in the 24-Parganas and another such school with 14 pupils in Jessore.

288. The relations between the District Board and the Education Department continued satisfactory during the year.

#### XXVII.—DISPENSARIES.

289. Statement No. XXXI annexed to this report shows the working of the several dispensaries in the Division. Their number was 49 against 46 in the previous year. The increase is due to the opening of a dispensary at Chitpur in the 24-Parganas, the Arnakali Zenana Hospital at Berhampore in Murshidabad, and to the placing of the dispensary at Chuadanga in Nadia under Government supervision.

290. In the 24-Parganas there were 21 dispensaries, of which 7 receive both in-door and out-door patients, and the others out-door patients only. Of the former, the Sagore Dutt Hospital at Kamarhati, which is under the management of the Administrator-General, is the most flourishing, and at that and Kandi (Murshidabad) alone, do the out-door patients exceed 100 a day. Next in importance are the Cossipore and Russa dispensaries, which are well provided with funds and are very popular. The Barisa and Barasat dispensaries have been considerably improved during the year. The Diamond Harbour dispensary has been provided with a new building. Among the out-door dispensaries the best are at Chetla, Naihati, and Halisahar. These are all located in good buildings and are well provided with the necessary equipments. The Chetla dispensary has proved to be very popular and has obtained an annual grant-in-aid of Rs. 500 from the Calcutta Corporation. The total number of in-door and out-door patients treated at all the dispensaries during the year was 2,013 and 98,695 against 2,031 and 84,778 respectively in the previous year. There was a great increase in the attendance at most dispensaries probably due to the unusual prevalence of malarious fever. The total expenditure incurred in maintaining the dispensaries was Rs. 35,786, the greater part of which was met from private subscriptions and endowments. The small amount of aid given by the District Board of this district is noticeable.

291. The following statement shows the working of the Lunatic Asylums at Dullunda and Bhawanipur, the Campbell Hospital at Sealdah and the Police Case Hospital at Alipore:—

NAME OF INSTITUTION.	Average number of patients daily aided.		Cost incurred by Government.	
	1892.	1893.	1892.	1893.
1	2	3	4	5
Bhowanipur Lunatic Asylum	37	37	Rs. 20,359	Rs. 20,474
Dullunda ditto ...	257	247	28,808	26,770
Campbell Hospital ...	462	685	46,907	53,402
Alipore Police Hospital ...	27·46	...	1,460	...

The Calcutta Municipality continues to subscribe Rs. 30,000 annually towards the expenses of the Campbell Hospital. There was a marked increase in the number of patients during the year.

292. In Nadia there were nine dispensaries under Government supervision during the year. That at Krishnagar is in charge of a first grade Assistant Surgeon, while those at Ranaghat, Meherpur, and Kushtia are under the Civil Hospital Assistants attached to the respective subdivisions. The dispensary at Santipur is under the charge of a Licentiate of Medicine and Surgery, and

those at Ula, Chakdaha, Kumarkhali, and Chuadanga are under local native doctors. The dispensaries at Krishnagar, Ranaghat, Meherpur, and Kushtia receive both in-door and out-door patients, while the rest treat out-door patients only. The number of patients, both in-door and out-door, treated at all the dispensaries was greater than that of the previous year in all dispensaries, the totals being 508 and 38,998 against 456 and 26,775 respectively. The total expenditure incurred in maintaining the dispensaries was Rs. 10,239, of which the greater part was borne by the local municipalities. The amount of private subscription is very small.

293. There are two other dispensaries in the Meherpur subdivision—one at Shikarpur and the other at Natudaho. The former is maintained by the Church Missionary Society, and the latter by Babu Nafar Chunder Pal Chaudhri, a local zamindar. These two dispensaries gave relief to a large number of patients who needed it owing to the prevalence of malarious fever and cholera.

294. In Murshidabad there were eight dispensaries, six of which receive both in-door and out-door patients and two out-door patients only. The total number of in-door and out-door patients treated at the dispensaries was 1,212 and 51,143 against 1,134 and 47,985 respectively in the previous year. There was a great increase in attendance at all the dispensaries, except at Murshidabad, where it fell off slightly. The total expenditure incurred in maintaining the dispensaries was Rs. 23,189, the greater part of which was met from private subscriptions and endowments. The opening of the Arnakali Zenana Hospital at Berhampore, which is set apart exclusively for the treatment of native females, has greatly benefited the female population of the town of Berhampore. There is accommodation for six in-door patients, and it is to be hoped that ladies of a superior class will now avail themselves of the opportunities offered them.

295. In Jessore there were six dispensaries, of which those at Jessore and Magura receive both in-door and out-door patients. The total number of in-door and out-door patients treated at all the dispensaries during the year was 242 and 28,315 against 235 and 18,577 in the previous year. There was an increase in the attendance at all dispensaries, which indicates increased popularity. The total expenditure incurred in maintaining the dispensaries was Rs. 7,137, of which the greater part was borne by the local municipalities and the District Board. A grant of Rs. 25 a month has been made by the District Board for the entertainment of a female civil hospital assistant, and Rs. 300 as contribution towards the construction of a female ward to the Jessore dispensary.

296. Besides the above, a new dispensary has been opened since the close of the year at Bangaon with the aid of the District Board, supplemented by local subscriptions. Another new dispensary is to be opened shortly at Nahatta by the Raja of Naldanga with the aid of a grant from the District Board. The District Boards of Jessore and Khulna have shown themselves the most liberal towards this important subject. Land has also been acquired by the Jessore Municipality for a contagious diseases hospital.

297. In Khulna there are five dispensaries, of which those at the Sadar and Satkhira receive both in-door and out-door patients only. The total number of in-door and out-door patients treated at the dispensaries was 117 and 16,782 against 131 and 16,507 in the previous year. The attendance increased at Khulna and Satkhira and decreased in the other dispensaries. The attendance in all the dispensaries was very small. This requires the attention of the local authorities. The total cost of maintaining the dispensaries was Rs. 3,985, of which the greater part was borne by the local municipalities and the District Board.

298. Besides the above there are two dispensaries maintained by private gentlemen—one at Morrelganj by Maharaja Durga Charan Law, and the other at Shamnagar by Rai Hari Churn Chowdry, a local zamindar. A dispensary is also maintained at Sripur in the Debhatta Municipality by the Hita Sadhipi Sabha of that place.

#### XXVIII.—LIBRARIES.

299. The district and the subdivisional office libraries are reported to have been kept in good condition and order during the year under report. Besides the "Rivers Thompson Library" at Kanaghat, another library has been

opened there by certain ex-students of the local school. Both of these libraries are mostly used by the students. There has not been much improvement in the status of the Jessore Public Library during the year under report. It appears that there was an income of about Rs. 319, of which Rs. 242 were raised from subscriptions; but as the payment of dues on account of repairs executed in the previous year and cost of establishment, including their arrear pay, swallowed up more than half the income, not more than Rs. 9 could be spent on the purchase of books. It is said that the subscribers appear to value the library chiefly for the daily newspapers, which are taken in and circulated among them, and that the books of the library are not much read. As only Rs. 5 a month can be spared for a clerk, the library is open for only a very limited time during the day. There are public libraries at Satkhira, Sripur, Tengra, Bhawanipur, Senhati, and Mulghar, in the district of Khulna. The Satkhira library is said to be not in a good state. The Town Hall and public library buildings at Khulna are reported to be in good condition, but no improvement has been made to them since the close of the year 1892-93.

#### XXIX.—MUSEUMS.

300. As reported in previous years, there are no museums in any of the districts of this Division.

#### XXX.—LOCAL SELF-GOVERNMENT INSTITUTIONS.

##### *District and Local Boards.*

301. The administration of the District and Local Boards under the provisions of the Bengal Local Self-Government Act III of 1885 has now been carried on in this Division for eight years.

302. In the 24-Parganas the District Board is composed of 25 members, including the Chairman, of whom 12 were elected. It held 13 meetings during the year against 12 in the previous year. The average percentage of attendance at each meeting was 46·8 per cent. of the members against 52 in the previous year. The reason for the decrease has not been given. Besides the general meetings of the Board, the Education Sub-Committee and the Finance Committee met several times during the year.

303. The number of Local Boards in the district was reduced from 6 to 4 during the year owing to the abolition of the Barrackpore and Dum-Dum subdivisions. This change had the effect of reducing the number of members from 59 to 51. All the Local Boards had non-official Chairmen. The following table shows the number of meetings held by the Local Boards and the average attendance of members at each meeting during the year:—

NAME OF LOCAL BOARD.	Number of meetings held.	Average attendance at each meeting.
Alipore ... ..	13	6·6
Diamond Harbour .. ..	13	7·2
Barasat ... ..	13	6·9
Basirhat ... ..	4	5·2

The small number of meetings held by the Basirhat Local Board was, it is said, due to the small amount of work which it had to do, but it is difficult to understand why its monthly accounts and other petty matters were not put up before it more regularly. If it had charge of primary education more work might be found for its members.

304. The Local Boards continued to be in charge of the village and district unmetalled roads and cattle-pounds.

305. On rural sanitation and water-supply the District Board spent Rs. 1,860 during the year. Of this Rs. 1,040 (of which Rs. 400 were contributed by the Barasat Municipality) represents the cost of clearing jungle and removing obstructions in the bed of the *Soonti* in the Barasat subdivision. Both the District Board and the Barasat Municipality are trying their best to remove the obstructions to the water-courses of this stream. It also expended Rs. 1,348 on sanitary and conservancy arrangements in connection with the fairs held at Saugor Island in the Diamond Harbour subdivision and at Harwa in the Basirhat subdivision.

306. In Nadia the District Board consists of 21 members, including the Chairman, 10 of whom are elected. It held 14 meetings during the year against 13 in the previous year, the average attendance being 12·07 against 10·92 in the previous year.

307. As in the previous year, there were four Local Boards in the district, three of which were presided over by non-official Chairmen. The following table shows the average attendance of the members and the number of meetings held by the Local Boards during the year:—

NAME OF LOCAL BOARD.	Number of meetings held.	Average attendance at each meeting.
Kushtia ...	7	4·4
Sadar ...	9	4·8
Meherpur ...	11	4·5
Ranaghat ...	6	6

The number of meetings held has decreased in every case, except at Meherpur, and in no place was sufficient. The average attendance of members in all the Local Boards, except the Sadar, shews a slight improvement, but it is still very bad.

308. The District Board of Murshidabad, which was reconstituted in the beginning of the year under report, consists of 21 members, including the Chairman, of whom 10 were elected. It held 12 meetings during the year against 18 in the previous year. Two of these were, however, adjourned meetings, the average attendance being 8·41 against 7 in the previous year.

309. The Local Boards were also reconstituted during the year. The subjoined table shows the number of meetings held by them and the average attendance of members at each meeting during the year:—

NAME OF LOCAL BOARD.	Number of meetings held.	Average attendance at each meeting.
Sadar ...	13	5·5
Kandi ...	12	5·1
Jangipur ...	19	7·6

310. In Jessore the District Board consists of 25 members, including the Chairman, of whom 12 are elected. It held 21 meetings against 16 in the previous year, the average attendance being 12·2 against 10·37 in the previous year. This is satisfactory.

311. The subjoined table shows the number of meetings held by the Local Boards during the year and the average attendance of the members at each meeting:—

NAME OF LOCAL BOARD.	Number of meetings held.	Average attendance at each meeting.
Sadar ...	14	6·4
Narail ...	12	4·4
Jhenidah ...	7	6
Magura ...	8	3·7
Bangaon ...	10	7·5

The attendance at Magura was very bad and indifferent at Narail; at Jhenidah and Bangaon there was a marked improvement. The matters placed under the management and control of the Local Boards were almost the same as in the previous year, viz., pounds, ferries, dispensaries, village roads, and education. The management of the middle schools was, however, very properly transferred to the District Board, as the Local Boards could not give satisfaction in regard to the punctual despatch of business and in their dealings with the secretaries of schools.

312. The District Board of Khulna, which consists of 17 members, including the Chairman, held 14 meetings during the year against 15 in the previous year. The average attendance at each meeting was 11·4 against 8·46.

313. The following statement shows the number of meetings held and the average attendance at each meeting of the Local Boards during the year :—

NAME OF LOCAL BOARD.	Number of meetings held.	Average attendance at each meeting.
Sadar ... ..	12	6·5
Bagerhat ... ..	5	6
Satkhira ... ..	11	6·5

Although the number of meetings held at the Sadar and Satkhira Local Boards has improved, the attendance has fallen off. The Bagerhat Local Board shows no sign of improvement in either.

314. The following is a summary of the views of the District Officers on the working of the District and Local Boards.

315. *24-Parganas*.—The working of the District and Local Boards was on the whole satisfactory. The members of the District Board evinced much interest in the disposal of the several matters placed before them for consideration. The Finance Committee met several times during the year and did much useful work.

316. *Nadia*.—The working of the Local Boards was not satisfactory. The non-official executive officers of the Board did not seem to be as zealous and energetic as they should have been. The members of the District Board generally took interest in their work.

317. *Murshidabad*.—The working of the Local Self-Government Act was fairly satisfactory; but it is much to be desired that the members of both District and Local Boards should take more interest in the actual out-of-doors work carried on under the Boards.

318. *Jessore*.—The District Board worked smoothly and the attendance of members was fairly good. It was, however, difficult to get together the Finance Committee for the purpose of auditing accounts, which consequently fell into arrears. The work of the Education Committee was attended to with more zeal. The brunt of the work still falls on the Chairman and Vice-Chairman. The Local Boards generally have not proved as successful in the management of pounds and ferries as was expected, but the Vice-Chairman of the Bangaon Local Board, Babu Ganga Churn Chatterji, deserves special mention for his creditable management of the pounds and ferries under that Board. As the members of these Boards are drawn from the neighbourhood and are supposed to know its circumstances better than any one else, it was thought that they would be able to settle the pounds and ferries advantageously with suitable persons and to collect the rents more easily and fully; but this has not been the case.

319. *Khulna*.—The District Board works well. The attendance is comparatively large, and members take an interest in the business. The Khulna Local Board is fairly well managed, but this cannot be said with regard to the other Local Boards. All the Local Boards have failed in collecting pound and ferry rents punctually.

320. The results generally seem to be much the same as in other parts of the Province, namely, that while the District Board works well and members take interest in their work, the Local Boards are as a rule distinguished for general apathy. The reason generally assigned, and with a fair amount of truth, is that as a rule the work is insufficient and of an uninteresting nature; but until it is seen that they carry out efficiently the work made over to them, the District Board exercise a wise discretion in declining to increase their powers.

321. One of the main difficulties of the Local Board question lies with regard to the Chairman. The Subdivisional Officer ordinarily ought to be the Chairman, as he alone probably knows the wants of the whole subdivision and can weigh the respective claims of its different parts; but apart from the natural desire of Government to encourage as far as possible local self-government by appointing a non-official Chairman, and the fact that there is a certain amount of jealousy, especially in the neighbourhood of Calcutta, by non-official members, the frequent changes among the Subdivisional Officers render their appointment as Chairman often impossible. As far as the people generally go, local self-government is, and is likely to be for some time, an absolute impossibility.

*Municipalities.*

322. The number of municipalities in this Division was 37 at the end of the year as at the close of the preceding year. It has been decided, however, on the representation of the mill-owners at Titaghur, to separate the Titaghur ward of the South Barrackpore Municipality in the 24-Parganas and to form a new municipality out of it.

323. The fourth general election took place in the latter part of the year, viz. on the 21st and 22nd December 1893. Except in the districts of Jessore and Khulna, great excitement over the elections prevailed, and a keen canvass and hard contests took place between the candidates in most of the municipalities. The legality of the proceedings of the presiding officers in the elections in the South Suburban Municipality in the district of the 24-Parganas, and in the Berhampore Municipality in the district of Murshidabad, was questioned by the rate-payers and defeated candidates in those municipalities, but the present election rules being defective, inasmuch as they do not give any power to the controlling authorities to interfere in these matters, nothing could be done.

324. The important privilege of nominating a member of the Bengal Legislative Council had been granted to the 22 municipalities of this Division which had an income of not less than Rs. 5,000 a year, and on the 15th May 1893 a meeting of the delegates sent by the municipalities was held in my office, at which they acquitted themselves well by unanimously electing Mr. Lal Mohan Ghose, a Barrister-at-Law, as their representative, to be recommended as a member of the Council of His Honour the Lieutenant-Governor for the purpose of making laws and regulations.

325. The following statement shows the income and expenditure of the municipalities, district by district, during the year under report compared with that of the previous year:—

DISTRICT.	INCOME.		EXPENDITURE.		REMARKS.
	1892-93.	1893-94.	1892-93.	1893-94.	
1	2	3	4	5	6
	Rs.	Rs.	Rs.	Rs.	
24-Parganas ... ..	4,68,618	4,76,279	3,74,132	3,46,306	The figures for 1892-93 as given in the last year's report do not tally with those now given, as the figures were calculated on different principles. This year the figures have been made to tally with the Municipal Administration Report.
Nadia ... ..	90,216	94,190	83,299	85,678	
Murshidabad ... ..	96,146	96,614	84,187	85,135	
Jessore ... ..	25,971	29,035	24,217	26,175	
Khulna ... ..	33,822	46,402	32,301	22,478	
Total ... ..	7,14,773	7,42,520	5,97,136	5,65,771	
Increase ... ..	...	27,747	...	...	
Decrease ... ..	...	...	...	31,365	

The above figures show an increase of Rs. 27,747 in the income of the municipalities which is shared by all the districts of this Division. No explanation of the increase in the district of the 24-Parganas has been given, but I observe that it occurred principally in Cossipore-Chitpore, Maniktala and the South Suburban Municipalities. South Barrackpore showed a marked decrease. In Nadia it is attributed to the collection of the arrear taxes and to the realisation of latrine fees in the municipalities of Krishnagar and Kumarkhali, where in some of the wards Part IX of the Municipal Act was newly extended. The increase in Murshidabad is only nominal. In Jessore it is due to better collection, and to that made in the last month of 1892-93 having been credited to the account of the year under review. The increase in Khulna is owing to Rs. 25,000 of the special Government grant of Rs. 50,000 being credited in the year under report against Rs. 9,000 in the previous year. As regards expenditure there is a decrease of Rs. 31,365 in spite of an increase in the districts of Nadia, Murshidabad, and Jessore. In the 24-Parganas the decrease occurred mainly in the Cossipore-Chitpore Municipality, in which all available

funds are being kept to provide for the supply of filtered water by the Calcutta Corporation. Maniktala on the contrary showed a marked increase. In Khulna the Commissioners of all the municipalities failed to undertake road and other works, though there were funds available. It is very unsatisfactory to find Municipal Commissioners failing to carry out works provided for in their budget estimates.

326. The attendance of Municipal Commissioners at meetings has improved in the districts of the 24-Parganas and Nadia, but in other districts it continues to be unsatisfactory. Important municipalities like North Barrackpore, South Suburban, North Dum-Dum, Barasat and others failed to hold 12 meetings a year. Certainly want of work cannot be given as an excuse. South Barrackpore held 18 meetings.

327. The following is a summary of some of the principal improvements effected in some municipalities of this Division.

328. In the Baranagar Municipality in the 24-Parganas a plot of land about 10 bighas in area was acquired and raised for trenching purposes. In Cossipore-Chitpore 2,188 feet of saucer drains were constructed and some *kutcha* drains were made *pukka*. The Commissioners of the South Barrackpore Municipality constructed a number of culverts at a total cost of Rs. 3,156. In Barasat obstructions to the river Soonti were removed from Jogotighata, three miles north of Barasat, down to the mouth of the river, a distance of 9 miles, at a cost of Rs. 1,040 (of which Rs. 640 were contributed by the District Board). The Commissioners of the Maniktala Municipality obtained a loan of Rs. 25,000 from Government for the supply of filtered water. According to previous arrangements the sum was made over to the Calcutta Corporation for laying pipes, &c., in the main road and a few other roads. The work was completed during the latter part of September 1893, and the filtered water is being supplied by the Calcutta Corporation at the rate of four annas per thousand gallons.

329. In Nadia a survey and level of the towns of Ranaghat, Nadia, Kushtia, and Kumarkhali were undertaken in the latter part of the year preliminary to the drainage of these municipalities. In Krishnagar, which is more advanced than the others, it is contemplated to carry out a drainage scheme by excavating the bed of the Anjana, and the plans and estimates have been drawn up. The Municipal Commissioners have obstinately refused to increase their income by raising the rate of taxation, notwithstanding the repeated advice given to them; hence they have not the necessary funds to carry out this scheme, and look to Government for help. The state of things in the Santipur Municipality reported in the previous year has improved to a certain extent.

330. In the Berhampore Municipality in the district of Murshidabad some of the filthy *kutcha* drains were made *pukka*.

331. In Jessore re-excavation of three big tanks was undertaken by the municipality during the year. The cost for two of them was placed by their owners at the disposal of the Chairman, and for the other was met from the municipal funds. These three tanks are expected to do much to remove the scarcity of water in Jessore, though a great deal yet remains to be done to place the town in a satisfactory basis as regards its water-supply. In the same municipality two main *kutcha* drains, measuring 3,514 feet, have been constructed to divert the course of the station water towards the Harnia bil.

332. The condition of the Jessore Municipality, both internal and external, has greatly improved under its present Chairman, Babu Umesh Chandra Ghose. This gentleman is reported to personally supervise all works executed in the municipality with a view to enforce economy. The rate of taxation in the Kotechandpur Municipality is very low and should be raised. Much of the area of the Moheshpur Municipality is rural, and its limited income does not permit any improvement in sanitary and conservancy arrangements. The rate of assessment in this municipality is also unusually low. It should be abolished.

333. The Khulna and Debhatta Municipalities in the district of Khulna are reported to be well managed, while in Satkhira there were some differences among the Commissioners, but the Magistrate found nothing unfavourable to remark on as regards the work done. The leading zamindar of the place has

now become its Chairman, and this may be looked on as a good sign. The municipality at Chanduria ought to be abolished. It used to depend chiefly on an indiscriminate tax levied on all carts found in its limits, but this practice has been stopped, and its finances have suffered considerably accordingly. In Khulna the Municipal Commissioners arranged for pumping up water from tanks into settling reservoirs, which appear to be very popular, and have increased their number by two more during the year.

334. The tendency to increase establishments still continues, and though far more interest is taken in Municipal than in Local Board work, there is no doubt that many Commissioners strive at earning popularity or to gain some private ends rather than give up their time and work for the public weal. So far from many of the municipalities of this Division being in advance, as they should be, of the average municipalities of the province, I have no hesitation in saying that they are distinctly behind, and I would suggest that some of the native papers should, instead of working always about the imaginary misdeeds of Government, devote some of their columns to the misgovernment in municipalities and honestly try to effect an improvement therein.

#### XXXI.—EMPLOYMENT OF MUHAMMADANS.

335. Statement XXXII shows the extent to which Muhammadans are employed in this Division. There is little to add to what was written on this subject in last year's report. Considering the proportion of educated Muhammadans to educated Hindus, the percentage of appointments held by Muhammadans appears to be fair in all the districts of this Division, except Murshidabad.

336. In Nadia there was some decrease in the number of ministerial appointments held by Muhammadans during the year under report, owing to the abolition of the temporary clerks on the completion of the cess revaluation operation of the district.

337. In Jessore there was a decrease in the number of Muhammadan menials during the year as compared with the previous year. The decrease took place in the Civil Courts owing to reduction. Mr. Fiddian, the Collector of Jessore, observes that the disproportion of Muhammadans in the ministerial service is due to their backwardness in education. In his opinion the educational statistics are not, however, very hopeful, as they show a decrease in the number of pupils as compared with the previous year.

338. The Collectors of Murshidabad and Khulna have made no observation on the subject. In Murshidabad the proportion of educated Muhammadans to educated Hindus and that of Muhammadan employes to Hindu employes were 1 to 2·71 and 1 to 4·5 respectively.

339. I am always glad to see Muhammadans employed, as the appointments held by them are far short of what they are entitled to according to their population; but until the leading men among them apply themselves with far more vigour than at present to the cause of education, it is hopeless to expect any marked increase. In fact Government will have constantly to be on the look-out that their number does not decrease, as with the decrease in superior appointments held by Europeans, there is naturally an increase in those held by Hindus, and the latter are naturally more inclined to appoint Hindus in preference to Muhammadans. The absence of ministerial officers of the latter persuasion from District Boards is most marked, as they are only to be found in two out of the five districts of this Division.

#### XXXII.—POST OFFICES AND TELEGRAPHS.

340. As usual, the District Officers have not been able to obtain complete information on the subject for the year under report. The following is a summary of such information as has been received. There is nothing to show in the reports as to how far District Officers themselves visited these offices and made enquiries about the sales of stamps and issue of money-orders. The success which has attended many offices in selling small packets of quinine is also a subject which should have been commented on. The enquiries which I made in Darbhanga showed it to be in Bihar a most successful experiment, and a measure which has been thoroughly appreciated by the people.

341. The table below shows the number of post offices in this Division and the number and mileage of the main lines during the year under review:—

DISTRICT.	NUMBER OF POST OFFICES.			MAIN LINES.					
	Imperial.	Zamindari.	Total.	Imperial.		Zamindari.		Total.	
				Number.	Average mileage.	Number.	Average mileage.	Number.	Average mileage.
1	2	3	4	5	6	7	8	9	10
24-Parganas ..	71	8	79	...	...	...	...	49	359
Nadia ..	85	6	91	44	428½	12	141	56	569½
Murshidabad ..	34	5	39	8	123	18	207	26	330
Jessore ..	57	6	63	26	241	16	216	42	457
Khulna ..	34	5	39	13	126	17	273	30	399

The number of Imperial post offices increased in the 24-Parganas and Nadia by 10 and 1 respectively, while it decreased in Murshidabad by 2. The post office at Patkabari has been transferred to the Chuadanga head office in Nadia, and the branch post office at Dewanserai has been abolished. The number of post offices in Jessore and Khulna remained the same as in the previous year. The Collector of Khulna observes that the number of post offices shown in last year's report was wrong. Five post offices are partly zamindari and partly Imperial. The number of main lines increased in Jessore only by 1, and decreased in Nadia and Murshidabad by 1 and 8 respectively, while the average mileage increased in Khulna only by 10 and decreased in the 24-Parganas and Murshidabad by 21 and 62 respectively. In Murshidabad the decrease is ascribed to the closure of certain zamindari main lines owing to the abolition of some police outpost. Why no information as to the number of the different kinds of lines is supplied by the 24-Parganas it is difficult to say.

342. The number of letters, &c., received for despatch and issued for delivery in the districts during the year was as follows:—

DISTRICT.	Number of letters, &c., in 1893-94.	Number of letters, &c., in 1892-93.
24-Parganas ...	9,658,136	10,260,484
Nadia	(Not given.)	
Murshidabad	(Not given.)	
Jessore	3,130,523	3,256,032
Khulna	(Not given.)	

It will be seen that both the 24-Parganas and Jessore show a decrease. In the 24-Parganas the decrease is mainly under the heads "Newspapers" and "Packets of all kinds," and is ascribed to the fact that the figures given by the Postal authorities under these two heads represent only the number received for delivery, the number received for despatch not being available. As regards Jessore, the figures do not appear to be accurate. The figures generally are not worth commenting on.

343. The following table shows the working of the several telegraph offices during the past two years:—

DISTRICT.	Name and number of telegraph offices.	Messages sent.		Messages received.	
		1893-94.	1892-93.	1893-94.	1892-93.
1	2	3	4	5	6
24-Parganas ...	16 offices (names not given) against 14 offices in 1892-93 ...	16,506	11,807	9,130	8,862
Nadia ...	3 offices—Krishnagar and Santipur ...	1,071	1,732	2,183	1,961
Murshidabad ...	4 offices—(Berhampore, Murshidabad, Jeaganj and Jangipur) against three offices in 1892-93 ...	2,780	2,866*	2,527	2,569
Jessore ...	1 office—Jessore ...	1,237	1,133	812	730
Khulna ...	2 offices—Khulna and Bagerhat ...	939	801	1,339	651

\* In the previous report 4,266 appears to be a mistake for 2,866.

These figures show that there was a considerable increase in the messages sent in the 24-Parganas, Nadia, Jessore, and Khulna, and in the messages received in the 24-Parganas, Nadia, Jessore, and Khulna. The increase is said to be due to the better appreciation by the public of the advantages of telegrams in carrying on urgent business. The decrease in Murshidabad is said to be due to more telegrams having been sent and received in 1892-93 on account of the volunteer race which took place at Berhampore in that year. The figures in the above table relate only to the Government telegraph offices. There are also telegraph offices at all railway stations which take away a certain amount of business from the post office telegraphs. We have no information as to the extent of business thus transacted. A further reduction in the rate of telegrams would, I believe, lead to a still larger increase of revenue. No District Officers have discussed the question whether there is room for more telegraph offices or not, but the number in Jessore, Nadia, and Khulna looks as if it was capable of expansion. Probably all subdivisions should have combined post and telegraph offices.

## XXXIII.—POUNDS.

344. The following table gives the statistics of the pounds under the District Boards in the Division during the year under report compared with the preceding year:—

1	2	3	4	5	6	7	8	9	10	11	12
DISTRICT.	Year.	Number of pounds.	Arrear demand.	Current demand.	Total demand.	Collections, including arrears.	Balance.	Remissions.	Net balance.	Expenditure.	REMARKS.
			Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	
24-Parganas ...	1892-93	100	1,146	5,585	6,739	5,714	1,015	594	421	55	
	1893-94	101	421	5,920	6,341	5,028	713	90	623	80	
Nadia ...	1892-93	170	7,708	26,281	33,989	26,227	7,762	3,743	4,019	1,275	
	1893-94	173	4,019	26,182	30,201	26,120	4,072	81	3,991	504	
Murshidabad ...	1892-93	75	660	15,347	16,013	15,172	841	...	841	206	
	1893-94	75	841	16,906	17,747	14,430	3,308	...	3,308	301	
Jessore ...	1892-93	140	7,063	20,369	28,272	20,444	7,828	...	7,828	601	
	1893-94	140	7,828	21,397	29,225	21,029	7,506	423	7,163	655	
Khulna ...	1892-93	66	2,538	4,562	7,100	5,197	1,891	91	1,802	43	
	1893-94	64	1,802	5,015	6,817	4,192	2,625	...	2,625	100	
Total ...	1892-93	551	20,021	72,072	92,093	72,754	10,339	4,428	14,911	2,360	
	1893-94	553	14,911	75,490	90,391	72,017	16,374	654	17,770	1,630	

The first thing that strikes me in this statement is the very large arrear demand, which shows that as a whole the administration of pounds is very indifferently looked after. Jessore and Khulna stand out remarkably badly in this respect, though Nadia and Murshidabad also figure very poorly. It is satisfactory to see that remissions have been much less than usual.

345. Taking the Division as a whole, the number of pounds increased by 2 and the current demand by Rs. 3,408. The collections, including arrears, however, fell off, being 95·4 per cent. of the current demand against 101 per cent. in the previous year. The net balances have increased by Rs. 2,859. The expenditure in connection with the pounds was reduced by more than one-fourth.

346. In the 24-Parganas the number of pounds increased by 1 and the rental by Rs. 337. The collections show a decrease of Rs. 86 only. A sum of Rs. 948 was realised during the year as sale-proceeds of unclaimed stray cattle, &c., making up the total pound collections to Rs. 6,576 against Rs. 6,823 in the previous year. The new pound forms prescribed in Government Circular No. 37M., dated 22nd May 1893, were introduced from January 1894.

347. In Nadia the number of pounds increased by 3, but the current demand fell by Rs. 99. The net balance outstanding at the close of the year amounted to Rs. 3,991, which is heavy. It is in course of realisation under the Public Demands Recovery Act and by *kistibandis*. Complaints of malpractices by farmers in the form of illegal seizure and impounding of unoffending cattle by means of hired emissaries are not rare in this district.

348. In Murshidabad the number of pounds remained stationary, but there was an increase of Rs. 1,619 in the rental. The collections were, however, not as good as in the previous year, the balances outstanding being

Rs. 3,368 against Rs. 841. The decrease in collections is due to the fact that the farmers could not make much profit on account of the excessive rain of last year. They constantly defaulted, and the pounds were regularly resold at a loss. The balance will have to be recovered under the certificate procedure, but a great part of it is sure to be irrecoverable.

349. In Jessore also the number of pounds remained stationary, but the rental increased by Rs. 1,088. Collections increased by Rs. 1,185. The net balance outstanding was reduced from Rs. 7,828 to Rs. 7,168, but it is still far too heavy. A good deal of the balance which is covered by certificates is irrecoverable and will have to be written off. As a rule, respectable men seldom came forward to bid for the pounds, and the Local Boards settled them with those who offered the highest bids without enquiring into the character and solvency of the bidders. The result was that the farmers defaulted, and in the course of the certificate proceedings taken against them it came to light that they were men of no means. The Magistrate writes on the subject as follows:—"The difficulty of managing pounds seems to have increased of late owing to the strong prejudice felt by the Hindu community against having anything to do with seizing cows and putting them in pounds, where they may be subjected to hardship. Only Muhammadans of a common kind can usually be secured as lessees of pounds. A case in the Bangaon subdivision came to my notice, where a Hindu of the blacksmith caste took the lease of a pound, and for this he was boycotted by his fellow castomen."

350. In Khulna the number of pounds decreased by 2, but the current demand increased by Rs. 462, owing to the resettlement of some pounds at enhanced rates. The collections were, however, less by Rs. 1,005, owing partly to the scarcity during a part of the year, and partly to the apathy and neglect on the part of the Local Boards, by whom the pounds are managed. The net balance at close of the year was Rs. 2,625 against Rs. 1,802 in the previous year. Those balances which are really irrecoverable should be struck out as soon as possible.

351. The Magistrates of the 24-Parganas and Murshidabad have given no information regarding municipal pounds in their districts. In Nadia there were during the year 25 municipal pounds against 23 with an income of Rs. 3,733 against Rs. 3,457 in the previous year. All of these were farmed out. The numbers of municipal pounds in Jessore and Khulna remained stationary, but the incomes fell from Rs. 1,512 and Rs. 932 in the previous year to Rs. 1,250 and Rs. 712 respectively in the year of report. All the pounds in the Jessore Municipality were managed *khas*. I should recommend a change.

352. As regards management of pounds in the district, Local Boards as a rule rarely give any help in bringing to notice the irregularities in their management. If it was not necessary to give them some work, often to justify their existence, I would gladly see pounds taken away from them. It cannot be too often impressed upon them that if they wish to see the expenses of education increased, they should give more careful attention to the management of pounds.

#### FAIRS.

353. The most important fairs held in the 24-Parganas are—

1. Ganga Saugor *méla*.      2. Pir Gora Chand's *méla*.
3. Gazi Sahib's *méla*.

The Ganga Saugor, which is a religious bathing festival, was held during the year under report from the 9th to 14th January on the Saugor Island near the junction of the Bhagirathi with the sea. The fair is reported to have been smaller than usual on account of a corresponding fair at Allahabad, the number of people collected being estimated to be between 20,000 and 30,000. The usual arrangements to maintain order were made, and a Joint-Magistrate was deputed from the Sadar station to be present during the festival. There were a few cases of petty theft and extortion, which were, except two or three, all disposed of on the spot. There was no outbreak of any epidemic disease, but a few sporadic cases of cholera and bowel-complaints are reported to have occurred, and there were two deaths. The sanitary and conservancy arrangements were made by the District Board at a cost of Rs. 1,075, which was afterwards recovered from the proprietors.

The other two fairs are held in honour of Muhammadan pirs or saints. Pir Gora Chand's fair was held at Harwa in the Basirhat subdivision from the 23rd February to 2nd March. About 50,000 people are reported to have attended. Here was also no outbreak of any epidemic diseases. There were a few cases of fever and bowel complaints and one case of cholera, but none of them ended fatally. The District Board made all sanitary arrangements in this fair also at a cost of Rs. 312. The third or Gazi Sahib's fair was held at Bansra in the Sadar subdivision from the 20th to 22nd June, and was attended by about 50,000 people. There was no outbreak of any epidemic disease in this fair also.

354. In Nadia the principal fairs held during the year were the *Rash Jatra* at Santipur, the *Dól Jatra* at Ghosepara, and the *Chaitannya mēla* at Navadwipa. Each of these was attended by about 30,000 people. The *mēlas* at Kulia and Chakdaha also deserve mention. The former was attended by about 15,000 people. Sanitary and conservancy arrangements were either made by the local municipalities or by the owners of the lands on which the fairs were held. In Navadwipa the sanitary arrangements were made from the fees derived from the Lodging-house Act which is in force in this municipality.

355. An agricultural exhibition was held at Kushtia in March last, and lasted for a week. Government made a grant of Rs. 250 for its expenses, and Mr. N. N. Banerjee, an Assistant to the Director of Land Records and Agriculture, visited it, accompanied by an overseer of the Department, and issued instructions to the Managing Committee for the encouragement of the cultivation of Naini Tal potatoes and Buxar wheat by the cultivators.

356. The principal fairs in Murshidabad are—

- |                              |                            |
|------------------------------|----------------------------|
| 1. Tulsi Behar <i>mēla</i> . | 3. Chatta <i>mēla</i> .    |
| 2. Kapileshur <i>mēla</i> .  | 4. Patkabari <i>mēla</i> . |
- Goas *mēla*.

Of these the Tulsi Behar *mēla* is of some importance, and lasts for nearly a month. The other fairs are of short duration, and are gradually losing their importance and utility. No epidemic disease is reported to have broken out in any of these.

357. Of the fairs held in Jessore, those that deserve any notice are the Jubilee *mēla* at Magura, the *Rash mēla* at Satrajitpur in the Magura subdivision, and the *Rash mēla* at Gilapole in the Jhenidah subdivision. The Jubilee *mēla* was held from the 25th February to the 20th March. At this *mēla* there was an exhibition on a small scale. The exhibits were poor, but still small rewards were paid to encourage agriculture as well as art. Silk cocoons were exhibited in connection with a recent attempt to revive that industry in the neighbourhood. The *Rash mēlas* at Satrajitpur and Gilapole are religious gatherings. Both were held in November. The former lasted for a fortnight and the latter for a month and-a-half. Temporary shops were opened at both places.

358. In Khulna no fair of any importance was held during the year.

#### ZAMINDARI DÁK.

359. The following statement shows the receipts and expenditure on account of the zamindari dák service in this Division during the year under report as compared with the preceding year:—

DISTRICT.	Rate per cent. at which levied.		Amount levied.		Expenditure.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
	2		4	5	6	7
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
24-Parganas ...	0 8 0	0 7 0	7,865 13 6	10,074 10 2	7,643 8 10	7,656 0 6
Nadia ...	0 12 0	0 12 0	7,970 11 6	9,228 14 2	5,897 11 10	5,997 5 10
Murshidabad ...	0 9 0	0 9 0	9,677 2 10	5,863 1 5	6,200 6 1	6,275 0 9
Jessore ...	1 0 6	0 14 0	11,056 0 0	7,218 0 6	8,058 13 11	8,154 10 9
Khulna ...	1 0 0	1 0 0	9,680 0 0	6,875 0 0	7,684 4 1	7,568 5 1
Total			45,668 11 10	40,284 10 3	35,484 12 9	35,640 6 11

360. The number of post offices remained the same in all the districts of the Division. In the 24-Parganas the line from Bhangore to Chailabi, 32 miles

long, was abolished from 1st December 1893, owing to the abolition of the police outpost at Chailabi, and the total length of the lines was thus reduced from 230 to 198 miles. Owing to this reduction a monthly saving of Rs. 47 was effected, but an increase of Rs. 5 per mensem was granted to the pay of each of the branch postmasters of Bhangore, Debipur, Kulpee and Harwa, and also to the pay of the zamindari dák clerk of the Alipore post office. The net saving therefore amounted to Rs. 22 a month only.

361. In Murshidabad 5 of the 24 dák lines in the district were abolished during the year owing to the abolition of the five outposts named below:—

- |               |                 |
|---------------|-----------------|
| 1. Ranitolla. | 3. Jajan.       |
| 2. Sherpur.   | 4. Dhanirampur. |
| 5. Rangamati. |                 |

362. In none of the other districts was any change in the dák lines made during the year.

363. Under the orders of the Board of Revenue, contained in the Resolution dated the 5th January 1893, the cess was levied at the rates shown in column 3 of the table given above. This rate has been fixed for five years, from 1st January 1893.

364. The Board also by their Resolution quoted above have changed the kist days of 1894 from 28th March and 28th September to the 12th January and 28th September, *i.e.*, the 12th January has been substituted for 28th March, and these dates have been fixed for the next four years, *i.e.*, up to 1898.

365. The total collections during the year show an increase in the 24-Parganas and Nadia, while in the other three districts there was a decrease. The increase in the 24-Parganas is said to be due to the payment for the March kist of the year 1892-93 having been mostly made by the assesses in April 1893. It is also attributed to the fact that under the orders of the Board quoted above there have practically been three kist days during the year, *viz.*, those of April 1893, September 1893, and January 1894. The increase in Nadia is said to be chiefly due to the large collection of fines and excess payment. In Murshidabad the decrease in the receipts for 1893-94 is ascribed to a large part of the demand of that year having been paid in advance in 1892-93. The decreases in Jessore and Khulna have not been explained. In the former district it is probably due in part to the reduction in the rate of the cess from Re. 1-0-6 per cent. to Re. 0-14-0 per cent. The total expenditure shows an increase in all districts, except Khulna. In Nadia it is stated that the head clerk of the zamindari dák cess office having in 1892-93 been under suspension for some time, there was some saving in the expenditure, while during the year under report there has been no such saving. In Jessore the increase in the expenditure is attributed to the fact that more officers were on privilege leave than in the year preceding. The fluctuations in the other districts have not been explained, and do not require special notice.

366. There was no complaint reported during the year, and the management of the lines was satisfactory.

367. The amalgamation of the Zamindari Dák Department with the District Land Revenue Tausi Department has been ordered by the Board to come in force from the 1st April 1894.

#### XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

368. There are no important social or political institutions in any of the districts of this Division. The residents of the 24-Parganas district, who are inclined to interest themselves in social and political institutions, are able, owing to their proximity to Calcutta, to join the institutions and associations which exist there. There are rate-payers' associations in several municipalities in this district and in Nadia. They concern themselves for the most part with the affairs of the municipalities in which they are established. The Indian Association of Calcutta is said to have branches in Diamond Harbour in the 24-Parganas and in Krishnagar in Nadia. In the latter place it did not discuss any particular subject of interest, and in fact held no meetings at all. It is also reported that there are insignificant branches of the Congress Committee in Krishnagar, Chakdaha, Meherpur, and Kushtia in Nadia. These branch

committees do not regularly meet to discuss questions of public interest, but only when the general Congress meeting is advertised with a view to depute representatives.

369. In Nadia there are two social institutions, viz the Santipur *Bandhab Sabha* and the Ranaghat *Mitra Sabha*, which are doing useful work in the way of charity to poor and helpless widows and orphans.

370. In Murshidabad there are three Associations, viz. the Murshidabad Indian Association, the Murshidabad Muhammadan Association, and the Anjuman-i-Hydrî. During the year under review the first did not discuss any important social or political questions; the second only deals with matters connected with the moral and intellectual improvement of the Muhammadans of the district; the third is a purely religious institution, and is reported only to help and assist the poor and needy.

371. In Khulna there is no political institution of any importance.

372. Among the social institutions only the Jessore and Khulna Samilani, which look after zanana education and the physical and moral training of boys, and the Sripur *Hitasainini Sabha* which maintains a charitable dispensary in Sripur, deserve notice.

#### STATE OF PUBLIC FEELING.

373. Public feeling is generally confined to a small section of the community, viz., the upper and the educated classes. The masses of the people are seldom affected by anything which does not touch their purse and the practical concerns of their daily life. To matters of general interest they are practically indifferent.

374. Public opinion is formed and guided by the Calcutta press, which has a large circulation in almost all the districts of this Division. Municipal discussions which are not uncommon excite much feeling and discussion, often from personal motives, but they are purely of local interest and attract no attention beyond the towns concerned. Some excitement attended the fourth general election of Municipal Commissioners in which much interest was evinced.

375. The income-tax continues to be distasteful to those whose pockets it has touched.

376. Last year no subject caused any very special excitement. The only subjects which exercised the public mind were (1) the ninth National Congress held at Lahore; (2) the Provincial Conference held at Calcutta; (3) the currency legislation or the exchange question; (4) the grant of exchange compensation allowance to European officers; (5) the exemption of piece-goods from the provisions of the Amended Tariff Act; (6) the privilege granted to the municipalities and other local bodies and associations to nominate members for the Bengal Legislative Council; (7) the simultaneous examination question; (8) Bill to amend the Bengal Municipal Act III (B.C.) of 1884; (9) the cadastral survey in Bihar; (10) the cow-killing question; (11) questions put in Council by members in exercise of the power of interpellation granted to them. Public feeling was worked upon for some time by unfavourable criticisms on the administration of Lord Lansdowne. The selection of Meherpur as the headquarters of the amalgamated subdivisions of Meherpur and Chuadanga also evoked some local feeling.

377. The relation between Muhammadans and Hindus has been generally peaceful during the year under review.

#### THE PUBLIC PRESS.

378. In the 24-Parganas the total number of presses was 27 against 25 in the preceding year.

379. Of the presses, 1 is owned by Government, 1 by the Oxford Mission, 8 by Muhammadans, 15 by Hindus and 2 by Native Christians.

380. The Oxford Mission Press continues to issue two fortnightly newspapers, viz., the *Epiphany* and the *Indian Churchman*, and two periodicals, viz., the *Calcutta University Magazine* and the *Indian Churchman* (quarterly review). The Post Despatch Press issues the *Trannodaya*. The Metropolitan Steam

Press issues a weekly paper called the *National Guardian*. The Secular Press issued a periodical called the *Cosmopolitan*, which has since ceased to exist. The Saptahik Sangbad Press, the Cossipore Horticultural Press and the Bharati Press issue periodicals called *Amader Patrika*, *Sanskrit Chandrika*, and *Bharati* respectively. These papers and periodicals have only a limited circulation. The other presses did not publish any newspaper or periodical; they were maintained by receipts from job work.

381. In Nadia, as in the preceding year, there were three printing presses, viz., two in the town of Krishnagar and one in Kumarkhali in the subdivision of Kushtia. These presses generally print dakhilas and insignificant books. No newspaper is published in this district.

382. In Murshidabad there were 10 presses against 9 in the preceding year. Of them the Arunodaya Press publishes a Bengali weekly newspaper called *Pratihar*, and the Gourgobinda Press issues a paper called *Murshidabad Pratinidhi*. The circulation of these papers is limited and their tone moderate.

383. In Jessore there were, as in the preceding year, four presses at work, viz., the Suvakari Press and the Daw Press in the town of Jessore, the Sarkar Press in Narail, and the Chikitsa Prakash Press in Garibpur in the subdivision of Bangaon. Of them the first three executed job works only. The proprietor of the Daw Press having been convicted of forgery of currency notes and sentenced to 10 years' transportation, his press has been closed. The last-named press published vernacular books on medicine and hygiene and a vernacular weekly journal called *Samaj-o-Sahitya*. The circulation of this paper is too limited to deserve mention.

384. In Khulna there was only one press as in the preceding year. It issues no newspaper, but is maintained by printing forms required by the local offices and private persons. A monthly vernacular journal called the *Ghosak* has recently been started by a local Native Christian. It is printed and published in Calcutta.

385. Of the vernacular papers published in Calcutta, the following are the most important :—

	Estimated circulation.		Estimated circulation.
1. The <i>Bangarasi</i>	... 20,000	7. The <i>Bharat Mitra</i>	... 2,000
2. The <i>Banganivasi</i>	... 8,000	8. The <i>Sudhakar</i>	... 2,000
3. The <i>Sanjivani</i>	... 4,000	9. The <i>Dainik</i>	... 1,200
4. The <i>Samaya</i>	... 4,000	10. The <i>Som Prakash</i>	... 800
5. The <i>Sulabh Dainik</i>	... 3,000	11. The <i>Sahachar</i>	... 500
6. The <i>Hitavadi</i>	... 3,000		

The *Bangarasi*, *Dainik*, and *Banganivasi* are orthodox in their views as regards social and religious matters. The *Sanjivani*, which is an organ of the *Sadharan Brahmo Samaj*, and the *Samaya* are heterodox in social and religious questions and advocate the cause of raiyats and coolies. The *Hitavadi* supports the Congress and is liberal in social matters. The *Sudhakar* is an orthodox Muhammadan paper, which is of use as showing what Musalmans think of controversial questions. The *Sahachar*, edited by a senior Pleader of the Alipore Judge's Court, is generally moderate in its views and language.

386. The administration of Government in all departments was freely criticised by the vernacular papers. The Police, Criminal and Civil Justice, the University and Legislature, all passed under review and received their share of comment.

387. Of the English newspapers conducted by natives, the *Indian Mirror*, *Amrita Bazar Patrika*, *Reis and Rayget*, *Hindu Patriot*, *Indian Nation*, *Hope* and *Bengali* are largely read, and are generally conducted with considerable literary skill.

388. The tone of the press as reflected in the native press has been as hitherto generally antagonistic to the legislative and administrative actions of

in every way. If one was to believe them, one would believe that nearly all Government actions were done for the benefit of the people at large, and that honesty was as a rule unknown among officials. On the people at large,

their vapourings have fortunately but little effect, but the attention paid to them by ignorant and mischievous people in England undoubtedly encourages them, and makes their writers believe that they attract much more attention than they really do. The *Cacoethes scribendi* has never been better exemplified than it is in many of the papers at the present time. On one subject, however, they have been sensible, and that is on the so-called "tree-daubing scare." They have with good reason jeered at the terrible state of alarm in which so many Europeans have lately found themselves merely because of sensational articles and letters in some of the Anglo-Indian contemporaries.

#### XXXV.—CHARACTER OF OFFICERS.

\* \* \* \* \*

#### XXXVI.—CONDUCT OF ZAMINDARS.

\* \* \* \* \*

#### XXXVII.—GENERAL REMARKS.

396. I did not take charge of the office of the Commissioner of this Division till the end of April after the close of the year under report; and as it was the busiest time of the year, when all annual returns and reports have to be prepared, I have not hitherto been able to make a tour in any of the districts of this Division except a short tour in Murshidabad or to inspect any of the local offices. This report has therefore been compiled from the information which has been furnished by the District Officers in the different reports which have been received from them, and I have been able to add very little from my own personal knowledge.

397. As far as I can judge, the year has been an uneventful one on the whole. Mr. Maguire, the Collector of Khulna, made the following observations, in which I fully agree:—"The history of an Indian district is generally the history of some calamity—a famine, a cyclone, or a tornado; and in this sense that district may be said to be happy which has no history, and this may, I think, be truly said of Khulna in the year 1893-94." This remark applies generally to all the districts of this Division during the past year.

398. The successive bad harvests for the last four years, consequent on the unseasonable and unequal distribution of rain, pressed hard on the people, especially of the middle class, whose condition was not on the whole very favourable. The year under report was healthier than its predecessor, but still the mortality from malarious fever and cholera was great.

399. It is to be hoped that the Sanitary Drainage Bill will do good, but there is a very decided opinion that good drinking water is wanted in preference to drainage, especially as there is but little doubt that the landlords do not, either from poverty or from other reasons, devote as much money to the keeping up of tanks and to water-supplies as they did in old times. The raiyats also are not so willing as they were to give help on the subject.

400. In spite of all that is being done, the spread of elementary education is slow; that it is making way is, however, a source of congratulation. During the year under review owing to agricultural distress there has been a considerable decrease in the number of the lower primary schools and their pupils.

401. The relations between landlords and tenants were generally satisfactory. There was no tension of feeling between the Hindus and Muhammadans, and the cow-killing question which disturbed the peace of the north-western part of this province spread very slightly to this Division.

402. During the year under review some advances were made regarding improvement of drainage of a portion of the Barasat subdivision in the 24-Parganas by opening out a dead river called the Soonti for a distance of about 9 miles. The immediate effect of this has been that the free flow of the water of the river has been established, the drainage of Barasat and neighbouring villages improved, and the water of the river, which was absolutely filthy before, is now good enough to be used for drinking and culinary purposes. Boats also now proceed up the river. It is also reported that malarial fever has not been so prevalent since the improvement was effected.

403. Nothing has, however, yet been done to open the Anjona at Krishnagar in Nadia. A scheme has been prepared for the purpose, but it has not been finally approved of by Government.

404. Proposals have been made for constructing a steam tramway from Ranaghat to Krishnagar *via* Santipur, and if they are carried out, they will remove a long-felt want.

405. During the year under report the list of ancient monuments prepared in 1886 was revised. Some additions and corrections have been made to it. Mr. Maguire, the Collector of Khulna, visited nearly all the chief antiquities in his district. Some of the monuments possess some historical interest.

# RESOLUTION ON THE REPORT OF THE BOARD OF REVENUE ON 'WARDS' AND ATTACHED ESTATES IN THE LOWER PROVINCES FOR THE YEAR 1893-94.

## REVENUE DEPARTMENT—LAND REVENUE

*Durjeeling, the 8th October 1894.*

RESOLUTION—No. 763T—R.

READ—

The Report of the Board of Revenue on Wards' and Attached Estates in the Lower Provinces for the year 1893-94.

The report was submitted to Government in due time on the 27th August 1894. The number of wards' estates under the charge of the Court of Wards was 78, and of attached and encumbered estates 67, against 74 of the former and 66 of the latter in the preceding year. There was thus an increase of four wards' estates and one attached estate in comparison with the year 1892-93. Of the total number of estates, 16 wards' estates and 5 attached and encumbered estates were under management for a part of the year only according to Appendix I of the Board's Report, having either been taken charge of or released during the year.

2. The total demand for revenue and cesses (current and arrear) due to Government was Rs. 51,13,516. Rupees 78,876 of the arrears and Rs. 50,20,141 of the current demand were paid, being 99·8 per cent. of the total demand.

The balances, which show a considerable reduction, being Rs. 14,499 only, were chiefly due from the Basudebpur estate in Midnapore and the Sheohar estate in Muzaffarpur. The former was a heavy defaulter in the previous year, and was discharged from management during the year of report. The Sheohar estate was taken in charge on the 5th September 1893 with arrears due to Government amounting to Rs. 6,684, of which Rs. 2,931 were left unpaid.

3. The amount of rent and cesses due to superior landlords was Rs. 6,22,729, of which Rs. 1,09,294 were the arrear from the previous year. The payments amounted to only Rs. 4,95,586, leaving the large balance of Rs. 1,24,299, the major portion of which was due by three estates, viz., Haturia, Bamna, and Satkhira. The first two were taken in charge during the year heavily involved in debt, while in Satkhira the bulk of the balance is due to disputes between the estate and co-sharers. The lastnamed estate was in an embarrassed condition in 1892-93 also.

4. The following statement shows the demand, collection, and balances of rent and cesses due to the estates during the five years ending with the year of report:—

YEAR.	DEMAND.			COLLECTIONS.			PERCENTAGE OF—		Remissions.	Balances.
	Arrear.	Current.	Total.	Arrear.	Current.	Total.	Current collection on current demand.	Total collections on current demand.		
1	2	3	4	5	6	7	8	9	10	11
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.			Rs.	Rs.
1889-90	1,08,44,289	1,00,15,159	2,08,61,448	...	...	1,02,24,591	...	102	24,52,188	81,84,669
1890-91	79,81,439	98,29,588	1,78,11,020	...	...	96,29,082	...	98	7,57,448	74,24,535
1891-92	77,07,017	91,53,100	1,68,60,117	30,07,505	60,69,371	91,38,730	96·3	99·8	12,12,179	65,69,302
1892-93	62,08,638	92,69,637	1,55,01,300	20,04,150	61,06,730	81,00,405	88·6	97·8	3,05,605	60,06,710
1893-94	66,78,027	97,38,208	1,64,10,230	29,84,402	64,12,911	93,07,313	85·8	96·5	4,35,740	65,77,177

5. The percentage both of current collections and of total collections on the current demand was lower than in either of the two preceding years. The falling off is attributed to loss of crops by floods and unfavourable agricultural results in many parts of the country, especially Tippera, Backergunge, and Midnapore. Out of the 21 larger estates with a rental of Rs. 50,000 and upwards

the percentage of total collections on the current demand exceeded a hundred in only eight cases:—Burdwan, Khagra, Bhawanipur, Maldwar, Kanika, Deo, Rajkrishna Banerjee, and Sukraj Rai. The current collection on the current demand in the Courjon estate in Noakhali reached only 80·6 per cent. against 90 per cent. in the previous year. The total amount of balances of rent and cesses due to estates at the end of the year was Rs. 65,77,177, of which Rs. 7,82,871 were due when the estates were taken in charge, and Rs. 57,94,306 accrued subsequently. Rupees 47,64,287 of the balances are said to be good and in process of recovery. The bad and irrecoverable balances increased by Rs. 2,64,454.

6. The table given in paragraph 11 of the Board's report shows the debts due by estates. Debts due during the year, the payments and reductions by compromise, and the debts due at the end

of the year, by all estates under management, including those which were in charge for only a part of the year. To be of any statistical value, the table should include only the estates under the management of the Court throughout the year, or at least it should separate them from the new and relinquished estates. The figures thus reduced show that the total amount of debts due during the year was Rs. 36,27,063, the payment and reductions by compromise Rs. 11,66,215, and the debts due at the end of the year Rs. 24,60,848. The Court of Wards withdrew from the management of the Basudebpur estate in Midnapore, and have since the close of the year released the Bamna estate in Backergunge on account of their hopelessly embarrassed condition.

7. Separating new or relinquished estates from those under management throughout the year, the management charges were Rs. 7,16,772, and the percentage on the

current demand for rent and cesses was 7·3. Except in Burdwan, where the enormous rental of the Burdwan Raj Estate reduces the percentage of charges, and in Chota Nagpur and Dacca the charges were between 10·4 and 14·4 in the other Divisions. The new general management rate under Act X of 1892, which came into force from the beginning of the year 1893-94, yielded Rs. 1,32,092 out of a demand of Rs. 1,42,961, which includes Rs. 5,560 of arrears of the previous year. The balance remaining unrealised at the end of the year was therefore Rs. 10,869. On the other hand, there were advance payments amounting to Rs. 6,573.

8. Survey or settlement operations, or both, under the supervision of the Director of Land Records, were in progress in portions of the Burdwan Raj khas mahals, in

the Talipabad, Dakhin Shahbazpur and Tikari estates, and had been practically completed in the Sarail, Kujang (included in the Burdwan Raj) and Kanika estates. Portions of the following estates were also under survey and settlement:—Malighati, Turkoa, Syudpur, Maldwar, Chandrakumar, Madhupur, Siri, Dhalbhum, and Pandra. It is contemplated that wards' estates in Chittagong, Cuttack, Balasore, Puri, Muzaffarpur, Saran, Champaran, and Darbhanga will be included in the general settlement operations in these districts.

9. In the Resolution on the Board's report for the year 1891-92, the following observations were made:—"Sir Charles Elliott cannot too strongly insist upon the policy

Improvements.

of devoting a liberal expenditure to improvements in solvent estates which have come under the charge of Government. Every manager of such estates should make out and keep by him a programme or list of projects and estimates, and this list should, if possible, be sanctioned beforehand, so that he may be ready to spend on these works any surplus sums he may have; and Commissioners and Collectors, when on tour, should call for these lists of projects and discuss them with managers and arrange them in order of importance." The Board, in paragraph 15 of their report for the year 1892-93, noted that the attention of the local officers had been drawn to these orders. But the Lieutenant-Governor discovered that in certain estates in the districts of Backergunge and Noakhali, which came under his inspection in July last, no such list had been prepared, and no attempt had been made by the managers to follow the orders of Government. The present report furnishes ample evidence of the general tendency to disregard these orders. The following table shows that there has been some improvement, and the total amount spent on all manner

of useful objects has risen above 7 lakhs of rupees and exceeds the record of any past year. But the expenditure on schemes of direct improvement to the estates amounted only to Rs. 1,58,406, a small sum compared with the amount of investments in landed property and Government securities, Rs. 5,59,441, and the year closed with a cash balance of Rs. 18,63,446. The Lieutenant-Governor trusts that in future more serious efforts will be made to spend the surplus usefully:—

YEAR.	Subscriptions and donations to schools.	Subscriptions and donations to dispensaries.	Maintenance in efficient condition of estates, buildings and other immoveable property.	Improvement of land and property for benefit of ward.	Surveys and settlements.	Total.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1889-90 ...	69,301	38,732	2,24,439	66,930	2,24,168	6,23,570
1890-91 ...	59,241	32,255	2,13,178	58,404	1,26,523	4,89,601
1891-92 ...	61,155	37,598	1,91,397	92,864	2,67,345	6,50,359
1892-93 ...	64,059	36,524	2,16,870	1,57,782	97,104	5,72,339
1893-94 ...	59,844	46,527	2,46,225	1,58,406	2,01,899	7,12,901

10. In the great Burdwan estate, with an income of over 50 lakhs of rupees, Rs. 91,062 were spent on surveys and settlements and Rs. 23,752 on improvements, which apparently include the sum of Rs. 9,679 shown in statement XXVII of the Divisional Administration Report of Orissa to have been expended on improvements in the Kujang estate appertaining to the Burdwan Raj. There is room for large expenditure in the Kujang estate on judicious sea embankments.

In the Tikari estate, yielding an income of about 7½ lakhs of rupees, Rs. 39,288 were spent on works of improvement, such as gilandazi, wells for irrigation, &c., against Rs. 26,350 in the preceding year.

In the Kasim Bazar estates over Rs. 12,000 were laid out on the excavation of tanks for drinking water. In Bhawanipur, Rs. 12,104 (or according to the Commissioner's Annual Report, statement XXVII, Rs. 18,321) were expended on works of improvement, but most of this was devoted to clearances of jungle in the Sundarbans and very little to improvement of the inhabited part of the estate, though there is much demand there for further outlay on the water-supply of the villages.

11. With the exception of these four estates—Burdwan, Tikari, Kasim Bazar, and Bhawanipur, Tikari being the best in this respect—the subject of improvements appears to have been generally neglected: the worst of the remaining 17 of the larger estates being Khagra, Basudebpur, Dhalbhum, Courjon, Rajkrishna Banerjee, and Sukraj Rai, of which the first four spent nothing on improvements. The case of Dhalbhum is particularly bad; the year closed with a cash balance of Rs. 25,319, but there was no expenditure under this head. The Lieutenant-Governor has separately called the attention of the Board to the management of the Courjon estate, with which he is not satisfied. In the Divisional Administration Report, Mr. Oldham observes with regard to the management of this estate as follows:—"Worst of all is the Courjon estate. We have had it now for over 20 years, and beyond some paltry subscriptions have done nothing for the tenantry, while we have been rigorous rent-receivers and enhancers. The large amount of claims written off in my time showed in detail how freely and carelessly certificates used to be issued. The excuse for this system is that it came to us with a debt of Rs. 1,25,000 which was fully cleared last year. This debt was absolutely personal and had nothing to do with the maintenance of the estate or the tenantry.

I represented\* that at least one portion of the estate in which the operation was practicable at an estimated cost of Rs. 6,000 should undergo a survey and settlement. No reply has yet been received." In the Rajkrishna Banerjee estate the expenditure on improvements was only Rs. 245, though there were no debts—a fact which does not correspond to the high character borne by the Manager of the Chittagong Wards' Estates. The Sukraj Rai estate spent the extremely small sum of Rs. 97 on improvements. In the Maldwar estate in Dinajpur Rs. 4,678 are shown in statement XXVII of the Commissioner's Divisional Administration Report to have been spent on improvements, while the Board's Report shows an expenditure of Rs. 2,130 only. No explanation is, however, given as to the manner in which this amount was laid out. The Shankarpur estate shows a surplus of Rs. 49,100, and an expenditure of only Rs. 1,450 on improvements. (The Divisional Report states the expenditure on improvements at Rs. 2,505.) The Dakhin Shahbazpur estate in Dacca spent only Rs. 800 on improvements, while the charges on account of maintenance, &c., of the proprietor and family amounted to Rs. 42,968. The Lieutenant-Governor has drawn the attention of the Board separately to the management of this estate also. The Chandrakumar estate in Shahabad spent only Rs. 600 on improvements, but the debts of the estate are heavy. The Dhanwar estate in Hazaribagh spent the sum of Rs. 1,923 on improvements, which is insufficient in comparison with the cash balance of the estate.

12. In this connection the Lieutenant-Governor desires to draw the attention of the Board to the following remarks of the Officiating Commissioner of Burdwan in his recent Divisional Administration Report for 1893-94 :—"The administration of wards' estates in the Midnapore district has not been as satisfactory as might be expected. In taking involved estates under our administration, we hope to improve their condition and to make them over in a solvent state. We have not done this either in respect of Basudebpur or in respect of Beraberia, which were in our hands for years; and the condition of some other estates which were released within the past few years was quite as bad at the time of release. It is to be hoped that we shall succeed better in future, and that all estates in Midnapore now under the Court of Wards will improve by our administration." The following remarks of Mr. Romesh Chunder Dutt are also quoted as being to the point:—"Cholera is mainly due to bad drinking-water as malarial fever is mainly due to obstructed drainage; and as the supply of drinking-water is improved, cholera must abate. This has been so in Calcutta, where cholera raged furiously in every hot season, thirty years ago, and the disease has never raged to the same extent since the town got a supply of filtered water. It is to be hoped that every district town will sooner or later be supplied with filtered water, and that tanks will be reserved in every village. A very great deal has yet to be done to improve the sanitation of the country; but it is impossible for District Boards to undertake this with their present resources which are meagre, and are barely sufficient for roads and education."

13. The following statement illustrates the working of the certificate procedure in wards' and attached estates during the five years ending with the year 1893-94 :—

Certificates.

YEAR.	Number pending from last year.	Number filed during the year.	Total.	Disposed of during the year.	Pending more than six months.	Pending less than six months.	Total.	Amount of demand covered by the certificates.	Total annual rent and cesses of estates.	Percentage of column 9 to column 10.
1	2	3	4	5	6	7	8	9	10	11
1889-90	...	25,018	16,397	38,415	17,628	14,546	2,241	20,787	Rs. 6,32,703	1,00,15,169
1890-91	...	31,187	10,975	33,143	18,438	12,193	1,511	13,704	4,60,970	98,20,538
1891-92	...	13,704	13,359	27,063	17,148	8,107	1,748	9,855	4,75,613	91,53,100
1892-93	...	12,310	8,648	21,858	11,705	9,053	1,040	10,093	5,58,414	92,90,087
1893-94	...	10,381	7,477	17,758	11,638	4,334	1,761	6,096	6,71,210	97,32,305

The Board observe that the decrease in the number of certificates filed, from 8,648 to 7,477, was due to the orders of Government prohibiting the issue

of certificates in wards' estates, of which a survey has not been made and record of rights prepared. But during his tour in July last, the Lieutenant-Governor found that in Noakhali the certificate procedure was applied to the estates in the district, though none of them had been surveyed or had a record of rights. So far as the orders of Government are carried out, it will be well if information were given as to what substitute has been employed for the certificate procedure, and if civil suits have been filed, corresponding statistics to those in the preceding table should be given about them.

14. The Board report that eleven estates were taken in charge and ten released during the year. The section of the Board's report which refers to the relinquishment of estates, contains a remarkable record of good work done, especially in the case of the Dighapatia estate. The estate lies in 15 districts, the ancestral portion of it belonging, under the will of the late Raja, to his eldest son, Kumar Promada Nath Rai, and the self-acquired estates to his three younger sons. The rent-roll of the eldest ward stood at the time of assumption of charge by the Court of Wards in January 1884, at Rs. 4,36,639, and that of the younger wards at Rs. 1,50,210. On the date of release the rent-roll of the former was Rs. 4,89,254, and of the latter Rs. 2,19,650, the increase in the first case being due to purchase of new properties and the settlement and resettlement of waste and relinquished lands; and in the second case, principally to properties being brought under direct management in consequence of the default of patnidars. The gross value of Government securities and cash balance on the date of assumption of charge was Rs. 3,65,628 in the case of the eldest ward, and nothing in the case of the younger wards. On the date of release the amount of the former was Rs. 16,70,107, and the latter Rs. 4,04,841. The estates are free from debts, while the debts due to the eldest ward's estate were reduced from Rs. 4,74,499 to Rs. 1,77,708. The debts due to the younger wards have increased from Rs. 23,745 to Rs. 79,638, on account of default made by certain patnidars. The portion of the younger wards' estate which was managed direct, is held in coparceny, and, as the co-sharers would not join, no works of improvement were undertaken. But the eldest ward's estate spent during the period of its management by the Court of Wards, Rs. 76,006 in subscriptions and donations to schools, Rs. 44,757 in subscriptions and donations to dispensaries, and Rs. 80,332 on works of improvement of which Rs. 30,810 were laid out in the excavation of tanks. This estate maintained and supported two high class English schools, nine middle vernacular and middle English schools, twenty-seven patshalas, one Sanskrit tol, and two girls' schools, granted allowances to boys in indigent circumstances, and contributed towards the construction of school buildings. A good library is also maintained at Dighapatia at the expense of the estate for the benefit of the people. The charitable dispensaries at Dighapatia, Bonaghati, and Naukhila are entirely supported by the estate, and contributions were granted to the dispensaries at Pabna, Bogra, Nator, Noagaon, Bongram, and Sara. The eldest ward read up to the full course of the F.A. examination in the Presidency College, after which he left the College to learn zamindari business. The second ward, Kumar Basanta Kumar Rai, has successfully passed the B.A. examination with double honours in English and Philosophy, while the third and fourth wards are now in the second-year class of the Presidency College. The Lieutenant-Governor has perused the following passage of the Board's report regarding the eldest ward with much pleasure:—"It is believed that his future career will show that the care bestowed on his education by the Court of Wards was not thrown away. He fully appreciates the system of management of the Court, and it is expected he will pursue that line of conduct which the Government hopes and expects from zamindars who have the interest and good of the people at heart."

15. The number of estates managed during the year, under the Chota Nagpur Encumbered Estates Act VI of 1876, was 55, being the same as in the preceding year. Three estates were released during the year, and one was brought under protection during the year. The following statement shows the demands, collections, and balances for 1893-94:—

DISTRICT.	Arrear demand.	Current demand.	Collections.	Percentage of collections on current demand.	Remissions.	Balance.	Advance collections on account of the ensuing year.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.		Rs.	Rs.	Rs.
Hazaribagh ... ..	42,380	94,434	96,121	102.6	8,892	30,101	26,046
Lohardaga ... ..	59,506	91,607	92,309	100.8	2,604	56,050	124
Palamau ... ..	4,908	15,697	16,030	107.8	373	3,202	.....
Manbhum ... ..	31,122	95,619	85,116	89.0	1,241	40,341	129
Singbhum ... ..	1,00,450	87,347	73,424	84.2	8,882	1,65,401	30
Total ..	2,08,326	3,84,704	3,64,769	94.8	21,582	2,96,648	21,278

16. The progress made in the liquidation of debts is shown in the following statement:—

DISTRICT.	Due at the commencement of the year.	Ascertained and incurred during the year.	Total.	Payments.	Reduction by compromise.	Balance due at the close of the year.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Hazaribagh ...	6,51,832	28,070	6,79,902	2,42,656	11,761	4,25,485
Lohardaga ...	2,24,995	7,607	2,32,602	39,382	100	1,93,120
Palamau ...	1,21,563	2,726	1,24,289	12,235	.....	1,12,054
Manbhum ...	2,18,057	12,521	2,30,578	32,008	.....	1,98,570
Singbhum ...	1,77,565	6,131	1,83,696	20,959	.....	1,62,737
Total ...	13,94,012	57,055	14,51,067	3,47,240	11,861	10,91,966

It is not possible to gather from the facts and figures contained in the Board's report to what extent the schemes of repayments of debts were carried out in each district, and it would be well if a column were added to the above table to show what portion of the total debts fell due, under the scheme of repayment, to be discharged within the year. The Manbazar estate in Manbhum is mentioned as having been deficient in this respect, but it is not stated how far the payments fell short of the provisions of the scheme for liquidation of debts of this estate.

17. The Lieutenant-Governor desires to thank the Board of Revenue for their successful management of the estates under their charge. The names of the officers who are specially commended by the Board will be noted in the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,  
Secretary to the Govt. of Bengal.

**REVISED RULES FOR THE REGULATION OF APPOINTMENTS IN THE  
SECRETARIAT CLERICAL SERVICE OF THE GOVERNMENT OF  
BENGAL AND ATTACHED OFFICES.**

FINANCIAL DEPARTMENT.—MISCELLANEOUS.

*Darjeeling, the 10th October 1894.*

RESOLUTION No. 364T.—F.

READ—

The Resolution of the Government of India, Home Department, No. <sup>2 Exam.</sup><sub>186-1187</sub>, dated the 5th June 1894.

Read again—

The Resolution of this Government in the Appointment Department, dated the 16th March 1889.

The system laid down by the Government of India for the regulation of appointments in the clerical service of the Secretariat of that Government and of its attached offices was extended to the same service of the Government of Bengal by the Appointment Department Resolution quoted in the preamble. The rules of the Government of India on the subject were adopted for the Bengal clerical service with some slight modifications, and competitive examinations (to be held simultaneously with those for appointments under the Government of India) were prescribed for candidates desirous of employment under the Government of Bengal. An essential part of this scheme was the separation of the clerical service into two Divisions—an Upper and a Lower; the minimum limit of pay for the former being fixed at Rs. 100, and appointments carrying pay below that sum being comprised in the latter.

2. By their recent Resolution cited in the preamble, the Government of India, while retaining the rules for the examination and appointment of candidates for the Lower Division, have abolished the examination for the Upper Division, the passed candidates appointed to vacancies in that Division having proved unequal to the duties with which they were entrusted; and it has been ruled that in future vacancies in the Upper Division will ordinarily be filled by the promotion of men already serving in the Lower Division.

3. The experience of the Government of India in respect of the Upper Division appointments appears to be more or less that of the heads of offices and departments in Bengal; who, as a rule, have been unwilling to appoint to vacancies in the Upper Division men who were selected for their success in a competitive examination, but have no experience in office work. At the same time, the number of candidates for appointments in the Upper Division has been much less than was expected. The Lieutenant-Governor, therefore, considers that in Bengal also an Upper Division examination need not be maintained. It seems to him, moreover, that this examination being abolished, the separation of the offices into two divisions will be no longer necessary. The distinction between the Upper and the Lower Division, by pay only, and not by class of work, has been purely arbitrary, and hardly designates any real difference in the demand for special ability. The divisions will accordingly cease to exist. There will be a single examination for admission into the clerical service, and promotion will be given throughout each office according to seniority and merit combined, subject, however, to the recognized proviso that the head of the office may introduce outsiders into appointments requiring special experience or fitness, when they cannot be suitably filled in the office itself. It is necessary also that a proportion of the vacancies should be reserved for the appointment of registered apprentices, and of European and Eurasian candidates, who should receive some appointments, and this proportion is fixed at one-third. The remaining two-thirds of the vacancies will be open to the successful candidates at the examination held under the rules appended to this Resolution.

4. The clerical service rules have hitherto been in operation in certain specified offices in the mufassal as well as in Calcutta; but it has been found that passed candidates are generally unwilling to accept appointments on small pay out of Calcutta, while, on the other hand, the pay which will tempt passed candidates to accept posts in the mufassal is generally sufficient to secure a more experienced man locally. In these circumstances the Lieutenant-Governor considers that the mufassal offices which have hitherto been under the operation of the clerkship rules may well be left outside their scope for the future.

5. The rules framed under the Appointment Department Resolution of 1889 have been revised in accordance with this Resolution, and are now republished for general information. They will come into force with effect from the date of publication in the *Calcutta Gazette*, and will apply only to the offices named below. All other officers are left free to make their own arrangements for filling up vacancies: —

1. The Bengal Secretariat.
2. The office of the Board of Revenue.
3. Ditto Inspector-General of Jails.
4. Ditto ditto of Police.
5. Ditto ditto of Registration.
6. Ditto ditto of Civil Hospitals.
7. Ditto Director of Land Records and Agriculture, Bengal.
8. Ditto Sanitary Commissioner.
9. Ditto Superintendent of Emigration and Protector of Emigrants.
10. Ditto Superintendent of Stamps and Stationery.
11. Ditto Collector of Calcutta.
12. Ditto ditto of Customs, Calcutta.
13. Ditto Commissioner of Excise.
14. Ditto ditto of the Presidency Division.
15. Ditto Superintending Engineer, South-Western Circle.

ORDER.—Ordered that this Resolution, together with the revised rules, be published in the *Calcutta Gazette*, and that a copy of each be forwarded to the heads of the offices concerned, to all Departments of this Government, and to the Accountant-General, Bengal, for information.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

*Offg. Secretary to the Govt. of Bengal.*

*Rules for the Regulation of appointments in the Clerical Service of the Secretariat of the Government of Bengal and of the attached offices.*

1. The Clerical Service of the Secretariat of the Government of Bengal and of the attached offices will no longer be divided into two sections, the Upper and the Lower Division. Promotion will in future be regulated throughout each office by seniority and merit combined. The head of the office will, however, retain the power of introducing outsiders into appointments requiring special experience or fitness, when they cannot be suitably filled by promotion in the office itself.

2. An examination of candidates for the Clerical Service will be held in communication with the Government of India in Calcutta in January of each year. Subject to the permission of the Government of India, the arrangements for the examination will be made by the Board of Examiners, Fort William, who will be assisted by paid Examiners, and will act in communication with the Financial Secretary to the Government of Bengal. Before the examination commences, a distinguishing number will be given by the Secretary to the Board of Examiners to each candidate, with which he will mark each of his papers of answers.

3. There will be a preliminary test in dictation and handwriting which candidates must satisfy. The examination in these subjects will not be competitive, but marks will be assigned for the purpose of testing proficiency. The papers of candidates will be examined as soon as possible after this examination, and the Examiners will require any candidate who

fails to obtain two-third marks in each subject to withdraw from the further examination. The remaining subjects will be—

	Marks.
(1) English composition ... ..	100
(2) Précis-writing ... ..	100
(3) Geography ... ..	50
(4) History (English and Indian) ... ..	50
(5) Arithmetic: Euclid, 1st book, and Algebra up to Simple Equations ... ..	50

Any candidate obtaining less than one-fourth marks in either subject (1) or subject (2) shall be disqualified, and no candidate will be credited with any marks in subject (3), subject (4) or subject (5) unless he obtains one-fifth of the marks in that subject.

4. Candidates who have passed the Entrance Examination of an Indian University, or, in the case of Europeans and Eurasians, by standard VII prescribed by the Code for European Schools, will alone be admitted to the examination. Every candidate for an appointment must send a written application for permission to appear at the examination to the Secretary to the Board of Examiners between the date of issue of the notification announcing the number of vacancies to be competed for (*vide* Rule 6), and the sunset of the 15th day of December (inclusive).

[FORM.]

To the Secretary to the Board of Examiners,  
Fort William.

SIR,

I REQUEST permission to present myself at the ensuing examination of candidates for appointments in the Clerical Service of the Secretariat of the Government of Bengal and the attached offices.

2. If successful, I should elect to serve in the office of the

3. A treasury receipt for the fee of Rs. 10 is forwarded herewith.

I am, &c.

5. The application under the last rule should be in the form given in the margin, and must be accompanied by a treasury receipt for the sum of Rs. 10. This sum the candidate is required to pay into the treasury nearest his place of residence by way of examination fee. With the application must also be forwarded—

- (1) The candidate's certificate of the Entrance or any higher University Examination, or of standard VII prescribed by the Code for European Schools.
- (2) Evidence (except in the cases provided for by Rule 7) that the candidate at the date of making his application is not less than 18 and not more than 24 years of age. The date of the candidate's birth must be stated.
- (3) In case the candidate has been educated at a school in which students' good-conduct registers are kept, and in case a year has not elapsed since he left school, a copy of the candidate's register for the last year of his attendance at school certified by the Head Master. In other cases a certificate that the candidate is of good moral character, from the head of the institution in which he has last been educated, or from some respectable house-holder to whom he is well known in private life, and who is himself known to a District or Sub-divisional Magistrate or to the head of some Government office—this last fact being certified by the countersignature of the officer in question.
- (4) A certificate from a Government Medical Officer of or above the rank of Surgeon-Captain, that the candidate is in good health and of sound constitution.

6. The number of candidates to be selected by the examiners will be notified in the *Calcutta Gazette* on or before the 31st October. This number will be determined in communication with the heads of the offices concerned, with reference to the number of vacancies existing or estimated as likely to occur within the course of the following year, plus a margin of 10 per cent for casualties.

7. Persons who have at any time held a permanent appointment in any of the offices affected by the Resolution, but who may have lost such appointment owing to its abolition or on reduction of establishment, may present themselves for examination under these rules, provided they are under 40 years of age on the day of the examination.

8. As soon as practicable after the open competitive examination, the Board of Examiners will report the result to the Financial Secretary to the Government of Bengal. The report will take the form of a list giving the names of selected candidates, and the exact dates of their births; the distinguishing numbers of unsuccessful candidates; and the number of marks obtained by each candidate, whether successful or unsuccessful, in each subject of examination. The Financial Secretary will then circulate a list of selected candidates to the heads of the offices concerned. Candidates will be given their choice of departments as far as possible, and the Financial Secretary will intimate such choice, if made, to the head of each office. The head of each office will, however, be at liberty to offer a vacant appointment which may occur in his office to any selected candidate on the list. This offer should be made through the Financial Secretary, who will keep each office informed as the names of selected candidates are removed from the list. No candidate selected in a later year shall be offered an appointment until the offer has been made to, and refused by, the selected candidates of an earlier year remaining on the list.

9. The name of a candidate shall be removed from the list in the following circumstances:—

- (a) If he is not already in service—when he reaches the age of 25 years.
- (b) When he has twice refused an appointment in any Department, or when two years have elapsed from the date of entry of his name in the list.

10. One-third of the vacancies in each office may be filled up by the head of the office from the registered apprentices or by the appointment of outsiders. The remainder will be reserved for the successful candidates at the Clerical Service Examination. If, however, such a candidate is not available for any vacancy, it will be at the disposal of the head of the office.

11. Appointments of men not in the list of successful candidates of the Clerical Service shall, if the person appointed is not already in Government service, be made subject to the conditions that such person—

- (a) is at the time of appointment not less than 18 and not more than 25 years of age;
- (b) produces satisfactory evidence that he possesses a minimum educational qualification equivalent to the Entrance standard of one of the Indian Universities;
- (c) produces similar evidence that he is of good moral character;
- (d) produces a certificate from a Government Medical Officer of or above the rank of Surgeon-Captain, to the effect that he is in good health and of a sound constitution.

12. An officer already in Government employ may be appointed to any vacancy without regard to the qualifications specified in the preceding rule.

13. Every candidate, whether selected by examination or otherwise, who receives an appointment, will be on probation for twelve months, and if at any time during that period or at its close his work is not considered satisfactory by the head of the office in which he is employed, he may be discharged and will have no claim to gratuity or compensation. If, however, he was admitted from another office, he may be relegated to his former appointment, or, so far as may be practicable, transferred to another appointment of the same pay. To provide for such cases, arrangements should be made by which promotions in the place of the transferred clerks should be sub. *pro tem.* until the latter have passed their period of probation.

14. The above rules will apply to the Secretariat offices of the Government of Bengal, to the offices of the—

Board of Revenue,  
Commissioner of the Presidency  
Division,  
Inspector-General of Jails,  
Inspector-General of Police,  
Director of Land Records and Agriculture,  
Inspector-General of Registration,  
Inspector-General of Civil Hospitals,

Sanitary Commissioner,  
Superintending Engineer, South-Western  
Circle,  
Superintendent of Emigration and Protector of Emigrants,  
Collector of Customs,  
Superintendent of Stamps and Stationery,  
Collector of Calcutta,  
Excise Commissioner,

and to such other offices at Calcutta under the Government of Bengal as may hereafter be notified.

15. These rules shall take effect from the date of their publication in the *Calcutta Gazette*.

16. Copies of these rules may be obtained on application at the office of the Financial Secretary to the Government of Bengal, Calcutta.

# **RESOLUTION ON THE ADMINISTRATION REPORT OF THE HOWRAH BRIDGE FOR 1893-94.**

No. 2255 Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

*Dated Calcutta, the 11th October 1894.*

## **RESOLUTION.**

READ—

The Administration Report of the Howrah Bridge for 1893-94.

The following statement shows the actual receipts and expenditure of the bridge during the year under review, as compared with the previous nine years:—

PARTICULARS.	1893-94.	1892-93.	1891-92.	1890-91.	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.

2. The income during the year amounted to Rs. 1,55,217, being less than that of the previous year by Rs. 7,282. This was due mainly to the transfer of the steam-tug *Hetty* to the port during half the year. The receipts from the tug showed a falling off of Rs. 6,932, as her earnings for six months only were credited to the bridge account. Railway traffic showed an increase of Rs. 955 over the receipts of the previous year. The Corporation of Calcutta has not yet repaid the sum of two lakhs, which was advanced to that body in connection with the construction of the Harrison Road as a loan without interest from the reserve fund.

3. The expenditure amounted to Rs. 14,043, showing a decrease of Rs. 15,253 as compared with that of 1892-93. The wearing surface of the bridge was maintained in thorough order, a large quantity of the surface planks and battens having been renewed. The wood used for the wearing surface, which was specially imported by the Commissioners from Johor near Singapore, has been found most suitable for the purpose. The superstructure, timbers, fenders, sheathings of pontoons, were repaired and renewed as found necessary and all the other works which were found to be necessary to keep the bridge in thorough order were carried out.

4. As in the previous year, in addition to the ordinary receipts, the following sum, which may be classed as extraordinary, was received:—

	Rs.
Interest on Government securities of pontoon renewal fund ...	2,000
The corresponding expenditure under the same head was—	
Sinking fund on loan ... ..	3,458

5. The cost of lighting the bridge with electricity was, during the year under review, Rs. 9,137, against an estimate of Rs. 6,400. The annual working expenses of this system of lighting were originally estimated at Rs. 4,660, as against Rs. 5,448, the cost of lighting the bridge with gas. In 1892-93 the charges amounted to a sum of Rs. 12,386, as compared with Rs. 4,591 during 1891-92, when electric lighting was not introduced. The large expenditure was explained to be due to certain abnormal charges which were not likely to recur, and it was further added that with the experience gained, the cost of working could be reduced to Rs. 6,400 per annum. The working expenses during the past financial year, have, however, considerably exceeded this estimate, and the Lieutenant-Governor observes that no reason has been assigned for it, nor any detailed account given. This must not happen again.

6. The bridge was opened for the passage of vessels on 146 occasions during the year, of which 104 were on the ordinary fixed days of the week, and 45 were on Sundays, on special application. The number and description of vessels which passed though the bridge on these occasions are given in the table below:—

	1893-94.	1892-93.	1891-92.	1890-91.	1889-90.	1888-89.	1887-88.	1886-87.	1885-86.	1884-85.
1	2	3	4	5	6	7	8	9	10	11
Sea-going vessels ... ..	291	309	254	414	362	360	331	295	366	403
Inland steamers and flats ... ..	1,060	1,129	1,400	1,069	941	878	829	841	1,102	944
Steam-tugs ... ..	549	453	346	540	491	466	397	387	406	343
Port Commissioners' vessels ... ..	161	183	66	92	53	30	46	56	69	56
Government steamers and flats ... ..	2	...	...	5	16	7	6	10	6	10
TOTAL ...	2,063	2,074	2,066	2,110	1,863	1,741	1,679	1,596	1,949	1,755

7. One sea-going vessel collided with the bridge, and there were 77 collisions of other vessels, against 52 in 1892-93 (the lowest number on record), and 95 and 149 in 1891-92 and 1890-91, respectively.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

*Secretary to the Government of Bengal.*

## Rainfall, Weather, and State and Prospects of the Crops.

Statement showing Rainfall, Weather, and State and Prospects of the Crops in the different districts of Bengal, as reported to Government, during the week ending the 13th October, 1894.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
<b>BENGAL.</b>			
<b>BURDWAN DIVA.</b>	1 Burdwan Oct. 13, '94 1'21 Kalna ... Nil Katwa ... Not reported. Raniganj ... 0'11	1'21 Nil Not reported. 0'11	Weather—seasonable. Harvesting of <i>aus</i> continues. <i>Aman</i> and sugarcane doing well. Fodder and water sufficient. Prices of common rice:— Srs. Burdwan ... 11 to 16 Kalna ... 11 to 14 Katwa ... 13 to 15 Raniganj ... 14 } per rupee.

The total fall from 1st January to 13th October 1894	...	...	...	...	61.95
The average fall of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	...	

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; p, passing temporary showers; t, thunder; , dew; d, drizzling rain.

last ten years. The variations are negative when the mean for the week is less than the corresponding normal mean, and positive when greater. Under the head District observations of rainfall the normal average of the rainfall returned received in the district, i.e., from total rainfall as the subdivi-

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-  
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATUR-  
DAY, THE 13TH OF OCTOBER 1894.**

DURING the previous week Bengal had been affected by two barometric depressions or feeble cyclonic storms. The second feeble storm had formed on the 2nd instant in the north-west angle of the Bay, and had rapidly moved in a north-westerly direction through the extreme western districts of the province into the North-Western Provinces, and had broken up at the close of the week probably not far from Naini Tal. The small storm had as usual brought up with it another but rather light advance of south-west monsoon winds, and thus at the close of the week conditions were of light monsoon character over the whole province, and a moist south-easterly and easterly wind current was flowing freely inland from the Bay.

On the 7th pressure in Bengal had risen slowly at all except a few stations in the extreme south-east of the province, and it had become very uniform, while it was still in small to moderate defect. The south-easterly and easterly winds were on this day being partly driven back by an advancing north-westerly wind current, and northerly winds were appearing in South-West Bengal and Orissa, while north-westerly winds were blowing at many of the stations in Bihar and Chota Nagpur; over the remainder of the province also winds were becoming irregular in direction. Hence with the partial withdrawal of the moist easterly winds general rainfall ceased, but owing to the feeble interaction which was taking place, local showers were falling, and in some cases the local falls were heavy. On the 8th the conditions which had become established on the 7th became more pronounced, pressure had again risen, and the north-westerly and northerly winds had extended to the great majority of stations, and again only local showers were reported over the greater part of the province. On the 9th, however, these conditions were partially reversed, pressure began to fall at the western stations, though it continued to rise over the remainder of the province. Pressure became relatively low in the Central Provinces and also along the west coast of the Bay, and a moist easterly and south-easterly wind current set in over the province, driving back the north-westerly and northerly winds, and hence again on the 9th fairly general rain began to set in over the whole province. On the 10th pressure had continued to fall over the northern half of the province, though it was still rising over the southern half, and while pressure was in excess over the south-eastern districts by amounts ranging up to 0·073" at Chittagong, it was in defect at the northern, north-western and western stations by amounts ranging up to 0·08" at Buxar. The very strong easterly element in the wind directions which had been established on the 9th began to give way again slightly on the 10th, on which day winds were more generally southerly. Rainfall had, however, been reported generally over the province on the 10th. On the 11th pressure had fallen slowly to moderately over the whole province, and had become in defect by amounts ranging up to a tenth of an inch at Buxar, while on the other hand very slight excess temperatures were recorded at the extreme south-western stations. The easterly element in the wind directions had again given way, and southerly and south-westerly winds were generally blowing, and with the further disappearance of the easterly winds rainfall had again become less general except at the eastern stations, and those near the hills. On the 12th pressure had risen in the west of Bihar, while it had fallen elsewhere. A feeble tendency towards a cyclonic circulation of winds was set up in Bihar, but over the remainder of the province winds were southerly and south-westerly. Conditions were therefore disturbed in Bihar, and heavy rain was reported there and in North Bengal and Assam, while showers only occurred in the south of the province. On the 13th, or the last day of the week, pressure had again risen over the western half of the province and fallen over the eastern half, and a diffused low pressure area existed over Central and South-West Bengal, while winds also became irregular and perhaps slightly cyclonic in direction. The area of lowest pressure was, however, retreating southwards and carrying the disturbed weather with it, but on this day moderate general rain was received in practically all districts.

*Pressure* has been below the normal for the greater part of the week, and the mean pressure has shown a considerable defect. The variations have been largest at the stations in the west of Bihar, where the defect has equalled about 0·06 inch and 0·07 inch at such stations as Dehri, Buxar, Arrah, and Motihari, while at the southern and south-eastern stations the defects were very small and pressure was almost normal. Indeed, at Chittagong and Silchar slight excess pressures have been registered. For the whole province of Bengal the general defect has equalled about 0·04 inch, and in Assam it has equalled only 0·018 inch.

*Temperature* has been decidedly high almost throughout the week, and the average mean temperature of the province has been in excess by one degree. The largest excess amounts of about two degrees have been registered in North Bengal and Bihar, while on the other hand temperature has been fairly normal in East and South-West Bengal and Orissa.

In Assam the mean temperature has averaged 0·5° in excess.

*Rainfall.*—The heaviest falls have occurred in Bihar, which has received an average amount of two and-a-quarter inches. North Bengal has received rather less, the average fall having been 1·96 inches. In the remaining divisions of South-West Bengal, East Bengal, Orissa, and Chota Nagpur, the falls have averaged a little less than an inch in each case.

The falls have been rather largely in excess in Bihar and North Bengal, about normal in South-West Bengal and Chota Nagpur, and decidedly in defect in East Bengal and Orissa. In all divisions, however, even in those cases where the actual falls have been largely below the normal, the number of rainy days in the week has been larger than usual, and hence it would appear that, though lighter than usual, the showers have been decidedly more numerous.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following:—South-West Bengal 85 per cent., North Bengal 183 per cent., East Bengal 60 per cent., Bihar 189 per cent., Orissa 57 per cent., and Chota Nagpur 87 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 110 per cent. of the normal.

In Assam during the week Silchar has received 3.19 inches of rain, Dhubri 1.34 inches, and Sibsagar 0.64 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 13th of October 1894:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.

APPENDIX TO

# The Calcutta Gazette.

WEDNESDAY, OCTOBER 17, 1894.

## NOTICES TO MARINERS.

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 189.

[First Publication.]

JAPAN—SIMONOSEKI STRAIT.

*Shoals found near Kanabuse.*

THE British Admiralty has given notice (No. 493 of 1894) that on a Japanese chart recently received the undermentioned shoals are shown and have been inserted in the Admiralty charts:—

1. A shoal of  $3\frac{3}{4}$  fathoms lies 3 cables W. by S.  $\frac{3}{4}$  S. (S.  $70^{\circ}$  W.) from Kanabuse beacon, or approximately in lat.  $33^{\circ} 58' 20''$  N., long.  $130^{\circ} 58' 20''$  E.
2. A shoal of 4 fathoms, rock, lies 4 cables S.W. by W.  $\frac{1}{2}$  W. (S.  $62^{\circ}$  W.) from Kanabuse beacon, or approximately in lat.  $33^{\circ} 58' 15''$  N., long.  $130^{\circ} 58' 15''$  E.

(Variation,  $4\frac{1}{2}^{\circ}$  Westerly in 1894.)

H. B. HOOPER, Comdr., R.I.M.,  
*Acting Port Officer of Calcutta.*

Published for general information.

G. C. MACONCHY,  
*Under-Secretary, Marine Department.*

CALCUTTA, the 15th October 1894.

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT

NOTICE TO MARINERS—No. 190.

[First Publication.]

AUSTRALIA, EAST COAST—PORT JACKSON.

*Amended sounding in East channel.*

THE British Admiralty has given notice (No. 501 of 1894) that attention has been drawn to the fact, that on certain Admiralty charts of Port Jackson, a sounding of  $3\frac{1}{4}$  fathoms is shown in the position,  $1\frac{1}{4}$  cables S.  $88^{\circ}$  W. from the Obelisk on Green point, East channel.

The sounding in the above position should read  $5\frac{1}{4}$  fathoms, and not  $3\frac{1}{4}$  fathoms, as charted.

Approximate position, lat.  $33^{\circ} 50' 35''$  S., long.  $151^{\circ} 16' 30''$  E.

Variation  $9^{\circ}$  Easterly in 1894.

H. B. HOOPER, Comdr., R.I.M.,  
*Acting Port Officer of Calcutta.*

Published for general information.

H. J. S. CORTON,  
Chief Secy. to the Govt. of Bengal.

## PUBLIC WORKS DEPARTMENT,—BENGAL.

## ESTABLISHMENT.

*The 23rd October 1894.*

*No. 310.—Notification.*—The following notification, issued by the Government of India in the Public Works Department, is republished for information :—

*No. 396, dated the 17th October 1894.*—Mr. W. H. Shortt, Deputy Examiner of Accounts, is, on return from leave, posted to the office of the Examiner of Public Works Accounts, North-Western Provinces and Oudh.

## RAILWAY.

*The 23rd October 1894.*

*No. 311.—Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up at the public expense for a public purpose, viz., for alterations to the Dowlutdia station of the Eastern Bengal State Railway at Goalundo, it is hereby declared that for the above purpose a piece of land measuring, more or less, twenty-two acres of standard measurement in the village of Dowlutdia, pargana Mohomutpur, district Faridpur, bounded on the north by the river Ganges and land in possession of the Eastern Bengal State Railway, and on the west by land in possession of the Eastern Bengal State Railway, and on the other two sides by land in the village of Dowlutdia, is required within the aforesaid village of Dowlutdia.

This declaration is made, under the provisions of section 6 of Act No. I of 1894, to all it may concern.

*No. 312.—Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for alterations to the Bahadurpur station of the Eastern Bengal State Railway at Damukda, it is hereby declared that for the above purpose two pieces of land measuring, more or less, twenty-one acres and twenty-five poles of standard measurement in the village of Bahadurpur, pargana Naskerpur, district Nadia, bounded on the north by land in the possession of the Eastern Bengal State Railway, and on the other three sides by land in the village of Bahadurpur, are required within the aforesaid village.

This declaration is made, under the provisions of section 6 of Act No. I of 1894, to all whom it may concern.

*No. 313.—Notification.*—Whereas it appears to the Lieutenant-Governor of Bengal that land in the district of Manbhum is likely to be needed for a public purpose, viz., for the Bengal-Nagpur Railway, notice is hereby given to all whom it may concern that, in exercise of the powers conferred by section 4 of Act I of 1894, the Lieutenant-Governor of Bengal has authorized the Engineers for the time being engaged in this undertaking to enter upon and survey lands, and to do all other acts required for the proper execution of their work as provided or specified in the said section.

*No. 314.—Declaration.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for improving and extending the existing transshipment yard at Mokameh Ghat station, in the village of Aunta Chanderbhan, Aunta Raghuram, Aunta Lakhan Chand, pargana Gheyasur, zilla Patna, it is hereby declared that for the above purpose a piece of land measuring, more or less, 10 bighas 12 cottahs 3 churs 4 dharkis of local measurement, bounded on the north by district road, east by lands of mauzas Aunta Raghuram, Aunta Chanderbhan, and Aunta Lakhan Chand, south by village road, west by land belonging to East Indian Railway, is required within the aforesaid village of Aunta Chanderbhan, Aunta Raghuram, and Aunta Lakhan Chand.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

**No. 315.—Declaration.**—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the public expense for a public purpose, viz., for the construction of an Assistant Engineer's quarters for Bengal-Nagpur Railway in the village of Ketkia, pargana Charra, zilla Maubhum, it is hereby declared that for the above purpose a piece of land measuring, more or less, thirty bighas eight cottahs of standard measurement, bounded on the north by Furna tank and waste land held by Babu Kirty Chunder Chaudhuri, south by Gonsai Shair tauk and bastu bhita of Mohan Mahata, Doyal Mahata, Bengan Mahataui and Rafu Chutar, east by Bengal-Nagpur Railway, west by the aloe plantation of Purnha jail, is required within the aforesaid village of Ketkia.

Mines of coal, iron-stone, slate or other minerals lying under the land, or any particular portion of the land, except only such parts of the mines and minerals as it may be necessary to dig or carry away, or use in the construction of the work for the purpose of which the land is being acquired, are not needed.

This declaration is made, under the provisions of section 6, Act I of 1894, and section 3, clause (1), Act XVIII of 1885, to all whom it may concern, and is in supersession of declaration No. 188, dated the 29th May 1894, published at page 633, Part I of the *Calcutta Gazette* of the 30th May 1894.

F. J. JOHNSTONE,  
Secy. to the Govt. of Bengal.

A. CROFT,  
*Director of Public Instruction.*

### NOTICE.

#### *Entrance Examination.*

A TEST examination of private students for admission to the ensuing Entrance Examination will be held at the Office of the Inspector of Schools, Presidency Circle, 4, Dalhousie Square, Calcutta, on Friday, the 7th, and Saturday, the 8th, December 1894. Only candidates residing in any of the districts of the Presidency and Chota Nagpur Divisions will be admitted to the examination.

2. Only those candidates who have not studied in any institution since the 1st September 1894, will be recognized as private students. They will be required to furnish satisfactory proof that they have not read in any school from that date. They must also produce certificates of conduct and progress in studies from the authorities of the last school where they read, or, in the case of those who have not been in any school for more than a year, from some other reliable authorities.

3. *Bond fide* teachers employed in any of the schools in the Presidency Circle may be admitted to the examination, if they can produce certificates of service and character from their employers or from the Deputy Inspector of the district concerned.

4. Each candidate should submit to this Office, not later than the 27th November 1894, his application for admission to the test examination, stating the following particulars:—

- (1) Age; (2) residence; (3) father's name; (4) second language besides English; and (5) whether he appeared at any previous Entrance Examination.

5. The admission-fee for the examination is Rs. 4 for each candidate, and is to be remitted with the application within the prescribed date, after which a fine of Rs. 2 is to be imposed for each week's delay.

6. Every private candidate must be accompanied for the purpose of identification by some person known to this Office, otherwise he will not be admitted to the test examination.

7. Candidates who are sent up by this Office must appear at the Calcutta Examination Centre.

8. Those that reside at a distance from Calcutta are to present themselves at the test examination held by the head-master of the local zillah school, on condition that they appear at the centre selected by the candidates from that institution.

#### *F. A. and B. A. Examinations.*

Deputy Inspectors, Sub-Inspectors, and *bond fide* teachers of recognized English schools, in the Presidency and Chota Nagpur Divisions, who have served as such for full two academical years, or for six months in the case of those who have been admitted to a former examination of the same class, will be admitted to the above examinations on production of certificates of character and length of service (with dates) from their employers. Their applications must reach this Office on or before the 1st December 1894.

**RADHIKA PRASANNA MUKHERJI,**

*Inspector of Schools, Presidency Circle.*

4, DALHOUSIE SQUARE, CALCUTTA,

*The 3rd October 1894.*

#### NOTIFICATION.

"Nutan Path," by Babu Chandra Nath Basu, M.A., B.L., is substituted for the late Pandit Iswar Chandra Vidyasagar's "Bodhodaya" as the authorised text-book in Bengali for the Lower Primary Scholarship Examination of 1896 and subsequent years until further orders.

A. CROFT,

*Director of Public Instruction, Bengal*

#### NOTIFICATION.

It is hereby notified that for the ensuing half-yearly Departmental Examination of Junior Civilians, Deputy Magistrates, &c., to be held in November 1894, two Local Examination Committees will be convened in this division, viz., (1) at No. 24½, Dalhousie Square, West, Calcutta, for officers employed in the 24-Parganas, Nadia, Jessore, Khulna and at the Presidency, and (2) at Berhampore for officers employed in the district of Murshidabad.

By order,

BUNGSHIDHUR BANERJEE, *Personal Assistant.*

COMM. 'S OFFICE, PRESY. DIVN., CALCUTTA, *the 3rd October 1894.*

#### NOTIFICATION.

It is hereby notified that for the ensuing half-yearly examination of Assistant Magistrates and others to be held on Thursday, the 1st November 1894, and two following days, two Local Examination Committees will be convened in this division, viz., one at Bankipore for officers employed in the districts of Patna, Gaya and Shahabad, and the other at Muzaffarpur for officers employed in the districts of Saran, Champaran, Muzaffarpur and Darbhanga.

The examination will commence at 10-30 A.M. each day.

BEPIN BEHARY MOOKERJEE, *Peral. Asstt. to Commr.,*

*for Offg. Commr. on tour.*

PATNA COMM. 'S OFFICE, *the 2nd October 1894.*

**Sheriff's Office, the 19th September 1894.**

NOTICE is hereby given that the Fifth Criminal Sessions of the year 1894 of the High Court of Judicature at Fort William in Bengal, for the Town of Calcutta and Factory of Fort William, and the places subordinate thereto, will be holden at the Court-house, in the Town of Calcutta, on Wednesday, the 5th day of December next, at 11 o'clock in the forenoon, and so on from day to day, until the said Sessions be over. And it is hereby proclaimed that all persons who will prosecute any of the prisoners to be brought up for trial at the said Sessions be present then and there to prosecute.

By order of the Board of Revenue, L.P.,

C. R. MARRIOTT, *Collector of Customs.*

CUSTOM HOUSE, CALCUTTA, the 23rd October 1894.

# The Calcutta Gazette.

WEDNESDAY, OCTOBER 24, 1894.

PART I A.

## Orders and Notifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

The following orders, issued by the Government of India, in the Finance and Commerce Department, are republished for general information.

H. J. S. COTTON,  
*Chief Secy. to the Govt. of Bengal.*

### NOTIFICATIONS.

#### ACCOUNTS AND FINANCE. PUBLIC DEBT.

*The 19th October 1894.*

No. 5288A.—Notice is hereby given that Government Promissory Notes and Stock of the  $3\frac{1}{2}$  per cent. loans may be transferred on the conditions stated below:

(a) from any one of the  $3\frac{1}{2}$  per cent. loans of 1842-43, 1854-55, 1st May 1865 and 1879 to any other of these loans;

(b) from the  $3\frac{1}{2}$  per cent. loan of 1853-54 to the  $3\frac{1}{2}$  per cent. loan of 1893-94.

2. The conditions on which such transfer is permitted are that—

(i) a full half year's interest is due on the Government Promissory Note or Stock Certificate at the time it is presented for transfer,

(ii) the new Note or Certificate will be issued bearing interest from the commencement of the current half-year of the loan to which it appertains,

(iii) interest up to that date will be paid on the old Note or Certificate.

3. The usual fee for renewal will be charged on each new Note or Certificate issued.

4. This Notification supersedes paragraph 2 of the Notification in this Department, No. 4565A., dated 20th October 1893.

## PART IB.

### ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

#### MUNICIPAL AND LOCAL.

##### NOTIFICATION.

*No. 4045M.—The 18th October 1894.*—Whereas a notification No. 3043M., dated the 27th July 1894, was published at page 196, Part IB of the *Calcutta Gazette* of the 1st August, declaring the intention of the Lieutenant-Governor to confirm the rules set forth below, which were framed by the Commissioners of the Sasaram Municipality, in the district of Shahabad, under section 3 of Act XX of 1887, for the protection of wild birds and game within the limits of the said Municipality, and whereas no objection has been raised to the proposal within one month from the date of the publication of the above notification within the Municipality, it is hereby notified that the said rules are confirmed by the Lieutenant-Governor under clause 4 of the said section of the Act, and are published for general information under clause 5 of section 6 of the General Clauses Act I of 1887:—

##### *Rules.*

1. "Wild birds" for the purposes of these rules shall include jungle-fowl, non-domesticated pea-fowl, pheasant, plover, jays, egrets, golden oris, and green fly-catchers.
2. The Local Government having, by notification No. 3047M., dated the 27th July 1894, declared that the provisions of section 3, Act XX of 1887, shall apply to hares and deer, the following rules will apply to those animals also as well as to wild birds.
3. The breeding season for the purposes of these rules shall extend from 15th March to 30th September.
4. Whoever has in his possession, or exposes for sale within the limits of this Municipality, any wild bird, hare or deer killed or captured during the breeding season, shall be liable to a fine not exceeding Rs. 5 for each such bird or animal.
5. Whoever brings within the limits of this Municipality the plumage of any wild bird, or the fur or skin of any hare or deer killed or captured during the breeding season, shall be liable to a fine not exceeding Rs. 5 for the plumage of every such bird or the fur or skin of every such hare or deer. In the case of a second conviction, the fine may extend to Rs. 10 for each such bird or animal referred to in rules 1 and 2 above.
6. A reward not exceeding half the fine realized may be granted by the adjudicating Magistrate to any person who has afforded information leading to a conviction for a breach of any of the above rules.

O. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

##### NOTIFICATION.

*No. 4057M.—The 19th October 1894.*—It is hereby notified that the Commissioners of the Khirpai Municipality in the district of Midnapore, having at a meeting requested the Local Government under section 23 of the Bengal Municipal Act III of 1884, as amended by Act IV of 1894, to appoint a Chairman, the Lieutenant-Governor is pleased to appoint Babu Surendranath Ghose, Subdivisional Officer, to be their Chairman *vice* Babu Peary Lal Ghose, resigned.

O. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## DECLARATION.

*No. 5109 M.—The 23rd October 1894.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Ghatal Municipality for a public purpose, viz., for depositing materials for the bridge of boats and for constructing a shed for repair of boats and for sanitary purposes of the Ghatal Municipality in the village of Konnagor, pargana Barda, zilla Midnapore, it is hereby declared that for the above purpose three pieces of land measuring, more or less, 18 cottahs and  $7\frac{1}{4}$  chitaks of standard measurement, are required. The boundaries of the plots of land are as follow:—

*Plot No. 1*, measuring 1 cottah and  $\frac{3}{4}$  chitak of land, is bounded on the North by the pukka ghat leading to the pontoon bridge; on the East by the road leading to the Subdivisional Office; on the South by the subdivisional compound, and on the West by the river Silye.

*Plot No. 2*, measuring 1 cottah and  $\frac{3}{4}$  chitak of land, is bounded on the North by the land belonging to Messrs Watson and Company, Limited; on the East by the public road; on the South by the pukka ghat to the pontoon bridge, and on the West by the river.

*Plot No. 3*, measuring 16 cottahs and 6 chitaks of land, is bounded on the North by the public road and uncultivated land belonging to Bama Charan Chakrabutty; on the East by the homestead land of Sita Nath Napit and Nobin Dagar; on the South by the Municipal road, school-latrine and lakhiraj land of Rameswar Pauja, and on the West by the Chetua circuit embankment.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## DECLARATION

*No. 5116 M.—The 23rd October 1894.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken by Government at the expense of the Calcutta Municipality for a public purpose, viz., for widening Peepulputty Lane and extending it to meet Ram Mohon Dutt's Lane and Lansdowne Road, it is hereby declared that for the

above purpose pieces of land Nos. 44, Elgin Road, 3-1, 4, 5, 6, 7, 8, 8-1, 22, 23-1, 24 and 25 Peepulputty Lane, 5, 6 and 9, Mokim Sircar's Lane, and 7, Ram Mohon Dutt's Lane in Bhowanipur, Dihi Panchannogram, district 24-Pargannas, measuring, more or less, one bigha, one cottah, ten chittaks and 26 square feet, are required.

The boundaries of the plots of land are as follow :—

*Portion marked A on plan.*—On the north partly Elgin Road and partly Peepulputty Lane; on the south Peepulputty Lane; on the east partly premises No. 44, Elgin Road, and partly premises Nos. 24 and 25, Peepulputty Lane; and on the west Peepulputty Lane.

*Portion marked B on plan.*—On the north partly Peepulputty Lane and partly portion of premises Nos. 4, 5 and 6, Peepulputty Lane, and partly portion of premises No. 7, Ram Mohon Dutt's Lane; on the south partly Ram Mohon Dutt's Lane and partly portion of premises Nos. 8 and 8-1, Peepulputty Lane; on the east partly portion of premises Nos. 3-1, 5, 6, 7, and 8, Peepulputty Lane, and premises No. 7, Ram Mohon Dutt's Lane and partly Peepulputty Lane; and on the west partly premises Nos. 41 and 42, Elgin Road, and partly portion of premises Nos. 5, 6, and 7, Peepulputty Lane, and 7, Ram Mohon Dutt's Lane.

*Portion marked C on plan.*—On the north partly portion of premises No. 23-1, Peepulputty Lane, and partly portion of No. 9, Mokim Sircar's Lane; on the south partly Mokim Sircar's Lane, and partly portion of No. 9, Mokim Sircar's Lane; on the east Mokim Sircar's Lane; and on the west Peepulputty Lane.

*Portion marked D on plan.*—On the north and west Mokim Sircar's Lane; on the south portion of No. 6, Mokim Sircar's Lane; and on the east a public ditch.

*Portion marked E on plan.*—On the north and west a public ditch; on the south portion of premises No. 5, Mokim Sircar's Lane; and on the east Mokim Sircar's Lane.

Plan and specifications of the land are filed in the office of the Commissioners for public inspection.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

C. W. BOLTON,  
Offg. Secy. to the Govt. of Bengal.

## PART II.

### Advertisements.

[N. B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette cannot be received after Noon on Monday.]

#### LAND SALE NOTICES.

##### Advertisement of sale.

NOTICE is hereby given that the undermentioned plots of canal surplus land no longer required by Government, in the district of Shahabad, will be put to sale at 11 o'clock on the 30th October 1894.

The purchasers of the several plots of land will be subject to the following conditions:—

1. If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.
2. If the amount of purchase-money exceeds Rs. 100, one-fourth of the amount must be immediately deposited; if the balance be not paid by the noon of the 16th day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.
3. The plots of land will be sold revenue free to the highest bidders.
4. The purchasers will have to respect the right of the raiyats and collect rent from them in accordance with the rent-roll prepared and filed with the record of the case.
5. The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale—

## Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated in the district of Muzaffarpur, will be put up to sale at 10 o'clock on the 1st November 1894 at the Muzaffarpur Collectorate.

The purchasers of the several plots of land will be subject to the following conditions:—

## Conditions.

1st.—The amount of bid should not be less than the price shown against each lot. The lots will be sold to the highest bidders with or subject to an annual revenue shown against each lot.

2nd.—One-fourth of the amount of bid must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled (the sum deposited being forfeited to Government), and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.

3rd.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale:—

Name of district.	Pargana and estate.	Number of mile.	NUMBER AND AREA OF EACH PLOT.		Boundary of each sale lot.	Total area of each sale lot in local bigha.	Price of each sale lot.	Annual revenue of each sale lot.
			Number.	Area in local bigha.

### Oudh Forest Department.

#### BAHRAMGHAT DEPOT.

ON THE OUDH AND ROHILKHAND RAILWAY.

**FROM** this date the prices of sal beams and scantlings supplied from this depot will be as follows:—

**BEAMS**—21 feet length, at Rs. 2-10 per cubic foot.

22	"	"	2-12	"
23	"	"	2-14	"
24	"	"	3	"

Above the length given two annas per foot run will be charged. Any inches over the foot will be charged as a foot.

**SCANTLINGS**—From 12 to 20 feet, at Rs. 2-8 per c. ft.

Under 12 and over 7	"	2-4	"
Under 7 feet	"	?	"

The above prices are for ordinary building purpose.

For *Planing Sleepers, &c.*, special rates will be fixed by agreement.

The Department will still taken orders for buildings all over at Rs. 2-4 per cubic foot, provided the scantlings are taken in fair proportion.

*Second and Third Class Timber* will be sold and price fixed by agreement.

*Auction Sales* will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N.-W.P. and Oudh, Oudh Circle.

KANHYA LAL,

Sub-Assistant Conservator of Forests,  
Barhamghat Division.

Barhamghat, the 1st April 1886.

### Pure Sulphate of Quinine.

MANUFACTURED AT THE BENGAL GOVERNMENT CINCHONA PLANTATION.

THE price of this quinine is as follows:—

1 pound tin	Rs. 16, or, post free, Rs. 16-12.
1 " " "	8, " " " 8-8.
1 " " "	4, " " " 4-8.

Analysis shows this quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloiks Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanical Garden, Sibpur, near Calcutta. It can be had either white or coloured pink.

### Cinchona Febrifuge.

Cinchona Febrifuge can be purchased by all Government officers and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates—per four ounce tin, Rs. 2, ans. 8; per eight-ounce tin, Rs. 5; per pound tin, Rs. 10. The general public can be supplied by the Superintendent, Botanic Garden, for *Cash only* at the undernoted rates—per four-ounce tin, Rs. 3; per eight-ounce tin, Rs. 6; per pound tin, Rs. 12. This medicine is also sold by the principal European and native druggists in Calcutta. Postage four annas per 4 oz. tin, eight annas per 8oz. tin, and twelve annas per pound tin, in addition to the foregoing rates.

JOHN OWENS, Presidency Postmaster, Calcutta.  
General Post Office, the 23rd October 1894.

### The Indian Law Reports.

*Published under Authority.*

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta Madra, Bombay, and Allahabad. and comprise four series—one, for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

*Terms of subscription payable annually in advance.*

For the complete series, including postage, Rs. 22-8.

	Without postage.	With postage.
	Ra. A. P.	Ra. A. P.
For the Calcutta Series ...	10 0 0	12 8 0
„ each of the Madras, Bombay, and Allahabad Series ...	6 0 0	7 0 0
a part of the Calcutta Series purchased separately (inclusive of postage in India) ...		2 0 0
part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) ...		1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied of subscribers when required in place of copies lost in transit:—

For town. For mofussil.

	Ra. A. P.	Ra. A. P.
For the Calcutta Series, per copy ...	0 8 9	0 10 3
„ each of the Madras, Bombay, and Allahabad Series, per copy ...	0 5 3	0 5 9
„ the Calcutta Series, For the year ...	7 2 6	8 6 3
„ each of the Madras, Bombay and Allahabad Series, For the year ...	4 4 6	4 11 3

Persons desiring to subscribe for or purchase the Report should apply to—

- Superintendent, Government Press, Madras.
- The Superintendent, Government Central Press, Bombay.
- „ Curator of Government Books, North-Western Provinces and Oudh.
- „ Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance:—

	One page	Half page.	Quarter page.
	Ra. 20	Ra. 14	Ra. 9
For one issue ...	55	38	24
„ three issues ...	100	68	45
„ six „ ...	145	96	64
„ nine „ ...	180	120	80

SEVERAL volumes of the BENGAL LAW REPORTS, from August 1868 to December 1876, and FULL BENCH RULINGS Parts I and II, are available at the following rates:—

	Without postage.	With postage.
	Ra. A. P.	Ra. A. P.
Bengal Law Reports for one year	20 0 0	22 8 0
Single copies, Rs. 2 per copy.		
Full Bench Rulings, Parts I and II ...	20 0 0	22 8 0

Bengal Secretariat Press, 10, Lyon's Range, Calcutta.

Remittances to be forwarded to the Accountant and Treasurer Bengal Secretariat, Writers' Buildings, Calcutta.

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Superintendent of Government Printing in Bengal, 10, Lyon's Range, Calcutta.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

### Notice.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

### Notice.

The 29th March 1886.—The subscription to, and postage for the Calcutta Gazette will henceforth be at the following rates, payable in advance:—

	For the Mofussil.		For Calcutta.
	Per annum.		Per annum.
	Ra. A. P.		Ra. A. P.

*An Act to amend the Articles of War for the government of Her Majesty's Indian Forces.*

WHEREAS it is expedient to amend the Articles of War for the government of Her Majesty's Indian Forces; It is hereby enacted as follows:

**Title and commencement.** I: (1) This Act may be called the Indian Articles of War Amendment Act, 1894; and

(2) It shall come into force on such date as the Governor General in Council may by notification in the Gazette of India fix in that behalf.

2. Part I, clause (c), of the Indian Articles of War (hereinafter called "the said Articles"), is hereby repealed.

3. For Part I, clause (d), of the said Articles the following shall be substituted, namely:

"(d).—*Application of Articles.*

"These Articles shall apply to all—

- (a) persons to whom they actually apply at present;
- (b) persons commissioned or gazetted as

- (c) medical subordinates;
- (d) persons attested under these Articles;
- (e) unattested recruits;
- (f) persons enrolled under these Articles;
- (g) persons, not otherwise subject to military law, who, on active service, in camp, on the march, or at any frontier post specified by the Governor General in Council by notification in this behalf, are employed by, or are in the service of, or are followers of, or accompany any portion of, Her Majesty's Indian Forces

Provided as follows:

if any person claims to belong to a class to which the Army Act is, and these Articles are not, applicable, the burden of proving that he belongs to that class shall lie upon him."

4 For Part I, clause (e), of the said Articles the following shall be substituted, namely:

"(e).—*Definitions.*

"In these Articles, unless there is something repugnant in the subject or context,—

(1) 'notification' means a notification published in the official Gazette:

(2) 'prescribed' means prescribed by rules made by the Governor General in Council or by any authority empowered by him in this behalf:

British officer means an officer holding a commission in Her Majesty's land forces, but does not include an honorary commissioned officer:

(4) 'Native officer' means an officer commissioned or gazetted as an officer holding a Native rank in Her Majesty's Indian Forces:

(5) 'officer' means a British officer or Native officer, but does not include a warrant officer or non-commissioned officer.

(6) 'medical subordinate' means a senior hospital assistant, a hospital assistant of the first, second or third class, and a sub-hospital assistant, but does not include an officer:

(7) 'superior officer,' when used in relation to a person subject to these Articles, includes a warrant officer, a non-commissioned officer and an acting non-commissioned officer:

(8) 'soldier' includes a non-commissioned officer and any armed person doing duty in the ranks of Her Majesty's Indian Forces:

(9) 'recruit' means a person enlisted for enrolment in any corps or department as a soldier:

(10) 'corps' means a unit of command, such as a regiment of cavalry, a regiment or battalion of infantry, a battery of artillery, and any other separate body of troops which is declared by the Governor General in Council by general or special order to be a corps for the purposes of these Articles; it also includes an army hospital corps and a transport corps:

(11) 'department' includes any division or branch of a department:

(12) 'military reward' means any gratuity or annuity for long service or good conduct; it also includes any good-conduct pay or pension and any other pecuniary reward:

*The Indian Articles of War Amendment Act, 1894.**(Sections 5-6.)*

(14) 'active service,' as applied to a person subject to these Articles, means the time during which such person is attached to or forms part of a force which is engaged in operations against an enemy, or is engaged in military operations in, or is on the line of march to, a country or place wholly or partly occupied by an enemy, or is in military occupation of any foreign country:

(15) the expression 'India' means British India, together with any territories of any Prince or Chief under the suzerainty of Her Majesty exercised through the Governor General in Council or through any Governor in Council or other officer subordinate to the Governor General in Council: and the expression 'British India' means all territories and places in Her Majesty's dominions which are for the time being governed by Her Majesty through the Governor General in Council or through any Governor in Council or other officer subordinate to the Governor General in Council:

(16) the expression 'general officer of the Command' means the general officer commanding the forces in a Command: and the expression 'Command' means one of the principal portions into which the army of India is, for the time being, divided:

(17) 'commanding officer,' when used in any provision of these Articles with reference to any separate portion of Her Majesty's forces or to any department, means the British officer whose duty it is under the Army Regulations, India, or, in the absence of any such Regulation, by the custom of the service, to discharge with respect to that portion of the forces or that department the functions of commanding officer in regard to matters of the description referred to in that provision:

(18) 'military custody' means the arrest and confinement of a person, according to the usages of the service:

(19) 'court-martial' means a court-martial held under these Articles:

(20) 'criminal court' means a court of ordinary criminal justice in British India, or established or continued elsewhere by the authority of the Governor General in Council:

(21) 'civil offence' means an offence which if committed in British India would be triable by a criminal court:

(22) "offence" means any act or omission punishable under these Articles and includes a civil offence as hereinbefore defined: and

(23) expressions occurring in the Indian Penal Code and used in these Articles and not herein otherwise defined shall have the meanings respectively assigned to them by that Code"

XLV of 1860.

5. For Part I, clause (f), of the said Articles the following shall be substituted, namely:

"(f).—*Saving of certain Regulations.*

"Nothing in these Articles shall affect any regulations by which the respective offices and powers of cantonment magistrates and officers in charge of the police in cantonments are defined and controlled."

6. For Part II, Title I, of the said Articles the following shall be substituted, namely:

**"TITLE I.—ENROLMENT, ATTESTATION, DISMISSAL AND DISCHARGE.**

"Article 1.—(1) The Governor General in Council may, by notification, declare what persons or classes of persons shall be enrolled only, or be both enrolled and attested, respectively.

(2) A person shall be deemed to be enrolled under these Articles when his name has, with his consent, been entered in the prescribed manner on the list of a corps or department of Her Majesty's Indian Forces.

(3) Subject to the provisions of this article with respect to recruits, every person to be attested under these Articles shall be taken before the prescribed civil or military officer, and that officer shall read and explain to him, or cause to be read and explained to him in his presence, the questions set forth in the prescribed form of attestation, and such other matters if any) as may be prescribed; and, after having cautioned him that if he makes a false answer to any question set forth in the attestation form he will be liable to be punished as provided by these Articles, shall record the answer to each question, and shall, if he is satisfied that the person fully understands the questions, and that the answer has been correctly recorded opposite each question, and if he perceives no impediment, administer to the person an affirmation or oath in the prescribed form.

(4) The form of affirmation or oath prescribed under this article shall contain a promise that the person to be attested will be faithful to Her Majesty, Her heirs and successors, and that he will serve in Her Majesty's Indian Forces and go wherever he is ordered by land or sea, and that he will obey all commands of any officer set over him, even to the peril of his life.

(5) When a recruit is reported fit for duty, an affirmation or oath in the same form shall be administered to him in the prescribed manner by the commanding officer in front of the corps or such portion thereof or such members of the department as shall be present.

(6) After administering the affirmation or oath, the officer shall authenticate the attestation paper by his signature, and the person shall then be deemed to have been attested.

(7) Subject to any rules which may be prescribed, the Commander-in-Chief in India, or the general officer of the Command, may direct that any persons to whom these Articles apply as attested persons shall, for the purposes of these Articles, be deemed to be enrolled, and that any persons to whom these Articles apply as enrolled persons shall, for the purposes of these Articles, be deemed to be attested.

"Article 2.—(1) Subject to the provisions of the Army Act, the Governor General in Council may, by notification, direct that persons of any class subject to these Articles shall, for any of the purposes of these Articles, be deemed to be Native officers, warrant officers or non-commissioned officers; and,

(2) Subject, as aforesaid, any prescribed authority may issue an order giving a like direction.

*The Indian Articles of War Amendment Act, 1894.*

(Sections 7-11.)

(3) Any notification or order issued under this article may be cancelled by the authority issuing the same; and,

(4) Subject as aforesaid, any person of the said classes with respect to whom no such notification or order is in force shall, so far as may be, be deemed for all the purposes of these Articles to be of a rank inferior to that of a non-commissioned officer.

(5) Should any question arise as to the rank of any other person subject to these Articles, or as to whether any such person is above or below a specified rank, the decision of the Governor General in Council thereon shall be conclusive.

(6) Every person subject to these Articles shall for the purposes thereof, be deemed to be under the commanding officer of the corps or department (if any) to which he is attached, and, if not attached to any corps or department, under any officer who may for the time being be named as his commanding officer by the general or other officer commanding the force with which such person may for the time being be serving, or of any other prescribed officer, or, if no such officer is named or prescribed, under the said general or other officer commanding:

Provided that a general or other officer commanding shall not place any person under an officer of official rank inferior to that of such person if there is present at the place where such person is any officer of higher rank under whom he can be placed.

"Article 3.—(1) Every Native officer shall be liable to dismissal from the service by the sentence of a general court-martial, and to dismissal or discharge by order of the Governor General in Council, or of the Commander-in-Chief in India, or of the general officer of the Command to which he belongs.

(2) A Native officer dismissed under these Articles shall forfeit all claim to pension.

"Article 4.—(1) Every person subject to these Articles, other than a Native officer, shall be liable to—

a) dismissal from the service by the sentence of any court-martial empowered to try him, and

(b) dismissal or discharge from the service, by order of the Governor General in Council, or of the Commander-in-Chief in India, or of the general officer of the Command to which he belongs, or of the officer commanding the division or district in which he is serving, or, if he belongs to a force not attached to a command, by order of the officer commanding such force.

(2) Every person so dismissed shall forfeit all claim to pension.

"Article 5.—(1) Every attested person of or below the rank of non-commissioned officer who has been dismissed or discharged from the service, and

Attested person dismissed or discharged and re-enlisting or making false answer to his attestation.

or discharge, may be dismissed the service by the officer commanding the corps or department with which he is serving; and

(2) Every attested person of or below the rank of non-commissioned officer who is discovered to have made a wilfully false answer to any question set forth in the attestation paper which has been put to him by, or by direction of, the officer before whom he appears for the purpose of being attested, shall, on conviction by court-martial, be liable to suffer imprisonment (with hard labour and with or without solitary confinement) or such less punishment as is in these Articles mentioned.

"Article 6.—Every attested person who is dismissed or discharged from the service shall be furnished by his commanding officer with a certificate, in the English language and in the mother-tongue of such person (when his mother-tongue is not English), setting forth—

- (a) the authority dismissing or discharging him;
- (b) the cause of his dismissal or discharge; and
- (c) the full period of his service in the army."

7. In article 7, sentence 1, of the said Articles, the words "in any regiment, corps, detachment or guard" are hereby repealed.

8. For the third sentence of the last-mentioned article the following shall be substituted, namely:

"or who, knowing or having reason to believe in the existence of any mutiny or sedition, or of any intention to mutiny or create sedition, or of any conspiracy against the State,"

9. In article 8 of the said Articles, for the words "under any circumstances in which the superior officer is distinguishable as such in any manner" the words "knowing or having reason to believe him to be such" shall be substituted.

10. For articles 10 and 11 of the said Articles the following shall be substituted, namely:

*Desertion.*

"Article 10.—Who deserts or attempts to desert the service;—or

"Re-enlistment without having been discharged.

"Article 11.—Who, without having first obtained a regular discharge from the corps or department to which he belongs, enlists or enrolls himself in any other corps or department;—or"

11. For the last paragraph of article 24 of the said Articles the following shall be substituted, namely:

"Whenever any person is convicted of an offence specified in article 7 and punishable

*The Indian Articles of War Amendment Act, 1894.**(Sections 12-23.)*

12. For articles 25 and 26 of the said Articles

the following shall be substituted, namely:

Substitution of new articles for articles 25 and 26.

*"Unbecoming behaviour."*

"Article 25.—Any officer, medical subordinate or warrant officer who behaves in a manner unbecoming his position and character;—and any person subject to these Articles—

*"Intoxication on duty."*

"Article 26.—Who is in a state of intoxication when on or after having been warned for any duty, or on parade, or on the line of march;—or"

13. For article 31, of the said Articles the

following shall be substituted, namely:

Substitution of new article for article 31.

*"Failure to rejoin."*

"Article 31.—Who, being on leave of absence and having received information from proper authority that his corps or department has been ordered on service, fails, without sufficient cause, to rejoin without delay;—or"

14. For article 39 of the said Articles the

following shall be substituted, namely:

Substitution of new article for article 39.

*"Impeding Provost-marshal."*

Article 39.—Who impedes a provost-marshal or assistant provost-marshal, or any officer or non-commissioned officer or other person legally exercising authority under or on behalf of a provost-marshal, or, when called on, refuses to assist, in the execution of his duty, the provost-marshal, assistant provost-marshal, or any such officer, non-commissioned officer or other person;—or"

15. In article 40 of the said Articles the words

"enrolled or" shall be inserted between the word "person" and the word "attested".

Amendment of article 40.

16. For article 47 of the said Articles the

following shall be substituted, namely:

Substitution of new article for article 47.

*"Making away with regimental necessities."*

*"Article 47.—Who—*

(a) designedly or through neglect kills, injures, makes away with or loses his horse or ill-treats any animal used in the public service;—or

(b) dishonestly or fraudulently removes, conceals or delivers to any person, or designedly or through neglect injures or loses his arms, clothes, tools, musical or surgical instruments, equipments, ammunition, accoutrements or regimental necessities, or any such articles entrusted to him or belonging to any other person;—or

(c) sells, pawns, destroys or defaces any medal or decoration granted to him by order of Her Majesty or of the Governor General in Council for service in the field or for general good conduct;—or

17. For article 57 of the said Articles the fol-

lowing shall be substituted,

*"Punishment for offences mentioned in articles 54, 55 and 56."*

"Article 57.—Shall, if convicted by a general court-martial, be sentenced to be dismissed the service and to forfeit any arrears of pay and allowances due to him at the time of dismissal, and shall be punishable also with imprisonment (with or without hard labour, and with or without solitary confinement) for a term which may extend to two years: and shall, if convicted by a district court-martial, be liable to any or all of the penalties which such court is competent to inflict."

18. In article 65 of the said Articles the

word "other" shall be omitted.

Amendment of article 65.

19. For article 66 of the said Articles the

following shall be substituted, namely:

Substitution of new article for article 66.

*"Penalties for offences specified in articles 58 to 65."*

"Article 66.—Shall, on conviction by a general or district court-martial, be liable to any or all of the punishments, other than death or transportation, which the court-martial is competent to award"

20. In article 69 of the said Articles, for the

words "such punishments as" to the end, the words "any or all of the punishments, other than death or transportation, which the court-martial is competent to award"

Amendment of article 69.

21. For article 71 of the said Articles the

following shall be substituted, namely:

Substitution of new article for article 71.

*"Abetment."*

"Article 71.—Every person who abets, within the meaning of the Indian Penal Code, any offence punishable under these Articles may be punished with the punishment hereinbefore provided in these Articles for such offence."

22. For article 72 of the said Articles the

following shall be substituted, namely:

Substitution of new article for article 72.

"Article 72.—For the purposes of these Articles, there shall be five kinds of courts-martial, that is to say—

- |                                     |  |
|-------------------------------------|--|
| (1) General courts-martial.         | { Hereinafter called ordinary courts-martial.      |
| (2) District court-martial.         |  |
| (3) Regimental courts-martial.      |  |
| (4) Summary general courts-martial. | { Hereinafter called extraordinary courts-martial. |
| (5) Summary courts-martial.         |  |

23. For articles 73 and 74 of the said Articles

the following shall be substituted, namely:

Substitution of new articles for articles 73 and 74.

*"Ordinary Courts-martial."*

"Article 73.—(1) The following authorities shall have power to convene general or district courts-martial, namely:

Power to convene ordinary courts-martial.

- the Commander-in-Chief in India,
- the general officer of the Command,
- any officer empowered in that behalf by the Commander-in-Chief in India.

*The Indian Articles of War Amendment Act, 1894.**(Sections 24-31.)*

India or the general officer of the Command.

(2) The power of convening general or district courts-martial may be granted under clause (1), sub-clause (c), subject to such restrictions, reservations, exceptions and conditions as the Commander-in-Chief in India or the general officer of the Command granting the power may think fit.

(3) Any warrant under this article for convening general or district courts-martial, or either of them, may be addressed to an officer by name, or by designation of his office, or partly in one way and partly in the other, and may or may not, according to the terms thereof and the mode in which it is addressed, be limited to an officer named or be extended to any person for the time being performing the duties of such officer, or to the successors in command of such officer.

*“Article 74.—*A general court-martial shall, if held in British India, consist of not less than seven officers unless that number, due regard being had to the public service, is not available, in which case the court may consist of not less than five officers.”

24. Articles 75, 77, 78 and 79 of the said Articles are hereby repealed.

25. In article 76 of the said Articles, for the words “reduction to the ranks” the words “reduction to a lower grade or to the ranks” shall be substituted.

26. For articles 80 and 81 of the said Articles the following shall be substituted, namely:

*“Article 80.—*A district court-martial shall consist of not less than five officers, unless that number, due regard being had to the public service, is not available, in which case the court may consist of not less than three officers.

*“Article 81.—*A district court-martial may, when necessary, be composed wholly of officers of the corps or department to which the accused belongs.”

27. In article 82 of the said Articles the words “or garrison” and the words “other than mutiny” shall be omitted.

28. In the last-mentioned article, for the words “one year” the words “two years” and for the words “reduction to the ranks” the words “reduction to a lower grade or to the ranks” shall be respectively substituted.

29. After article 82 of the said Articles the following article shall be inserted, namely:

*“Article 82A.—*Whenever a general or district court-martial is ordered to be composed of the smaller number of officers specified in article 74 or 80, the order convening the court shall expressly state that the larger number of officers is not due regard being had to

the public service, available; and that statement shall be conclusive evidence of the fact so stated.”

30. For articles 83, 84 and 85 of the said Articles the following shall be substituted, namely:

*“Article 83.—*A regimental court-martial may be appointed by the officer commanding any corps or department or detachment thereof by any officer when in command of two or more corps or departments or detachments thereof.

*“Article 84.—*A regimental court-martial shall consist of not less than three officers.

*“Article 85.—*A regimental court-martial shall have power to try all persons subject to these Articles and not above the rank of non-commissioned officer—

(a) for any offence triable by a court-martial under these Articles, except an offence punishable under articles 7 to 23 (both inclusive), articles 54 to 65 (both inclusive), or articles 171 to 173 (both inclusive), and

(b) with the previous sanction of the prescribed authority, for any of the offences so excepted.

*“Article 85A.—*A regimental court-martial shall have power to pass any sentence which might have been passed by a district court-martial for the like offence other than suspension from rank, pay and allowances:

Provided that no sentence of imprisonment for a term exceeding six months, nor any of the additional punishments specified in article 135, shall be passed by a regimental court-martial.”

31. For articles 86 to 89 (both inclusive) of the said Articles the following shall be substituted, namely:

*“Article 86.—*(1) The officers composing a court-martial convened under the foregoing provisions shall, except as hereinafter provided, be Native officers.

(2) The Governor General in Council, or the Commander-in-Chief in India, or the general officer of the Command, or any officer empowered in that behalf by warrant of the Commander-in-Chief in India or the general officer of the Command, may direct that any court-martial convened under these Articles shall be composed of British instead of Native officers.

(3) Any person subject to these Articles, who is under orders for trial by any court-martial, may claim to be tried by British officers.

(4) In all cases the right of making such a claim shall, before the court is convened, be explained to the person under orders for trial by the commanding officer, or some officer deputed by him in this behalf, and, when such a claim is made, the court shall be constituted accordingly.

(5) A court-martial convened for the trial of any person subject to these Articles, and serving with any British corps or detachment, may be composed of British officers if, in the opinion

*The Indian Articles of War Amendment Act, 1894.*

## (Section 32.)

of the officer convening the court (such opinion to be expressed in the order convening the court and to be conclusive), Native officers are not available with due regard to the public service for service on the court.

Judge advocate and appointment of superintending officer for Native court-martial.

"Article 87.—(1) Every general court-martial shall be attended by a judge advocate.

(2) If no officer of the judge advocate general's department is available, the officer convening the court shall appoint a fit person to act as judge advocate at the trial.

(3) No person under orders for trial or under trial by any court-martial may, without the leave of the court, object to any person acting or professing to act as judge advocate.

(4) A British officer of not less than four years' service, hereinafter called the superintending officer, shall be appointed to superintend the proceedings of every court-martial composed of Native officers which is not attended by a judge advocate.

"Article 88.—(1) At every court-martial the senior officer shall sit as president. President. president without special appointment as such.

(2) In case of the death or unavoidable absence of the president, the next senior officer shall take the place of the president, without special appointment as such, and the trial shall proceed if the court is still composed of not less than the smallest number of officers of which it is required by these Articles to consist.

"Article 89.—No finding or sentence of a general, district or regimental court-martial shall be valid, except so far as it may be confirmed as provided by these Articles. Finding and sentence invalid without confirmation.

"Article 89A.—(1) The following authorities shall have power to confirm the findings and sentences of general and district courts-martial: By whom findings and sentences may be confirmed or otherwise disposed of.

- (a) the Commander-in-Chief in India;
- (b) the general officer of the Command, as regards troops under his command wherever stationed;
- (c) the officer commanding a force not attached to a Command;
- (d) any officer empowered in that behalf by warrant of the Commander-in-Chief in India or the general officer of the Command;

Provided that, except on active service or beyond the limits of India, no warrant issued under this article shall be deemed to empower an officer to confirm any finding or sentence in the case of an officer, medical subordinate or warrant officer, or a sentence of death, transportation or imprisonment for a term exceeding seven years in any case whatever.

(2) The provisions of article 73, clauses (2) and (3), shall, with the necessary modifications, apply to warrants issued under this article.

(3) The officer who convenes a regimental court-martial or the officer having authority to convene such court-martial, at the date of the submission of the finding and sentence thereof, shall have power to confirm the same.

"Article 89B.—Subject to such restrictions as may be contained in any warrant issued under the last preceding article, the confirming officer may, when

Power of confirming officer to mitigate, remit or commute sentence.

confirming the sentence of a court-martial, mitigate or remit the punishment thereby awarded, or commute that punishment for any less punishment or punishments to which the offender might have been sentenced by the court-martial:

Provided that a sentence of transportation shall not be commuted to a sentence of imprisonment for a term exceeding the term of transportation awarded by the court."

Substitution of new articles for articles 90 to 97.

32. For articles 90 to 97 (both inclusive) of the said Articles the following shall be substituted, namely:

*"Extraordinary Courts-Martial.*

"Article 90.—The following authorities shall have power to convene a summary general court-martial, and such a court-martial may be convened—

- (a) in any place, whether within or beyond British India, by an officer empowered in this behalf by an order of the Governor General in Council or of the Commander-in-Chief in India or of the general officer of the Command;
- (b) by an officer commanding any detached portion of Her Majesty's troops upon active service when, in his opinion, it is not practicable, with due regard to discipline and the exigencies of the service, that an offence should be tried by an ordinary general court-martial.

"Article 91.—(1) A summary general court-martial shall consist of not less than three officers, who may be either British or Native, or both British and Native officers, as the officer convening the court thinks fit. Composition of summary general courts-martial.

(2) Such court may be convened and the proceedings thereof be recorded in accordance with the form in the Second Appendix to these Articles with such variations as the circumstances of each case may require:

Provided that the convening officer may, in respect of any such trial by such court, specially order the evidence, together with the prisoner's statement in defence, to be fully recorded in writing.

"Article 92.—A summary general court-martial shall have all the powers of a general court-martial, and, subject to any instructions contained in the order convening the court, its sentence shall be valid, and may be carried out forthwith in case it does not exceed that which a district court-martial is empowered to pass, and in any other case when confirmed by the authority convening the court. Powers of a summary general court-martial.

"Article 93.—(1) A summary court-martial may be held—

- (a) by the commanding officer, being a combatant officer, of any corps or depart-

*The Indian Articles of War Amendment Act, 1894.**(Sections 33-36.)*

- ment of Her Majesty's Indian forces, or of any detachment of those forces;

- (b) by the commanding officer of any British corps or detachment to which Native combatant details subject to these Articles are attached.

(2) At every summary court-martial the officer holding the trial shall alone constitute the court, but the proceedings shall be attended throughout by two other officers, British or Native, who shall not, as such, be affirmed or sworn.

(3) The proceedings shall be recorded in the English language, and, when closed, shall be signed by the officer holding the trial, and by the officers attending thereat.

(4) A summary court-martial may try any person subject to these Articles and under the command of the officer holding the court, except an officer, medical subordinate or warrant officer.

(5) Any member of an army hospital corps may be tried by summary court-martial by any officer authorised in this behalf by the officer commanding the division, district, brigade or station to which the alleged offender belongs.

*"Article 94.—*A summary court-martial may try any offence punishable under any of these Articles:

Provided that when there is no grave reason for immediate action, and reference can, without detriment to discipline, be made to superior authority, a summary court-martial shall not try without such reference any of the following offences, namely:

- (a) any offence punishable under any of the articles 7 to 23 (both inclusive), or articles 54 to 65 (both inclusive), or article 171;

- (b) any offence against the officer holding the court.

*"Article 95.—*(1) A summary court-martial held by the commanding officer of a corps or department may pass any sentence which can be passed under these Articles, except a sentence of death or transportation, or of imprisonment for a term exceeding one year.

(2) A summary court-martial held by any other officer may pass any sentence which can be passed under these Articles, except a sentence of death or transportation, or of imprisonment for a term exceeding six months.

*"Article 96.—*The finding and sentence of a summary court-martial shall not require to be confirmed, but may be carried out at once

Provided that, if the officer holding the trial is of less than five years' service, he shall not, except on active service, carry into effect any sentence until it has received the approval of a superior military officer commanding not less than a corps.

*"Article 97.—*The proceedings of every summary court-martial shall, without delay, be forwarded to the officer commanding the district, or the division or brigade, within

officer: and such officer or the Commander-in-Chief in India or the general officer of the Command, or, when the court is held in a force not attached to a Command, the officer commanding the force, may, for reasons based on the merits of the case, but not on any merely technical grounds, set aside the proceedings."

33. For article 100 of the said Articles the following shall be substituted, namely:

*"Article 100.—*(1) Whenever any person subject to these Articles is accused of any offence which his commanding or other superior officer considers should be tried by court-martial, such officer shall order the accused to be placed in military custody until he can be tried by a court-martial or is discharged by proper authority.

(2) No such person shall be detained in military custody longer than is necessary for the purposes of justice."

34. Article 101 of the said Articles is hereby repealed.

35. For article 102 of the said Articles the following shall be substituted, namely:

*"Article 102.—*(1) An interpreter shall be appointed to every court-martial.

(2) If no duly qualified interpreter is available at the station or place where the court-martial sits, the officer appointing the court, or the officer commanding in the district or place within or at which the trial is to be held, shall appoint any competent person to perform the duty of interpreter.

(3) When no other qualified or competent person is available, the superintending officer, or, in the case of an European court, the president, shall perform the duty of interpreter.

(4) In the case of a trial by a summary court-martial, the officer holding the trial, or one of the officers in attendance thereat, may perform the duty of interpreter if no other competent interpreter is available.

(5) No interpreter shall, as such, have a vote upon any matter."

36. For article 103 of the said Articles the following shall be substituted, namely:

*"Article 103.—*(1) When a court-martial after the commencement of the trial is reduced below the smallest number of officers of which it is by these Articles required to consist, it shall be deemed to be dissolved.

(2) If, on account of the illness of the prisoner before the finding, it is impossible to continue the trial, a court-martial shall be dissolved.

(3) Where a court-martial is dissolved under this article, the prisoner may be tried again.

*"Article 103A.—*The president of a court-martial may, on any deliberation among the members, cause the court to be cleared of all other persons.

*The Indian Articles of War Amendment Act, 1894.*

## (Sections 37-44.)

**"Article 103B.**—The court may, when it thinks fit, view any place."

**37.** In article 104 of the said Articles the words "general court-martial appointed under an Order in Council, or of any other" and the words and figures "under article 96 or 97" shall be omitted.

**38.** In article 107 of the said Articles, for the words "courts-martial, other than courts-martial appointed under an Order in Council, or summary" the word "ordinary" shall be substituted.

**39.** After article 108 of the said Articles the following article shall be inserted, namely:

**"Article 108A.**—At a summary court-martial the interpreter shall make affirmation or oath down to the words 'published by authority' only."

**40.** Article 114 of the said Articles is hereby repealed.

**41.** For article 116 of the said Articles the following shall be substituted, namely:

**"Article 116.—(1)** A prisoner charged before a court-martial with desertion may be found guilty of attempting to desert or of being absent without leave.

**(2)** A prisoner charged before a court-martial with attempting to desert may be found guilty of desertion or of being absent without leave.

**(3)** A prisoner charged before a court-martial with any one of the following offences, that is to say, theft, dishonest misappropriation or conversion, criminal breach of trust, or dishonestly receiving or retaining stolen property, may be found guilty of any other of those offences.

**(4)** A prisoner charged before a court-martial with any other offence under these Articles may, on failure of proof of an offence having been committed under circumstances involving a more severe punishment, be found guilty of the same offence as having been committed under circumstances involving a less severe punishment."

**42.** For article 117 of the said Articles the following shall be substituted, namely:

**"Article 117.—(1)** When any person subject to these Articles has been convicted by a court-martial of any offence, such court-martial shall enquire into, and receive and record evidence of, any previous convictions of such person, either by a court-martial or by a criminal court, and shall further enquire into and record the general character of such person.

**(2)** Evidence received under this article may be either oral, or in the shape of entries in, or certified extracts from, court-martial books or other official records; and it shall not be necessary to prove the signature to such certified entries, nor shall it be necessary to give notice

before trial to the person tried that evidence as to his previous convictions or character will be received.

**(3)** At a summary court-martial the commanding officer holding the trial may, if he thinks fit, record any previous convictions against the offender and his general character, as of his own knowledge, instead of requiring them to be proved under the foregoing provisions of this article.

**"Article 117A.**—Subject to the provisions of the last foregoing article, the Indian Evidence Act, 1872, subject to such modifications thereof and to such additional rules of evidence as the Governor General in Council may, by notification, direct, shall apply to all proceedings before a court-martial."

**43.** For articles 119 and 120 of the said Articles the following shall be substituted, namely:

**"Article 119.**—No sentence of death shall be passed by any court-martial without the concurrence of two-thirds at the least of the members of the court.

**"Article 120.—(1)** The finding or sentence of any court-martial may be once revised by order of the officer authorized to dispose of the proceedings, and, on such revision, the court, if so directed by him, may take additional evidence.

**(2)** The court, on revision, shall consist of the same officers as were present when the original decision was passed, unless any of those officers shall be unavoidably absent.

**(3)** In case of such unavoidable absence the cause thereof shall be duly certified in the proceedings, and the court shall proceed with the revision, provided it still consists of the smallest number of officers of which such court is by these Articles required to consist."

**44.** For articles 122 to 124 (both inclusive) of the said Articles the following shall be substituted, namely:

**"Article 122.—(1)** The judge advocate in the case of a general court-martial, and the officer ordering the trial in the case of any other court-martial, may, by summons under his hand, require the attendance before the court, at a time and place to be mentioned in the summons, of any person either to give evidence or to produce any document or other thing.

**(2)** In the case of a witness amenable to military authority, the summons shall be sent to the officer actually commanding the corps, department or detachment to which he belongs, and such officer shall serve it upon him accordingly.

**(3)** In the case of any other witness, the summons shall be sent to the magistrate within whose jurisdiction he may be or reside, and such magistrate shall give effect to the summons as if the witness were required in the court of such magistrate.

*The Indian Articles of War Amendment Act, 1894.*

(Sections 45-51.)

(4) When a witness is required to produce any particular document or other thing in his possession or power, the summons shall describe it with convenient certainty.

1 of 1872. (5) Nothing in this section shall be deemed to affect the Indian Evidence Act, 1872, sections 123 and 124, or to apply to any letter, post-card, telegram or other document in the custody of the postal or telegraph authorities.

(6) If any document in such custody is, in the opinion of any district magistrate, chief presidency magistrate, high court or court of session, wanted for the purposes of any court-martial, such magistrate or court may require the postal or telegraph authorities, as the case may be, to deliver such document to such person as such magistrate or court may direct.

(7) If any such document is, in the opinion of any other magistrate or of any commissioner of police or district superintendent of police, wanted for any such purpose, he may require the postal or telegraph department, as the case may be, to cause search to be made for and to detain such document pending the orders of any such district magistrate, chief presidency magistrate or court.

"Article 123.—(1) Any witness duly summoned, and any person who commits any contempt of court in the presence of a court-martial, or any offence described in article 56, 67 or 68, shall, if subject to these Articles, be proceeded against as the court may direct.

(2) If any such witness or person is not so subject, the president of the court-martial may certify the offence under his hand to the court of any magistrate within the local limits of whose jurisdiction it was committed, and the magistrate may thereupon take cognizance of the case, and, after hearing anything which the accused may desire to say, dispose of it as if the offence had been committed in a proceeding in the court of such magistrate.

Privileges of persons attending courts-martial. "Article 124.—(1) No president or member of a court-martial, no judge advocate or superintending officer, no party to any proceeding before a court-martial or his legal practitioner or agent, and no witness acting in obedience to a summons to attend a court-martial, shall, while proceeding to, attending on or returning from, a court-martial, be liable to arrest under civil or revenue process.

(2) If any such person is arrested under any such process, he may be discharged by order of the court-martial."

Repeal of articles 125 to 129. 45. Articles 125 to 129 (both inclusive) of the said Articles are hereby repealed.

Amendment of article 130. 46. In article 130, clause (d), sentence 1, of the said Articles, for the words "one year" the words "two years" shall be substituted.

Substitution of new article for article 131. 47. For article 131 of the said Articles the following shall be substituted, namely:

"Article 131.—Dismissal from the service may

48. In article 132 of the said Articles, Insertion of words after the word "reduced" in article 132. the words "to a lower grade or" shall be inserted.

49. For articles 133 to 137 (both inclusive) of the said Articles the following shall be substituted, namely

"Article 133.—In executing a sentence of solitary confinement, such confinement shall in no case exceed fourteen days at a time, with intervals between the periods of solitary confinement of not less duration than such periods; and, when the imprisonment awarded shall exceed three months, the solitary confinement shall not exceed seven days in any one month of the whole imprisonment awarded, with intervals between the periods of solitary confinement of not less duration than such periods.

"Article 134.—A non-commissioned officer sentenced by court-martial to any of the punishments specified in the second paragraph of article 132 shall be deemed to be reduced to the ranks.

"Article 135.—On a conviction of any offence, a general, summary general or district court-martial may, in addition to any other punishment which it is empowered to award, sentence the offender to forfeit all advantage as to additional pay and claim to pension on discharge which might otherwise have accrued from the length or nature of his former service, or to forfeit all such advantage absolutely, whether it has accrued from former service or may accrue from future service, or to forfeit service for the purpose of promotion, increased pay or pension or any other prescribed purpose, or to forfeit any military decoration or reward.

"Article 136.—Whenever a person subject to these Articles is convicted by a court-martial, his good-conduct pay shall, subject to any rules or orders which may from time to time be made with the previous sanction of the Governor General in Council, cease.

"Article 137.—On a conviction for any offence, if the offender is sentenced to dismissal from the service, or if his sentence involves such dismissal, he may further be sentenced to forfeit, if the court shall so direct,—

(a) all or any arrears of pay and allowances or other public money due to him at the time of his dismissal, or

(b) such portion thereof as may be required to make good any proved loss or damage arising out of his offence."

50. The first paragraph of article 138 of the said Articles, and the word "and" at the beginning of the second paragraph of the same article, are hereby repealed.

51. In article 139 of the said Articles, for the words "in the case of an officer, two-thirds or

*The Indian Articles of War Amendment Act, 1894.*

(Sections 52-63.)

52. Articles 142 to 149 (both inclusive) of the Repeal of articles said Articles are hereby repealed.

53. In articles 150 and 151 of the said Articles. after the words "the offender shall" the words "as soon as may be convenient" shall be inserted, and for the words "the nearest jail" the words "a jail" shall be substituted.

54. To the last-named article the following Addition to article proviso shall be added, namely:

"Provided that, in the case of a sentence of such imprisonment for a period not exceeding three months, the confirming or superior authority or, in the case of a summary court-martial, the commanding officer holding the trial may direct that the sentence shall be undergone in military custody."

55. To article 152 of the said Articles the words "Subject to the control of the Commander-in-Chief in India" shall be prefixed; and for the words "the Commander-in-Chief of a Presidency" the following words shall be substituted, namely: "the general officer of the Command."

56. To the second paragraph of the last-mentioned article the words "Subject as aforesaid," shall be prefixed, and in the same paragraph for the words "any Presidency" the words "a Command" shall be substituted.

57. In article 155 of the said Articles, after the words "from the date of such sentence" the words "or if an appeal be preferred against such sentence and fail, from the date of the disposal of such appeal," shall be inserted.

58. To the last-mentioned article the following Addition to same ing shall be added, namely:

"Provided that on active service any such person may, by order of the officer empowered under these Articles to confirm or otherwise dispose of the proceedings of the trial, be retained to serve in the ranks, and his service therein shall be reckoned as part of his term of transportation or imprisonment."

59. Articles 156 to 159 (both inclusive) of the said Articles are hereby repealed.

60. For article 160 of the said Articles the following shall be substituted, namely:

"Article 160.—When any person subject to these Articles has been convicted by a court-martial of any offence,—

(a) the Governor General in Council, or,  
(b) when the person has been convicted of any offence other than a civil offence, the Commander-in-Chief in India or the general officer of the Command.

(2) remit wholly or in part any punishment awarded to him;

(3) order the restoration to him of any service or other advantage forfeited under his sentence, or

(4) re-admit him to the service when he has been dismissed therefrom:

Provided that the general officer of the Command shall not exercise the powers conferred by this section in respect of any person, unless—

(1) the person was under his authority when sentenced; and

(2) the person is still in the service, or, if the person has been dismissed from the service, the corps or department from which he was dismissed has since continued under the authority of that officer."

61. In article 161 of the said Articles the words "or to the Government of Fort St. George, or to the Government of Bombay," shall be repealed; and for the words "Commander-in-Chief of any Presidency or of the officer commanding any force not attached to a Presidency" the following words shall be substituted, namely: "Commander-in-Chief in India or the general officer of the Command, or of the officer commanding any force not attached to a Command."

62. After article 161 of the said Articles the following shall be inserted, namely:

*" Preservation of Proceedings.*

"Article 161A.—(1) The proceedings of all general courts-martial shall be preserved by the judge advocate general for not less than seven years, and the proceedings of summary general courts-martial and district courts-martial for not less than three years, from the date of the confirmation of the finding and sentence.

(2) The proceedings of regimental and summary courts-martial shall be preserved for three years with the records of the corps or department to which the prisoner belonged.

(3) Every person tried by a court-martial shall be entitled, on demand at any time after the confirmation of the finding and sentence where such confirmation is required, and before the proceedings are destroyed, to obtain from the officer or person having the custody of the proceedings a copy thereof, including the proceedings upon revision, if any, upon payment for the same at the prescribed rate."

63. For article 162 of the said Articles the following shall be substituted, namely:

"Article 162.—(1) When any person subject to these Articles has been absent without due authority from his duty for a period of sixty days, a court of enquiry shall, as soon as practicable, be assembled, and, upon affirmation or oath administered in the prescribed manner, shall enquire respecting the absence of the person, and the deficiency, if any, of property of the

*The Indian Articles of War Amendment Act, 1894.*

(Sections 64-71.)

ammunition, equipments, instruments, clothing or necessities; and, if satisfied of the fact of such absence without due authority or other sufficient cause, the Court shall declare such absence and the period thereof, and the said deficiency if any; and the commanding officer of the corps or department to which the person belongs shall enter in the court-martial book of the corps or department a record of the declaration.

(2) If the person declared absent does not afterwards surrender, or is not apprehended, the record shall have the legal effect of a conviction of desertion.

(3) If the person declared absent surrenders or is apprehended, the record or a copy thereof, purporting to bear the signature of the officer having the custody of the court-martial book, shall, on the trial of the person for desertion, be presumptive evidence of the facts therein recorded; and, on proof of the identity of the prisoner with the person therein mentioned, he may be found guilty of desertion and of the deficiency, if any, therein recorded."

64. For the last paragraph of article 163 of the said Articles the following shall be substituted, namely:

"Such recommendation, duly confirmed by the Commander-in-Chief in India, or by the general officer of the Command, or the officer commanding any force not attached to a Command to which he belongs, or by any general officer under whose command the person is serving, shall entitle him to receive such arrears and reckon service accordingly."

65. For article 164 of the said Articles the following shall be substituted, namely:

"Article 164.—The Commander-in-Chief in India, the general officer of the Command, the officer commanding any force not attached to a command, and the officer commanding any district or division or brigade, shall respectively have power to reduce to a lower grade or to the ranks any non-commissioned officer under his command."

66. In article 165 of the said Articles, for the words "No such minor punishment shall be awarded by a court-martial," to the end of the article, the following shall be substituted, namely:—

"Unless otherwise specially provided by the said Commander-in-Chief, no Native officer, medical subordinate or warrant officer shall be liable to any such minor punishment."

"Good-conduct pay shall not necessarily be forfeited on the infliction of a minor punishment, but forfeiture thereof may be awarded as a substantive punishment, by order of the commanding officer, as may from time to time be prescribed in the General Orders of the Commander-in-Chief in India."

"Forfeiture of good-conduct pay may be awarded in addition to any other minor punishment."

67. In article 166 of the said Articles, the words "the Governor of Fort St. George in Com-

68. In article 168 of the said Articles, for Amendment of article 168. the words "the Commander-in-Chief of the Presidency" the words "the Commander-in-Chief in India or the general officer of the Command" shall be substituted.

69. In the second paragraph of article 169 of the said Articles, for the words "warrant officer" the words "non-commissioned officer" shall be substituted.

70. The second and third paragraphs of article 170 of the said Articles are hereby repealed.

71. For articles 171 to 175 (both inclusive) of the said Articles the following shall be substituted, namely:

*"Civil Offences.*

"Article 171.—Every person subject to these Articles who at any place beyond British India commits any civil offence shall be deemed to be guilty of an offence against military law, and if charged therewith under this article shall, subject to the provisions of these Articles, be liable to be tried for the same by court-martial at any place, whether within or beyond British India, and on conviction to be punished as follows, that is to say:

(a) if the offence is one which would be punishable under the law of British India with death or with transportation, or with imprisonment for a term exceeding three years, he shall be liable to suffer any punishment assigned for the offence by the law of British India; and

(b) in other cases, he shall be liable to suffer any punishment assigned for the offence by the law of British India or such punishment as might be awarded to him in pursuance of these Articles in respect of an act to the prejudice of good order and military discipline.

"Article 172.—The Governor General in Council may, by notification, extend the last foregoing article to civil offences or any class of those offences committed by a person subject to these Articles when on active service in British India, and may cancel any such notification."

"Article 173.—Every person subject to these Articles who, whether within or beyond British India, commits or attempts to commit or abets the commission of any of the following offences against any person subject to military law, that is to say, murder, culpable homicide or any offence punishable under any of the sections 323 to 335 (both inclusive) or section 306 of the Indian Penal Code, shall be deemed to be guilty of an offence against military law, and if charged under this article with any such offence shall, subject to the provisions of these Articles, be

*The Indian Articles of War Amendment Act, 1894.*

(Sections 72-73)

conviction shall be liable to suffer any punishment assigned for the offence by the said Code.

**"Article 174.**—When under any of the foregoing Articles a criminal court and a court-martial have each jurisdiction in respect of an offence, it shall be in the discretion of the prescribed military authority to decide before which court the proceedings shall be instituted, and, if that authority decides that they shall be instituted before a court-martial, to direct that the accused person shall be detained in military custody.

**"Article 175.**—(1) When a criminal court having jurisdiction is of opinion that proceedings ought to be instituted before itself in respect of any alleged offence, it may, by written notice, require the convening authority or the prescribed military authority at his option either to deliver over the offender to the nearest magistrate to be proceeded against according to law or to postpone proceedings pending a reference to the Governor General in Council.

(2) In every such case the said authority shall either deliver over the offender in compliance with the requisition or shall forthwith refer the question as to the court before which the proceedings are to be instituted for the determination of the Governor General in Council, whose order upon such reference shall be final."

72. For articles 176 to 179 (both inclusive) of the said Articles the following shall be substituted, namely:

**"TITLE VI.—PROPERTY OF DECEASED PERSONS AND DESERTERS.**

**"Article 176.**—The following rules are enacted respecting the disposal of the property of every person who belongs to a class subject to these Articles who dies, is killed in the field or deserts:—

(1) The commanding officer shall secure all the moveable property that is on the spot, and cause an inventory thereof to be made, and draw any pay and allowances due to the deceased or deserter

(2) In the case of a deceased person who has left in a Government Savings Bank (including any Post Office Savings Bank, however named,) a deposit not exceeding one thousand rupees the commanding officer may, if he thinks fit, require the secretary or other proper officer of the bank to pay the deposit to him forthwith notwithstanding anything in any departmental rules; and, after the payment thereof in accordance with such requisition, no person shall have any right in respect of the deposit except as hereinafter provided.

(3) In the case of a deceased person whose representative is on the spot and has given security for the payment of the regimental debts (if any) of the deceased, the commanding officer shall deliver over the property and the amount of the deposit (if any) received under clause (2) of this article to that representative.

(4) In the case of a deceased person whose estate is not dealt with under clause (3) of this

article, and in the case of any deserter, the commanding officer shall cause the property to be sold by public auction, and shall pay the regimental debts and other debts in camp or quarters (if any), and in the case of a deceased person the expenses of his funeral ceremonies, from the proceeds of the sale and the amount of the deposit (if any) received under clause (2) of this article.

(5) The surplus, if any, shall in the case of a deceased person be paid to his representative, if any, or in the event of no claim to such surplus being established within twelve months after the death, then the same shall be remitted to the prescribed officer.

(6) In the case of the sale of the effects of a deserter, the amount remaining in the hands of the commanding officer shall be forthwith remitted to the prescribed officer.

**"Article 177.**—Property deliverable and money payable to the representative of a deceased person under the last foregoing article may, if the total value or amount thereof does not exceed one thousand rupees, and if the prescribed officer thinks fit, be delivered or paid to any person, appearing to him to be entitled to receive it or to administer the estate of the deceased, without requiring the production of any probate, letters of administration, certificate or other such conclusive evidence of title; and such delivery or payment shall be a full discharge to those ordering or making the same and to the Secretary of State for India in Council from all further liability in respect of the property or money; but nothing in this article shall affect the rights of any executor or administrator or other representative, or of any creditor, of a deceased person against any person to whom such delivery or payment has been made.

**"Article 178.**—A person shall be deemed to have deserted within the meaning of article 176 who has been convicted of desertion, or who has been illegally absent from duty for a period of sixty days and has not subsequently surrendered or been apprehended.

**"Article 179.**—The provisions of the last-mentioned article shall, so far as they can be made applicable, apply in the case of a person subject to these Articles becoming insane, such allowance being made for his support as is authorised by the Military Lunatics Act, 1877."

73. For Part III of the said Articles the following shall be substituted, namely:

**"PART III.—MISCELLANEOUS.**

**"Article 180.**—When any person subject to these Articles has been acquitted or convicted of an offence by a court-martial or by a criminal court, or has been summarily dealt with for an offence under article 165 or 166, he shall not be liable to be again tried for the same offence by a court-martial or dealt with summarily in respect of it under either of the said articles.

**"Article 181.**—(1) No person subject to these Articles shall, so long as he belongs to Her Majesty's Indian Forces, be liable to be arrested for debt

XI of 1877.

*The Indian Articles of War Amendment Act, 1894.*

## (Section 73.)

under any process issued by, or by the authority of, any civil or revenue court or revenue-officer.

(2) The judge of any such court may examine into any complaint made by such person or his superior officer of the arrest of such person contrary to the provisions of this article, and may by warrant under his hand discharge the person, and award reasonable costs to the complainant, who may recover those costs in like manner as he might have recovered costs awarded to him by a decree against the person obtaining the process.

(3) For the recovery of such costs no fee whatever shall be payable to the court by the complainant.

*"Article 182.*—Neither the arms, clothes, equipment, accoutrements or necessities of any person subject to these Articles, nor any animal used by him for the discharge of his duty, shall be seized; nor shall the pay and allowances of any such person or any part thereof be attached, by direction of any civil or revenue court or any revenue-officer, in satisfaction of any decree or order enforceable against him.

*"Article 183.*—Every person belonging to the Indian Reserve Forces shall, when called out for or engaged upon or returning from training or service, as an officer or soldier, be entitled to all the privileges accorded by the two last foregoing articles to a person subject to these Articles.

*"Article 184.*—(1) On the presentation to any court by or on behalf of any officer or soldier subject to these Articles of a certificate, from the proper military authority, of leave of absence having been granted to or applied for by him for the purpose of prosecuting or defending any suit or other proceeding in such court, the court shall, on the application, of such officer or soldier, arrange, so far as may be possible, for the hearing and final disposal of such suit or other proceeding within the period of the leave so granted or applied for.

(2) The certificate from the proper military authority must state the first and last day of the leave or intended leave, and set forth a description of the case with respect to which the leave was granted or applied for.

(3) No fee whatever shall be payable to the court in respect of the presentation of any such certificate, or in respect of any application by or on behalf of any such officer or soldier for priority for the hearing of his case.

(4) Where the court is unable to arrange for the hearing and final disposal of the suit or other proceeding within the period of such leave or intended leave as aforesaid, it shall record its reasons for having been unable to do so, and shall cause a copy thereof to be furnished to such officer or soldier on his application, without any payment whatever by him in respect either of the application for such copy or of the copy itself.

(5) If in any case a question arises as to the proper military authority qualified to grant such certificate as aforesaid, such question shall be at once referred by the court to the nearest

officer commanding a corps, whose decision shall be final.

*"Article 185.*—(1) Whenever any person subject to these Articles deserts, the commanding officer of the corps, department or detachment to which he belongs shall give written information of the desertion to such civil, political or police authorities as, in his opinion, may be able to afford assistance towards the capture of the deserter; and such authorities shall thereupon take steps for the apprehension of the said deserter in like manner as if he were a person for whose capture a warrant had been issued by a magistrate, and shall deliver the deserter, when apprehended, to military custody.

(2) Such authorities shall also, by such means as appear to them best adapted for the purpose, prevent persons reasonably believed to be subject to these Articles from travelling through the areas subject to their jurisdiction, unless on duty, or furnished with a certificate of leave or discharge.

(3) Any police-officer may arrest, without warrant, any person reasonably believed to be subject to these Articles and to be travelling without authority, and shall bring him without delay before the nearest magistrate, or the nearest military commanding officer when no magistrate is readily accessible, to be dealt with according to law.

*"Article 186.*—Whenever any person subject to these Articles, who is accused of any military offence, is within the jurisdiction of any civil, political or police officer, such officer shall aid in the apprehension and delivery to military custody of such person upon receipt of a written application to that effect signed by his commanding officer.

*"Article 187.*—In any proceeding under these Articles, any application, certificate, warrant, reply or other document purporting to be signed by an officer in the civil or military service of the Government shall, on production, be presumed to have been duly signed by the person and in the character by whom and in which it purports to have been signed, until the contrary is shown.

*"Article 188.*—(1) The Governor General in Council may direct that for the purposes of these Articles—

(a) any portion of Her Majesty's Indian Forces belonging to a Command shall, when serving beyond the ordinary limits of the Command, continue subject to the authority of the general officer of the Command; or

(b) any portion of those forces not belonging to a Command shall be attached to a Command, and shall be subject to the authority of the general officer of the Command.

(2) Except as may be directed under clause (1) of this article, any portion of the said forces shall, when serving in a Command, be for the purposes of these Articles subject to the authority of the general officer of that Command.

*The Indian Articles of War Amendment Act, 1894.*

## (Section 74.)

*Article 189.*—Nothing in these Articles shall be deemed to affect the authority conferred on the Commander-in-Chief in India by any Act of Parliament or by Royal Warrant or Commission.

*Article 190.*—(1) The Governor General in Council may, by notification, make rules consistent with these Articles to regulate the procedure of courts-martial and officers, military, civil or political, having any jurisdiction or authority under these Articles, and for the purpose of carrying these Articles into execution, so far as relates to the investigation, trial and punishment of offences triable under them.

(2) Rules under this article may provide among other matters for the following :

- (a) the assembly and procedure of courts of enquiry ;
- (b) the convening and constituting of courts-martial ;
- (c) the adjournment, dissolution and sittings of courts-martial ;
- (d) the procedure to be observed in trials by courts-martial ;
- (e) the confirmation and revision of the findings and sentences of courts-martial ;
- (f) the carrying into effect sentences of courts-martial ;

(g) the forms of orders to be made under the provisions of these Articles relating to courts-martial, transportation or imprisonment.

(3) The Governor General in Council may by any such rule confer on any court-martial or officer any power (other than a power to try an accused person or pass a sentence) conferred on a court of original jurisdiction by the Code of Criminal Procedure, 1882.

X of 1882.

*Article 191.*—(1) The Governor General in Council may, by notification, apply all or any of the provisions of these Articles to any force raised and maintained in India under the authority of the Governor General in Council, and may cancel or modify any such notification.

(2) While any of the provisions of these Articles apply to any such force, the Governor General in Council may, by notification, direct by what authority any jurisdiction, powers or duties incident to the operation of those provisions shall be exercised or performed in respect to that force."

74. After the Appendix to the said Articles the Second Appendix set out in the Schedule to this Act shall be added.

Addition of Second Appendix to Articles.

## RESOLUTION ON THE ANNUAL GENERAL ADMINISTRATION REPORT OF THE ORISSA DIVISION FOR THE YEAR 1893-94.

### GENERAL DEPARTMENT—MISCELLANEOUS.

*Darjeeling, the 23rd October 1894.*

#### RESOLUTION No. 107TG.

READ—

The Annual General Administration Report of the Orissa Division for the year 1893-94.

Mr. Cooke held charge of the Division throughout the year, and his Report, which is concise and tersely written, gives an interesting account of the subjects to which he and his Collectors devoted their attention during their tours of inspection. It does not, however, contain many such pregnant suggestions for administrative reforms as have been brought forward in the reports from some other divisions.

2. Mr. Stevenson held charge of the district of Cuttack throughout the year, with the exception of a brief interval of privilege leave. Mr. Cornish closed his long connection with Balasore towards the end of March 1894, and was transferred on grounds of ill-health to Bankura. Mr. Walsh, District Magistrate of Puri, took furlough from December 1893, and was succeeded by Mr. Coxe. There was practically no change in any of the four sub-divisions in the Division. The Lieutenant-Governor has much pleasure in acknowledging the good work of Messrs. Stevenson and Cornish, and their assiduous care of the interests of the districts which they have administered so long.

3. The attempt to introduce a system of maintenance of the settlement record in Khurda (discussed in paragraph 16) was actively carried on, but the general conclusions seem to be that the record had been allowed to get too

much out of order, and must be put right once for all before a system of regular mutation of names as changes arise can be carried out.

4. The Lieutenant-Governor is glad to notice, in paragraph 32 of the Report, the intelligent and painstaking enquiry made by Mr. McPherson, Sub-divisional Officer of Khurda, into the condition of the people in that sub-division. The question of the result of giving free right of transfer or mortgage to raiyats is one of the most important questions of the day, and Mr. McPherson is right in saying that the coming re-settlement ought to be used so as to throw light on it. His conclusion that the unskilled labourers' wages have not risen in spite of the rise in prices, and that the numbers of the landless classes are rapidly increasing, will probably be agreed in by those who have made similar enquiries in tracts far from any large centre of employment such as towns and factories. In his 191<sup>st</sup> paragraph the Commissioner has reverted to this subject, and expresses a doubt whether the day labourer in Orissa is as badly off as is supposed. He quotes the remarks of "an officer who has good opportunities of observing that many of this class are not free agents, that they have as a rule taken advances from a cultivator or a contractor and cannot leave such service, and that better wages will not tempt them to do so unless the temptation of an advance is added. The same officer adds that this position of semi-slavery enables the employer to obtain their services much below the wage that would be paid by another person, and that the labourers are ground down to the lowest scale that is consistent with their survival." Mr. Cooke holds that this is the possible explanation of the fact that wages do not rise in Orissa, as has been pointed out by Mr. McPherson and others.

5. His Honour would have been glad if more information had been given on the subject of salt administration, which is one of the specialities of the Orissa Division. It would have been useful if in paragraph 40 statistics had been given of the number of prosecutions and the punishments inflicted for illegal manufacture and possession of salt, a matter to which much public attention has been turned of late, and on which much nonsense has been written.

6. The remarks in the end of paragraph 62 betray the same curious confusion of mind between judicial interference and executive interference with the proceedings of a Subordinate Magistrate which the Lieutenant-Governor has not infrequently observed elsewhere. It is a common mistake to think that, if a Magistrate sitting as an Appellate Court corrects a judgment of a lower Court, he is acting judicially and rightly, but if he pays a visit of inspection and points out errors to his subordinates, he is interfering as an Executive officer and acting wrongly. In the Lieutenant-Governor's opinion he is acting rightly and judicially in both instances: in the one case he is curing the defects of the past, in the other he is providing a remedy against their occurrence in future. The Government circular No 4116J., dated 29th August 1893, referred to the publication of censure on judicial action, not to the advice which an experienced Magistrate is entitled to give to inexperienced subordinates. In the particular case in point, His Honour considers that the Magistrate of Cuttack was quite right in advising the Bench of Honorary Magistrates to guard against the indiscriminate summoning of accused persons unless the complaint is *prima facie* valid.

7. *Paragraph 75.*—Great delay has occurred in connection with the land acquisition work for the East Coast Railway; but the Lieutenant-Governor regrets to see that the Report is silent on the subject. It would have been useful if the Commissioner had shown what rate of compensation has been awarded per mile as compared with the original estimate, how that rate was composed, how much was paid to proprietors, tenants, &c., and on what basis it was calculated. It should also have been stated how long the Deputy Collector has been engaged on this work, what portion is finished, and what still remains. This is a class of work which requires close inspection and is too much left without supervision.

8. The Lieutenant-Governor regrets to find in the Commissioner's Report such a sentence as the following quoted from the Collector of Cuttack:—"I have reason to believe that the raiyats' real complaint is that they are not given water when they want it, and they not unnaturally ask, why should we pay for what is not given as required, but at the sweet will and pleasure of the canal officers? Especially do they complain that they do not get water to irrigate their lands so as to render them fit for ploughing. They say that the rule is to supply no water till the crop is growing, while in a season like the present, when there has been no rain for some months, water is urgently needed

for preliminary cultivation." Mr. Stevenson has since explained that his intention was only to quote complaints he had heard, not to endorse them as supported by himself. The fact is that the supply in the Mahanadi in the hot weather is not sufficient to admit of water being given for ploughing, and is but barely sufficient for the purposes of navigation. The credit and the interests of the Canal officers are involved in their success in encouraging the spread of irrigation. With their enormous *clientèle*, and the climatic fluctuation in the rains, there must be occasional delays; but the idea that they give or refuse water "at their sweet will and pleasure" can only spring up in the minds of a few malignant or ignorant persons. It is believed that the opening of the new head sluice for the Kendrapara Canal, and the alteration in the shutters of the Baitarni weir, will do much to remove the difficulty in the supply of water which is complained of.

9. The Lieutenant-Governor is glad to notice in paragraph 89 that a sum of nearly Rs. 24,000 was spent in the Kanika Estate in Cuttack on the repairs of the embankments which were destroyed by the cyclone of May 1893, but regrets that the Commissioner has not dwelt at greater length on the subject of improvements in Wards' estates throughout the Division, on which upwards of Rs. 41,000 were spent. His Honour surmises that the expenditure was chiefly on embankments. A scheme of complete embankment on the sea side of the Kujang Estate should now be prepared with the approval of the Irrigation Department. The collections in this estate, both in this and the previous year, were extremely bad, and no explanation of the cause is given in paragraph 88.

10. The Lieutenant-Governor concurs in the suggestion made in the latter part of paragraph 106 of the Report, that the Assessors of income-tax ought to learn the figures in Gujrati and Marwari to enable them to form a fair estimate of the incomes of large traders whose accounts are kept in those languages. The attention of the Board of Revenue will be specially drawn to this matter.

11. *Paragraphs 114-120.*—The subject of providing accommodation for pilgrims at Puri under the Lodging-house Act IV (B.C.) of 1871 is one of the most important questions peculiar to Orissa which the Commissioner and his officers have to deal with. The Lieutenant-Governor approves of the proposal "to erect at Puri" (and also along the road between Puri and Cuttack) "corrugated iron shelters which, while not competing with the licensed lodging-houses, will afford protection to numbers of pilgrims who cannot be accommodated in lodging-houses, even had they the means to pay for accommodation." It would be useful if the Commissioner could see his way to supply statistics of the number of pilgrims to Puri. As almost all those who come by land enter by one road, it should not be difficult to establish a registering station to record the statistics. Though the Puri Lodging-house Act was extended to Jajpur town in September 1890, it has not yet been enforced owing to the bye-laws and model rules not having been sanctioned. The Commissioner should see that no further delay occurs in the submission of these bye-laws and rules for the final sanction of Government.

12. The Lieutenant-Governor regrets the decrease in the number of schools and pupils under the Head of Public Instruction, noticed in paragraphs 122 and 123 of the Report. According to the Report there has been a net decrease of 2,399 scholars in the Division, which is surprising, as the recent Resolution recorded on education under Municipalities and District Boards placed this Division very high in respect of the number of scholars. The Lieutenant-Governor has noticed with satisfaction the liberality of Babu Satyendra Nath De, who has instituted scholarships at Balasore for proficiency in gymnastics.

13. *Paragraphs 165 and 166.*—The Lieutenant-Governor is glad to notice the marked improvements in the District Board and Municipality of Puri as compared with the state of things that existed last year. His Honour concurs with the Commissioner in attributing the improvements in the Puri Municipality to the Chairman, Dr. Banks, who has devoted himself to his duties with marked and untiring energy.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

*Secretary to the Government of Bengal.*

ANNUAL GENERAL ADMINISTRATION REPORT OF THE ORISSA  
DIVISION FOR 1893-94.

No. 993R., dated Cuttack, the 7th July 1894.

From—H. G. COOKE, Esq., Offg. Commissioner of the Orissa Division,  
To—The Secretary to the Government of Bengal, General Department.

I HAVE the honour to submit the following Report on the General Administration of the Orissa Division for the year 1893-94. The subjects have been arranged in accordance with the instructions contained in Government order No. 762, dated 24th February 1893.

2. The district reports were received in this office on the dates mentioned below against each:—

Cuttack	...	...	...	1st June 1894.
Balasore	...	...	...	30th May "
Puri	...	...	...	8th June "

Complete information was not received from—

Cuttack till	...	...	...	29th June 1894.
Balasore "	...	...	...	30th " "
Puri "	...	...	...	5th July "

## I.—CHARGE.

3. The subjoined tables give the details of such changes as occurred in the divisional, district, and subdivisional administration during the year under report:—

(a) *Commissioner.*

DIVISION.	Name of officer.	From—	To—
1	2	3	4
Orissa ...	Mr. H. G. Cooke ...	1st April 1893 ...	31st March 1894.

(b) *District officers.*

DISTRICT.	Name of officer.	From—	To—
1	2	3	4
Cuttack ...	Mr. G. Stevenson ...	1st April 1893...	29th July 1893. 31st March 1894.
Balasore ...	" E. H. Walsh ...	30th July " ...	30th October 1893.
	" R. Cornish ...	1st April " ...	8th July "
	" S. L. Maddox ...	9th October " ...	14th March 1894.
	" L. P. Shirres ...	9th July " ...	8th October 1893.
	" C. H. Bompas ...	15th March 1894...	26th March 1894.
Puri ...	" E. H. Walsh ...	27th " " ...	31st " "
	" A. C. Sen ...	1st April 1893...	22nd July 1893.
	" H. R. H. Coxe ...	4th November " ...	30th November "
		23rd July " ...	3rd " "
		1st December " ...	31st March 1894.

(c) *Subdivisional Officers.*

SUBDIVISION.	Name of officer.		From—	To—
1	2		3	4
CUTTACK.	Jajpur ...	Babu Monmohan Chakravarti ...	1st April 1893 ...	31st March 1894.
	Kendrapara ...	„ Nabin Chandra Das ...	Ditto ...	Ditto.
BALASORE.	Bhadrak ...	„ Nagendro Nath Ghose ...	Ditto ...	Ditto.
PURI.	Khurda ...	Mr. S. K. Agasti ...	Ditto ...	17th April 1893.
		„ H. McPherson ...	18th April 1893 ...	31st March 1894.

The year's administration was characterized by unusual changes in the personnel of the District Officers, especially in Balasore and Puri. The subdivisions of Jajpur, Kendrapara, and Bhadrak fared better, there being continuity in the incumbency of the officers in charge of them.

## II.—TOURS AND INSPECTION OF OFFICES.

4. The details of the tours made by the officers of this Division are shown in the following tables:—

(a) *Commissioner of the Orissa Division (and Superintendent of Tributary Mahals).*

NAME.	NUMBER OF DAYS ON TOUR.												Total.
	April 1893.	May.	June.	July.	August.	September.	October.	November.	December.	January 1894.	February.	March.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
Mr. H. G. Cooke ...	...	20	11	10	11	...	5	17	21	30	3	6	134

(b) *Collectors.*

NAME.	NUMBER OF DAYS ON TOUR DURING EACH MONTH.												Total.

	Mr. McPherson ...	...	2	14	6	6	3	6	10	19	15	25	14	120

5. My tour as Commissioner and Superintendent of Tributary Mahals extended over 134 days, of which 78 days were spent in the Tributary Mahals, an account of which will be given in the Annual Administration Report of those mahals, and 56 days in the regulation districts. Of this, 27 days were devoted to inspection in the Puri district, 18 days in the Balasore district, and 11 days in the subdivisions of the Cuttack district.

6. I started for Puri on the 12th May 1893, and *en route* at Pipli discussed settlement work with the Assistant Settlement Officer, Mr. Nathan. I reached Puri on the 15th. On the 16th I inspected the jail, the pilgrim hospital and dispensary, and began office inspection in all its branches, which I concluded on the 30th May 1894.

7. My tour of the Balasore district commenced on the 22nd July 1893. I got to Balasore on the 24th, and on the 25th visited the jail, pilgrim hospital, and the Raja Shyamanand Dé dispensary. I also availed myself of an interview with Raja Boikunth Nath De Bahadur, Chairman of the Municipality, to discuss with him municipal and other matters. Excluding three days, from 28th to 30th July 1893, during which I paid a visit to the Tributary State of Nilgiri, I occupied myself up to the 5th August in inspecting the distillery, the Collector's and Magistrate's offices in all their branches, the municipal office, the zilla school and the District Board's and sub-registry offices. On my way back to head-quarters I visited the Bhadrak subdivisional office, which I inspected from the 7th to the 8th August 1893.

8. The Kendrapara subdivisional office was inspected in October 1893 in all departments, including the sub-treasury and sub-registrar's offices, Municipal, Local Board's, fauzdari, and excise offices.

9. The inspection of the Khurda subdivision was undertaken in November 1893. I reached the subdivisional head-quarters on the 7th, on which date the offices being closed, I accompanied the Subdivisional Officer to a neighbouring village (Minchin Patna), where I saw the state of the crops and irrigation works there. On my way back to Khurda, I was shown the practical working of the proposed alterations in the milan khasra rules. At Khurda I inspected the sub-jail, charitable dispensary, and sub-treasury. The District Officer having concluded a very protracted inspection less than two months before, and the Subdivisional Officer's own inspection having been concluded less than a week before on 4th November 1893, it was not thought expedient to make a detailed inspection. I therefore confined myself to dealing with points that struck me as requiring attention when I inspected in March 1893, and to

questions which had arisen in the course of the Collector's and the Sub-divisional Officer's inspections, and on such matters of peculiar interest as *milan khasra*.

10. The year's inspection work closed with a visit to Jajpur sub-divisional office. On the 9th and 10th of March 1893, all the different departments, including the Municipal and Local Board offices in this sub-division, were dealt with.

11. All the District and Sub-divisional Officers were in camp for periods in excess of the prescribed amount of touring, and their tours appear to have been pretty well distributed throughout the year. The tours of Mr. McPherson, the Sub-divisional Officer, are most interesting and important, as will appear from the extract given below.

12. The following extracts from the district reports show how the camping time was spent in each district. The Collector of Cuttack writes:—

"In June I proceeded to Kendrapara and in July to Jajpur for the half-yearly inspections of the sub-divisional offices and the sub-treasuries, the sub-registry, Local Board and Municipal offices, and all other public institutions situated at the sub-divisional head-quarters.

"In November I toured through Kanika, visiting also that portion of the estate which lies on the north bank of the Baitarni river in the Balasore district, and inspected the Manager's office and the settlement office, discussing with the Manager sundry matters connected with the settlement of the estate. A combination had been formed by some of the tenants, incited by certain mustajirs, to resist the new settlement, and I interviewed large bodies of them at Ganja and elsewhere. It was clearly explained to them that they were being leniently treated, and that if there were any trouble the mustajirs themselves would be the first to suffer. Eventually the combination was broken up and the new rates introduced without trouble. The schools and the newly-opened dispensaries at Ghanteswar and Rajnagar were also inspected, and the state of the Kanika embankments and flood damages ascertained.

"In this tour I also visited Aul, inspecting, as usual, the thana, pound, kanungos' offices, &c. I discussed with the Raja some boundary questions pending as between killas Aul and Kanika, and got him to agree to an amicable settlement in place of a law suit. The Government Pleader, as a mutual friend of both Raj families, has been good enough to agree to assist, and I have asked him to conclude the matter, if possible, before the present Manager leaves Ganja.

"In December I visited the tracts along the High Level Canal and Jaganath road. I inspected the outposts at Tangy and Barachana (finding that at Khandittar just closed, it having been abolished, as were Barachana and Tangy soon after), thana Dharmasala, and Dharmasala District Board dispensary; also all the *chatties* on the Trunk Road up to Akhuapada, the office of the Manager of Madhupur ward's estate, Madhupur Garh, the seat of the wards, and various places in the estate where local enquiry was desirable. I ultimately reached Jajpur, where all the Government offices situated at sub-divisional head-quarters were inspected.

"In January I visited Dompara and Banki Government estate, inspecting the tahsil office, the sub-treasury, the thana and all other public institutions in that estate, as also outstills, &c., and made enquiries as to excise matters. I next proceeded to killa Kujang side, and toured through parts of that ward's estate. The Port and Customs offices at Hukitolah, the outpost at Mahakalpara, the Kujang sub-manager's office, and some of its "Ara" cutcheries were inspected, and various enquiries made in the estate as to estate matters, Government lands taken up along the creeks, &c. On my way back to Cuttack I inspected the Tirtol and Jagatsinghpur thanas, the Jagatsinghpur sub-registry office, the Gobindpur and Kissennagar outposts, the Biribati and other kanungos' offices, and the Chati serai and District Board dispensary at Nuabazar.

"In February I visited (walking) the country along the Patamundai Canal, inspecting village roads, outposts, kanungos' offices, state of crops, and ultimately reaching Kendrapara by the Indipur to Kendrapara road. All the public offices and the sub-treasury at the station were thoroughly inspected.

"In September Mr. Walsh visited Kendrapara to hold an enquiry regarding the exclusion of certain areas from that municipality, and in October he went to Banki for half-yearly inspection, and thereafter to Ganja, where he inspected the Kanika Manager's office.

"All the important parts of the district were thus visited during the year, offices at head-quarters and at subdivisions and wards' estate offices being fully inspected twice. All the thanas, with the exception of two, a large number of outposts, kanungos' offices, pounds, schools, excise shops, the District and Local Board roads were inspected, as also the *chatties* along the Jaganath Trunk Road, and enquiry was also made into the state of crops, public health, material condition of the people, relation between landlords and tenants, &c., &c."

13. As regards the tours of the Subdivisional Officers of Jajpur and Kendrapara, the Collector writes as follows:—

"They visited almost all places of importance, some once, some twice or thrice, and inspected the offices of all kanungos, the police-stations and outposts, most of the excise shops and pounds, schools, village and District Board roads, and made enquiries into the state of crops, public health, and material condition of the people in their respective subdivisions."

14. Of the officers who held charge of the Balasore district, Messrs. Shirres and Bompas, who received charge at the close of the year, did not go on tour. Regarding the tour of the other two officers and the Subdivisional Officer of Bhadrak, the Officiating Collector, Mr. Maddox, writes as follows:—

"During the year Mr. Cornish inspected police-stations at Soro, Chandbali, Basta, Basudebpur, Bhadrak, and Dhamnagar, and outposts at Remna, Singla, Acquapada, Barikpur, and Rasalpur, and pounds at Soro, Basta, Haldipada, Chandbali, Basudebpur, Remna, Bhadrak, and Dhamnagar, and dispensaries at Soro, Chandbali and Bhadrak. He also visited and inspected Port and Customs offices, khas mahal office, Honorary Magistrate's office at Chandbali. He also inspected subsidiary jail, khas mahal office, girls' school, subdivisional office and sub-treasury at Bhadrak. He also inspected pathsalas, roads, *chatties*, excise shops, ganja shops, and opium shops at different places, and flagstaff, &c., and enquired into the state of crops. He also inspected Moharbhaj office and manager's office, jail, and thana of Nilgiri.

"I in my tour inspected subsidiary jail, dispensary, sub-treasury, Local Board, subdivisional office, khas mahal office and registration office, high class English school, and girls' school at Bhadrak. I also inspected outposts at Mahapada, Kamarda, Bhograi, and manager's office at wards' estates Jankunda and Shahabander, and police-station at Soro, and enquired into the state of crops, &c.

"The Subdivisional Officer in his tour visited every part of the subdivision, inspected ferries, pounds, pathsalas, kanungos' offices, excise shops, khas mahals, and road works. He visited lodging-houses at Chandbali and Jaganath road. The accounts of sarbarakars of khas mahal were examined locally. He made enquiries about the prospects of crops."

15. The Collector of Puri, Mr. Cox, gives the following account of the camping done during the year in that district. He says:—"Mr. Walsh visited Khurda in April 1893 to inspect and discuss milan khasra work. In May he visited Jajpur on the Jaganath road, with the view of building a temporary cholera hospital.

"Mr. Sen went along the Jaganath road in August and visited Khurda. In September Mr. Walsh on his return visited Bhubaneswar, Khurda, and Jenkia.

"My own tours have been largely connected with my work in the Tributary States. In December I tried a Ranpur case. In January I visited Khandpara. In February I made a fortnight's tour through Ranpur and Nayagarh. At the end of March and beginning of April I tried a Ranpur case that lasted three or four days, and in May I had to try two Nayagarh cases.

"As it is difficult to get to the Tributary States and back to Puri under a week, if any work has to be done, it may be imagined that these five visits were a serious impediment to my becoming acquainted with the Puri district itself. Besides the Tributary States and Khurda, I have visited Satpara, Bhubaneswar, and the Jaganath road, but the north-east and south-west corners of the district are unknown to me."

16. The following is taken from the report of the Khurda Sub-divisional Officer:—

“For the purposes of the milan khasra work, the subdivision having been divided into three circles, assigned to different officers, including the Sub-divisional Officer himself, his tours were necessarily confined to a much more circumscribed area than usual, and the major portion of these tours was devoted to operations directly or indirectly connected with this work.

“Owing to lack of survey instruments, which were not received till January 1894 and not distributed till end of February 1894 and the rains, it was impossible to undertake milan khasra operations during the months from May to August 1893 in more than a few mauzas immediately surrounding the headquarters. In September and October, experiments with a view to revising and improving the milan khasra rules were undertaken in a few mauzas at no great distance from Khurda. As a result of this, the Subdivisional Officer found reason to confirm him in his belief that to pave the way for milan khasra operations it was necessary to make extensive and thorough enquiries into the unauthorized cultivation of waste lands, and to compel the raiyats as a body to apply for registration of all unauthorized changes.

“During November and December 1893 and from January to March 1894 applications for waste lands of 303 villages of zillas Khurda and Dandimal were disposed of by personal enquiries at the spot or from some places very near to the sites. In this way no less than 7,644 applications were disposed of. Simultaneously with this waste land work, the work of mutation of names in respect of raiyati holdings was also vigorously prosecuted.

“From October 1893 to March 1894 inclusive, the total number of petitions received was 28,332 against 4,121 from April to September 1893 inclusive, and the total number for the whole year 1893-94 was 32,453 against 4,737 for the year 1892-93.

“During a short time in the latter end of March 1894, the Subdivisional Officer inspected the progress made in the milan khasra work by a large number of sarbarahkars in the direction of Bolegarh, and found it almost without exception satisfactory. In his opinion the work now being done can be equally well utilized, whether the old milan khasra rules are maintained, or whether the new plan, which has been suggested by Mr. Finucane during his late visit to Khurda, be adopted by Government.

“The very seasonable and plentiful rainfall of 1893-94 obviated the necessity of any considerable portion of the touring season being devoted to relief work or enquiries into failure of crops. The only enquiries made had reference to the standing case of loss of crops, chiefly lying in Balavadrapur and the Mogulbandi zillas, on account of floods in the Daya river, the left bank of which it has been decided to abandon. A number of affected villages in zillas Khurda and Dandimal were visited by the Subdivisional Officer, the enquiries in the other zillas being made by other circle officers. The loss of crops for the present year, though considerable, was less than the average, and there was no reported loss of life or of cattle.”

Besides the above, the Subdivisional Officer's tours were utilized in frequently visiting an experiment in potato cultivation which was being made on a portion of flooded area near the point where the Khurda-Puri road crosses the Daya river, and in visiting and inspecting the offices of some of the kanungos, the Khurda and Banpur stations, most of the outposts, and the two estate dispensaries. A number of estates' improvements, agricultural, and sanitary works were also inspected. Enquiries were made as to the progress of vaccination, the sarbarahkars as a body being urged to help to the best of their ability, and the Barunai, Gurujung, Atri, and Khandagiri fairs were visited, and arrangements for the preservation of sanitary conditions were made in the case of larger fairs.

Amongst matters of a miscellaneous nature which engaged the Subdivisional Officer's attention during his tours, were enquiries into local irrigation disputes, investigation of complaints against sarbarahkars, enquiries about *toila* cultivation, visits to the four forest blocks of Dandimal deforested in 1892, a visit to the temple of Bhubaneswar to report on a petition calling on Government to maintain the temple in repair, and a visit to the disputed land in Bargarh mauza claimed by the Bhubaneswar temple.

17. The following table shows the dates when the different district and subdivisional offices and treasuries were inspected by different officers:—

(d) INSPECTIONS MADE BY—	DISTRICT OFFICES.		
	Cuttack.	Balasore.	Puri.
1	2	3	4
(1) Commissioner ...	September 1893	July and August 1893.	May 1893.
(2) Collector ...	March 1894	September 1893 March 1894	August and September 1893. March 1894.

(e) INSPECTIONS MADE BY—	DISTRICT TREASURIES.		
	Cuttack.	Balasore.	Puri.
1	2	3	4
(1) Commissioner ...	.....	.....	.....
(2) Collector ...	April 1893 September " March 1894	September 1893 March 1894	September 1893.

(f) INSPECTIONS MADE BY—	SUBDIVISIONAL OFFICES AND SUB-TREASURIES.			
	Jajpur.	Kendrapara.	Bhadrak.	Khurda.
1	2	3	4	5
(1) Commissioner ...	March 1894	October 1893	August 1893	November 1893.
(2) Collector ...	July 1893 December "	June " February 1894	" " December " February 1894	September "

18. In addition to the above, the Banki office and sub-treasury were also inspected twice by the Collector of Cuttack; once in October 1893 and once in January 1894. The Subdivisional Officers also made half-yearly inspections of their respective offices and sub-treasuries.

### III.—WEATHER AND CROPS.

19. The necessary statistics under this head are given in appendices I and II as usual. Appendix I shows that during the year under report the rainfall was far more than in the two preceding years and in excess of the average rainfall of each of the districts, which is shown in the Census Report to be as follows:—

Cuttack	... 59.51
Balasore	... 66.38
Puri	... 52.01

the rainfall during the year under report being 72·18, 73·58, and 68·60, respectively, as per appendix I. The rainfall was not only excessive, but was very badly distributed and proved unfavourable to several crops, as will appear from the following. The Collector of Cuttack says:—

“The weather was very abnormal throughout the year, the first half (April to September) being unusually rainy—more like East Bengal or Assam—and the last half, November to March, practically rainless. This abnormal weather prejudicially affected the crops in general.”

He says further that on account of heavy and excessive rainfall, floods, and a cyclone in the ploughing and sowing season; a part of the area both of *beali* and *sarad* never dried sufficiently to admit of cultivation. There were, again, high floods in the following September, followed by cessation of rains. The outturn of the above two crops was therefore not more than 9 annas on an average. The *rabi* was similarly affected by excessive rain at the time of sowing, and cessation of rain afterwards. Excessive rainfall and floods are reported to have similarly affected the paddy crop in Balasore, where the outturn is, however, reported to be 15 annas in the Sadar and 12 annas in the Bhadrak subdivision.

In the district of Puri the excessive rain and floods in the early part of the rainy season are reported to have seriously affected the *beali*, *sarad* and sugarcane crops in the Sadar subdivision, where the outturn of the winter rice crops is estimated at 12 annas, taking 16 annas to represent the average crop. The subdivision of Khurda was not, however, so much affected, the undulating character of the soil facilitating the draining off of superfluous water. The outturn there was full 16 annas. The deficiency in the district was made up by the *dalia* crop, which does not depend on rain water, being grown on swampy places. The divisional result was thus not worse than in the preceding year or the year before, taking all the crops into consideration, as will appear from Appendix II.

#### IV.—PUBLIC HEALTH.

20. The table below shows the details of mortality from various causes which occurred in the several districts of this Division during 1893 as compared with that of 1892:—

DISTRICT.	NUMBER OF DEATHS FROM—														Ratio of death per mille of population.	
	Cholera.		Small-pox.		Fever.		Bowel- complaints.		Injuries.		Other causes.		Total.			
	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.	In 1892.	In 1893.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Cuttack ... ..	21,289	2,484	4,200	2,135	29,759	22,641	4,674	3,328	1,226	1,291	14,000	14,746	74,208	47,014	39'34	24'29
Balasore ... ..	14,925	1,825	Not given.	14,140	11,290	Not given.	Not given.	Not given.	Not given.	Not given.	14,307	12,610	43,373	25,725	43'61	25'91
Puri ... ..	9,597	1,703	2,261	2,415	5,400	7,289	3,152	2,671	464	585	13,273	12,701	33,040	27,428	37'80	20'02
Total ... ..	45,212	6,472	6,551	4,550	48,389	41,224	7,826	5,999	1,690	1,866	40,643	40,056	151,311	100,167	30'0	25'8

21. The public health during the year, as is evident from the foregoing statistics, was better than that of the preceding year, but worse than the two previous ones, the mortality as compared with that of 1892 being only 25·8 per mille of the population, as against 39 in 1892, 25·0 in 1891, and 22·5 in 1890. There was a decrease in deaths under almost all heads of complaints, that under cholera being the most striking. This disease is reported not to have broken out in an epidemic form in any of the districts, although unusually large numbers of pilgrims passed through the Division on the occasion of the special Naba Kalibar festival in connection with the Rath Jatra. This happy result is attributed to a plentiful supply of water as a consequence of the unusually heavy rains of the year, which also contributed towards keeping the season cool. Towards the close of the year it is reported from Balasore that a short outbreak of cholera occurred in the Bhadrak subdivision, which was almost confined to villages on the banks of the rivers Salandi, Baitarni and Matai. The Collector notices this as a curious fact, it being supposed that some impurity must have been washed down with the water from the Gurjats. The Collector of Puri mentions with

satisfaction the fact that though there was a great increase in the number of pilgrims that visited Puri, cholera in an epidemic form was totally absent. He writes: "The sanitation of the town and the roads leading thereto, where most of the cholera is found, is looked after as far as limited means will allow, but I fear the arrangements, as elsewhere in rural India, are too elementary to have much effect on the death-rate. A shower of rain has probably as much effect in preventing disease as a dozen latrines."

The Subdivisional Officer of Khurda states: "The abundant rainfall confined the ravages of cholera to a few sporadic cases. Khurda subdivision is not traversed by the most important of the pilgrim routes, but in addition to the pilgrims from Central India by the Sambalpur road, it is liable to visit by worshippers of Siva at Bhubaneswar and neighbouring shrines. Fortunately these visits did not bring in their train their usual accompaniments, death and disease."

22. The decrease in the death-rate from cholera in a year of an exceptionally large gathering of pilgrims, and the facts above stated, go to support the theory of Mr. Cornish, noticed in the last year's report, paragraph 11, that cholera is not connected with the influx of pilgrims.

Vaccination.

23. The following table gives the statistics of vaccination:—

DISTRICT.	Number of vaccinators.	Number of persons vaccinated.	Successful.	Unsuccessful and unknown.	Cost of establishment.	Average cost per head.	Average cost per head of successful cases.	NUMBER OF CASES INSPECTED.	
								Found successful.	Found otherwise.
1	2	3	4	5	6	7	8	9	10
Cuttack ... ..	87	17,487	16,088	1,399	Rs. A. P. 2,159 13 3	Rs. A. P. 0 1 4	Rs. A. P. 0 1 6	16,088	1,399
Balasore ... ..	42	28,852	23,393	460	1,543 0 0	0 1 0	0 0 11	26,754*	560*
Puri ... ..	35	18,123	17,394	729	1,654 7 8	0 1 5	0 1 6	16,401	427
Total ... ..	164	59,462	56,874	2,588	5,377 3 11	0 1 5	0 1 6	59,243	2,382
Total for 1892-93 ...	98	43,890	42,308	1,582	2,967 1 11	0 0 10	0 0 9	37,554	1,372

\* The difference between these and the total number vaccinated is due to the fact that those cases which have been inspected by different inspecting officers have been taken as so many different cases inspected.

24. Of the number of licensed vaccinators in Cuttack, seven were apprentices. The Civil Surgeon of Cuttack, who is the Superintendent of Vaccination, inspected only 100 cases, and the rest were inspected by his staff, consisting of one Inspector and three Sub-Inspectors. He offers the following remarks on the vaccination of the district:—"The working of vaccination is very backward. Besides seeing about a hundred vaccinated cases, I have on my visits to dispensaries inspected several roadside villages and found a large number of children unprotected. I am myself very much occupied by the charge of a medical school and a large and increasing number of cases in a large hospital, and am hardly able to devote any time to vaccination. The vaccination is very backward, and requires a special Deputy Superintendent to organise and develop it. An effort was made to introduce and extend calf-vaccination in the district, as it is in full vigour in town. I vaccinated and sent to various parts of the district several calves. The result has not been satisfactory, as the people object and the vesicles dry up before their consent is obtained."

25. The decrease in the number of vaccinators in the Balasore district is said to be due to the system of a security deposit of Rs. 10 having been required from each vaccinator, in consequence of which those who failed to deposit their security withdrew their names from the establishment. It is not known if this system is in force in the other districts of the Division, and if it is, the effect seems to have been otherwise in them. The increase in the number of persons vaccinated in Puri is attributed by the District Officer to the better organization of the Civil Medical Officer, the greater industry of the vaccinators, and the increased popularity of the operations.

26. The following extract is reproduced from the report of the Puri Collector, showing vaccination work in that district:—

"The most noteworthy feature in the year's history of vaccination is the introduction of free vaccination. Hitherto the vaccinators have, I believe, been employed for the larger proportion of their time in collecting their fees, and vaccination has proportionately suffered; but in the year under report the Board

sanctioned an expenditure of Rs. 850 on vaccination, and operations were thereafter performed free of cost. The figures show an increase of operations, but the inspecting staff has been and is so incompetent that I do not think the comparison of figures leads to any trustworthy result. I believe the figures have been far more rigidly tested this year than in previous years, as the change in the position of the vaccinators has necessitated it; but it is a difficult thing to ascertain whether a vaccinator who claims 150 successful operations in a month has really done the work alleged or not. I regret the experiment that has been made, though I admit its success. It seems to me unreasonable that people should expect to be vaccinated gratuitously, and that Rs. 1,000 should be provided annually out of the public money to meet the expectation. Sooner or later it will be necessary to revert to the old system, and then the old opposition will be found to have been multiplied a hundredfold. It has been decided, for reasons which my predecessors and myself have been unable to appreciate, to refrain from making vaccination compulsory. The discontinuance of the experiment of free vaccination probably this very year will, speaking very generally, place before us the alternative of compulsory vaccination or none. As there seems no hope of the adoption of the former alternative, the experiment, however successful, is regrettable. The success, so far as the performance of successful operations go, is undeniable. Little reliance can be placed on the total figures either of this or of past years, but the personal observation of the Civil Medical Officer has shown beyond doubt that a great deal of good work has been done, probably far more than in previous years."

The good work I believe to be as much due to the zeal and interest that Dr. Banks shows in the work, as to the fact that vaccination is free. I lean to Mr. Coxe's view that vaccination should be made obligatory in Puri.

27. Two cases were instituted in Cuttack under Act V (B.C.) of 1880, and two persons sent up for trial were both convicted, against three cases in 1892-93, in which two persons were convicted and one acquitted. There were four cases of practising inoculation under Act IV (B.C.) of 1865, and five persons were sent up. They were all acquitted. In the preceding year 40 persons were sent up in 26 cases, and of these 21 were convicted and 19 acquitted.

28. There was no case, either under Act V (B.C.) of 1880 or Act IV (B.C.) of 1865, during the year in the Balasore district. In the previous year there were two cases only, under Act IV (B.C.) of 1865, of which one was declared false and the other resulted in the conviction of one person. The Magistrate of Puri is silent on this point. His attention will be called to it.

#### V.—MATERIAL CONDITION OF THE PEOPLE.

29. The effect of the unusually heavy rainfall of the year and the consequent floods has already been noticed, the outturn of the staple rice crop being estimated at 9, 13 and 14 annas in the three districts of Cuttack, Balasore and Puri respectively. The condition of the people is reported to have varied in proportion to the outturn; in Cuttack it is reported to have been not satisfactory, in Balasore not bad, and in Puri satisfactory. I cannot think, however, that the condition of the tenantry, except in special cases where crops have entirely failed, is bad anywhere. The landless class, here as elsewhere, are poor, and their poverty has been aggravated by high prices. The following extracts from the district reports describe the condition of the districts severally:—

30. Mr. Stevenson of Cuttack writes: "For the last three years there has not been anything like a bumper crop, and during the year 1893-94 the outturn in many parts of the district was very poor in consequence of the unusual rainfall in spring, especially at the time of the cyclone of May 1893, which was attended with a heavy rainfall. This, besides interfering with cultivation, resulted in a large stock of paddy stored in pits being swamped and destroyed.

"There was also a large export of rice, though owing to bad harvest this was comparatively less than in 1892-93. All these circumstances combined caused the price of rice and of all other food-grains to rule very high—a fact which told very severely upon the agricultural as well as upon the non-agricultural classes of the population, the former having sold off their stocks to satisfy the demands of their mahajans, from whom they had received advances of grain and cash, and the latter more specially, as they, being non-producers of cereals,

had to depend entirely upon the markets, and their incomes did not increase in proportion to the rise in prices."

31. The Collector of Balasore states:—"The excessive rainfall, and the floods in consequence of it, caused the crops to suffer in some parts of pargana Bhgrai in north of the district, and in parganas Kauna, Bhra and Byang in south of the district. The labouring classes of the affected parts are feeling some difficulty, but are not in distress nor in need of any assistance. The relief works in pargana Kamarada, which were opened on account of the loss of crops in the previous year, were closed in November 1893 at the harvest of winter rice crop. The high price of food-grains prevailed in the district during the year under report, but the raiyats could not reap the benefits from it, as the landlord and the mahajan between them took practically all the crops of the year in satisfaction of their demands. It will take more than one good year to improve the condition of the people. In parts of the district, especially towards Chandbali, there is a tendency to over-export during the cold season, with the result that prices rise abnormally in the early month of the rainy season till the new crop is assured. On the whole the condition of the people is not bad in the district."

32. The Subdivisional Officer of Khurda has given much thought to the matter as regards the condition of the people of his subdivision, and his interesting remarks are reproduced below :—

"The population of Khurda is almost entirely agricultural, that is, nearly every person has some more or less direct connection with the tillage of the soil. Nevertheless, for purposes of enquiry into the material condition of the people, it is, I think, possible to divide roughly the population into four classes—

- |                                   |                                       |
|-----------------------------------|---------------------------------------|
| (1) The trading or mahajan class. | (3) The artisan class.                |
| (2) Agriculturists proper.        | (4) The class of unskilled labourers. |

"The present year has been, I believe, for the first two classes a year of more than average prosperity. It has been a year of excellent harvest, so far as the staple crop is concerned, following on an equally favourable year. Prices have remained at the high level at which they have stood for the last two or three years, and there has been no increased demand in the shape of enhanced rent. The person who owns land and subsists by its cultivation has thus every reason to be satisfied with its present position. The prosperity which has attended the agricultural class during the last two years has been, as a matter of course, reflected on the trading and mahajan classes.

"It remains to consider how the rise in prices has affected the artisan and unskilled labourer. Whatever may be their condition, it is safe to say that, so far as the present year is concerned, they are neither better nor worse off than in the preceding year. There has been no appreciable change in prices either of food or of labour during the last three years; and as there was no falling off in the sources of employment during the year under report, it may be safely presumed that no exceptional hardship has marked their condition during the year under report.

"I am, however, of opinion that no sufficient attention has been paid in the past to the question how far the condition of the third and fourth classes is gradually altering for the better or worse as a general fact. The change from year to year may not be appreciable, and yet a comparison of relatively distant dates may afford very well marked indications of the process of change.

"The enquiries I have made in this matter have not been sufficiently extensive to enable me to state any well-established theory, but they suggest two important considerations which are worthy of further investigation:—

"(1) That while the skilled labourer, *e.g.* the mason, carpenter, blacksmith, &c., has been able to advance the price of his labour with the price of food, the unskilled labourer's wages have been almost stationary for the last 20 years during which there has been a rise in the price of food of not less than 50 per cent.; and

"(2) That there is a rapid increase in the numbers of the landless classes.

"With regard to the first consideration, I have made verbal enquiries of some of the older residents, sarbarahkars and contractors, and verified their statements by reference to the accbunts of one of the chief Khurda contractors. The figures thus got have been compared with the price of the staple crop (rice) for the last 25 years as shown by the Khurda kanungo. All whom I have asked are agreed that the present condition of the cooly is one of great hardship, and that the ordinary necessities of life are with difficulty procurable by him.

"The second of the two considerations affects the first, because the artisan and the unskilled labourers in Khurda, though not at any period supported by the tillage of their own lands, have most of them possessed a few plots whereby they have eked out their earnings. The information available from estate mutation records seems to show that a process is going on whereby these small holdings are being gradually transferred to the hands of mahajans or wealthy raiyats.

"During the last twelve years there have been about 48,000 cases of mutation by sale. In a thousand cases disposed of in the present year, I found that no less than 426 of the vendors were persons whose original holdings were less than one acre, and 283 vendors sold all the land they had. An extension of the percentage found in the selected cases to the whole number of mutations would seem to indicate a transfer of about 13,000 persons from the land-holding to the landless classes during a period of 12 years.

"These notes are given for what they are worth. I am conscious that there is no less reliable source of information than badly prepared statistics, and my only object has been to suggest the direction in which enquiry may be pursued in future. The coming Khurda settlement of 1897, if proper statistical enquiries are made, ought to throw a flood of light on the question how far it is politic to entrust to raiyats a free power of land mortgage and transfer such as was accorded to them in the current settlement.

"Considerable attention, I find, has been paid in the past two years to the concession of *toila* cultivation to aborigines and Uriyas as a means of improving their condition.

"During the year 1893-94, 1,140 acres were granted to 1,175 applicants. Of this amount 459 acres were granted to Uriyas and 681 to 11 aborigines. Applications were refused in 372 cases. While these were the facts as shown on paper, I have no doubt whatever that a much larger amount of land was actually cultivated in *toila*. No check was made of the excess cultivation, as it was not deemed advisable to effect a sudden reversal of the policy pursued by my predecessor. By limiting the amount of grant to three máns per head, and refusing applications in cases where the culturable waste of a village was reported to be only a few acres, I attempted to discourage the practice. I do not think that in a good year, when harvest is abundant and there is no deficiency in the sources of labour employment, we should allow the best part of the grazing lands, fuel, and timber stock to be destroyed by persons who are either thriftless and indolent cultivators, or mere nominees of sarbarahkars and wealthy raiyats. It may be a good thing to allow the cultivation of forest lands, even though to the prejudice of the general community, in years when there is scarcity causing distress amongst the poorer classes, but it is not a policy to be pursued indiscriminately year by year. The amount of *toila* granted last year was 2,520 acres and 1,654 acres to aborigines and Uriyas respectively."

#### VI.—EMIGRATION AND IMMIGRATION.

33. No emigrants or immigrants were registered during the year, either under Act I of 1882 or XXI of 1883; but the marginally-noted free emigrants passed through the cooly depôts in Cuttack and Balasore. Their number compared with the previous year shows an increase.

34. The number of depôts for the accommodation of free emigrants during the year remained the same as in the previous year in Cuttack, viz. three, and increased by one in Balasore, making the number four. These depôts were

	Adults.	Children.
Cuttack	487	124
Balasore	152	7

regularly inspected by the Magistrates and police officers, their sanitary condition was found good, and no abuses of any sort coming to light.

35. Besides the usual movement of labourers between Calcutta and Chandbali, the Subdivisional Officer of Khurda reports that a number of people belonging to Ganjam and other Madras districts came to Khurda to work on the East Coast Railway, some up-countrymen engaged in the same work having also temporarily settled there.

#### VII.—PRICES OF FOOD AND LABOUR.

36. Appendices III and IV exhibit the prices of food-grains and wages of labour which prevailed during the year.

37. Owing to comparatively good harvests in Balasore and Puri and to the decrease of exports to the northern part of Balasore, where there was insufficient crop, the prices of the staple food-grain were much easier there than in the two preceding years, being 17 seers 1 chitak in each, as against 16 seers 8 chitaks and 14 seers 15 chitaks in 1892-93, and 13 seers 7 chitaks and 15 seers 4 chitaks in 1891-92 respectively. It was in Cuttack alone that the prices ruled high, the price of common rice having risen from 16 seers 9 chitaks in 1891-92 and 16 seers 3 chitaks in 1892-93 to 14 seers 14 chitaks in the year of report. The causes which contributed to bring about this result are thus set forth by the Collector of Cuttack. He writes: "The outturn of the crop of 1892-93 was below the average, and there were large exports by Bombay merchants; what remained had been stored in pits—as usual in the hot weather, the season of fires—when the unusually heavy rain of May 1893 destroyed a large portion of the stock. This, combined with the low outturn of the year, caused the prices of food-grains to rule higher than usual."

38. The wages of labour remained almost stationary in Cuttack and Puri; Balasore shows some increase, which is attributed partly to a better class of artisans being available, and partly to increased demand for labour.

#### VIII.—MINES AND MANUFACTURES.

39. There is nothing to add to what I said last year under this head. With regard to the manufacture of salt, the only important industry in the Province, no salt was manufactured in Balasore: the district of Puri is capable of producing salt in two places—(1) the mouth of the Devi, and (2) the Chilka during the year under report. The two factories, Gurbai and Tua, on the Chilka, were worked.

The following is a statement of the quantity of salt manufactured and sold, and the number of malangis employed:—

Year.	Quantity manufac- tured.	Quantity sold.	Number of pans worked.	Number of malangis employed.
1	2	3	4	5
	Mds.	Mds.		
1892-93 ...	52,963	50,250	145	519
1893-94 ...	15,422	15,103	565	1,695

40. The Madras system was in force during the year. Though larger numbers of malangis were employed and more pans worked, the outturn was far less than in the preceding year, and this is ascribed to the unfavourableness of the season. From the factories at the Devi, 8,860 maunds of the old salt was sold in addition to the above.

## IX.—TRADE AND COMMERCE.

41. There has been a decrease of Rs. 30,07,226 or 20·7 per cent. in the aggregate value of the sea-borne trade as compared with the figures of the preceding year. The following table exhibits in detail the value of the imports and exports port by port for the past five years:—

PORT.	Year.	Value of imports.	Value of exports.	Total value of trade.
1	2	3	4	5
		Rs.	Rs.	Rs.
Cuttack	1889-90	1,01,652	16,78,647	17,80,299
	1890-91	1,47,122	30,16,554	31,63,676
	1891-92	41,176	41,56,594	41,97,770
	1892-93	1,79,990	32,35,176	34,15,166
	1893-94	1,10,422	23,83,956	24,94,378
Balasore	1889-90	60,50,495	46,84,336	1,01,34,831
	1890-91	57,81,542	46,11,557	1,03,96,099
	1891-92	76,70,184	48,49,255	1,25,19,439
	1892-93	66,16,673	41,30,047	1,07,46,720
	1893-94	50,70,781	36,01,509	86,72,290

	1892-93	160	3,30,232	3,30,392
	1893-94	334	3,18,050	3,18,384

42. The Collector of Cuttack attributes the decrease in the export trade partly to the poor rice harvest during the year and partly to the Bengal-Nagpur Railway, which now carries off the rice from the Sumbulpur side, for which the Mahanadi was formerly the only outlet. The fall in import is explained to be due partly to the trade between Calcutta and Cuttack being carried on *via* Chandbali in Balasore, and partly to the reduction of the price of kerosine-oil in America. The Collector of Balasore attributes the decrease in export to the decline of the Malabar coast trade, and that in import to the increase of imports through the Coast Canal. The decrease in export in Puri is explained to be due to the non-exportation of rice to the Indian ports during the year. Properly speaking, there is no import trade in Puri. Occasionally a few Government stores are imported by sea.

43. Inland trade is not registered, and no statistics are available for it. The Collector of Balasore, however, reports that the value of the trade by the Coast Canal amounted to Rs. 4,64,433, and that 386 tons of rice and paddy were exported from his district, against 857 tons in the previous year, by Range No. III of the High Level Canal. The chief articles of trade of the Province are rice, pulses, oilseeds, cocoanuts, cotton twist, yarn, jute, cloths, hides, horn, dried fish, tobacco, spices, betelnuts, timber, salt, lac, nux vomica, resin, kerosine and other oils, copper, lead, gold, silver, ironware, &c.

44. The passenger traffic during the past two years is shown in the following statement:—

Number of passengers arrived and departed in 1892-93	...	290,833
Ditto ditto 1893-94	...	297,843

It will be seen that there was an increase of 7,010 passengers during the year under report as compared with the figures for the previous year. The increase is attributed to a larger influx of pilgrims to Puri during the last Car festival.

X.—ADMINISTRATIVE CHANGES.

45. The following are the changes worth noticing :—

Cuttack	...	14	margin, in the three districts, under Government
Balasore	...	13	Resolution No. 1333J., dated 2nd March 1894.
Puri	...	11	

2nd—Constitution of a special police-station for the town of Cuttack.

3rd—Employment of chaukidars instead of constables in the towns of Cuttack, Jajpur, and Kendrapara.

4th—Appointment of an additional Excise Sub-Inspector in the district of Puri to guard against smuggling of excisable articles from the Tributary States.

5th—Conversion of the Khurda Bench into an Independent Bench.

6th—Reversion of the permanent kanungos from the settlement work to the regular line in the district of Cuttack.

7th—The peshkush or tribute of killa Keonjhar was ordered to be paid into the Balasore instead of the Cuttack treasury.

46. The Magistrates of Cuttack and Puri do not welcome the abolition of so many outposts. The former is afraid that it will encourage bad characters to frequent the Trunk Road, occasion delay in police investigation, and create difficulties in *post-mortem* examination in cases of unnatural death. The latter regrets that the reasonable suggestions of his predecessor have not been taken into consideration, and thinks it most injurious to abolish the outposts of Kakatpur, Brahmagiri, and Kanas.

The Collector of Cuttack says that its benefits have been neutralized by the want of good men in the higher grade, in consequence of which the town sub-inspector has still to be deputed to investigate important cases. Regarding the chaukidars also, the Collector says that their employment is likely to prove a failure in Cuttack town, "where the men enlisted, the best to be obtained, are as a rule a bad lot, and now that they find it is not to be all play and money-making, they are resigning freely." The Collector of Cuttack says that the sadar kanungo and kanungos have come back with no addition to their stock of knowledge, having been employed as ordinary muharrirs in the Settlement Department.

XI.—STATISTICAL ENQUIRIES.

47. With the exception of the usual statistics of rainfall, crops, mortality, prices-current, &c., no statistics of importance were collected during the year under report.

XII.—CIVIL JUSTICE.

48. The statistics for statements VI, VII, and IX have been supplied by the District Judge, and those for statement VIII by the Collectors, as rent suits are tried by the revenue courts in this Division. The number of civil suits disposed of and those pending show an increase in such suits. There has been a noticeable increase in title suits and a decrease in those for money before all the courts. I am not in a position to account for this. It is satisfactory to note the increase in the number of suits disposed of and the decrease in the number of witnesses detained over two days before all the courts, though there is an increase in the total number of witnesses examined. The pending file has somewhat increased in the courts of the Munsifs of Kendrapara and Jajpur.

49. As regards rent suits (statement VIII) all the districts show an increase in the total number of suits, as well as in disposals. The increase is ascribed to the settlement proceedings in Balasore, and to the institution of an unusually large number of suits by the Rani of Puri for recovery of arrears in Puri. The increase in Cuttack is said to be due partly to bad crops for the last two or three years, and partly to the settlement proceedings. The pending file for the Division has increased, though there is an increase in the number of cases disposed of. The result is satisfactory on the whole. The columns 12 to 14 are blank against the officers in Cuttack. To account for this the Collector says that attendance register of witnesses was not opened for want of forms. This is not satisfactory.

## XIII.—CRIME.

50. The number of cognizable and non-cognizable cases during the year under report is compared below with those of the preceding year:—

DISTRICT.	COGNIZABLE CASES.				NON-COGNIZABLE CASES.				TOTAL.			
	1892.	1893.	Increase.	Decrease.	1892.	1893.	Increase.	Decrease.	1892.	1893.	Increase.	Decrease.
1	2	3	4	5	6	7	8	9	10	11	12	13
Cuttack ... ..	2,832	3,100	328	...	2,556	2,998	133	...	5,688	6,148	460	...
Balasore ... ..	1,341	1,642	308	...	2,246	2,173	...	73	3,400	3,815	325	...
Puri ... ..	3,013	3,531	518	...	1,175	1,428	253	...	4,188	4,959	771	...
Total ... ..	7,089	8,333	1,244	...	6,277	6,599	312	...	13,360	14,922	1,566	...

51. The year is criminally the worst since 1889. The increase in each district is accounted for in the following manner:—In Cuttack the increase in cognizable cases is partly in offences against property and partly in offences prosecuted by the town police; and that in non-cognizable cases is partly under class IV, minor offences against the person, and partly under the Indian Salt Act. To account for this the Collector says:—"Settlement operations, as well as the suspension of agricultural operations for a long time, owing to extremely heavy rainfall, contributed greatly to this increase." In Balasore the increase in the cognizable cases is ascribed to the settlement operations, while the decrease in non-cognizable crime is too small to call for any remark. In Puri the increase under both heads is ascribed on the one hand to a large concourse of pilgrims leading to a considerable increase in offences under Act V of 1861 and under the Puri Lodging-house Act, and on the other hand to active prosecutions under the Excise and Forest Law.

52. The following table, however, shows a considerable increase in the total number of cases, both cognizable and non-cognizable, since 1889:—

DISTRICT.	1889.	1890.	1891.	1892.	1893.
1	2	3	4	5	6
Cuttack ... ..	5,004	4,675	4,997	5,688	6,148
Balasore ... ..	4,273	4,169	3,296	3,490	3,815
Puri ... ..	3,767	3,242	4,031	4,188	4,959
Total ... ..	13,044	12,086	12,324	13,366	14,922

It has to be seen whether the variations are solely due to such temporary causes as have been assigned from year to year, or to an increasing criminal tendency of the people, or to the activity of the officers in bringing the offenders to justice, or to all these causes combined. The attention of the Magistrates will be invited to this, and they will be requested to deal with the matter specially.

53. It is, however, satisfactory to note that the Division continues to be free from serious crime.

## XIV.—POLICE.

54. The following are the changes in the numerical strength of the police during the year under report. In Cuttack the long-felt want of a special sub-inspector for the town was supplied by the addition of one of the third grade to the sanctioned strength. In Balasore ten constables were replaced by the same number of town chaukidars.

55. The police was, moreover, reorganized as noted under heading "Administrative changes." The views of the District Officers of Cuttack and Puri regarding the abolition of some of the outposts have also been noted.

56. In addition to the sanctioned strength, a special police force of 4 head-constables and 100 constables was entertained for 30 days, at the cost of the

Superintendent of the Puri Temple, during the Car festival. Another force of one head-constable and 20 constables was similarly entertained during the Rath Jatra at Bhubaneswar, at the expense of the Temple Committee.

57. Statement X gives the required statistics under this head. It shows a slight improvement in the divisional result. During the year under report, out of 4,485 cases tried, 3,975 or 88·6 per cent. ended in conviction, against 3,170 out of 3,638 cases or 87·1 per cent. in the preceding year. It is difficult to say how much of this is due to the efficiency of the staff, the conduct of the police not having been favourably reported on in two of the districts. The Magistrate of Cuttack says: "Generally speaking, discipline is inclined to be lax among the constables, and the District Superintendent is doing what he can to improve it. Detective ability is at a very low ebb." The Magistrate of Balasore observes thus:—"On the whole the conduct of the police has not been good, especially among the literate head-constables. The constables have not behaved themselves as they did in the previous year. Some of the sub-inspectors have worked satisfactorily." The Collector of Puri has offered no remarks under this head. His attention has been invited to this.

58. There is an increase in the number of punishments over that of the preceding year. In Cuttack the number of officers and men departmentally and judicially punished was 96 against 71, and that in Balasore 74 against 57 in the preceding year. In Puri 45 men were punished both judicially and departmentally. No comparison can be made with the preceding year, as the figures for it have not yet been supplied.

59. No case of torture is reported; but in Cuttack one head-constable was convicted under section 161, Indian Penal Code, for taking an illegal gratification, and in Puri one constable was convicted under section 379, Indian Penal Code, and another was punished for associating with bad characters.

60. As regards the condition of the rural police, the matter is under consideration of the Government in connection with the Provincial settlement. I submitted a special report after the conference held by His Honour the Lieutenant-Governor during His Honour's visit to Cuttack in April last. I do not therefore think it desirable to reproduce the views of the Collector or myself, the unsatisfactory condition of the system, as well as that of the chaukidars, being well known. It may, however, be noted here, with regard to their conduct, that in the district of Cuttack 49 of them were punished judicially and 59 departmentally. Of the former, two are reported to have been convicted of dacoity. The reports of Balasore and Puri are silent on this point.

One case is reported from Puri of a constable having employed a chaukidar on menial duty. The former was duly punished.

#### XV.—CRIMINAL JUSTICE.

61. Required statistics under this head are given in the statements XI to XVI (both inclusive). Eight thousand four hundred and seventy-two cases were disposed of by the Stipendiary and Honorary Magistrates during the year 1893, against 7,782 in the preceding year.

62. The Stipendiary Magistrates convicted 5,379 out of 8,260 persons brought to trial. One thousand seven hundred and twenty-two persons out of 2,519 tried were convicted by the Honorary Magistrates. The percentage of conviction in the case of the former was 65·1, and that of the latter was 68·3, against 64·9 and 62·7 respectively in the previous year. There has been much improvement in the result of appeals preferred against the decisions of Honorary Magistrates, the ratio per cent. of orders confirmed to those appealed against being 76·78 as compared with 65·8 of the preceding year. In the case of Stipendiary Magistrates the ratio increased from 73·2 to 74·82. The percentages of convictions to persons tried by the several benches were as follows:—

Cuttack Sadar	...	...	41·3
Jajpur	...	...	25·3
Kendrapara	...	...	38·8
Balasore	...	...	55·5
Bhadrak	...	...	37·6
Puri	...	...	91·4
Khurda	...	...	45·8

The poorest result is noticeable in the Jajpur Bench, where the percentage has fallen from 27·1 in the previous year to what is shown above. Commenting on the working of this Bench, and with reference to my remarks contained in paragraph 33 of the last year's report, Mr. Stevenson, Magistrate of Cuttack, quoting the remarks of the Subdivisional Officer, observes as follows :—

“The members of the Jajpur Bench are all very regular in attendance; but they have still apparently a tendency to acquit unduly. I, as last year reported, requested the Subdivisional Officer, who is on the spot, to inspect the records of the cases tried by the Bench at intervals and in an informal manner (he not being in a position to call for records under section 435, Criminal Procedure Code), to note and indicate to the Bench, also in informal fashion, any apparent error. This he has been doing, and the result of one inspection he gives below: ‘I find that out of 12 cases now examined, two only ended in convictions; all the others in acquittals. In these ten cases of acquittals, two were acquitted under section 248, Criminal Procedure Code, two under section 245, Criminal Procedure Code, and six either for want of proof or as civil disputes. Evidently the Bench Magistrates require such strict and reliable proofs that very few cases stand. Comparing the two cases in which conviction was made with the six cases in which acquittals were made, I hardly find any such difference in evidence as would warrant the difference in result. Taken from another point of view, I find the ten cases of acquittals to consist of one police case, two complaint cases in which the accused were summoned, and seven complaint cases in which the complainant was called upon to prove his case.

“In all the last seven cases the Bench Magistrates thought fit to summon the accused, and all ended in acquittals. Now, in my opinion, some of these complaints were so evidently civil disputes as to have been dismissed under section 203, Criminal Procedure Code; but the Bench Magistrates preferred summoning the accused, putting them to unnecessary expense and trouble, and ultimately passing verdict of acquittals.’

“I regret that from the Commissioner's remarks upon my last year's report, the above procedure did not seem to meet with his approval. But where, as at Jajpur, the Bench sits at a distance from head-quarters, and I cannot myself see the records, I can devise no better mode of check, and neither the High Court nor Government has found fault with the procedure.”

The recent orders of Government (*vide* Circular No. 4116J. of 29th August 1893) condemn the practice referred to.

63. The attendance of Honorary Magistrates was on the whole satisfactory, many gentlemen having attended more than 75 per cent. of the calls; they rendered material help in the disposal of criminal cases, and relieved the Stipendiary Magistrates of an amount of work which formed almost a third of the cases disposed of by them. There is only one Bench, viz. Puri Sadar, which sits daily.

64. No improvement is noticed in the matter of remands during the year under report as compared with the preceding year. Although the number of cases remanded more than six times decreased from 15 in 1892 to 12 in 1893, the ratio per cent. of A cases remanded six times and more to A cases disposed of increased from ·9 to 1·14. The number of A cases disposed of on the first hearing was smaller during the year under review than that of the year preceding, being 1,085 against 1,166 in 1892.

65. The result of sessions trials was almost the same as in the previous year, the percentage of convictions being 73·3 against 74·1 of the preceding year. Much improvement is noticed in Puri, where the percentage rose from 68 to 75.

66. The realization of criminal fines during the year was not satisfactory. The balance at the end of the year amounted to Rs. 21,538 against Rs. 18,473. Cuttack alone shows improvement in this respect, the outstanding balance in that district having decreased from Rs. 8,851 to Rs. 7,403. Nearly half of the divisional balance is outstanding in Puri. The Magistrate of the district submitted a remission statement for Rs. 6,520, but I hesitated to sanction such a wholesale remission, especially as fines imposed at the end of 1893 were included in the list submitted in May 1894. I have informed the Magistrate that I would remit fines up to 1892 if he thinks that all reasonable steps have been taken for their recovery.

## XVI.—REGISTRATION OF DOCUMENTS.

67. Appendix XVII shows the required statistics under this head. The number of documents registered rose to 25,501 from 21,676 in the preceding year. All offices except the Bhadrak office show increase more or less. To account for the increase in his district the Registrar of Cuttack says:—"The increase in the number of registrations was chiefly in sales and mortgages, a circumstance which to some extent reflects the condition of the people at large. Survey and settlement operations in progress throughout the district accounted also in part for the increase, as people desired to have the best evidence of title; and an increasing appreciation of the advantages of registration was also to some extent responsible for this." The Collector of Balasore attributes the increase of 30 per cent. only to the provincial settlement. The Collector of Puri says the increase in his district is due partly to appreciation of the value of registration, and partly to the settlement proceedings having opened the eyes of the raiyats to the fact that their holdings are transferable.

68. It is to be noted that both the Collectors of Cuttack and Puri observe that increase is noticeable both in compulsory and optional registrations. In the district of Puri optional registration rose to 2,113 from 1,690 in the preceding year. The figures for the other two districts are not available. Making allowance for the causes assigned by the District Officer in the year under report as well as in the preceding one, I am inclined to attribute the increase in optional registration in some measure to the Full Bench Ruling of the Calcutta High Court in *Makhan Lal Pal versus Bunku Behari Ghose*, page 623, Indian Law Reports, Calcutta, Volume XIX, which in a manner makes optional registration compulsory under the Registration Act. It has, however, to be seen how far this is borne out by facts. The District Officers will be requested to consider the matter from this standpoint.

## XVII.—CONDITION OF THE DIVISION AS REGARDS LAND AND LAND REVENUE ADMINISTRATION.

69. The prescribed statements XVIII to XXV give the required statistics under this head. The subject-matter having been dealt with in detail in the Land Revenue Administration Report, a brief review only is given here, as usual.

70. Out of the gross divisional demand, Rs. 18,86,592, the sum of Rs. 18,42,933 was collected, giving a percentage of 97·6 against 97·9 in the preceding year. The slight fall is mainly due in Cuttack to the non-adjustment of the balance due from certain estates sold against their sale proceeds, and in Puri to the fact that disturbances in the Tributary State of Ranpur caused delay in the payment of the tribute, which was not recovered till after close of the year. In Cuttack the accounts could not be adjusted pending decision of the appeals preferred towards the close of the year. This may be easily avoided by holding the sales earlier.

71. The divisional percentages of collection on gross and current demands in temporarily-settled and Government estates are compared below with that of the previous year:—

CLASS.	Percentage of gross collection on gross demand.		Percentage of gross collection on current demand.	
	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5
II ...	99·6	99·7	99·6	100·1
III ...	92·2	90·8	79·05	96·2

The slight increase in class II and the slight decrease in class III do not call for any special remark. It may, however, be noted that the percentage

of collection was 99 and 96·6 in the Government estates of Banki and Khurda respectively.

Sales of estates for arrears of revenue.

72. There were 24 sales under the Revenue Sale Law against 25 in the preceding year. There is nothing special to notice in this connection.

73. The provincial survey and settlement works were actively carried on during the year. There were no other minor operations. As the former are dealt with separately

Survey and Settlement.

as a special subject, statistics are not given here.

74. The required statistics are given in statement XXI. The number pending at the beginning of, and that filed during, the year was less than in the preceding year. The

Certificate work.

year under report, however, closed with a heavier file. The Collector of Cuttack says that the increase in his district is due to the facts that the demands of the cess certificates were realized during the last quarter, but satisfaction could not be entered, as the treasury chalangans did not reach the certificate offices before the close of the year, and that some miscellaneous certificates were filed during the last quarter.

75. Statement XXIII gives the required statistics. It will be seen that there is a decrease in the number of cases disposed

Land acquisition.

of in Cuttack. The Collector attributes this to the small plots of land involved in the cases, and to the petty sums to be disbursed, which led to the unsatisfactory attendance of parties. Acquisitions were mainly made for the distributaries of the Jajpur canal, the drainage of the Taldanda canal, and the East Coast Railway. The department made pretty fair progress.

76. Statement XX shows that ten cases were disposed of against 17 in the preceding year. Of the 61 cases pending, 30 cases have been stayed under the Board's orders

Partition.

No. 538, dated 11th December 1891, pending the completion of the provincial settlement, and the proceedings in one case was confirmed after the close of the year. As regards the balance, no special remarks seem to be called for, some of them having been almost completed.

77. The required statistics are given in statement XXIV. There is a considerable increase in the number of cases instituted, it being especially great in Balasore. This is mainly

Land Registration.

due to the settlement proceedings in progress. In Puri alone it is said to be partly due to vigorous proceedings taken under section 65 of Act VII (B.C.) of 1876. It is satisfactory to note the increase in the number of cases disposed of and the decrease in those pending.

78. There were certain defects in the initial registration work of the district of Cuttack. After personally inspecting the work and discussing the matter with the Collector, I reported the matter to the Board, who were pleased to sanction a special establishment for the purpose of supplying defects. Satisfactory progress was made during the year, and the special work is expected to be soon finished.

79. Complaints were received of the inconvenience entailed on the public in having to come in to Cuttack to file applications for mutation. Some relief has been afforded by allowing such petitions to be filed at the subdivisions, but it is not found practicable to deal with the cases otherwise than at the district head-quarters.

80. This is now dealt with separately as a special subject. It may be noted here that there was considerable decrease in the

Irrigation.

area leased out. In the district of Cuttack the area leased during the year was 86,790 acres against 128,748 acres in the preceding year. The Collector of Balasore has also noticed the decrease in his district, though no figures have been given. In both the districts the decrease is due to non-renewal of the lapsed leases. The Special Deputy Collector is reported to have ascribed it to the fact that there was more or less rain throughout the kharif season. But the Collector of Cuttack gives a different reason. He says thus:—"But I have reason to believe that the raiyats' real complaint is that they are not given water when they want it, and they not unnaturally ask, why should we pay for what is not given as required, but at the sweet will and

pleasure of the canal officers? Especially do they complain that they do not get water to irrigate their lands so as to render them fit for ploughing. They say that the rule is to supply no water till the crop is growing, while in a season like the present, when there has been no rain for some months, water is urgently needed for preliminary cultivation."

The decrease is no doubt due to the change both in the system of supplying water and the collection of the dues, the present arrangement being considered less lenient than its predecessor. The present system has not been long enough in force to admit of criticism.

81. The divisional percentage of the balance on the gross demand was 11·3 against 8·7 in the preceding year. The districts of Balasore and Puri show a decrease, while Cuttack shows an increase in percentage, which is as follows:—

DISTRICT.	1892-93.	1893-94.
1	2	3
Cuttack ... ..	13·1	17·8
Balasore ... ..	6·09	5·8
Puri ... ..	2·8	2·1

82. In his cess report the Collector of Cuttack thus accounts for the increase in the balance: "The percentage of collection of the current demand was 81·3 and that of arrears 83·2 as against 87·7 and 60 respectively in 1892-93. That the percentage of current collections is no higher is due chiefly to the difficulty experienced by persons paying cess direct to Government in collecting from their raiyats, another reason being the bad harvests of the year. Payment of the current demand was also affected by the calls upon the payers to make good, all at once, arrears that had been accumulating and were brought to light by the enquiry above noted." The enquiry referred to involved an adjustment of road cess collection accounts for past years. The increase in the percentage of the arrear collection may be taken as a set-off for the fall in the total collection.

#### XVIII.—WARDS' AND ATTACHED ESTATES.

83. No attached estates were under the management of the revenue authorities of the Division during the year. Killa Patia in the Cuttack district remained under the management of the Civil Court as reported last year.

84. The assessed jama of this estate, including cesses and miscellaneous receipts, amounted to Rs. 9,132 for the year under report. The total expenditure on account of management and other charges, including the allowance of Rs. 2,400 per annum for the maintenance of the proprietor and his family, amounted to Rs. 5,132.

85. The decree-holders were paid Rs. 1,910, and the total amount of debt liquidated up to the end of the year under review was Rs. 52,415, leaving an outstanding balance of Rs. 36,868, of which Rs. 14,230 is principal and Rs. 22,638 interest. The payment of a comparatively small amount to the decree-holders during the year was, it is explained, due to non-realization of rents from most of the tenants, some of whom were unable to pay their rents in consequence of failure of crops for three successive years, while the rest being refractory had to be sued.

86. The statistics for Wards' estates are given in Appendix XXVII.

87. The following Wards' estates were managed by the revenue authorities during the year under report:—

Cuttack	...	{ 1. Kanika.
		{ 2. Kujang.
		{ 3. Madhupur.
Balasore	...	{ 4. Jamkunda.
		{ 5. Shahbanda.
Puri	...	{ 6. Rorang.
		{ 7. Malighati.

88. Taking the Division as a whole, the collections in the Wards' estates show some improvement over the results of the previous year, the percentage of total collection on the total demand being 53·4 against 41·51 in 1892-93. But this is not so high as it should be. Taking the estates individually, Kanika shows the best results, as will appear from a comparison of the following percentages as compared with 1892-93, and Kujang the worst:—

		Percentages of total collection on total demand in—	
		1892-93.	1893-94
Kanika	...	90·8	107·6
Kujang	...	21·3	33·3
Madhupur	...	74·5	62·4
Jamkunda	...	93·3	94·3
Shahbanda	...	52·3	61·5
Rorang	...	85·4	73·5
Malighati	...	69·9	69·1

89. The following events may be noted in connection with the Wards' estates of this Division:—Rani Sulakhyana Pata Mohadei, the mother and guardian of the late Raja Padmanabh Bhunj, who was a pensioner of Kanika, drawing Rs. 300 per annum, died on 1st May 1893.

On account of strong winds accompanied with heavy rain and high floods, but chiefly owing to the May cyclone, all the Wards' estates of Cuttack suffered more or less during the year, and amongst these the Kanika estate suffered the most. The houses of many tenants fell, there was a loss of cattle and property and considerable loss of paddy stored in pits, the total loss caused to raiyats being estimated at about a lakh of rupees. Besides this, the estate's embankments suffered more or less, the estimated damage under this head being Rs. 30,000. A sum of Rs. 23,718 was sanctioned by the Board for the repairs of these embankments.

In spite of these disasters, it is noteworthy that the financial results of the year's administration of this estate show no deterioration, but on the contrary an improvement.

In the Kujang estate the cutcherry houses were very much damaged by the cyclone of May 1893. No work could be done for several days, and postal communication was interrupted. Houses fell and others had their thatch blown away, while, as in Kanika, paddy stacks suffered. There were successive floods in this estate in July and August 1893; but fortunately these caused no damage to crops, but those of September 1893 injured the *sarad* crop in several villages.

Sugarcane and the ripe *beali* crop in Madhupur were very much damaged by the high winds and heavy rains of 21st to 23rd September 1893.

The chief cause of the short collections in the Shahbanda estate in Balasore is the hostile attitude of the uncle and aunt of the minor, who are instigating the raiyats to withhold their rents. They have brought a civil suit in the Court of the Subordinate Judge of Alipore, claiming  $\frac{2}{3}$ rd share of the entire property. The case is still pending decision. The raiyats are also reported to have suffered to some extent on account of partial failure of crops owing to the flood of the river Subarnarekha.

The low percentage of collections in the wards' estates of the Puri district is attributed partly to the local kistbundis, according to which six *pans* of the current demand in Rorang and four *pans* in Malighati fell due in the last two months of the year, and hence legal coercive measures could not be concluded within the year. There was also a change in the collection agency in *hastabud* villages.

90. Survey and settlement operations are in progress in the Madhupur estate in Cuttack and in the Jamkunda and Shahbanda estates in Balasore.

91. The education of all the minors is well looked after. The Rorang minor, who has been transferred to Cuttack, is living with the Kanika minor; both are reading at the Ravenshaw Collegiate School. They are making fair

press in their studies. The Board have sanctioned the removal of the minor to Cuttack for studying in the Ravenshaw Collegiate School, and a competent private tutor has been engaged. The Jamkunda minor, who was promoted to the third class of the Balasore zila school and was getting on well with his studies, is reported to have fallen into bad company since the death of his guardian tutor. Proposals are now before the Board for engaging the services of another tutor, pending whose appointment the minor has been sent home to his mother at Jamkunda.

The Shahbanda ward is reported to have somewhat improved in his studies. He is now 20 years old, but is still in the 4th class. Both these minors receive some practical instructions from the managers of their estates, with a view to their acquiring an insight into zamindari matters. The Collector reports that he is arranging for the wards to learn something of the practical working of the Tenancy Act at the attestation camps of the Assistant Settlement Officers engaged in the settlement operations of their estates.

#### XIX.—EXCISE.

92. The statistics under this head are given in statement XXVIII according to the instructions in paragraph 2 of your No. 2737, dated the 27th November 1893. The result is an increase of the excise revenue throughout the Division, the total figures for the year under report being Rs. 6,10,535 against Rs. 5,60,977 in the previous year. It is to be noted here that the former sum includes the Rs. 19,904 credited into the treasury during the year by the Manager of Dhenkanal State, as reported in paragraph 72 of the last year's report. The result is still satisfactory.

93. Increase is noticeable under all the heads except under license fees for country spirit and tari. In Cuttack the licenses for the sale of distillery liquor were settled under the guaranteed system. They were put up to auction as regards still-head duty only, not as regards license fees, and were settled with those who offered to pay the highest amount of duty. But it has not been explained why the license fees fell to Rs. 10,124 from Rs. 13,888 in the previous year. The Collector's attention will be invited to this. The Collector of Puri has not explained the decrease in his district; the license fees for country spirit being Rs. 2,622 against Rs. 2,988 in 1892-93, though the quantity consumed rose to 3,051 gallons from 2,473 gallons.

94. All the districts show an increase in the quantity of country spirit consumed. In Cuttack it is ascribed to the partial introduction of outstills; in Balasore it is said to be due to the presence of the large number of up-country men in connection with the revenue survey of the district; and in Puri the increase is the result of the tari shops remaining unsettled for a greater portion of the year in consequence of the opposition to the tree-tax system. The decrease in the license fee of tari is confined to the district of Puri, and is due to the said opposition.

95. Ganja and bhang show a decrease in the quantity consumed. As this has been a subject of special discussion, it seems desirable to note here the views of the District Officers. With reference to the fall in the quantity consumed in his district, the Collector of Cuttack says thus:—"The only reason that can be suggested for the fall is that owing to the increase in the retail price consequent on the increase in license fees and duty simultaneously, illicit consumption of Gurjat ganja in places where it is easily procurable has increased, and that in places where it is not easily procurable the poorer consumers have reduced their consumption and taken to the use of other intoxicants perhaps more deleterious." The Collector goes on to say:—"The duty on all kinds of ganja was raised during the year, and having regard to the facility with which Gurjat ganja can be here procured, we have, I think, gone as far as we safely can in this direction." With regard to this, the Collector of Puri says thus:—"The duty is so high that the temptation to smuggle is irresistible. It is believed that the Khurda subdivision is flooded with the drug, and that it can be obtained anywhere very cheaply. In my opinion it should, as regards duty, be placed on the level of bhang or sidhi, to which it is more akin, as regards the mode of consumption, than the

Rajshahi ganja." With reference to my No. 1852P., dated 26th October 1893, from the Political side, the Government has in its No. 2486S.R., dated 19th April 1894, ordered that the matter will remain pending until receipt of the Indian Hemp Drugs Commission's report. The only fact to be noticed now is the resort to more deleterious intoxicants referred to by the Collector, who does not, however, say what these are. His attention will be invited to this with a view to ascertain how far this has led to the increase in the consumption of other exciseable articles.

96. As to opium issued to the vendors in the Gurjat States, it was found selling cheaper in the Gurjats than in Mogalbandi, in consequence of lower rates of license fee in those States. It was decided by the Board that the supply should be issued to each State according to a scale fixed. The Collector of Cuttack says this arrangement has proved salutary.

97. The tree-tax system of tari is reported to have worked well in Balasore.

#### XX.—STAMPS.

98. The following table exhibits the receipts and charges under this head during the year 1893-94 as compared with the preceding year:—

YEAR.	District.	RECEIPTS.				CHARGES.			Net. revenue.
		Sale of judicial stamps.	Sale of non-judicial stamps.	Miscellaneous receipts.	Total.	Refund.	Other charges.	Total.	
1	2	3	4	5	6	7	8	9	10
		Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
1892-93	Cuttack ...	1,00,952	43,837	4,032	2,08,821	1,717	3,274	4,991	2,03,810
	Balasore ...	50,607	17,576	1,979*	70,222	450	1,270	1,720	68,493
	Puri ...	57,917	32,981	1,047†	92,845	130	1,551	1,680	90,555
	Total ...	2,09,536	94,394	7,058	3,71,888	2,315	6,395	8,710	3,63,178
1893-94	Cuttack ...	1,81,350	45,757	5,013	2,32,120	631	3,515	4,146	2,27,983
	Balasore ...	60,654	19,478	2,882	83,014	112	1,478	1,590	81,424
	Puri ...	70,462	34,962	2,749	1,08,173	128	2,060	2,197	1,05,976
	Total ...	3,12,475	1,00,197	10,644	4,23,316	871	7,062	7,933	4,15,383
	Increase ...	42,039	5,903	2,686	51,428	...	667	...	52,205
	Decrease ...	...	...	...	...	1,444	...	777	...

\* This differs from the last year's figures by Rs. 127, duty and penalty levied by Collector not having been included under this head.

† There is a difference of Rs. 16 as compared with the entry made as per last year's report. This is due to subsequent correction of return No. XXXV by the Collector.

There has been an increase of Rs. 51,428 in the sale of judicial and non-judicial stamps and in miscellaneous receipts. The increase is distributed as follows:—

	Rs.
Judicial	42,939
Non-judicial	5,803
Miscellaneous	2,686

99. The sale of court-fee stamps chiefly contributed to the increase which is explained by the Collector of Cuttack to be due to the increase in the number of cases instituted during the year, and to the fact that process fees at a higher rate were levied for serving notices under sections 6, 7 and 10 of Act XI of 1859, under Board's Circular No. 11 of September 1893. In Balasore a large number of mutation cases were instituted during the year on account of settlement operations going on in that district, in consequence of

which there was an increase in the sale of court-fee stamps. The Collector of Puri attributes the increase in his district chiefly to the institution of mutation cases in the Khurda subdivision consequent on the *nilan khara* operations, and to a larger number of rent suits having been filed during the year than in the preceding year.

100. In explaining the increase under the head non-judicial stamps, the Collector of Cuttack reports that a greater number of documents (sales, mortgages, &c.) were executed during the year on account, probably, of bad times. In Balasore it is attributed to the transfer of properties of higher value during the year under report than in the preceding year. In Puri the increase under this head amounted to Rs. 1,981, for which no explanation has been furnished by the Collector.

101. It is satisfactory to note that although there was increase under receipts, the charges decreased by Rs. 777. The decrease was mainly under the head "Refund of value of stamps purchased." This is due to the refund of the price of stamps of higher values in the previous year than in the year under report. The net revenue shows an increase of Rs. 52,205, which is satisfactory.

102. The table below shows the action taken by Civil Courts and Collectors on unstamped or insufficiently stamped documents, and prosecutions for infringement of stamp laws:—

YEAR.	District.	ACTION TAKEN BY CIVIL COURTS ON UNSTAMPED OR INSUFFICIENTLY STAMPED DOCUMENTS.		ACTION TAKEN BY COLLECTORS ON UNSTAMPED OR INSUFFICIENTLY STAMPED DOCUMENTS.		PROSECUTIONS INSTITUTED FOR INFRINGEMENT OF THE STAMP LAWS.				
		Number of cases.	Duty and penalty levied.	Number of cases.	Duty and penalty levied.	Number of cases.	Persons brought to trial.	Convicted.	Fine imposed.	Reward paid.
1	2	3	4	5	6	7	8	9	10	11
1892-93 ...	Cuttack ...	53	Rs. 269	19	Rs. 163	5	5	5	26	...
	Balasore ...	...	...	15	126	5	5	5	40	...
	Puri ...	7	50	13	88	1	1	1	16	...
	Total ...	60	358	47	317	11	11	11	83	...
1893-94 ...	Cuttack ...	48	330	19	228	3	4	1	5	15
	Balasore ...	2	11	9	65	5	5	2	63	...
	Puri ...	26	234	15	108	5	7	3	40	...
	Total ...	76	575	43	401	13	16	12	108	15
	Increase ...	16	217	...	84	2	6	1	26	15
	Decrease ...	...	...	4	...	...	...	...	...	...

All the districts except Cuttack show increase in the number of cases in which duty and penalty were levied by the civil courts. The amount of duty and penalty realized by these courts also increased from Rs. 358 in 1892-93 to Rs. 575 during the year under report. This is due to the fact that almost all the cases instituted during the previous year were petty ones, and the amount of penalty realized in each amounted to Rs. 5. As regards cases in which action was taken by revenue courts, the amount of penalty and duty levied increased by Rs. 84, although there was a slight falling off in the number of cases. The increase amounted to Rs. 125 in the district of Cuttack, which the Collector attributes to the fact that in the preceding year all the cases were of a petty nature. Balasore shows a decrease of six cases with an amount of Rs. 61, which the Collector reports is probably due to greater carefulness on the part of the people in affixing proper stamps on documents. The result of prosecutions in stamp cases was not satisfactory. Only 63·1 per cent. of persons brought to trial were convicted, against 100 of the preceding year. Cuttack and Puri are responsible for the result. In the former three out of four persons brought to trial were acquitted for want of evidence. In the latter only three

out of seven persons tried were convicted. The Collector of Puri has not furnished any explanation for the large number of acquittals in his district. His attention will be drawn to this.

103. A reward of Rs. 15 was paid to a muharrir of the Banki tahsil office, in the district of Cuttack, for giving information of a case of evasion of the stamp law in respect of three documents. No reward was paid in Balasore or Puri.

#### XXI.—INCOME-TAX.

104. The required statistics are given in statement XXIX. There is an increase in the net divisional total collection, the figures being Rs. 57,134 during the year under report against Rs. 55,239 in the preceding year. This is due to an increase in Balasore and Puri and a decrease in Cuttack; the latter shows a decrease of 4·5, while the other two show an increase of 6·2 and 14·1 per cent. respectively in the net revenue.

105. There is an increase in the number of assesseees in all the districts, though Cuttack shows a decrease in the revenue. Of the 2,701 persons originally assessed, 484 assesseees preferred objections. Of these, 63 objections were fully, and 89 partially, successful. The result of objections in each district is as follows:—

DISTRICT.	Number of objections filed.	Number in which assesseees were exempted or the tax reduced.	Percentage of successful objections.
1	2	3	4
Cuttack ...	212	85	40·0
Balasore ...	135	45	33·3
Puri ...	137	22	16·6
Total ...	484	152	.....

It will thus be seen that Balasore shows more careful work and Puri stands next. The same result is to be seen in appeals to the Commissioner, which were as follows:—

DISTRICT.	Number of appeals.	Number of cases in which reduction or exemptions were made.	Percentage of appeals against the order of the Collector.
1	2	3	4
Cuttack ...	17	3	8·0
Balasore ...	7	2	5·2
Puri ...	13	2	9·5

106. To account for the large proportion of successful objections, the Collector of Cuttack says: "Roughly they are due to the Sadar subdivision, which is being managed by the greater facilities than are

arriving at a full estimate of the income of large traders who are up to all modes of evasion, and many of whose accounts are kept in foreign languages, as Gujarati and Marwari."

As to the alleged facility in the Sadar subdivision for filing objections, and the tendency of the people to contest everything, these may account for an increase in the number of objections preferred, but they cannot be the cause of the objections being successful. As to the difficulties of arriving at a fair estimate of the incomes of large traders, I believe it is not peculiar to those in Cuttack. The Income-tax Department labours under the same difficulties and disadvantages everywhere. The difficulty arising from the accounts being kept in foreign languages is a genuine one, and it exists, I believe, more in the town of Cuttack than elsewhere.

The assessor should, I think, provide against such difficulty by learning at least the figures of such foreign languages, and the Collector will be desired to take action in this direction.

## XXII.—MONETARY ARRANGEMENTS.

107. The following table shows the receipts and issues of currency notes during the year of report as compared with the previous year:—

DISTRICT.	RECEIPT.								ISSUE.							
	Received in payment of Government dues.		Received from public in exchange for silver or other notes.		Received from Bank of Bengal or other treasuries.		Total.		Issued in payment of Government dues.		Issued in exchange for silver or other notes.		Remitted to other treasuries.		TOTAL.	
	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17
Cuttack ...	Rs. 3,41,635	Rs. 1,85,320	Rs. 1,82,500	Rs. 50,785	Rs. 1,77,000	Rs. 1,80,500	Rs. 7,01,195	Rs. 4,35,445	Rs. 3,75,810	Rs. 4,20,620	Rs. 1,84,120	Rs. 82,045	Rs. 1,20,360	Rs. 12,480	Rs. 6,91,880	Rs. 4,94,545
Balasore ...	Rs. 75,450	Rs. 54,340	Rs. 57,810	Rs. 30,075	Rs. 47,725	Rs. 48,000	Rs. 1,50,985	Rs. 1,68,315	Rs. 86,075	Rs. 1,03,445	Rs. 75,875	Rs. 70,160	Rs. 175	Rs. 4,555	Rs. 1,62,125	Rs. 1,78,180
Puri ...	Rs. 81,570	Rs. 54,700	Rs. 45,080	Rs. 61,840	Rs. 47,500	Rs. 38,000	Rs. 1,77,150	Rs. 1,54,540	Rs. 89,215	Rs. 65,905	Rs. 72,230	Rs. 82,120	Rs. 37,965	Rs. 28,105	Rs. 1,99,400	Rs. 1,46,130
Total ...	Rs. 4,98,655	Rs. 2,94,370	Rs. 2,85,450	Rs. 1,41,770	Rs. 2,72,225	Rs. 2,66,500	Rs. 10,29,330	Rs. 7,42,340	Rs. 5,51,100	Rs. 5,89,370	Rs. 3,34,225	Rs. 2,01,325	Rs. 1,68,080	Rs. 45,140	Rs. 10,53,405	Rs. 8,18,855

There was a marked decrease both in receipts and issues of currency notes during the year in the districts of Cuttack and Puri, which is ascribable to slackness of trade. The increase in Balasore is chiefly attributed to the settlement operations and to the briskness of foreign trade.

108. The following table shows the transactions in the Post Office Savings Bank during the past two years:—

DISTRICT.	1892-93.			1893-94.		
	Number of deposits.	Amount deposited.	Amount withdrawn.	Number of deposits.	Amount deposited.	Amount withdrawn.
1	2	3	4	5	6	7
Cuttack ...	3,964	Rs. 1,29,612	Rs. 99,160	3,520	Rs. 1,11,852	Rs. 98,564
Balasore ...	2,177	Rs. 73,779	Rs. 53,117	2,034	Rs. 71,242	Rs. 53,072
Puri ...	869	Rs. 24,693	Rs. 19,244	1,074	Rs. 37,251	Rs. 24,186
Total ...	7,010	Rs. 2,28,084	Rs. 1,71,521	6,628	Rs. 2,20,345	Rs. 1,75,822

The result of the year shows a decrease in the number and amount of deposits as well as withdrawals for the Division. There was increase only in the district of Puri. The decrease in Cuttack is not very marked, and is attributed to the report that the rate of interest was to be lowered, as has been done from 1st April 1894. That in Balasore is reported to be due to the fact that the limit of deposit in each account in a year has been reduced from Rs. 500 to Rs. 200 only.

109. The following table shows operations in connection with money-orders:—

DISTRICT.	ISSUED.											
	Revenue money-orders.				Ordinary money-orders.				Total.			
	1892-93.		1893-94.		1892-93.		1893-94.		1892-93.		1893-94.	
	1	2	3	4	5	6	7	8	9	10	11	12
	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.
Cuttack ...	8,688	14,801	9,580	23,906	27,297	9,24,394	37,661	5,94,575	44,960	10,19,295	46,811	9,38,581
Balasore ...	3,398	53,941	3,111	42,160	26,471	5,06,372	28,722	5,85,731	20,009	5,80,312	31,833	6,27,861
Puri ...	513	2,467	375	2,343	16,934	3,66,030	17,905	3,91,096	17,947	3,86,646	18,680	4,23,296
Total ...	13,594	1,51,309	12,966	1,38,309	50,902	17,86,805	83,558	19,71,448	94,296	19,39,114	96,524	20,09,737

DISTRICT.	PAID.											
	Revenue money-orders.				Ordinary money-orders.				Total.			
	1892-93.		1893-94.		1892-93.		1893-94.		1892-93.		1893-94.	
	1	2	3	4	5	6	7	8	9	10	11	12
	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.	No.	Rs.
Cuttack ...	8,871	23,678	7,763	61,629	49,494	13,54,778	97,404	14,85,527	58,365	14,38,454	105,167	15,47,156
Balasore ...	3,769	49,965	3,075	46,781	22,960	3,67,518	26,535	4,91,439	24,735	4,17,473	30,110	4,68,220
Puri ...	537	2,344	243	2,754	16,508	4,62,424	17,423	5,67,377	16,339	4,64,768	17,605	5,70,131
Total ...	12,977	1,36,977	11,581	1,11,164	88,962	21,84,718	141,361	24,74,343	1,01,929	23,20,695	152,882	25,85,507

There has been a considerable increase both in issues and payments, the number and value in each being 2,228 with Rs. 71,643 in the former, and 51,013 with Rs. 2,64,812 in the latter. Revenue money-orders, however, show a falling off in all the districts, the reason for which in Balasore is said to be that proprietors seem to think that less risk is incurred by paying in revenue through their agents, as there is no apprehension of mistake in credit; while in Puri the petty zamindars only, whose shares of estates and amount of Government revenue are small, and who live at a great distance from the head-quarters, avail themselves of this system to remit their dues, payments of big zamindars being made through the mukhtars and revenue agents at head-quarters. The decrease in Cuttack is explained as follows by the Collector:—

“This is attributable to the fact that many money-orders being defective or having been received after the kist day in November 1892 and April 1893, the estates concerned were brought on the defaulters’ list, and though most were afterwards removed therefrom on the petition of the proprietors, this might have tended to shake their confidence in the system. With defects in the form of land revenue money-orders I have dealt in the Land Revenue Report. Delays in the post-office also prejudice the people against remitting by money-order; but the fault is chiefly their own, as they invariably put off remitting till the last moment. There are also interested persons, revenue agents and others, who profit by an adherence to the old custom of money being paid into the treasury direct. Such lose no opportunity of setting the people against the money-order system, resort to which has affected their incomes. It will doubtless make its way into more general favour in course of time.”

#### XXIII.—RAILWAYS AND OTHER PUBLIC WORKS.

110. The East Coast Railway was still under construction during the year under report, though work has again been suspended since the close of the year for want of funds. The progress of the work was, however, much impeded by various causes, and there remains still much to be done. The route to be followed for the last 25 miles to Cuttack has yet to be determined. The earthwork and bridges of the remaining parts of the line are reported to be three-fourths completed; the large bridge over the Mahanadi is not being built.

111. Two branch lines from the East Coast Railway to Puri are under consideration. The one from Chhatipur in the Khurda subdivision was surveyed and plans and estimates were prepared. As an alternative to this, it is proposed

to run a line from Cuttack to Puri along the existing road. Nothing is reported to have been done with regard to this line. A report was submitted as to the route which the proposed line from Sambalpur to Cuttack should follow.

112. The Public Works Department was engaged in extending the distributary system of the Jajpur, Kendrapara, Gobri and Patamundai canals, and the embankments along the right bank of the Baitarni and the left bank of the Bura rivers. These with the minor drainage works are nearly completed.

#### XXIV.—ROADS AND COMMUNICATIONS.

113. Nothing important took place under this head. The District Boards of Cuttack and Puri constructed seven and five new village roads respectively, and the latter a road from Astrang to Kakatpur. The existing roads were maintained in good condition.

With regard to Mr. Allen's proposal to make over to the District Board the two trunk roads in the district of Puri, mentioned in paragraph 94 of last year's report, the required proposal has not yet been received from the Collector of Puri, though his attention was invited to it. The proposal seems more likely to be well received now than formerly, as an Executive Engineer's division of Puri has been abolished and merged in another division.

#### XXV.—WORKING OF THE PURI LODGING-HOUSE ACT, IV (B.C.) OF 1871.

114. The subjoined statement gives the necessary information under this head:—

NAME OF FUND.	Receipts.		Expenditure.		Number of <i>chutties</i> .	Number of licensed houses.	Number of lodgers to be accommodated.
	1892-93.	1893-94.	1892-93.	1893-94.			
1	2	3	4	5	6	7	8
Puri Town Lodging-house Fund.	Rs. 5,526	Rs. 20,239	Rs. 7,208	Rs. 11,278	Rs. ...	Rs. 638	Rs. 17,050
Chandbali Town Lodging-House Fund.	725	671	546	570	1	52	2,475
Amalgamated Jagannath Road and Trunk Road Lodging-house Fund—							
In Cuttack ...	3,275	3,742	1,234	1,037	23	108	3,968
In Balasore ...	2,210	2,249	2,250	2,162	35	149	2,618
In Puri ...	2,314	4,501	3,440	4,561	14	175	4,181
Total ...	14,100	31,402	14,678	19,603	73	1,122	30,292

Except Chandbali, there was an increase in the number of lodging-houses and lodgers in the Puri town and *chutties* along the trunk road during the year under report. The total number of licensed lodging-houses was 1,122 with accommodation for 30,292 lodgers, against 704 houses for 19,833 lodgers in the previous year. The marked increase in the number of lodging-houses and lodgers, and consequent increase in receipts, was chiefly due to the unusual number of pilgrims that visited Puri on the occasion of the late Car festival, and to the great energy shown by Dr. Banks in carrying out the objects of the Act. To the same cause may be attributed the fact that in Puri the receipts under the head of fines also considerably increased, owing to a larger number of prosecutions, which numbered 138 against 27 in the previous year.

115. During the year 11 pukka and 34 kutcha houses with good ventilation were constructed, 175 pukka latrines repaired and constructed, 87 pukka drains

made and improved, 946 windows opened and 1,065 windows enlarged. It is in contemplation to erect at Puri corrugated iron shelters which, while not competing with licensed lodging-houses, will afford protection to numbers of pilgrims who cannot be accommodated in lodging-houses, even had they the means to pay for accommodation. This is a measure strongly called for by the circumstance that the Car festival takes place in the month of July in the height of the rains. Last year there must have been over a hundred thousand pilgrims, and the registered accommodation at Puri itself is for 17,050 only, which cannot suffice even in an ordinary year. The state of things on the roads is, I fear, worse than that in the town of Puri. Allowing for the fact that most pilgrims come by water as far as Cuttack, there is shown to be only accommodation for 4,181 pilgrims in the *chutties* south of the Katjuri, which, even if they suffice for the gradual influx of pilgrims, do not suffice for the rapid efflux at the termination of the festival.

Whatever the sufferings of pilgrims may be—and I conceive that they have suffered for centuries—such sufferings are nothing now compared with what they were in the past, and this is due chiefly to the enterprise of the Steamer Companies, which has made the pilgrimage more rapid and more easy.

116. The *chutties* along the Jaganath Trunk Road are under the District Health Officer, who is reported to have inspected them regularly. The Act was extended to Bhubaneswar towards the latter end of the year, and subsequently to Satyabadi.

The food sold in the *chutties* was regularly examined and, if found unfit for human consumption, was destroyed. In addition to 9 permanent mehters, 11 extra mehters were temporarily employed. The Magistrate thinks the supply of mehters altogether inadequate.

117. In Balasore the lodging-houses were frequently inspected by the Health Officer. The *chutties* and bazars were kept clean and the houses made more commodious and better ventilated. The Magistrate thinks the working of the Act was satisfactory.

118. In Cuttack out of 23 *chutties* lodging-houses, licenses were applied for by residents in 17. No applications were made from the remaining six small *chutties*. Five house-holders were sent up for keeping lodgers without licenses. None of them, though convicted, applied for licenses, as the fines imposed by the trying Magistrate were small and had no deterrent effect. The opposition of the tenants to the Act seems gradually decreasing. A muharrir and a sweeper were added to the strength of the staff during the year under report. The former was appointed to help the Inspector in collection work, and the latter to clean the three *chutties* (Kuakhia, Manipur and Khanditur). Dr. Banks again brought to my notice that the Puri Health Officer had a good deal of his time occupied with collection duties. If these are really found to interfere with his duties as a sanitary officer, it would be well that Puri should follow the example of Cuttack and allow him a muharrir. Extra sweepers were entertained during the pilgrim season at Nayabazar and Jobra near Cuttack.

119. The number of prosecutions was 36 against 32 persons, and that of convictions was 24 against 12 of last year. The Magistrate writes: "I inspected all the chief *chutties* during the year, and found all in good order: on the whole, certainly as well kept as those of Balasore and Puri districts that I have seen."

120. Though the Puri Lodging-house Act was extended to Jajpur town by Government No. 2087 of 15th September 1890, it has not yet been enforced owing to non-receipt to date of sanction to the bye-laws and model rules proposed. The numerous amendments suggested by the Magistrates in the bye-laws and model rules are under consideration, and amended editions will shortly be sent to Government for final sanction.

#### XXVI.—EDUCATION.

121. The required statistics under this head are given in statement XXX according to the instructions in paragraph 2 of your No. 2737, dated the 27th November 1893. The following is the note furnished by the Officiating Inspector of Schools of Orissa.

122. The following statement summarizes the comparative statistics of educational institutions of all classes:—

CLASS OF INSTITUTION.	1892-93.								1893-94.								Average number of pupils.		
	SCHOOLS.				PUPILS.				SCHOOLS.				PUPILS.						
	Cuttack.	Balasore.	Puri.	Total.	Cuttack.	Balasore.	Puri.	Total.	Cuttack.	Balasore.	Puri.	Total.	Cuttack.	Balasore.	Puri.	Total.	1892-93.	1893-94.

GRAND TOTAL	3,351	2,136	1,918	7,405	51,591	37,240	20,064	1,08,697	3,397	2,066	1,892	7,415	50,110	34,450	21,223	1,06,238	14.6	14.3	

123. There has been a loss of 104 schools and 3,057 pupils under the head of public institutions, and a gain of 114 schools and 658 pupils under the head of private institutions. There was thus a net increase of 10 schools with a not decrease of 2,399 scholars. The palpable loss of schools and pupils in Balasore is ascribed to the high market prices of food-grains which ruled throughout the year in consequence of the agricultural distress caused by the high floods which swept over the northern and southern parts of the district.

124. Of the 106,298 pupils under instruction, 102,014 are Hindus, 3,060 Muhammadans, and 1,021 Christians. Of the remaining 203, 13 are Brahmos and the rest are children of the primitive communities.

125. The total expenditure on all classes of institutions was Rs. 3,66,507, and the expenditure on superintendence, scholarships, buildings, and on other miscellaneous heads amounted to Rs. 57,407. Thus the aggregate expenditure on all accounts was Rs. 4,23,914, of which Government contributed Rs. 66,850, District Boards Rs. 78,991, and Municipal Boards Rs. 4,902.

126. A further improvement is visible in the way of the enforcement of the principle regulating the distribution of the municipal expenditure on education. Of the total outlay of Rs. 4,902 from municipal funds, Rs. 3,498 or 88 per cent. were devoted to primary and female education.

127. The population of the Division amounted by the census of 1891 to 3,877,294, of whom 1,896,725 were males and 1,980,569 females. Reckoned at the usual proportion of 15 per cent., the number of male children of school-going age would be 284,507, and the number of female children 297,085. Of the scholars on our returns, 100,886 are boys and 5,412 girls. It is thus seen that out of every 100 boys that might be at school, only 35 are being educated, the corresponding percentage for girls being as low as 1.8, a figure which, though insignificant by itself, will nevertheless be found favourable in comparison with the general percentage for the whole province.

128. The great disparity between Balasore and Puri as regards the percentage of boys at school and the total number of school-going age, as referred to in paragraph 17 of the Government Resolution No. 693T G., dated 2nd November 1893, can, I think, be accounted for otherwise than by resorting to the theory that it is due to differences in the degree of interest taken in education by the local Educational and District Officers. The fact that the disparity has continued to exist, though with some slight variations, ever since the introduction of the primary education scheme, lends no countenance to the above theory.

The only rational explanation of the disparity is afforded by the circumstance that the aggregate numerical strength of the literate castes (i.e. Brahmos, Karans, Khandaits, Rajus, etc.) in Balasore is more than double that of Puri. The disparity may also be partly traced to the fact of Balasore being more populous than Puri, as also to the predominance of the Panda class, whose attitude towards education is one of complete indifference.

129. A comparison like the one instituted in the paragraph above referred to between Patna and Orissa, and which is only based on the figures representing the total population and the gross educational expenditure of the two Divisions, would be misleading, as it loses sight of many other important aspects of the question which, if duly considered, would show Orissa in a more favourable light. Patna, with a population more than four times as great as that of Orissa, returned 9,353 schools in 1892-93, the corresponding number returned from Orissa being 7,405. The percentage of pupils to population of school-going age in Patna was 11.1 against 35.9 in Orissa. The percentage of public to the total expenditure on education in Patna was 36.9 and in Orissa 35.5.

When grants were originally made from provincial revenues for purpose of primary education, their distribution was regulated by the respective capability of the several divisions or districts to utilize these grants, as evidenced by the actual number of primary schools then existing in them. Orissa, which had a well-developed primary system of its own, thus succeeded in obtaining a larger grant than it could have secured on the mere basis of population, and the outlay seems to me to be justified by the relatively higher position which it has all along maintained as regards the percentage of boys actually under instruction.

130. As regards the substitution of inspecting pandits for chief gurus, there is no room for reform as far as this Division is concerned, the latter system having long since been in full operation in all these districts. It is also satisfactory to find that the stipendiary pathsalas do not absorb an unduly large share of the primary allotment. Lower primary schools for boys in Orissa are as a rule aided under the system of payment-by-results.

131. The number of students on the rolls on the 31st March last was 68, the same as in the preceding year. The expenditure for the year was Rs. 21,904, of which the grant from provincial funds amounted to Rs. 15,953. The cost to Government of each student was Rs. 177 against Rs. 180 of the preceding year.

At the B.A. examination held in 1893, 17 candidates appeared, of whom only 2 passed, and out of 40 students who appeared at the F.A. examination, only 5 passed. The one candidate who appeared at the M.A. examination failed.

Two candidates were sent up for the B.L. examination in November 1893. They both failed.

132. Out of 164 students sent up to the University Entrance examination, only 42 have passed successfully, the percentage of success being 40 against 80 of the preceding year. The unfavourable result, however, is not peculiar to Orissa, almost all the schools controlled by the Calcutta University having more or less shared in the general decline.

No marked fluctuations are noticeable in the results of the departmental examinations for the last two years, except the lower primary scholarship examination, the results of which present a marked disparity between Cuttack and Puri on the one hand, and Balasore on the other, in spite of an identical set of question papers framed by the Inspector of Schools for all the districts. The appointment by the Inspector of a Central Board of Examiners selected from all the districts, and paid as at present by District Boards in whose offices the results are tabulated, is an arrangement designed to minimize all chance of diversity in the valuation of answer papers.

133. The importance of influencing the character and manners of the scholars, as well as their intellects, appears to be kept prominently before the schools, and although the advance in this direction may not be easily gauged, it is believed that some good at least is being done. No serious breaches of discipline came to notice during the year under report.

134. Gymnastic and elementary drill are taught in most of the high English schools of this Division. In Balasore, Babu Satyendra Nath Do, a leading zamindar of the town, has placed a sum of Rs. 1,100 in the hands of Government, out of the interest of which four prizes of Rs. 5 each are awarded to school-boys who display proficiency in gymnastics. It is to be hoped that this good example will be followed by the public-spirited zamindars in the other districts.

The middle and primary schools of Orissa are too poor to do anything in this direction. It is reported that the Puri District Board intends to introduce simple physical training into the middle schools under its direct management.

The appointment of a special gymnastic master in the Cuttack Training School, which is the chief recruiting ground for vernacular teachers in Orissa, would be a step in the desired direction.

135. The most important institutions under this head are the Cuttack Training, the Medical and Survey Schools, all of which are resorted to for purposes of training by students from the four districts and the Tributary Mahals. The Cuttack Training School has 43 pupils on its rolls against an equal number in the year next preceding. The great bulk of the teachers of middle vernacular schools in Orissa are ex-students of this useful institution.

There are elementary training schools at Balasore and Puri. In order to make these schools serve any useful purpose, the period of training in them should, I think, be extended from six months to one year.

136. The Cuttack Medical School, under the management of Surgeon-Lieutenant-Colonel J. M. Zorab, M.B., registered 118 pupils, of whom 6 were females. Nineteen hospital assistants were turned out of the institution during the year under report. The school has up to date sent out 187 certificated hospital assistants, 72 of whom are in Government service and 37 in that of Native States.

The variety of operations performed in the attached hospital and the number of patients afford a good field for practical training of the students both as regards dressing and examining cases before the teachers.

Particular care and attention are also given to the teaching of Medical Jurisprudence, both theoretically and practically. A careful watch is always exercised on the morality and discipline of the students in their boarding-house, hospital and school, and breaches of discipline are rarely noticed.

The female class of this institution, though still numerically small, has taken a predominant place in the medical education in Orissa, and has amply fulfilled the favourable anticipations formed of it by its original founder.

137. The roll-number of the Cuttack Survey School, which is under the control of the Principal of the Ravenshaw College, is 42. Out of 18 candidates who appeared from the institution at the last final examination, 16 were successful.

There are two industrial schools at Balasore, in which carpentry and needle-work are taught, and which partake more of the character of bazar workshops than of regular technical institutions.

138. The District Boards of Cuttack, Balasore and Puri have created a few scholarships out of public funds at their disposal, for the purpose of enabling Uriya youths to receive training at the Jobra Workshop, the Calcutta School of Art, and the Sibpur Engineering College.

139. There are 101 special girls' schools attended by 2,541 pupils, the total number of girls under instruction, including those attending boys' schools, being 5,412.

The number of special girls' schools in Cuttack has declined considerably, and the loss is attributed to an unavoidable reduction of expenditure following close upon previous excessive outlay on this class of schools by the Local Boards concerned.

A girl belonging to the Cuttack Female Orphanage successfully passed the middle English scholarship examination during the year under notice.

Four girls passed the middle vernacular, 16 the upper primary, and 68 the lower primary scholarship examinations, against 10, 16 and 86 respectively in the preceding year.

140. The total number of Muhammadan pupils under instruction is reported to be 3,060 against 3,114, showing a loss of 54 pupils.

Muhammadan education.

Forty-eight Muhammadan pupils successfully passed the University Entrance and the departmental examinations, against 34 in the previous year.

No school in Orissa has been more successful in promoting the higher education of Muhammadan boys than the high English school of Kendrapara. I agree with the Inspector of Schools in thinking that if any school deserved a grant from the Mohsin Fund, surely it is Kendrapara.

In respect of educational facilities the Muhammadans of Orissa are better off than the other sections of the population. Apart from the advantages which they enjoy in common with the latter, they have special schools, special scholarships, and special free-studentships, and the rules regarding the age of admission are also relaxed in their favour.

141. These pupils numbered 190 against 298 in the preceding year. The

Education of aboriginal and backward races.

decline under the head is attributed to the closure of a few Sonthal schools in the wood-land pargana of Fatiabad in Balasore, brought about by a sudden rise in the price of food-grains in that tract. The pupils returned from Balasore are mostly Sonthals, and those from Puri semi-Hinduized Konds.

During the year under review, six Sonthal boys from Balasore successfully passed the lower primary scholarship examination.

There are seven special primary schools for children of low castes in Cuttack and Puri.

Thirty low-caste pupils passed the lower primary scholarship examination during the year under notice, viz., 28 from Balasore and 2 from Puri. None got scholarships.

142. Under this head are shown Persian maktabas, Koran schools, Sanskrit

Indigenous education.

tols, and elementary village pathsalas that do not conform to the departmental standards of instruction.

The maktabas numbered 40 with an aggregate roll number of 668. The Bhadrak and Dhamnagar maktabas do really impart instruction of a superior character in Persian classics to the Muhammadan pupils attending them. The others are scarcely worthy of the name of maktabas.

The number of Sanskrit tols has declined from 68 to 62, with a corresponding reduction in their attendance. The defunct tols were for the most part ephemeral institutions opened under the rumoured prospect of obtaining Government aid, and their loss is immaterial from an educational point of view. The two best tols in Orissa are the Puri Sanskrit School established at Puri in 1865 by the Maharaja of Balarampur in Oude, and the Sriram Chandra tol recently established at Balasore by the Chief of Moharbhaj. The financial condition of the former is very satisfactory. It has a capitalized fund of Rs. 13,000 invested in Government four per cents., and it receives a yearly grant of Rs. 1,300 from the Maharaja of Balarampur.

The Sriram Chandra tol at Balasore is a promising institution, and it has been placed on a stable financial footing by an adequate yearly grant sanctioned by its founder out of the revenues of the Moharbhaj State. The young Chief also takes a lively interest in the welfare of this school, which appears to me to be the best outcome of the late movement on the subject of the improvement of Sanskrit learning in Orissa.

A new tol has also been sanctioned for the Kanika Ward's estate, which is expected to commence work from the current session.

143. Associations have been formed at Cuttack, Balasore and Puri, with the object of improving the efficiency of Sanskrit tols by subjecting them to periodical examinations and rewarding them according to the results shown by them. Some of the tols in Cuttack and Puri and the adjacent Tributary States were thus examined and rewarded.

144. Thirty-three tols sent up 107 candidates, of whom 61 were successful, 50 of them belonging to the Puri district alone, and the rest to Cuttack and the Tributary States of Dhenkanal, Hindole and Talchere.

145. The total receipts of the Cuttack and Puri *Samitis* amounted to Rs. 789, and the expenditure to Rs. 553. The difficulty experienced in realizing

subscriptions and donations in this the very first year of the working of these *Samitis* does not augur well for the future success of these movements.

146. The municipalities and the District Boards of Orissa have not as yet contributed anything for the encouragement of Sanskrit tols. The municipality and the District Board of Puri, the traditional seat of Sanskrit learning in Orissa, ought to have moved in the matter long ago.

147. With reference to paragraph 5 of your letter above quoted, referring to paragraph 17 of the Government Resolution, as to education in this and the Patna Divisions, the Officiating Inspector ascribes it to the existence of a larger number of primary schools in Orissa when the Government grant was made for the purpose. The matter is still under my consideration, and a report may be submitted if necessary. I think the problem put by Government can be better solved by the Director of Public Instruction than the Commissioner of either Division, as neither knows the circumstances of the other Division, while the Director of Public Instruction has the advantage of knowing both.

#### XXVII.—DISPENSARIES AND HOSPITALS.

148. The required statistics under this head are given in statement XXXI. It shows 23 dispensaries against 19 in the preceding year. This increase of four dispensaries is due to opening of two in the Kanika Ward's estate, one at Nayabazar on the Jaganath road, and to the inclusion of the Satpara dispensary in the district of Puri, which the Collector says was not shown last year. The one at Nayabazar is very useful to the pilgrims, being situated at a place where they land from steamers near Cuttack. It is maintained by the District Board. Anantpur dispensary is the same as the one at Tekhri shown in the last year's report, the site of the dispensary having been changed owing to the removal of the office of the Manager of Kujang Ward's estate to Anantpur. Government sanction arrived for a dispensary in the Government estate of Banki, but it could not be opened before the expiry of the year, as no native doctor was deputed to take charge. A separate set of wards for females was added to the Bhadrak dispensary. The building for Srimati's Female Hospital at Balasore was completed during the year, but it could not be opened to patients. Lastly, the management of the Chandbali hospital was transferred to the District Board of Balasore.

149. As in the previous year, there is a considerable increase for the Division in the daily average number of both in and out patients, the figures being 120·36 and 612·98 respectively, against 92·07 and 543·01 in the preceding year. The increase is noticeable in all but a few dispensaries. The slight decrease in the average number of in-patients in Jajpur and out-patients in Dharmasala calls for no remark. But the decrease in the number of out-patients at Khurda, Pipli and Baliana in the district of Puri deserves special notice with reference to paragraph 18 of the Government Resolution on the last year's report. It is to be noted that there was a large influx of pilgrims on account of the special festival at the time of the Rathjatra, and there is a decrease in the average number of daily out-patients in the abovementioned three dispensaries situated within the reach of the pilgrim road. The Collector of Puri says nothing as regards the decrease in Khurda. With regard to the other two dispensaries he says thus:—"The dispensaries at Baliana and Pipli are kept by the Jaganath Road Fund, as they are supposed to be principally intended for pilgrims, though as a matter of fact they are used by residents in the proportion of five to each pilgrim." Further on he says: "I intend to give up the Baliana hospital and only have a temporary building there, as at Jajpur, during the Car festival for the use of the pilgrims, in case the Board does not bear part of the charge of the two dispensaries."

As far as the pilgrims are concerned, temporary dispensaries are calculated better to serve the purpose, as the influx of pilgrims is large only at particular occasions, and that again varies in number from year to year. As regards Satpara dispensary, the Collector's idea is to abolish it as of little use, and to apply the funds thus saved to the dispensaries at Pipli and Baliana as noted above.

There has been a slight increase in the cost of diet in all the dispensaries. The rate of cost and the increase in it in the Jajpur and Dharmasala dispensaries deserve note, and the Collector has been requested to account for both. As regards others, no remarks seem to be called for.

150. On the whole, the dispensaries appear to have worked satisfactorily. The Cuttack General Hospital showed an increase in major and minor operations. In his last visit the Inspector-General of Civil Hospitals is reported to have been satisfied with the variety of major and minor result operations and the practical knowledge of the students of the medical school. The results of the school were also satisfactory. The Committee appointed to enquire as to the advisability of keeping up the institution was satisfied that it was a useful one, and recommended its retention.

151. As regards the Lady Thompson Dispensary, the Collector of Cuttack says:—"The Lady Doctor, Miss Bose, has left, probably not to return. Indeed, as far as I can learn, the finances of the institution could not much longer have permitted of her salary being paid. The appointment of a lady doctor was not the success that was expected. People here are very conservative. This dispensary would be much more practically useful were it made an ordinary dispensary to meet the wants of this end of the town, with a female hospital assistant attached, who could treat women in the cottage hospital in the compound." There is some truth and force in what the Collector says. The Collector will be requested to move the Committee of Management to take his suggestion into consideration.

#### XXVIII.—LIBRARIES.

152. There is no public library in the Division. The district and sub-divisional libraries are reported to be in good order, except that some of the books in Puri require rebinding.

153. In Cuttack the catalogues were revised during the year in terms of Board's circular No. 6 of May 1889. A list of the obsolete and superfluous books was prepared and circulated in other offices at head-quarters and in subdivisions, and a copy was also sent to the District Officer of Angul. Those books that were required by other officers have been sent, and the rest will shortly be sold by public auction, of which notice has issued. The Balasore library, too, was revised during the year. The re-classification and re-cataloguing of the books of the Sadar library in Puri, referred to in the last year's report, have been completed.

154. In Puri there is a very large collection of manuscript copies of Sanskrit works in the Sankaracharya Math (the monastery founded by the disciples of the Hindu religious reformer Sankaracharya). The number of volumes is estimated at about one thousand, written in Devanagri, Telugu, Dravidian, Uriya and Bengali characters, on palm-leaf and paper. It is said that the work of cataloguing this library was once undertaken by Government at the instance of Dr. Rajendra Lala Mitra, but it is not known if the task was completed. The library is said to be very valuable.

#### XXIX.—MUSEUMS.

155. There is no museum in this Division.

#### XXX.—LOCAL SELF-GOVERNMENT.

156. The number of Local Self-Government institutions during the year under report was the same as in 1892-93, viz.—

<i>District.</i>	<i>Institutions.</i>
Cuttack ...	1. The District Board.
	2. The Sadar Local Board.
	3. The Kendrapara Local Board.
	4. The Jajpur ditto.
	5. The Cuttack Municipality.
	6. The Kendrapara ditto.
Balasore ...	7. The Jajpur ditto.
	8. The District Board.
	9. The Sadar Local Board.
	10. The Badrak ditto.
	11. The Balasore Municipality.
Puri ...	12. The District Board.
	13. The Sadar Local Board.
	14. The Khurda ditto.
	15. The Puri Municipality.

157. The year under report was the seventh since the Bengal Local Self-Government Act, III (B.C.) of 1885, came into operation in this Division. The third general election of the members composing the three District Boards and three municipalities took place during the year under report.

158. The three tables given below show in detail the working of the District and Local Boards and of the Municipalities in this Division :—

*District Board.*

DISTRICT.	NUMBER OF MEMBERS.			NUMBER OF MEETINGS HELD IN—		Number of meetings adjourned for want of quorum.	AVERAGE ATTENDANCE OF MEMBERS.		TOTAL RECEIPTS.		TOTAL EXPENDITURE.	
	Appointed by Government.	Elected by Local Board.	Total.	1892-93.	1893-94.		1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9	10	11	12	13

Total ... ..	43	32	75	103	61	8	...	...	1,17,787	1,09,160	1,15,123	1,06,436

There is a decrease in the number of meetings held by the three District Boards and several Municipalities, and an increase in the number of meetings held by the several Local Boards.

Mr. Stevenson writes as follows :—

“The attendance of members was more regular than in 1892-93, and at all meetings the Chairman presided, as desired by Government, when at head-quarters. The Vice-Chairman continued to render valuable assistance.

“The average attendance of members has improved in the Jajpur and Kendrapara Local Boards, and has fallen off in the Sadar Local Board, where, with the exception of a few, the members did not evince much interest in the conduct of business.

“The Chairman of the Local Board attributes this apathy on the part of the members ‘partly to the paucity of the work and partly to the petty nature of the charge devolved upon the Board, as very little is left for its functions since the transfer by the District Board to itself of the control of secondary education and sanitation.’ There may be something in this, but the District Board took action in terms of paragraph 11 of Government Resolution on Local Self-Government and the working of the District Boards for 1891-92.

“There was no change in the duties of the District Board, which were (1) the charge of pounds, (2) middle and primary education, (3) dispensaries, (4) ferries, (5) district and village roads, (6) water-supply.”

159. The majority of the Commissioners in the Cuttack Municipality are reported by the Chairman to have taken a lively interest in municipal affairs. The sanitary condition of the town was on the whole good, and the working of the municipality was generally satisfactory except as to office supervision.

The fourth general election of Commissioners took place during the year under report. The elections excited but little public interest, the total number of voters who attended being only 541 out of 1,643 persons entitled to vote.

160. The Municipal Commissioners held 17 meetings as against 26 in 1892-93, of which 2 were adjourned for want of a quorum, against 5 in 1892-93. Roads and conservancy were duly seen to, and two new ferries and six urinals were added. The dispensary was almost entirely maintained by the municipality.

161. The sanitary condition of the town was better than in 1892-93, when cholera appeared as an epidemic and 225 deaths occurred. An agitation was set on foot by some residents for the exclusion of certain alleged agricultural and isolated villages from the municipal area. The matter was enquired into and the result reported to Government, who directed that the matter should be kept in abeyance till the passing of the new Municipal Act.

The Magistrate reports that something was done towards clearing jungle in all the municipalities, but not nearly so much as should have been.

162. The District Board had the control and management of the following branches of administration—(1) secondary schools, viz., middle class and middle vernacular, (2) special schools, including madrassas and schools for aborigines, (3) ferries, (4) roadside drains, (5) examination of primary schools, (6) grant of scholarships and rewards.

To two Local Boards were delegated the powers of administering grants for pounds, roads (both village and district), primary schools (both for boys and girls). The Bhadrak Local Board had, in addition to these, been specially entrusted with the management of the Bhadrak and the Chandbali dispensaries, the dâk bungalow at Chandbali, and the supervision of Salundi and Acquapada ferries, as they lie within the jurisdiction and easy reach of that Board. The District Officer remarks that “the powers delegated to the Local Boards have been well exercised. On revision of the delegation of powers to these Boards in order to harmonise with the clear wishes of Government, the Sadar Local Board have been relieved as an experimental measure of the administration of the district roads from the beginning of the current financial year; the Bhadrak Local Board to retain them within its jurisdiction so long as the Sub-divisional Officer is the Chairman.”

163. There were three bye-elections held during the year to fill up vacancies caused by removal or transfer of Commissioners.

Municipality.

The fourth general election of this Municipality was also held on 15th January 1894, and 12 members were elected. The elections at each centre were attended by about little more than one-fourth the number of qualified voters. The election of Chairman and Vice-Chairman was smoothly carried out. Dr. Williams was elected Chairman and Babu Radha Charan Das Vice-Chairman. The Magistrate remarks:—"I am glad to be able to state that the so-called party feeling amongst the Commissioners did not hinder good and useful work, and I would add that under the new Chairman healthy signs of, if not unity, at least toleration, are being displayed."

164. Mr. Coxe writes:—"The average attendance of the members was 6.57 against 4.6 of the previous year, which shows

Puri District Board.

an improvement. Babu Harish Chandra Ghose, a local pleader, continues to be the Vice-Chairman, and devotes considerable time and pains to the work of his post, in which he takes much interest.

The management of the pounds, ferries, and village roads throughout the district, except Khurda sub-division, was made over to the Local Board from 1st April 1893, and from the number of meetings held and the average attendance of the members, it is evident that the Board has taken much more interest in the administration of the services it was entrusted with than before.

165. The condition of the Municipality is improving. The net income of the Municipality was Rs. 35,604, exclusive of Rs. 5,000 received from Government as loan for the Baradand drainage work.

Puri Municipality.

The main roads of the town were metalled with laterite stone and the lanes with broken pots, as last reported. Cattle straying about the streets are now impounded, and the pilgrims are not allowed to feed them with grass or straw, except at Pejnala and Sargadwar. The construction of the Baradand drainage work is approaching completion. The result of the last audit of the municipal account was on the whole satisfactory, and the irregularities pointed out are now being attended to.

166. I am able to bear testimony to a marked improvement in the District Board and Municipality of Puri over the state of things that existed last year, and I have separately reported to Government with regard to each of them. The great improvement in the Puri Municipality I attribute to the zeal and energy of the Chairman, Dr. Banks, whose devotion to his duties is conspicuous.

167. In the case of the Cuttack Municipality, I was not favourably impressed with the office work. The office appeared to be undermanned and not to have any clerk of the requisite ability to deal with the affairs of a large office. On the other hand, I can compliment the Chairman on the state of the roads and drains and on the manner in which, with the assistance of some of the Uriya Commissioners, he contrives to widen roads without recourse to the Land Acquisition Act.

In the case of the Cuttack District Board, the services rendered by Mr. Das, Vice-Chairman, are again entitled to special acknowledgment.

168. The Balasore Municipality, while maintaining its executive efficiency, has till recently been conspicuous for faction. I think the Commissioners have done wisely to elect as their Chairman an officer entirely beyond the reach of such influences.

#### XXXI.—EMPLOYMENT OF MUHAMMADANS.

169. In statement XXXII are given the required statistics under this head. There is nothing to add to what I said last year. The Muhammadans appear to have a fair share of employment.

#### XXXII.—POST-OFFICES AND TELEGRAPHS.

170. No new post-offices were opened during the year. On the contrary, one branch post-office was closed in the district of Cuttack, and the branch office at Kendrapara was made a sub-post office and the sub-post-offices at

Aul and Raghunathpur in the same district were reduced to branch offices. The reason for these changes is not known to me. No new lines of telegraph were constructed. An office was, however, opened at Jellasore in the district of Balasore. There is in the district of Puri a line of telegraph along the East Coast Railway line, which is worked only for the Department. Both the Departments are prospering well.

XXXIII.—ZAMINDARI DĀK.

171. The following table shows the working of the zamindari dāk during the year as compared with the preceding one:—

DISTRICT.	Number of estates paying cess.		Percentage on sadar jama.		Receipts.		Expenditure.		Number of lines maintained.		Number of runners employed.		Number of overseers employed.	
	1893-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.	1891-93.	1893-94.	1892-93.	1893-94.	1892-93.	1893-94.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
			Rs. A. P.	Rs. A. P.	Rs.	Rs.	Rs.	Rs.						
Cuttack ... ..	1,581	1,593	0 13 3-93	1 0 0	8,101	9,323	7,940	7,995	28	28	78	78	5	3
Balasore ... ..	818	818	1 4 6	1 2 0	5,251	4,846	4,794	4,982	19	19	51	51	3	4
Puri ... ..	304	402	1 13 3	2 0 0	5,210	5,414	4,776	4,955	10	10	29	29	3	3
Total ... ..	2,703	2,813			18,562	19,593	17,510	17,932	57	57	158	158	11	10

172. During the year under report, the mustajirs or farmers of Government revenue-free estates which are the property of individuals in the district of Puri were assessed with this cess under paragraph 4 of the Board's circular No. 1 of July 1880. This partly accounts for the increase in the receipts in that district. The difference in the rate of assessment partly accounts for the difference in the other districts.

173. No permanent new lines were opened. Three temporary lines were, however, maintained for eight months in the district of Balasore, at the instance of the Postmaster-General, for reasons not reported by the Collector. Nor is it clear whether this will be necessary annually. Further report will be called for and submitted. The other changes noticeable in the above statement call for no special remark.

174. In paragraph 155 of the last year's report it was stated that it might be necessary to revise the rate fixed for Cuttack to meet the charges for carrying the camp dāk of the Magistrate and subdivisional office, which it had been the practice to meet from contract contingencies. The Collector's report shows that a little more than Rs. 48 only was spent for this purpose, though additional temporary runners had to be entertained. It is reported at the same time that nothing was spent for carrying the dāks of the kanungos and outposts. The Collector's report does not state clearly whether chaukidars are still employed. Nor is it clear what is meant by "the rule not being generally known," when it is remembered that, not the public, but a limited number of Government officials only, are concerned. The Collector will be requested to altogether put a stop to the practice of employing chaukidars for carrying such dāks.

The collection work appears to have been done smoothly on the Collector's side.

175. There are said to have been 40 fairs in the district of Cuttack during the year under report, against about 40 in the preceding one. It is not clear whether new ones were started. It is desirable that the District Officers should pay particular attention to the site, water-supply, and other matters of sanitary consideration when new fairs are started. It seems also desirable from this point of view that the sites for new fairs should be reported beforehand to the District Officers, who should decide on their suitability. The attention of all the District Officers will be invited to this. No special arrangements were, however, made or necessary at any of the fairs in this district, except the Baruni

Jatra held in the town of Jajpur, when the municipality provided temporary latrines. No epidemic broke out at any of the fairs, and the police kept proper order.

176. In the district of Balasore a small sum was spent in erecting latrines and digging trenches only at Kawpur fair in the Bhadrak subdivision, and steps were taken to look after sanitary arrangements at other fairs of less importance.

177. In the district of Puri the fairs were the same as reported last year. The Ruth Jatra festival was attended by a larger number of pilgrims than usual. Cholera broke out, but fortunately the number of deaths was insignificant. Sanitary precautions were adopted by the Puri municipal authorities. At the Makar fair in the Khurda subdivision a temporary latrine was constructed and a small staff of sweepers engaged.

178. There were 121 pounds in charge of the District Boards, 56 in Pounds. Cuttack, 42 in Balasore and 23 in Puri, against 53, 43, and 22 respectively in the previous year.

179. In the district of Cuttack the receipts fell from Rs. 7,168 in 1892-93 to Rs. 6,576 in 1893-94. The Collector says no special reason can be assigned for the decrease; it is, however, alleged that the decrease was noticeable in the pounds near the canal embankments, and is attributed to the leniency of the canal authorities in impounding cattle trespassing on the embankments. This explanation does not seem to be satisfactory. The District Board has, however, farmed all its pounds with advantage for the current year, while it retained direct management of all the pounds during the year under report.

180. In the district of Balasore, 25 pounds were farmed out and 17 retained under direct management. The former show an increase in the receipts on account of competition, while the latter show a decrease which is ascribed to continuous rains and floods, on account of which the cattle could not be let out to graze. It is not clear, however, how the rains and floods affected the receipts of one class of pounds and not those of the other. The Collector will be requested to explain this.

181. There is a decrease in the receipts from pounds in the district of Puri, where the District Board farmed out 22 and retained one under direct management. The decrease is not, however, real, as it is due to a part of the demand remaining unrealized at the close of the year, for reasons not given.

182. With regard to the cows and bulls wandering in the streets of the town of Puri, noticed in paragraph 161 of last year's report, the municipal authorities are reported to have now taken steps for impounding such cattle.

#### XXXIV.—SOCIAL AND POLITICAL INSTITUTIONS.

183. The following are the Societies in the Division:—

- (1) The Orissa Association at Cuttack.
- (2) The Landholders' Association at Cuttack.
- (3) The National Society at Balasore.
- (4) The Orissa Sanskrit Samiti at Cuttack.
- (5) The Graduates' and Under-graduates' Association at Cuttack.
- (6) The Kayastha Sabha, or the Association of Bengali Kayasthas at Cuttack.
- (7) The Utkal Samilani Sabha, or the Association of Uriyas at Cuttack.
- (8) The Cuttack Total Abstinence Society at Cuttack.
- (9) The Sanatan Dharmarakshini Sabha at Puri.
- (10) The Gorakshini Sabha, or the Societies for the Protection of Cows at Cuttack and Puri.
- (11) The Puri Temple Repair Committee.

The first, second, and third are political in character, but exist in name only. The fourth and fifth are literary and did something during the year. The Sanskrit Samiti did useful work in taking measures for the organization of the Sanskrit tols and for holding Sanskrit examinations. The Graduates' and Under-graduates' Association appears to have stirred once when the abolition of the Cuttack Medical School was under consideration. The sixth and seventh deal with social matters and do not appear to have done anything during the

year. The eighth and ninth are of little importance. Though the name shows that it is a religious institution, the Sanatan Dharmarakshini Sabha was formed, the Collector of Puri says, to defend some Bairagis at Puri, and the Society is about to cease to exist, as the case of the Bairagis has been judicially decided. The Gorakshini Sabha is a thing of the past, as reported last year. No signs of its vitality have been noticed.

The eleventh is a temporary committee, and did useful work in raising subscriptions and continuing the repairs to the temples at Puri. The repairs of the Bhogamundap and the temple of Bemala were completed. The former was in a dangerous state; iron joists supported by iron pillars were set to support its dome. The floor of the temple of Lakshmi was marbled. Some work was done to the principal temple also. All the works were carried out without any accident. Many works are still in progress. Since the transfer of Babu Bularam Mullick, the Joint-Secretary, Babu Hari Bullab Bose is the principal local authority.

184. The Native Press was represented by the newspapers reported last year. They are—

1. *Utkal Dipika.*
2. *Balasore Sambad-bahika.*
3. *Uriya and Navasambad.*

All the papers were conducted loyally and with moderation. The tone of the Uriya press contrasts favourably with that of the vernacular press of Bengal. The first-named paper is the most widely circulated of the three. It deals generally with questions that concern Orissa, such as the settlement, manufacture of salt, and occasionally with questions of general interest, such as opium, Sanskrit study, cooly law, service rules, and the quarrel between the Hindus and Muhammadans. It deplored the bad feeling that had arisen between Hindus and Muhammadans, without espousing the cause of either section of the community. The other two papers chiefly concerned themselves with questions of local interest.

During the year under report a new periodical was started. With regard to this new periodical the Collector of Cuttack says as follows:—"Another paper called *Indradhanu* (Rainbow), a periodical published at irregular intervals, was started during the year by some of the leading educated men of the town and interior. It was originally set on foot to criticise and bring to notice the works of Upendra Bhunja, the first and perhaps most renowned poet of Orissa, and thereby to give him prominence as a writer. There was a move in opposition by another party, which attempted to give precedence to some other and more modern writers. This latter party published a periodical called *Bijuli* (Lightning) at the press of the Raja of Bamra, a Tributary State in the Central Provinces. For some time the two factions waged a paper war in their respective organs; but of late a more pacific feeling has prevailed."

185. As I reported last year, public opinion in Orissa restricts itself to such matters as are intimately connected with the material welfare of the people, such as the settlement now in progress. The public in Orissa less, if possible, than in Bengal concerns itself with politics, and in this respect the public, with its imperfect means of ascertaining the truth, acts wisely.

186. The marked difference between Orissa and Bengal is to be met with among the educated and half-educated classes: these in Orissa maintain the same attitude of trustful reliance on the good faith of the Government that was not unknown in Bengal a quarter of a century ago. They are the upholders of the Government rather than its detractors. There is no indication at present of that ignorant and vindictive censoriousness that too often characterizes the attitude of a small section of the educated and half-educated classes in Bengal, and which, if it did not usually fall on barren soil, might lead to political danger.

#### XXXV.—SUBORDINATE EXECUTIVE ESTABLISHMENT AND CHARACTER OF OFFICERS.

187. \* \* \* \* \*

#### XXXVI.—CONDUCT OF ZAMINDARS.

188. A considerable number of the zamindars of Orissa appear to be wanting in aptitude for the management of their own affairs; many are seriously

in debt, and it is a very common incident that they are not at the trouble of ascertaining what is due as revenue to Government on the dates of payment of the half-yearly instalments, and thus fall into difficulties under the Sale Law. I am inclined to think that in this respect they are more indolent than the zamindars of Bengal. I cannot attribute the embarrassments that have come to my notice either to the Land Law, under which they have enjoyed for 60 years the increased value of their properties which arises from a rise of rents in the case of all but *thani* raiyats, and to the extension of cultivation; nor can I attribute it to extravagance except, perhaps, in connection with marriages, *sradhs*, distribution of alms, and other religious observances. They certainly are not conspicuous for a display of wealth, nor can they be relied on, as a rule, to support liberally any great public objects. Their charity runs in older and I venture to think less desirable channels, namely, the gratuitous support of vagrants of the religious or pseudo-religious class. Under the above circumstances it might be anticipated that we should find them harsh and oppressive landlords, desirous of recovering their fortunes at the expense of the tenantry; whether from the survival of patriarchal relations here more than elsewhere, or from that indolence which is assumed to be characteristic of the Uriya, such does not seem to be the case. The land system of Orissa, moreover, protects a large class of the tenantry from enhancement during the currency of a settlement, which acts as a further check on the landlord. I do not, therefore, think it can be stated that the zamindars of Orissa are oppressive landlords.

189. The Collector of Cuttack says that in his district the conduct of the zamindars was good on the whole. There was a dispute between the Raja of Sukinda and his raiyats. It was, however, settled amicably. It was once reported that *killa Aul* was in confusion, but nothing has as yet come to light to show that the raiyats there are oppressed. The Collector of Balasore speaks favourably of Raja Baikuntha Nath De Bahadur, Babu Rajnarayan Das, Bhunya Abdus Soban Khan, Kailash Chandra Rai Mahasay, and Rai Govind Bullab Roy Mahasay.

190. There appears no improvement in the relations between the zamindars and raiyats in the district of Puri. The Collector says as follows:—

“The largest zamindar in the district is the Government. The next leading zamindars, as reported last year, are—

“(1) The Raja of Puri. Matters about himself and his estates remain much the same as reported last year by Mr. Walsh. I have never seen the Raja, but the information available to me goes to show that though he may at times have a glimmering of conscientiousness, he is not all that can be desired. He is too much a slave of his attendants ever to make a real attempt to improve himself. The Rani has at last been induced to appoint a competent manager, and it is to be hoped that this appointment will do good.

“(2) The Raja of Parikud seems an excellent landlord as far as I can judge, and to be cursed with unreasonable raiyats over whom he seems to be prevailing.

“(3) The jagirdar of Malud's estate continues to be managed by me as receiver on behalf of his creditors.

“(4) The Chaudhuri of Bhinjarpur. It is understood the Chaudhuris are not at one among themselves. Their estates have fallen into arrears and have been advertised for sale.

“(5) The zamindars of Kothdesh (two brothers) have been much involved in debts of late, and have been very irregular in payment of Government dues. Their estate has at present been advertised for sale, and will, I fancy, be sold next July. It is regrettable that an old and distinguished family should be broken up, but the end is inevitable. They are hopelessly involved, and have not the necessary sense or knowledge to save themselves.

“(6) Of the principal mahants of the several maths at Puri, who hold endowment land, the mahant of Emar is the only person who manages his property well and is the wealthiest. The rest I am informed either mismanage their property or are involved in debt.

“On the whole, there is but little recognition in this district of the principle that property involves any duties beyond ostentation.” I may add that I have seen very little evidence of ostentation in Orissa.

## XXXVII.—GENERAL REMARKS.

191. The year was rather a favourable one than otherwise for crops, except in the Cuttack district, which appears to be in a normal condition of short crops, and has been so for the last three or four years. Prices have everywhere been high, which cannot, I think, be attributed to a deficient harvest, but rather to the influence of prices ruling elsewhere. So far as the agricultural tenant is concerned, I see no reason to think that his condition is otherwise than prosperous, as he must derive some advantage from high prices. The condition of the day-labourer here as elsewhere is not good; there are no local industries which divert this class from being the servants of the tenantry, nor does it appear that they readily leave such service when the opportunity offers. Relief works, when tried, do not seem to attract labour even at periods of the greatest pressure from high prices.

Yet when it is considered how great is the number of Uriyas who leave Orissa for employment in Calcutta and elsewhere, it cannot be alleged that the Uriya is wanting in the enterprise necessary to take his services to a better market than is to be found locally. This leads me to doubt whether the Uriya day-labourer can be so badly off as would at first sight appear. I have heard it stated by an officer who has good opportunities of observing, that many of this class are not free agents, that they have as a rule taken advances from a cultivator or a contractor and cannot leave such service, and that better wages will not tempt them to do so unless the temptation of an advance is added. The same officer says that this position of semi-slavery enables the employer to obtain their services much below the wage that would be paid by another person, and that the labourers are sweated down to the lowest scale that is consistent with their survival. It is possibly here that we must look for the explanation of the fact that wages do not rise in Orissa, as has been pointed out by Mr. McPherson, Subdivisional Officer of Khurda, and others. The only way that we may hope that this bondage will be broken will be by creating a larger demand for unskilled labour. Manufactories are not likely to exist in Orissa, but a railway will doubtless stimulate an increasing number to leave Orissa for places where labour is better remunerated.

The settlement progressed on the whole quietly; less is heard now of the oppression of amins, and the time has not yet come for the raiyats to learn how the settlement will affect them, and they maintain a quiet attitude.

The East Coast Railway has come to a standstill, the decision of the difficult question as to where the Mahanadi bridge is to be built being still under consideration.

The year is remarkable for the large number of pilgrims that visited the Puri temple on the occasion of the Car festival. Ever since Puri has been a place of pilgrimage, pilgrims have visited the temple at considerable personal inconvenience and risk to health and life, and it is a subject of congratulation that in 1893 the abnormally large concourse, which is estimated to have exceeded 100,000 persons, showed an exceptionally low rate of mortality.

The Steamer Companies did yeoman's service in transporting pilgrims to and from Calcutta, and the sufferings experienced were materially lessened thereby. It would be interesting to compare the statistics as to mortality in 1893 with those of a similar occasion before steamer lines existed, and when the whole distance between Calcutta and Puri, over 300 miles, was traversed by road.

The Hemp Drugs Commission visited Orissa, and witnesses were examined at Cuttack and Puri. The Uriya is not in favour of the prohibition of the use of hemp drugs. Similarly, the Uriya witnesses before the Opium Commission were opposed to the prohibition of the use of that drug.

## RESOLUTION ON THE REPORT ON EXCISE ADMINISTRATION IN THE LOWER PROVINCES FOR 1893-94.

### FINANCIAL DEPARTMENT—SEPARATE REVENUE.

*Darjeeling, the 17th October 1894.*

RESOLUTION—No. 433T.-F.

READ —

The Report of the Commissioner of Excise for the year 1893-94, with the observations of the Board of Revenue thereon.

There was no administrative change in the management of this Department during the year. Mr. Krishna Govinda Gupta was Commissioner of Excise throughout the year, and he had the direct assistance of three Deputy Collectors, one of whom was his Personal Assistant, and two were peripatetic Inspectors of Excise. In 18 districts the Department was in charge of Special Deputy Collectors whose whole time was, or should have been, given, and whose pay was charged, to the Excise Department, while in the remaining districts excise work was entrusted to a half-time Deputy Collector on the ordinary staff. In all but three of the former districts there are central distilleries, the working of which demands the careful supervision of the Special Deputy Collectors. The distilleries generally are in immediate charge of Sub-Deputy Collectors or of Kanungos, as Superintendents. Their number was reduced during the year by the closing of those at Hooghly and at Maniktola in Calcutta, and since the end of the year the Mymensingh distillery has also been abolished. The number of Sub-Deputy Collectors now employed is 9, and of Kanungos, inclusive of the Deputy Superintendents of certain distilleries, 27. The Commissioner has not reported how far the old excise darogas have been replaced in the subordinate establishment by men of a superior class. This subject should be noticed in the next report.

2. *Inspections.*—The amount of inspection done by the Commissioner and the Inspectors was satisfactory. With regard to Collectors, it is reported that the central distilleries were insufficiently inspected in Birbhum, Murshidabad, and Monghyr, and that excise inspection generally was neglected in Bogra, Rangpur and Tippera. The Board should draw the attention of the Collectors, of these districts to the matter, and insist on the inspection work being properly done in future. In paragraph 7 of their report, the Board mention certain districts in which the Special Deputy Collectors are stated to have been employed, more or less, on judicial work in breach of the rule that their whole time should be given to excise work. It appears, however, from the Administration Report of the Commissioners, that in 1893 no judicial work was done by those officers in Mymensingh and Champaran, and that only in Midnapore was the amount excessive. The rule should be strictly carried out in future. It is satisfactory to notice that in 16 out of the 18 districts in which Special Deputy Collectors are employed, the minimum number of days prescribed for inspections in the interior (120) was attained or exceeded. Since the close of the year orders have been issued fixing the minimum number of days for touring by these officers at 150, and directing that they are not to be employed on magisterial duties or placed in charge of treasuries. In the other districts the Deputy Collectors of the ordinary staff supervising excise are not to have charge of the treasury, and are required to spend 90 days on tour. The number of days prescribed for these officers last year was 60, and the Lieutenant-Governor is glad to find that there was a deficiency in the tours in only three districts, excluding the Sonthal Parganas and Darjeeling, the circumstances of which are exceptional. The only serious deficiency (24 days) was in Tippera;

the cause of this should have been explained. A subordinate staff of inspecting and preventive officers is maintained in all districts. The movements of these officers should be closely and constantly watched and controlled by the Deputy Collectors and Collectors.

3. *Financial results of the year.*—The revenue from exciseable articles was, as in previous years, realised from fees on licenses for wholesale and retail sale of spirits or drugs, distillery fees, and duty on the actual quantity of country rum, country spirit prepared in the central distilleries, opium, ganja and bhang passing into consumption. Duty on imported liquors forms part of the Imperial customs revenue. A further enhancement of the duty on ganja, and the substitution of a distillery fee of  $2\frac{1}{2}$  annas per gallon, London-proof, for the former fee of one anna per gallon irrespective of strength, were the principal changes made last year in rates. The total receipts of the year, according to the figures returned by the District Officers, amounted to Rs. 1,21,37,096, or Rs. 6,37,096 in excess of the budget estimates. The total charges having been Rs. 6,47,740 against a budget estimate of Rs. 6,96,000, the net receipts were Rs. 1,14,89,356. The Accountant-General's figures show receipts larger by Rs. 28,563, but the discrepancy has to be reconciled. An annual statement of the charges should be obtained from him for comparison with the figures supplied by the Collectors. All exciseable articles show an increase of revenue in the past year, with the exception of madak, chandu and methylated spirits, the largest increase being obtained from the license fees of outstills and the duty on ganja. The incidence of the excise revenue per head of the population amounted to two annas and eight pies, against five annas and five pies and eight annas and four pies respectively in Madras and Bombay, and one anna and nine pies in the North-Western Provinces and Oudh for the year ending the 30th September 1893. The expenditure, on the other hand, decreased by Rs. 6,000; the details of the sub-heads as compared with 1892-93 are given in paragraph 44 of the Commissioner's report. There is an increase of Rs. 9,230 under salaries, with a decrease of Rs. 6,666 under rents and rates, and of Rs. 4,000 under petty construction and repairs. The Commissioner of Excise should furnish details of "petty construction" in future reports, as was done in paragraph 59 of his report for 1892-93.

4. *Relation of growth of consumption to growth of revenue.*—The Board's observation in paragraph 12, that the accepted principle of raising a maximum of revenue from a minimum of consumption, has been carefully kept in view, receives support from the following figures showing the revenue derived from, and the consumption of, the chief articles of excise in the past two years:—

	Revenue.		Percentage of difference.	Consumption.		Percentage of difference.
	1892-93.	1893-94.		1892-93.	1893-94.	
1	2	3	4	5	6	7
	Rs.	Rs.		L. P. gallons.	L. P. gallons.	
Distillery liquor ...	24,03,063	24,45,174	+1·8	402,158	416,867	+3·6
Outstill shops ...	26,27,080	28,07,724	.....	.....	.....	.....
Country rum ...	4,19,717	4,35,308	+3·7	80,176	83,554	+4·2
				Mds.	Mds.	
Opium ...	20,85,635	21,34,867	+2·4	1,934	1,9·0	+1·8
Ganja ...	28,86,066	26,35,045	+6·2	5,451	5,116	-6·1

The consumption of distillery liquor increased more than the revenue derived therefrom. This occurred mainly in Bihar, and is accounted for by the reduction of the duty in that province, which was intentionally made in order to enable that liquor to compete with the cheap outstill liquor and check illicit dealing in the latter. In other Divisions, where higher rates of duty are levied, consumption fell off. In the case of outstill liquor the returns of consumption obtained from the licensee-holders' books are too untrustworthy for quotation.

The revenue from country rum would have amounted to Rs. 4,39,600 in the past year if the full duty of Rs. 5 per gallon had been paid in Bengal on 1,073 gallons imported from Shahjehanpur which passed into consumption. If this sum is taken as the true revenue, the increase over the previous year was 4·7 instead of 3·7 per cent, and exceeded the increase in consumption. The increase in revenue from opium and ganja also gives a larger ratio than the increase in consumption. The reduction in the consumption of ganja, accompanied by a large increase in the revenue, is specially remarkable.

5. The gross revenue, the charges, and the net revenue in the past five years are shown in the following statement:—

YEAR.	Revenue.	Charges.	Net revenue	Percentage of charges.
1	2	3	4	5
	Rs.	Rs.	Rs.	
1889-90 ... ..	1,04,73,431	5,31,382	99,42,049	5·07
1890-91 ... ..	1,04,60,932	6,47,112	98,13,820	6·1
1891-92 ... ..	1,11,29,813	6,67,792	1,04,62,021	6·
1892-94 ... ..	1,16,00,621*	6,53,715*	1,09,46,906*	5·6
1893-94 ... ..	1,21,37,096†	6,47,740†	1,14,89,356†	5·3
Difference between the past two years ... ..	+ 5,36,475	—5,975	+ 5,42,450	—3

\* Revised figures.

† Figures subject to revision by Accountant-General.

Saving a slight fall in 1890-91, the revenue has steadily advanced, the net increase last year over the preceding year being Rs. 5,42,450. The charges at the same time show a gradual decrease in the past three years. Distributed according to the Divisions, the revenue compares thus for the past two years, after exclusion of the advance collections of each year:—

DIVISION.	1892-93.	1893-94.	Difference + or —
1	2	3	4
	Rs.	Rs.	Rs.
Burdwan ... ..	11,57,570	11,61,512	+ 3,942
Presidency ... ..	32,14,624	35,64,906	+ 3,50,282
Rajshahi ... ..	8,81,117	9,37,755	+ 56,638
Dacca ... ..	8,12,196	8,11,233	—963
Chittagong ... ..	2,68,588	2,65,973	—2,615
Patna ... ..	24,28,015	25,85,849	+ 1,57,834
Bhagalpur ... ..	12,09,774	13,08,328	+ 98,554
Orissa ... ..	5,64,242	6,18,447	+ 54,205
Chota Nagpur ... ..	8,37,868	8,75,374	+ 37,506
Total ... ..	1,13,73,994	1,21,29,377	+ 7,55,383

There was thus an increase of over 7½ lakhs last year on comparison of the revenue received in each year on account of the year itself. There were slight decreases in only two divisions, Dacca and Chittagong, while large increases were obtained in the Presidency (including Calcutta), Patna and Bhagalpur Divisions

6. *Revenue under different heads.*—Classified under the different heads, the revenue (without adjustment of advance collections) has been as follows in the past five years:—

ARTICLES OF EXCISE.	Revenue.					1893-94 compared with 1892-93.	
	1889-90.	1890-91.	1891-92.	1892-93.	1893-94.	Increase.	Decrease.
1	2	3	4	5	6	7	8
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Country spirits ... ..	47,07,139	45,28,262	48,14,643	50,30,143	52,52,898	2,22,755	...
Rum ... ..	1,00,669	98,383	2,20,972	4,19,717	4,35,308	15,591	...
Imported liquors ... ..	2,14,080	2,31,095	2,23,644	2,07,092	2,35,169	28,070	...
Beer ... ..	16	71	174	193	224	31	...
Tari ... ..	8,28,514	8,45,586	9,57,405	9,50,379	10,16,575	65,996	...

Charas ... ..	3,555	6,584	7,569	9,097	10,776	1,679	...
Biddhi, sabzi or bhang ... ..	43,141	44,847	46,464	53,559	55,762	2,194	...
Majum ... ..	2,067	1,910	1,962	1,984	2,069	85	...
Madak ... ..	82,825	81,467	85,343	79,089	78,979	...	1,310
Chandu ... ..	35,216	36,207	35,352	31,032	24,476	...	6,556
Spirits used for arts ... ..	143	466	772	1,060	337	...	729
Ganja ... ..	22,59,690	23,11,713	23,92,566	23,80,006	25,35,045	1,54,979	...
Opium ... ..	19,59,491	19,00,312	21,18,826	20,85,035	21,34,807	49,232	...
Miscellaneous ... ..	6,430	6,971	7,973	10,413	10,910	497	...
Total ...	1,04,73,431	1,04,69,032	1,11,39,813	1,16,00,621*	1,21,37,090	5,36,470	8,595
					Net increase	Rs. 5,36,475	

\* Revised figures, owing mainly to the inclusion of the revenue of the new district of Angul and Khondmals.

The revenue from country spirits, which fell by nearly 2 lakhs in 1890-91, has steadily advanced since, and in 1893-94 exceeded the receipts in that year by over 7 lakhs. Tari and pachwai show an unbroken advance since 1889-90, and rum, ganja and opium have also made steady progress from the same year save for a falling off in one year in each case. The settlements of licenses for the current year have again been very favourable, and the fees show up to the 31st May an increase of Rs. 4,44,099 over the amount in the past year.

7. *Country spirit.*—No article of excise contributes so largely to the revenue as country spirit. In the past year the receipts from this source amounted to Rs. 52,52,898, or 43·3 per cent. of the total excise revenue, against Rs. 50,30,143, or 43·4 per cent. in 1892-93. Country spirit is manufactured either at central distilleries or at outstills. The central distilleries are maintained by the Government; stills are worked within them by distillers, and the liquor is passed out, after the levy of the distillery fee and the duty, for sale at licensed shops. Except at a few subdivisions, the circumstances of which are exceptional, the distilleries are located at the head-quarters of the districts, the subdivisions being sometimes served by depôts supplied from them, from which the liquor is taken by the retail vendors. The central distillery system is in force throughout the following divisions and districts:—Burdwan, except certain wild tracts of Bankura and Midnapore, where outstills are allowed; the Presidency, Dacca and Orissa, except the jungle tracts of Cuttack along the frontier of the Tributary States, where outstills were re-introduced in the past year; the Giridih subdivision of the Hazaribagh district; and the Sonthal Parganas district. In the Patna Division, and the districts of Monghyr and Bhagalpur, a dual system of central distilleries and outstills is maintained, the areas served by the distilleries being defined, and outstills being placed at such a distance from the boundary as to minimise the risk of smuggling of outstill liquor into those areas. In the Rajshahi and Chittagong Divisions, in the Chota Nagpur Division, except a small portion of Hazaribagh and Manbhum, and in the districts of Purnea and Malda of the Bhagalpur Division, the outstill system only is in force. In all districts the number of distillery or outstill shops, or of both, sanctioned is fixed with due regard to the requirements of the drinking population, as ascertained by careful enquiry renewed from time to time, and to the policy steadily maintained by the Government of affording no undue facilities for procuring liquor; the sites are selected in consultation with the magisterial and other local authorities, changes being made in deference to their views and the opinion of respectable residents; and the licenses are sold by auction, at upset prices fixed with reference to consumption, so far as it can be estimated, and the prices obtained in previous years.

8. *Changes effected or proposed in the management of Sadar Distilleries.*—The modification in the rate of the distillery fee already referred to was a change of some importance made during the year in the rules relating to central distilleries. It is yet too early to judge its effect, but a comparison of columns 19 and 24 in table V shows that the receipts under this head have fallen in the Patna Division, where it was too high before, considering the weakness of the liquor distilled, and have risen elsewhere, where the spirit distilled is stronger. So far, therefore, the object of the change has been achieved. Another change was the introduction of locked receivers for the spirit passing from the stills on distillation, in order to prevent any fraudulent abstraction. The Board (paragraph 27) were not satisfied that the advantages obtained were commensurate with the annoyance caused by the restriction, and prohibited its extension to distilleries where it had not been tried; but Mr. Westmacott is personally of opinion that the principle is sound that distillers should not have access to the receivers without the presence of an excise officer. The extension of the system must depend on the reports received of its working in the places where it is in force. On the question of issuing liquor from the distilleries at fixed strengths obtained by blending liquors distilled at different strengths, referred to in paragraph 25, the Lieutenant-Governor's remark in the Government order of the 9th June 1894, which referred only to compulsory distillation at a certain strength, not to blending, appears to have been misunderstood. In paragraph 15 of the Resolution on the Annual Report for 1891-92, as also in the Government order of the 19th March 1892, the Lieutenant-Governor desired to convey approval of the system, while expressing the opinion that it should be enforced with discretion. He agrees with the Commissioner and the Board that minute differentiation of strength in the issues from the distilleries should not be allowed, and that the fixing of a few standards of strength, conformably to the wishes of the distillers, who know the tastes of the consumers, tends to simplify the accounts and act as a check on the distillery establishments. The Board are, therefore, at liberty to maintain and, if necessary, extend the system. The plan of fixing minimum prices for the retail sale of liquor, whether at distillery shops or at outstills, which involved minute interference and was never effectual, has been abolished; but the Commissioner now advocates, in paragraph 74 of his Report, that Government should fix the prices to be charged by distillers to the retail vendors, on the ground that the former have practically a monopoly of manufacture in central distillery areas, and that a reduction in the price of distillery liquor will minimise the temptation to smuggle or deal in contraband liquor. The Board (paragraph 30) discourage the proposal as an interference with free trade, and the Lieutenant-Governor agrees with them. The Board observe (in paragraph 32) that it has been considered a desirable policy to encourage the distillers to issue weak instead of strong liquor, but they do not advocate a policy of interference. The Lieutenant-Governor considers that the interference has been on the part of Government, which, by imposing a heavy still-head duty, has encouraged traders to distil at high strength: and the object of lowering the duty and the distillery fee is to allow things to take their course, and the tastes of the consuming classes to be consulted. In Bihar, where the demand is for a cheap, weak and comparatively innocuous liquor, the distillation of strong spirit had the tendency of encouraging drunkenness, or else of driving consumers to the use of illicit spirit.

9. *Changes in the management of outstills.*—With regard to outstills, effect was given from the beginning of the past year to the order of Government, in paragraph 14 of the Resolution on the Report for 1891-92, directing the withdrawal of the restrictions on the capacities of the stills and the fermenting vats, which were introduced some years since on the recommendation of the Excise Commission, but were found after full trial to be vexatious and ineffectual in practice. The licensees of outstills cannot, however, increase the size of the stills already sanctioned without the approval of the Collectors and the Excise Commissioner. The Lieutenant-Governor anticipates no evil results from the change, but the subject should be noticed in the next report. Mr. Westmacott (paragraph 25) deprecates the abandonment of the system followed by him when Excise Commissioner, of fixing the upset prices for the licenses for outstill shops on the basis of the quantity of liquor sold, a system which was condemned in paragraph 19 of the Resolution quoted above. Seeing that the information

procurable as to the quantity of liquor sold at the outstills is generally untrustworthy, the Lieutenant-Governor is of opinion that the average fees realised at the auctions in the previous three years must be the main guide for the calculation of the upset prices.

10. *Revenue from country spirit.*—Of the total revenue from country spirit, Rs. 24,45,174 were contributed by the central distilleries and the shops dependent on them, and Rs. 28,07,724 by the outstills, there being in the former case an increase of Rs. 42,111 and in the latter of Rs. 1,80,644 over the receipts in the previous year. The number of distillery shops settled increased from 1,175 to 1,255, or by 80, and of outstill shops from 2,007 to 2,034, or by 27; but the total number of shops of the two classes was still much below the annual average of the five years 1888–93. The increase in each case in the past year is explained to be partly due to the settlement of a larger number of the sanctioned shops during the past year. For the purpose of ascertaining the number of new shops it is necessary to compare, not the number of shops actually leased, which is always a little below the sanction, but the number of sanctioned shops in each year. This comparison should be made in future reports, and explanation of any increase given. From figures separately supplied by the Excise Commissioner, it appears that for the past year the number of sanctioned distillery shops was 1,292 against 1,243 in 1892–93, and of outstill shops 2,041 against 2,029. The Lieutenant-Governor trusts that the Board and the Commissioner will continue to check carefully all proposals for an addition to the number of existing shops, and to accord their sanction only in cases where the opening of a new shop is found necessary to meet a local demand which might otherwise be supplied by illicit dealing. In the Burdwan Division there was a decline in revenue from country spirit in all districts except Birbhum, but the loss was almost made up by increased receipts from pachwai and tari. It is clear from the figures furnished by the Commissioner that illicit distillation prevails largely in the Jahanabad sub-division of the Hooghly district and in Bankura, and the Lieutenant-Governor will be prepared to consider any proposals which the Board may desire to submit for the entertainment of special police in these tracts. The Presidency Division shows an increase of nearly Rs. 8,000 in the revenue, and a simultaneous decrease of nearly 6,000 gallons in consumption. In the Rajshahi Division, with Purnea and Malda, an increase of Rs. 40,820 was obtained. The Dacca Division shows a slight increase, a heavy falling off in Dacca, and a slight one in Backergunge, being compensated by a large rise in Mymensingh and a smaller one in Faridpur. The decrease in Backergunge is attributed partly to the use of country-made Eau-de-Cologne as a stimulant, which will be noticed further on. In the Chittagong Division the consumption of spirit is very limited. The revenue rose during the year owing chiefly to better settlements of the licenses. The Patna Division, with the addition of the districts of Monghyr and Bhagalpur, yields the largest revenue from country spirit, the amount received in the past year being Rs. 18,09,289 against Rs. 16,85,515 in 1892–93, showing an increase of Rs. 1,23,774, which was obtained in both the distillery and the outstill areas. Even the revenue from distillery liquor, which has long been on the downward grade, has commenced to rise as shown in paragraph 93 of the Commissioner's Report, and this may be the result of the measures lately taken to reduce its costliness. The lower classes of these districts are much addicted to drink, but the liquor consumed is ordinarily weak, and there is also a very large consumption of tari, which is still weaker. An increase of revenue was also obtained in the Sonthal Parganas and the Orissa and Chota Nagpur Divisions, Palamau contributing the largest amount in the latter division, owing to the closer attention paid to excise since its formation into a district.

11. *Reduction in the number of distilleries*—The suggestion (paragraph 30) that some of the smaller distilleries should be abolished, and their place supplied by dépôts furnished from other distilleries, should form the subject of a separate report. The substitution might perhaps be advantageously effected in the Sonthal Parganas, where five central distilleries are now kept up.

12. *Country rum.*—With the view of checking the competition of country rum with country spirit, the substitution of a strong for a weak liquor being undesirable in the interests of the people, the duty on rum was raised from Rs. 4 to Rs. 5 per gallon London-proof in certain districts from the 1st April 1892.

The effect of the change in 1892-93 was a decrease in consumption, but a recovery took place in the past year. The total quantity passing in consumption from the distillery at Sibpur and by importation from Shahjehanpur in the North-Western Provinces and Aska in the Madras Presidency was 83,554 gallons London-proof against 80,176 gallons London-proof in 1892-93, showing an increase of 3,378 gallons London-proof. These figures, however, include the exports to Assam. If these exports are excluded, the actual increase in consumption in Bengal itself was, as the Board report, 640 gross gallons. In future reports the quantity exported to Assam and consumed in the districts outside Calcutta should be shown in London-proof gallons. The duty rose during the year from Rs. 4,00,321 in 1892-93 to Rs. 4,13,734. The income from license fees being insignificant, the total revenue from rum rose from Rs. 4,19,717 to Rs. 4,35,308.

13. *Imported liquor.*—The excise revenue from imported liquor is made up entirely of fees for licenses for wholesale vend, and for licenses for retail in shops, at hotels and railway refreshment rooms, and on steamers. The total receipts amounted during the year to Rs. 2,33,162 against Rs. 2,07,092 in the preceding year. The number of hotel, railway refreshment room and steamer licenses increased, but licenses for wholesale and retail shops fell off considerably in Calcutta owing to the enhancement of the fees from Rs. 50 and Rs. 600 to Rs. 300 and Rs. 1,000 respectively. This reduction is satisfactory, as it implies the closing of a large number of shops for the sale of cheap imported spirits. Regarding these spirits the Commissioner writes (paragraph 101):

“Most of the cheap and low class foreign spirits imported into Calcutta is made in North Germany from starch roots, and is shipped here from Hamburg and London. All the varieties of these spirits (brandy, whisky, gin, spirits of wine, and spirits, other sorts), except some consignments of gin, are imported over-proof, in order to save freight. Nearly three-fourths of the total quantity imported is Hamburg spirits of wine, the average strength of which is seldom less than 63° O. P. The greater portion of the imported liquors sold in the native shops is concocted in Calcutta from these spirits of wine. The manipulation begins after they are cleared from the Custom House. The strength is reduced according to requirements, flavouring essences and colouring matter are added, and the mixture is variously sold as whisky, brandy, gin and even as port and sherry. Gaudy and glaring labels are used, and the number of brands, specially of brandies and whiskies, is enormous, though care is apparently taken to avoid a close imitation of any recognized trade marks or an infraction of the provisions of the Merchandise Marks Act, the Penal Code, or the Sea Customs Act, as amended by Act IV of 1889. These manipulated spirits are sold at an average strength of 40° U.P. The cost price of a dozen bottles is about Rs. 8, and the wholesale price Rs. 10-8 to Rs. 12. The retail price varies from Re. 1-4 to Re. 1-6 a bottle, which leaves a very large margin of profit. The importers of such spirits are known, and they have been warned that if they sell German spirit so labelled as to show it to be French brandy, English gin, Scotch whisky or anything other than what it really is, they will make themselves liable to prosecution.”

The Board add—

“A condition has been inserted in all the licenses issued for the current year binding the licensee not to possess or sell any spirituous or fermented liquor other than country rum, unless the bottle bears a label or capsule, or the cork is sealed with a seal showing the name and style of the firm or shop by which, and the place at which, the liquor has been bottled, and the country of manufacture. It is beyond the power of the law to prevent the bottling and concoction of imported liquors so long as the provisions of the Indian Penal Code relating to trade marks are not infringed, and so long as the requirements of the Merchandise Marks Act are satisfied. The measure adopted should go some way towards diminishing the use of liquors locally manipulated, as the purchaser will know that it is not the original article which he is buying.”

14. *Tari.*—Tari, or the sap drawn from palmyra and date trees, is an important source of excise revenue, the receipts last year having amounted to Rs. 10,16,375 against Rs. 9,50,379 in 1892-93. The liquor is used as a stimulant in a fermented state: when fresh and unfermented, it is a pleasant beverage having no intoxicating effect: when fermented, it is said to be nearly the same strength as about weak country liquor, but experiments should be made with the hydrometer to support this assertion. It is not distilled in this Province. Fresh tari is largely used in some districts for the manufacture of molasses, and is in such case exempt from taxation, the exemption extending to the whole of the Dacca Division under a notification issued by

the Government in 1883. In other districts a small fee only is levied, 2,461 licenses granted in the past year having yielded a revenue of only Rs. 7,211. The tari revenue is thus practically derived entirely from the fermented juice. The districts of Bihar contribute by far the largest share, and the proper regulation of tari taxation in those districts is a matter of great importance. A commencement has been made towards the introduction of the Madras system of fixing the license fee according to the number of trees tapped, a schedule of trees being filed by every applicant for a license, and the trees being subsequently marked for identification; but for the full introduction of the system it may be necessary to amend the law. The Board have been requested to submit a report on the subject, furnishing an estimate of the initial cost of registering and marking the trees, and of the future annual cost of the establishment required for maintaining the registers and detecting breaches of the rules, and this report is awaited. If further delay is unavoidable, the Board are requested to report at once on the further question which has been referred to them, whether an officer should be deputed to Madras to study the system on the spot. It is desirable that any information required for the further development of the system should be obtained as early as possible, in order that arrangements may be made before the settlements of the licenses for the ensuing year.

15. *Pachwai*.—This liquor, prepared by the fermentation of rice or marwa (*Eucaline Corocana*) and other grains, is a favourite beverage of the aboriginal or hill tribes who are found mainly in the districts of Burdwan, Birbhum, Bankura, Midnapore, Murshidabad, the Sonthal Parganas and Darjeeling. In other districts licenses are granted where settlements of the aboriginal tribes exist. Besides the licenses for sale, which yielded last year a revenue of Rs. 3,27,827 against Rs. 3,17,699 in 1892-93, licenses for home consumption are granted to the headmen of villages at low fees fixed according to number of households. In certain tracts free home-brewing is permitted. These relaxations of the ordinary excise rules are necessary in the interests of the aborigines, to whom pachwai is nutritious as well as stimulating, and who, if subjected to a stricter system, might be driven to the illicit manufacture and use of stronger liquor. The system appears to have worked well in the past year, and it has the Lieutenant-Governor's full approval. An attempt is being made to compel vendors of pachwai to keep accounts of their transactions, and also to ascertain the quantity of material used and the alcoholic strength of the liquor, with the view of obtaining better information for the fixing of the license fees. The attempt should be persevered in for statistical purposes and for general information, but the Lieutenant-Governor does not desire to see any increase in the rate of taxation on this simple and useful beverage.

16. *Ganja*.—The proceedings of the Hemp Drugs Commission, whose report has not yet been received, have attracted special attention to ganja and its congeners during the year. Ganja is grown under close supervision in a compact area, with Naogaon in Rajshahi as its head quarters, and is exported thence to golahs (or bonded storehouses) in the districts, from which it is issued on payment of duty to retail vendors. With a smaller area under cultivation there was a considerable increase in the outturn last year. The total quantity consumed in Bengal during the year, however, shows a satisfactory decline from 5,451 to 5,116 maunds, while the revenue, owing mainly to the increase in the rates of duty, rose from Rs. 23,86,066 in 1892-93 to Rs. 25,35,045. Bhagalpur, Purnea, Mymensingh, Monghyr, Puri, Gaya and the Sonthal Parganas gave the largest increases in receipts. The figures of consumption in Orissa show that, while the total quantity for the province has fallen from 241½ to 236½ maunds, the quantity of Garjhat ganja consumed in the district of Puri has increased from 5 maunds 14 seers to 18 maunds. It would thus appear that the enhancement of the duty on this kind of ganja has not checked its licit use in Puri. In Cuttack and Balasore, however, the drug did not come under taxation, although its consumption on the borders of the Tributary States is suspected. The local officers must continue their efforts to check any smuggling. The exports include 145 maunds sent to London, no mention of such exports having been made before: the nature and growth of this trade should be watched.

17. *Production and distribution of ganja*.—A perusal of section XII of the Excise Commissioner's Report leads the Lieutenant-Governor to think that

care should be taken to trace and compare the consumption of ganja year by year. The figures for 1893-94 appear to stand as follows:—

Estimated produce (paragraph 123)	...	...	Mds. 9,755
Exported from Rajshahi (paragraph 125)	...	...	7,434
Quantity unaccounted for, and remaining in producers' godowns	...	...	2,321
Details of quantity exported	...	...	7,434
Consumed in Bengal (paragraph 130)	...	...	Mds. 5,116
Sent to North-Western Provinces (paragraph 133)	...	...	463
" Nepal (paragraph 134)	...	...	234
" Mauritius	...	...	59
" Sikkim	...	...	1
" Hill Tippera	...	...	2
" Orissa Tributary States	...	...	4
" Assam	...	...	731
" Kuch Bihar	...	...	76
" London	...	...	145
Total accounted for			6,831
Balance remaining (presumably) in golahs	...	...	603

A statement of this kind should be drawn up year by year, and the manner of disposal of the balance unaccounted for should be traced. The actual balance in the golahs at the close of each year should be verified.

18. *Bhang*.—Bhang is a variety of hemp found wild in many districts of Lower Bengal and Bihar. For excise purposes it is stored and retailed in the same way as ganja, but the quantity thus taxed must be a fraction only of what is actually used, and the facility with which it can be procured renders abortive any attempt to suppress its illicit use. The revenue from bhang increased during the year from Rs. 53,558 to Rs. 55,752, with a decline in consumption from 1,034 to 943 maunds. The decrease was marked in Calcutta, where the drug is chiefly consumed, owing to a rise in the retail price caused by enhanced license fees. In Gaya, which is also a large consumer, a greater influx of pilgrims is said to account for a considerable increase in consumption.

19. *Opium*.—Excise opium is supplied to the licensed vendors from the district treasuries at prices varying from Rs. 16 to Rs. 32 per seer. The minimum price is fixed for the districts of the Patna Division, where the poppy is cultivated, with the view of removing the temptation of obtaining the drug illicitly from the cultivators. An enquiry was made during the year into the question whether the low price of excise opium in those districts does not tempt vendors to export it to other districts where the price is higher, but the Government eventually accepted the Board's view that such exportation, if on a large scale, could be easily detected from any abnormal increase in the quantity of the drug taken from the treasuries, while an enhancement of the price would offer greater inducement to the cultivators to keep back a portion of their produce for illicit sale. It was found necessary during the year to regulate the supply of opium to the shops in the Tributary States of Orissa bordering on the districts of Cuttack, Balasore and Puri, so as to equalize taxation on both sides of the border, and prevent the vendors in the Tributary States from underselling those in British territory. The Lieutenant-Governor desires that the retail price of opium per tola in each district may be reported in future and shown in Appendix D of the Report. The total revenue from excise opium rose last year from Rs. 20,85,635 in 1892-93 to Rs. 21,34,867, both license fees and duty contributing to the increase. The quantity of the drug sold also increased from 1,934½ to 1,970 maunds, or by 35½ maunds, but it was lower by nearly 36 maunds than the quantity sold in 1891-92. Increases took place in Calcutta and 19 districts, but were generally slight, except in Calcutta, Cuttack, Balasore, and Manbhum. In Calcutta the increase was due to large consumption by the chandu shops, but was small compared with a heavy decrease in the previous year. The increase in Cuttack was due to the inclusion in the return of the year of a quantity of the drug sold in

1892-93 to the Dhenkanal State. The increase in Manbhum is due to the opium vendors of the Gangpur State having taken their supplies from that district. An increase of  $3\frac{1}{2}$  maunds in Hooghly is attributed to the detection of some important smuggling cases in the previous year, and to a stricter watch being kept on the shops bordering on French Chandernagore, into which opium has long been smuggled from the producing districts. A considerable decrease in the quantity of opium taken from the treasury occurred in Chittagong, and is possibly due to the regulation of the supply to the vendors according to local requirements, and the consequent check on smuggling into Burma. The district of Murshidabad, in which consumption has steadily fallen in the past three years, and smuggling is suspected, appears to require the special attention of the excise authorities.

20. *Madak*.—This is a preparation of opium for smoking. A considerable reduction in the revenue occurred in Calcutta, owing to the prohibition of smoking on the premises of the licensed shops. The reduction of the limit of retail sale and of private possession to one tola, and the fixing of a fee of Rs. 50 for a special license for manufacture for domestic consumption, have also had an effect on the revenue. The Lieutenant-Governor does not regard the decrease in revenue with regret, but it would appear from the very great increase in the number of prosecutions for unlicensed manufacture, and the fact that only one license was taken during the year, that the fee of Rs. 50 for a special license is prohibitive and merely encourages illicit practices. The Board should at once submit a proposal for the reduction of the fee to a reasonable rate.

21. *Methylated spirit*.—This spirit is professedly imported for use in the arts, manufactures and chemistry, but evidence exists that much of the foreign imports, received mostly from Germany, is manipulated into Eau-de-Cologne and sold for use as spirit, and it is also suspected that methylated spirit is drunk after dilution with water or used for the adulteration of ordinary spirit. Methylation with caoutchoucine, which is the only substance used at the Custom House, Calcutta, effectually renders spirit unfit for use as liquor, but spirit methylated with wood-naptha, as in the case of most of the foreign imports, can with the admixture of essences, be manipulated into a potable liquor, and it is this kind which passes into consumption in the form of Eau-de-Cologne. The Collector of Backergunge has drawn attention in his last administration report to the large consumption of the so-called Eau-de-Cologne in his district, and the Lieutenant-Governor learns that the Commissioner of Excise will submit a separate report, with suggestions for suppressing the abuse which has grown up in connection with imports of methylated spirit. Much loss is at present caused to the excise revenue by the competition of this spirit, which pays an *ad-valorem* duty of 5 per cent., and is seldom less than 50° over-proof, with the more heavily taxed ordinary liquor, whether imported or country-made.

22. *Offences against the Opium and Excise Laws*.—While the number of prosecutions of licensees for petty and isolated infractions of the conditions of their licenses shows a satisfactory decline, prosecutions for other offences have increased; the Police, and to a less extent the Excise officers, having exhibited greater vigilance than in the preceding year. The net increase in cases is, however, due to the numerous prosecutions for unlicensed manufacture of madak. The total number of persons prosecuted was 5,138, against 4,634 in 1892-93, and the percentage of convictions also rose from 84·8 to 85·2. A marked increase in the number of prosecutions and convictions for illicit distillation of country spirit occurred in the Sonthal Parganas, and it may be hoped that a check has been given to the offence in that district. Illicit distillation seems to prevail largely also in Bankura, Midnapore, Angul, Singhbhum, and the Jehanabad sub-division of the district of Hooghly. The total amount of fines imposed for breaches of the excise laws and rules was Rs. 89,366, of which Rs. 57,791, or 64·6 per cent., were realised. Under both heads there was an increase as compared with the preceding year. Simultaneously with an increase in the number of cases, an advance in the amount paid as rewards is to be expected, and the total sum expended in the past year in payment to Police and Excise officers and informers accordingly rose from Rs. 68,252 in the previous year to Rs. 74,697. The Lieutenant-Governor is glad to learn that the necessity

for prompt payment of rewards, especially to informers, was fully recognized during the year.

23. The thanks of the Government are due to Mr. Krishna Govinda Gupta for his successful administration of the department during the year, and to the Board for their supervision and for the advice which they have given on various matters. The Commissioner expresses his obligation to the Divisional Commissioners and the Collectors generally, and to some officers in particular, and speaks favourably of the work of the Special Deputy Collectors as a body. The names of the officers specially mentioned by him will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

*Offg. Secretary to the Government of Bengal.*

## RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF THE PURI LODGING-HOUSE ACT IN BENGAL DURING 1893-94.

MUNICIPAL DEPARTMENT—MUNICIPAL—No. 490T.—M.

*Calcutta, the 15th October 1894.*

### RESOLUTION.

READ—

The reports from Commissioners of Divisions on the working of the Puri Lodging-house Act [IV (B.C.) of 1871 amended by Act II (B.C.) of 1879] during the year 1893-94 in the various places in their Divisions to which it has been extended.

SINCE 1888 it has been customary not to review these reports separately, but to include in the annual resolution relating to the municipalities in Bengal a short paragraph on the working of the Lodging-house Act in the Province. As, however, the Act has now been extended to several towns and areas, and its operation has assumed greater importance, a separate resolution has been considered desirable.

2. *Extension of the Act.*—The Puri Lodging-house Act IV of 1871, as amended by Acts II of 1879 and I of 1884, is in force in the towns and areas

*In the Burdwan Division.*

1. Garhbeta.
2. Dantun.
3. Ulubaria.

*In the Presidency Division.*

4. Nadia.

*In the Chittagong Division.*

5. Sitakund.

*In the Patna Division.*

6. Gaya.

*In the Bhagalpur Division.*

7. Deoghur.

*In the Orissa Division.*

8. "Chattis" on the Jagannath Road in the district of Cuttack.
9. Chandbali.
10. "Chattis" on the Jagannath Road in the district of Balasore.
11. Puri town.
12. "Chattis" on the Jagannath Road in the district of Puri, and
13. Jajpur.

named in the margin. Reports have been received on the working of the Act in the twelve places first named; but although the Act was extended to Jajpur in September 1891, no report has yet been submitted. The Commissioner states that, owing to the bye-laws not having been sanctioned, the machinery of the Act could not be put into motion. This explanation cannot, however, be regarded as adequate, for the regulation, inspection and licensing of lodging-houses, the most important functions of the Act, are provided for in the Act itself and not by bye-laws. The Commissioner should, therefore, issue orders to the Magistrate to take immediate steps to enforce the Act in the town. The bye-laws for all the places in the Orissa Division to which the Act has been extended are now with the Legal Remembrancer for an expression of his opinion, and will be confirmed shortly. The Act was also extended

in February 1894 to Bhubaneswar, a sacred place where pilgrims halt on their way to Puri, but it did not come into operation during the year under report.

3. *Income.*—The total income of the year was Rs. 47,361, against Rs. 27,380 in 1892-93; the opening balance was Rs. 16,650, and the closing balance Rs. 31,811. The fees realized for licenses for the reception of pilgrims showed a large increase, from Rs. 18,233 in 1892-93 to Rs. 34,868, and those for the certificates of the Health Officers as to the suitableness of the houses, from Rs. 1,162 to Rs. 1,576. This was mainly due to the year having been an auspicious one for pilgrimage to Jagannath, and accordingly in Puri the realizations under the former head, Rs. 18,070, were nearly four times as great as in the previous year. At Gaya, too, there was a substantial increase of more than Rs. 2,000. In Deoghur the fees produced Rs. 502 more than in the previous year 1892-93, owing to the rate having been raised from 2 to 4 annas per lodger. The rate for lodging-houses on the Jagannath Road in the Puri district was enhanced in the year 1891-92 from one pice to 2 annas, and the revenue increased in the year under report by nearly Rs. 500 without causing any reduction in the amount of licensed accommodation.

The income of the "chattis," or lodging-houses, on the Jagannath Road in the districts of Cuttack, Balasore, and Puri, includes the rents received from

the roadside lands, which were acquired in excess of actual requirements when the road was made. The collection of the rents appears in each case to have been satisfactory.

4. *Expenditure*.—The largest item of expenditure (Rs. 9,295) was under the head of contributions. Of this amount Rs. 4,710 were contributed by the Lodging-house Fund of Puri to the local Municipality. Where a municipality exists it seems generally advisable to entrust to it the expenditure of the allotments from the Lodging-house Fund for conservancy and sanitation, but it is desirable that the reports should show how the contribution has been expended in each case, and this information should be furnished in future. The expenditure under the head Medical is shown to be Rs. 7,719, but besides this Rs. 2,879, which appears in the accounts as a contribution, was really spent on medical requirements. Mr. Coxe, the District Magistrate of Puri, complains of the heavy expenditure on dispensaries incurred by the lodging-house funds belonging to the Jagannath Road in his district. He argues that the permanent residents get much more benefit from the dispensaries than the pilgrims, and thinks that one-sixth of their cost is all that the Lodging-house Fund should be called upon to contribute. Mr. Coxe has since sent up proposals for the re-arrangement of the expenditure of this fund, and these are now under the consideration of Government. The expenditure on construction (Rs. 662) was inadequate, and, as the closing balances were in many cases large (notably in those of Puri and Sitakund, and the "chattis" on the Jagannath Road in Cuttack), there was no reason for any parsimony. Since the close of the year proposals have been submitted to use portions of the balances of the two last-named funds on sanitary works.

5. *Prosecutions*.—The number of persons prosecuted for lodging pilgrims without a license, for lodging more than the licensed number, and for other offences against the Act and the bye-laws, was 265 against 198 in 1892-93, and the number convicted was 215 against 144. The amount of fines realized rose from Rs. 1,378 in 1892-93 to Rs. 2,051. In the town of Puri 138 persons were prosecuted, of whom 112 were convicted, 13 acquitted, and 13 cases remained pending at the close of the year. The Magistrate of Cuttack complains of the difficulty of enforcing the provision for the taking out of licenses for lodging-houses along the roads in his district, owing partly to the abolition of many police outposts. He must do his best with the existing means at his disposal to meet the difficulty. The law was, no doubt, more frequently disregarded in the past year owing to the unusually large influx of pilgrims. The Commissioner should consider the Magistrate's suggestion that where the "chattis" stand on Government land, the taking out of licenses should be made a condition of leasing.

6. *Public health*.—No diseases in an epidemic form broke out in Garhbeta during the year. At Dantun 8 cases of cholera were treated in the hospital, in which 3 died and 5 recovered. Cholera broke out in an epidemic form at Ulubaria when pilgrims were returning from Puri after the car festival: 66 persons were attacked, of whom one-half died and one-half recovered. There was only one case of cholera at Sitakund. No epidemic outbreak of disease occurred in the lodging-houses at Gaya, but the mortality among pilgrims was greater than in the previous year owing to the visit of a larger number of pilgrims to the town. The total number of deaths was 282. Of these, 163 were from fever, 82 from cholera, and 31 from other causes. The number of cholera cases treated in the hospital maintained by the Lodging-house Fund was 107, and of these 88 were pilgrims, the rest being the people of the town. Cholera deaths among pilgrims were 74, most of the patients having been received in a moribund state, due to exhaustion from long journeys, fasting and other hardships. In the dispensaries maintained on the Jagannath Road in the district of Puri, 56 persons treated were for cholera, of whom 21 were cured and 35 died. The reports from the places named in the

Nadia.

Deoghur.

Chandbali.

Puri (town) and "chattis" along the Jagannath Road in the district of Balasore.

margin are silent on the subject of the health of the pilgrims during the year. A statement in the following form should, wherever statistics are available, be incorporated in future reports. Where figures are not available, the health of the pilgrims should be commented on generally, and it should

be always stated whether or not any disease in an epidemic form occurred among them :—

7. A perusal of the reports shows that much good work is being done under the Act in most of the places to which it has been extended. The powers which the Act gives to inspect and regulate the lodging-houses, and to compel the provision of adequate and suitable accommodation for pilgrims, are of the utmost value. Its successful working depends mainly on the interest taken by the individual Magistrate or Health Officer, and the Lieutenant-Governor sees no reason to believe that there has been any shortcoming on the part of these officers during the year. In the Puri district especially much has been, and is being, done for the comfort and convenience of the pilgrims, under the energetic management of Dr. Banks, the Health Officer, supported by the District Magistrate. Lodging-houses to the number of 638 were licensed, with space for 17,050 lodgers, 4,039 inspections were made by the Health Officer and Assistant Health Officer, 11 new pukka and 34 cutcha lodging-houses were erected, and numerous smaller improvements were carried out during the year. In the "chattis" on the Jagannath Road in the Puri district, lodging-houses were frequently inspected to prevent overcrowding, and prosecutions were in some cases instituted. The food in the bazars was examined, and, if found unfit for consumption, was destroyed. The condition of water-supply at Puri, however, is still unsatisfactory, and some of the wells were closed during the year. The Lieutenant-Governor relies on the Magistrate and the Health Officer to continue their efforts, with the help of the Municipal Commissioners, to effect such improvements in the water-supply as may be practicable. The Swetganga tank, which is situated in the heart of the town, is in a very insanitary state, and the owner has not yet given sufficient assistance for its improvement. This question will be dealt with in the Resolution on the administration of Municipalities in the past year. In Gaya the inspection of lodging-houses and the issue of orders to cleanse lodging-houses, drains, &c., appear to have been well attended to, and the lodging-houses are reported to have been in good order. In the other places to which the Act has been extended, the operations are on a smaller scale, and the work of the year needs no particular comment.

ORDER.—Ordered that a copy of this Resolution be submitted to the Government of India, in the Home Department, and that copies of it be forwarded to the Commissioners of the Burdwan, Presidency, Chittagong, Patna, Bhagalpur, and Orissa Divisions, for information.

Ordered also, that a copy of the Resolution be communicated to the Sanitary Commissioner and to the Sanitary Board, and that it be published in the *Calcutta Gazette* for general information.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

*Offg. Secretary to the Govt. of Bengal.*

 (b) Rent of road-side lands credited to the Jagannath Road Fund.  
 (c) Includes Rs. 1,150 rent of road-side lands.

**RESOLUTION ON THE ADMINISTRATION REPORT OF THE  
COMMISSIONERS OF THE PORT OF CALCUTTA  
FOR 1893-94.**

No. 2298 Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

*Dated Calcutta, the 18th October 1894.*

**RESOLUTION.**

READ—

The Administration Report of the Port Commissioners of Calcutta for 1893-94.

THE consolidated debt due to Government by the Commissioners which at the beginning of the year stood at Rs. 38,46,346, was reduced by Rs. 1,54,771, and a further sum of Rs. 1,36,000 was invested in their own debentures. The gross debt of the Commissioners on 31st March 1894 amounted, exclusive of advances made by Government for the construction of the Kidderpore Docks, to Rs. 1,14,56,575, and the total investments at credit of the sinking fund have increased from Rs. 10,38,500 to Rs. 11,74,500 at the close of the year.

2. Against this debt the Commissioners hold block to the value of Rs. 2,06,64,074, and reserve funds amounting to Rs. 21,54,194 in addition to the valuable Strand Bank lands extending from Chandpal Ghât to Aheereetollah, for which however an annual rent of Rs. 37,292 is payable to Government.

3. An addition to the block of Rs. 3,51,724 was made during the year, the chief items being a new lightship and a new dredger. On the other hand Rs. 2,90,345 were written off, Rs. 2,35,235 of which was the value of the dredger *Octopus* sunk on the 22nd April 1893.

4. On a representation from the residents of Howrah, objecting to the gradual erection of huts and sheds among the avenue of trees along the wharf, a Committee was appointed to consider and report on the matter, and it was decided, in view of the necessity for providing increased accommodation, to widen the foreshore road by adding a berm of 80 feet along the river side of the wharf. Thirty feet of this width is to be maintained clear of huts and sheds, and the remaining width of 50 feet is to be utilized for business purposes, but no structure is to be allowed within 45 feet of the line of trees. This work was commenced in January 1894, and at the end of the year, two-thirds of the earthwork had been completed.

5. The total amount received from Government on account of the Dock loan up to the close of 1893-94 is Rs. 2,87,70,566, of which the sum of Rs. 7,587 was advanced during the year. Against this advance the expenditure has amounted to Rs. 2,87,39,974, of which Rs. 6,53,611 were spent during the year.

Both the caissons for the lock entrances were finished, and the one adapted for the 60 feet lock entrance has been utilized for locking vessels, which are too long to be admitted between the lock gates in the usual manner. By this means the lock chamber is increased in length by 36 feet, and rendered long enough to take in all vessels visiting the port, except two of the Brocklebank line.

During the year 26 additional hydraulic cranes were imported from England and were erected on the Dock walls. With this additional supply the Dock is now fully equipped with cranes, of which 51 are placed on the Dock walls and 5 at the tidal basin.

6. In regard to the revenue account, the year opened with a balance of Rs. 5,70,255, and the income for 1893-94 amounted to Rs. 43,47,834. The expenditure, including sinking fund renewals and improvements and repayment of loan, amounted to Rs. 43,15,676, leaving a balance of Rs. 6,02,413. The income of the year exceeded the budget estimate by Rs. 2,44,172, the increase being chiefly in the Jetties, including the Petroleum Wharf and Tea Warehouse, and the Harbour Master's Department. In the latter department the large earnings from mooring hire were due to the unusual number of vessels laid up in the port for long periods, and consequently cannot be looked on as altogether satisfactory.

7. The income under the head Jetties amounted to Rs. 13,38,391, showing an increase of Rs. 1,96,920, the chief improvement being under imports. The total

receipts from exports were Rs. 1,33,884, and are the largest since the formation of the Trust. The expenditure amounted to Rs. 7,96,258.

8. The income from the Petroleum Wharf at Budge-Budge continues to improve, the total receipts of the year having amounted to Rs. 2,34,083, or an increase of Rs. 36,972. The quantity of kerosine imported was 49,203,905 gallons, against an import of 32,543,864 gallons during 1892-93.

9. Although there was an increase in the importation of Russian oil in bulk during the year, the total importation from that country, which had risen to nearly 50 per cent. of the total importations for 1892-93, dropped during the year under review to only 16 $\frac{3}{4}$  per cent. of the total imported.

10. At the end of the year the total stock of oil at Budge-Budge was 16,365,120 gallons, out of which 12,766,360 gallons had been landed, and 3,598,760 gallons remained afloat. These conditions were unprecedented, and in consequence it has been found necessary to extend the shed so as to raise the storage accommodation to 16 lakhs of cases. A further proposal has been made to increase the accommodation to 20 lakhs of cases by the expedient of raising the roofs of the sheds, and this proposal is under consideration.

11. The total quantity of tea which passed through the Tea Warehouse was 51 million lbs against 45 million lbs during the previous year. The receipts amounted to Rs. 1,16,236, against Rs. 1,07,295 during the previous year.

12. During the year 217 vessels with an aggregate tonnage of 515,477 were berthed at the Jetties, against 214 vessels with a tonnage 485,299 during 1892-93. The average number of days each vessel occupied the Jetties was 10.5.

13. The income of the Harbour Master's Department amounted to Rs. 6,47,281, against Rs. 5,82,707 in 1892-93. The increase, as already explained, was due to higher receipts from mooring hire, in consequence of vessels lying back for freight occupying the moorings for longer periods, and also from the sale-proceeds of the dredger *Oclopus*, which was sunk in the early part of the year. The expenditure amounted to Rs. 5,07,417.

14. During the year there were 16 casualties to vessels, against 23 in the preceding year. This gives a percentage of 1.61, calculated on the number of vessels which arrived in the port.

15. Under orders of Government, dated the 2nd of October 1893, the Deputy Conservator of the Port was vested with powers under Act V of 1883, to hold preliminary enquiries into the cause of casualties occurring to vessels in charge of Harbour Masters. Sixteen such enquiries were held, and in no case was a further investigation under the Act, mentioned above, considered to be necessary; two Assistant Harbour Masters were, however, severely punished by the Commissioners.

16. The work of examining boats while plying was regularly attended to throughout the year by the surveyors. During the year 276 cargo and 87 passenger boats were called in for resurvey, having become unfit for service either through wear and tear or by meeting with accidents.

17. The total receipts under the head Port approaches amounted to Rs. 3,78,072, towards which the port-dues, reimposed from 1st December 1892, contributed Rs. 3,71,104. The expenditure amounted to Rs. 5,23,462. This large expenditure was due to the heavy cyclone of May 1893, repairs having been executed to several light and survey vessels.

18. The several channels in the river, with the exception of the Lower Saugor Roads and the Jellingham channel, have remained fairly steady. At the Lower Saugor Roads the bar has gradually extended to the south-west, necessitating the removal into deeper water of the Long Sand Light-house. The Jellingham channel has been a source of continual anxiety and trouble, the changes being so rapid and variable, entailing the services of one vessel to watch it daily. It was in this channel that the S.S. *Anglia* was lost. The Lieutenant-Governor is glad to see that the dangerous nature of this channel is realized by the Commissioners, and that special measures are being taken to give timely notice of the changes that are daily occurring.

19. This is the first complete year in which the special toll of 4 annas per ton on all imports and exports was in force. This toll was levied under section 108 of Act III of 1890, in order to enable the Trust to meet its liabilities. The toll yielded Rs. 7,95,100, or almost exactly the sum of Rs. 8,00,000, which it was originally estimated to produce.

20. The receipts of the Kidderpore Docks during the year amounted to Rs. 2,26,574 as shown below :—

	Rs.
Receipts from graving Dock ... ..	93,926
from imports	33,860
" from exports	80,462
Rent and miscellaneous	12,349
Railway earnings	1,339
Receipts from towing vessels by hopper barges	4,638
Total ...	2,26,574

21. Against this the expenditure has amounted to Rs. 15,04,288, details of which are given below :—

	Rs.
Traffic establishment ... ..	52,299
Working expenses ... ..	1,86,429
Municipal taxes ... ..	1,32,434
Interest on capital ... ..	11,33,126
Total ...	15,04,288

22. The total deficit is therefore shown to be Rs. 12,77,714, and this result though anticipated is extremely unfortunate. Apart from the interest charges and municipal taxes, it is observed that the expenditure on Traffic Establishment and Working Expenses exceeded the income by Rs. 12,154. Since the completion of the year, however, the Commissioners have been endeavouring to meet the wishes of the mercantile community by giving additional facilities to the trade, and it is hoped that these measures will induce a larger number of vessels to resort to the Docks.

23. The thanks of the Government are due to the Commissioners for their efficient management of the affairs of the Trust during the year.

By order of the Lieutenant-Governor of Bengal,

C. W. ODLING,

*Secretary to the Government of Bengal.*

REPORT ON THE WINTER RICE CROP IN  
BENGAL, 1894.

The following is published for general information.

C. E. BUCKLAND,  
*Secy. to the Govt of Bengal.*

REVENUE DEPT.,  
The 18th October 1894.

DEPARTMENT OF LAND RECORDS AND  
AGRICULTURE, BENGAL.

*First forecast of the winter rice crop in Bengal, 1894 (to the 15th September).*

1. *Character of the season.*—The rainfall of the monsoon of 1894, month by month, has been as follows:—

In May the rainfall was generally less than the normal. In June the rainfall was deficient in North Bengal, particularly in Rajshahi, Pabna, Bogra, Rangpur, and Jalpaiguri, and somewhat below the normal in parts of Eastern Bengal; it was also deficient in Jessore and Murshidabad, and in Muzaffarpur and Darbhanga, elsewhere abundant rain was received in June. In July the rainfall throughout these provinces was generally above the normal, except in North Bengal and North Bihar. The effect of the short rainfall in July in North Bengal was to retard the transplanting operations, and thus to prevent the full area from being brought under cultivation, as well as to improve the prospects of the crop. In August abundant rain was received everywhere except in Orissa, and in Hooghly, 24-Parganas and Midnapore, where the rainfall was considerably short of the normal. In North Bengal and North Bihar the rainfall of August was in excess of the normal, and thus partly made up the deficiency of rain in the preceding month. The rainfall during the first half of September was generally of a light character, but it appears to have been sufficient for the needs of the crop.

On the whole, the distribution of rainfall has proved to be favourable to the cultivation and growth of the winter rice crop in most districts of Bengal. The failure of the July rainfall in North Bengal and North Bihar was the only unfavourable element in the character of the present season, but it was to a great extent compensated for by the plentiful rainfall in the following month.

Damage by floods has been reported from the Kalna sub-division of Burdwan, from Nadia, Murshidabad, Pabna, Muzaffarpur, Cuttack, and Balasore; it was particularly serious in the Jajpur and Kendrapara sub-divisions of Cuttack. In the Contai sub-division of Midnapore the crop was seriously injured by the heavy rainfall of the 24th July, which also prevented a large area from being brought under cultivation.

2. *Area cultivated.*—The total area estimated to have been cultivated with winter rice in Bengal is 31,229,900 acres, against 31,021,900 acres in 1893, thus showing a small

increase over the area cropped last year. Timely rainfall is reported to have caused an increase in cultivation in many districts of Bengal, notably in the Burdwan, Presidency, and Dacca Divisions; on the other hand, the deficiency of rainfall in July prevented considerable areas from being brought under cultivation in Rangpur, Dinajpur, and Jalpaiguri. The areas sown with winter rice in these districts are estimated by the district officers to have fallen short of the areas cropped last year by 30, 6·5, and 15 per cent. respectively. In the Contai sub-division of Midnapur a large area, amounting to 25,800 acres or nearly 8 per cent. on the area sown in 1893, could not be sown with rice, owing to excessive rainfall at the end of July last.

3. *Character of the crop.*—It will be seen on reference to the district returns that out of the 44 districts from which returns have been received, 21 report a full average (16 annas) or more than a full average crop; 21 others report the crop as varying from 12 to 16 annas; and two districts, namely Jalpaiguri and Cuttack, return the crop to be 11 annas. There are only two sub-divisions where the crop is reported to be less than 8 annas, namely Contai in Midnapore, and Kendrapara in Cuttack, both of which return the crop as 7 annas.

On comparing the district estimates of outturn this year with those for 1893, it will appear that out of the 44 districts, twenty-two report the crop to be better than the crop of 1893, six report the crop to be equal to that of the last year, while 16 report it to be worse than the latter. The prospects of the standing crop appear, therefore, to be slightly better than those of the last year's crop. The outturn of the winter rice crop of 1893 was estimated by this Department at the full average or 16 annas. If the weather prove favourable to the standing crop in October, it may be expected that its outturn will amount to  $16\frac{1}{2}$  annas, and thus slightly exceed the average.

B. C. BASU,  
*Assistant Director.*

CALCUTTA,  
*The 4th October 1894.*

Countersigned.

W. C. MACPHERSON,  
*Director of the Department of Land  
Records and Agriculture, Bengal.*

DARJEELING,  
*The 6th October 1894.*

Preliminary Forecast of the Winter Rice Crop for 1894 (up to the middle of September).

Bardwan...	Sadar	794,980	635,500	454,300	454,300	454,300	Annas.	Annas.	The Collector remarks that the outturn of the crop in Kalna is expected to be the same as last year, although he returns this year's outturn as 12 annas only against 16 annas last year.	In previous returns the total cultivated area in the district used to be shown as 459,000 acres, but the Collector, Mr. Growse, thinks that estimate to be too low, and has raised it to 900,000 acres. Owing to this change the estimated area under <i>amra</i> rice has been increased from 278,000 acres to 654,000 acres (vide Bhadrak Crops Report for 1894).

Taking 10 annas to represent the average outturn, how many annas represented outturn last year?	Taking 10 annas to represent many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Department of Land Records and Agriculture, Bengal.
Midnapur	Sadar	2,120,860	1,720,100	809,040	612,100	752,000	16	16	An increased area has been brought under cultivation this year everywhere, except in Contai sub-division, and the outturn is likely to be better. This is due to the timely and sufficient rainfall at the sowing time. In Contai the heavy rainfall of July 24th proved injurious to paddy cultivation. The ryots are transplanting their fields again, but it is feared that the crop will in many cases prove a poor one. The figures in column 3 have been corrected according to the latest census figures, excluding the area occupied by river beds. Sufficient rain has done good to Sadar and part of Serampore, but want of it has caused damage in Uluberia and Jashnahat. Increase in area is owing to timely rainfall. A better outturn is expected in Howrah if nothing unforeseen happens.	The area of river beds ought not to be excluded.
	Tumuk	300,400	273,000	261,300	203,140	230,500	14	15

Kadia ...	Sadar ...	697,920	362,800	65,300	24,000	65,300	10	12	The increase in the area sown this year is due to the timely and normal rainfall during the ploughing and sowing season. The increase in the expected outturn is also due to the normal rainfall and to the late rise of the rivers. I should have estimated a still larger outturn had not a certain amount of damage been done by floods.
	Kushtia ...	393,080	278,400	28,000	21,000	28,000	5	12	
	Moherpur ...	634,580	492,600	24,400	15,000	24,400	8	12

	District Total ...	1,589,932	1,085,900	672,900	612,500	612,700	16	163	
Rajshahi ...	Sadar ...	631,152	586,700	190,300	199,300	190,500	18	184	Last year the progress of cultivation was stopped by heavy rainfall at the time of ploughing, but in this year the rainfall was according to requirements and hence the increase in the area sown. The <i>owes</i> paddy suffered a little from Nator; transplantation could not be timely made for want of rain in July last, but if the rain continues to fall as it is doing now, the outturn will be an average one.
	Nator ...	522,560	402,100	24,300	189,700	189,700	12	14

District.	Sub-division.	Total area of sub-division in acres.	Total area estimated to be under cultivation in acres.	Approximate normal area under winter rice in acres.	Approximate area under last year's winter rice in acres.	Estimated area under this year's winter rice in acres.	Taking 16 annas to represent the average outturn, how many annas represented outturn last year?	Taking 16 annas to represent the average outturn, how many annas will represent this year's outturn?	Remarks by the District Officers.	Remarks by the Agricultural Department, Bengal.
Dinajpur...	Sadar ... Thakurgaon ...	2,080,800 344,800	1,377,800 367,400	1,000,400 218,100	1,000,400 218,100	1,000,400 218,100	Annas. 20 20	Annas. 12 12	The area sown this year is less than that of the last year owing to the insufficient rain during the time of cultivation.	
	District Total ...	2,634,860	1,745,200	1,308,500	1,308,500	1,253,500	20	12	The want of timely rain has affected this crop to a great extent, and hence the decrease in the outturn. Recent rainfall has given transplantation an impetus, but I doubt whether the crop will come to anything in more than three-fourths of the normal area.	
Jalpaiguri	Sadar ... Alipore ...	1,072,150 883,731	557,200 487,700	329,500 230,200	324,400 168,700	381,900 157,900	15 16	12 9	The increase in area in column 4 against Alipore is due to increase of cultivation in the Dooars. The decrease in area and outturn shown in columns 7 and 9 are due to want of rain in July and August 1894.	It does not appear from the meteorological return that the rainfall of August was deficient.
	District Total ...	1,955,851	985,200	579,700	518,100	439,700	15	11	The difference in area in the Sadar sub-division is due to the ordinary fluctuation in cultivation. No winter crop is cultivated in the Kurseong sub-division. Owing to late rain at sowing time, land could not be fully cultivated in the Siliguri sub-division. The untimely rainfall of the year will cause a decrease in the outturn.	
Darjeeling	Sadar including Kurseong ... Siliguri ...	464,640 118,400 161,996	61,400 12,800 115,200	10,200 ..... 57,600	11,500 ..... 57,600	11,500 ..... 57,600	14 ..... 16	14 ..... 14		
	District Total ...	744,890	186,400	67,900	69,100	69,100	15	14		

Bangpur ...	Sadar ...	730,240	489,500	365,100	305,100	920,700	18	12	The decrease in area under this year's winter rice is due to unusually dry weather during the season of sowing and transplantation. In the same cause the decrease in outturn is also to be attributed.
	Kurigram ...	629,080	423,800	235,000	236,000	117,400	18	13	
	Gaibanda ...	485,400	371,200	251,000	251,000	231,700	18	13	
	Nijbamari ...	414,720	276,500	92,500	105,000	80,000	18	13	
	District Total ...	2,231,040	1,601,700	971,000	997,700	601,700	18	13	
Bogra ...	Whole district ...	999,300	421,000	280,000	220,000	300,000	19	15	The increase in the figure entered in column 7 is due to the fact that owing to late non-sown a larger amount of area land has in addition to the <i>main</i> lands been transplanted this year.  Owing to insufficient winfall transplantation was mostly commenced this year late in the season, a better crop cannot therefore be expected.
Pabna ...	Sadar ...	561,480	423,700	293,200	408,000	400,000	16	14	The estimate of normal area (column 5) seems to require revision. It is scarcely possible that the area cropped last year and this year should so greatly exceed the normal.  Last year rainfall having commenced earlier than usual, most of the low lying lands which were fit for the cultivation of the winter rice crop were under water when the time for sowing arrived. But the season for sowing the crop this year was a more favourable one in that respect. This explains the cause of increase in the area sown this year over that of the last year.  The sudden rise of the rivers before the plants could grow enough to be able to resist the action of flood is the reason why the outturn is estimated at less than the average. The crop in the low lands of Dulai thana has specially suffered from the effects of flood.
	Sirajganj ...	612,450	419,500	183,700	216,500	210,200	18	16	
	District Total ...	1,173,930	843,200	408,900	624,500	610,200	17	15	
Dacca ...	Sadar ...	810,240	403,100	270,100	243,100	913,100	12	14	With such favourable conditions, a full crop should be obtained.  The high price of paddy last year, and the favourable weather at the time of ploughing and sowing induced the cultivators to extend the cultivation; consequently there has been increase in the area sown this year as compared with 1921. This year's outturn is expected to be better than last year's owing partly to the gradual rise of the rivers, and partly to the timely rainfall.
	Manickganj ...	312,960	234,200	202,300	176,800	180,000	12	14

Shahabad	Arrah	585,900	467,400	373,200	200,800	200,900	Annas. 13 12 15 15	Anraa. 14 12 15 15	The figure in column 3 has been corrected from 100,000 to 80,000. The decrease in this year's area in Sadar is due to the fact that a very large area could not be sown owing to the difficulty in obtaining water; prospects very favourable. In Kuzar and Bhabua the rainfall has been timely and favourable. In Sasaram owing to sufficient rainfall the whole area under winter rice has been brought under cultivation except in Karghar thana, where more land has been reserved for <i>robi</i> cultivation. The figure in column 6 has been corrected from 393,000 acres to 383,000 acres.	In the final report, it should be explained why more land has been reserved for <i>robi</i> cultivation in Karghar thana.

Muzaffarpur.	Hajipur	493,440	335,000	150,000	130,000	130,000	14	11	In the Sadar and Sitamarhi sub-divisions owing to absence of rain in the early part of the season, the sowing and transplanting of the crops were retarded for some time, and hence the reduced outturn as compared with the average, but the weather was more favourable this year, and hence the estimated outturn better than in the last year. Owing to excessive rain and flood in Hajipur a greater portion of the crop has been damaged or washed away, and consequently the outturn is expected to be less than the normal and that of the last year.
	Sitamarhi	645,960	463,000	330,000	330,000	330,000	10	14	
	District Total	1,921,920	1,445,000	732,000	732,000	732,000	10	13	
	Sadar	782,080	584,000	275,000	250,000	250,000	8	16	
Darbhanga	Samastipur	498,960	301,000	165,000	134,000	125,000	8	12	Forecasts are prepared on the assumption that the season will prove favourable after the date of the first of a steady rain. The Collector's report, therefore, have been so cautious in preparing the present estimate.
	Madhubani	563,360	334,500	651,700	603,400	606,000	12	16	
	District Total	2,134,400	1,889,500	1,197,500	983,400	1,011,300	10	15	
	Sadar	897,760	698,200	279,000	279,000	279,000	16	16	
Monghyr	Jamui	1,015,520	516,300	894,300	578,300	578,300	16	16	The decrease in the area sown this year as compared with the normal area under winter rice is due to insufficient rainfall early in the season. The prospects so far seem to be generally promising, and if the rain continue favourable till the <i>har/hya</i> , a crop considerably above the average may be expected.
	Begusarai	462,160	309,300	14,700	14,700	14,000	10	14	
	District Total	2,469,440	1,982,800	688,000	671,300	671,300	15	16	
	Sadar	897,760	698,200	279,000	279,000	279,000	16	16	

Owing to want of timely rain 300 acres remained unsown in the Jamui and Begusarai sub-divisions. The season this year is very favourable, and it is expected that there will be a full average crop.

Forecasts are prepared on the assumption that the season will prove favourable after the date of the first of a steady rain. The Collector's report, therefore, have been so cautious in preparing the present estimate.

## SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS TAKEN IN ASSAM, FOR THE MONTH OF SEPTEMBER 1894.

At the close of August the conditions in Bengal were fairly normal for the season, and the changes had been for the last few days of the month small and unimportant. In the Bay, on the other hand, the changes were more important. The monsoon current, which had been blowing rather feebly in the extreme south of the Bay, began during the last week in August to increase in strength very decidedly, as judged by the wind velocities at the Ceylon stations. This strong advance gradually passed up the Bay and probably reached the centre of the Bay on about the 30th of August.

*Barometric depression of August 30th to September 7th.*—In front of this advance of monsoon winds a barometric depression of feeble and diffused nature appeared to form in the centre of the Bay on the 30th of August. This very feeble depression moved slowly towards the North Madras Coast, and on the 1st of September it was lying almost over that coast, and it was giving strong winds and squally weather in the east and south of the Bay. By the indraught towards it the monsoon current was partially prevented from flowing over Bengal, and hence rainfall was rather lighter than usual over the province at the end of August and beginning of September. On the 2nd the feeble low pressure area had moved in a north-westerly direction, and was lying over the eastern districts of the Central Provinces. On the 3rd it had again advanced in a north-westerly direction, and had become rather more definite and somewhat deeper, while its centre was near Pachmarhi. On the 4th it had moved into South-East Rajputana, and then it advanced in a more northerly direction into South-East Panjab, where it moved towards the hills and filled up on the 7th instant.

The depression was too far from Bengal to influence the province to any extent except that while it was off the Madras Coast it partially drew away the monsoon current from Bengal, but after its inland advance a fairly heavy wave of monsoon winds swept over Upper India in connection with the depression, though as Bengal was rather outside the actual indraught towards the storm, the rainfall in Bengal for the first week in September was lighter than usual, and only equalled about 75 per cent. of the normal.

*Very feeble barometric depression from September 7th to September 9th.*—On September 7th, while the first depression was breaking up in the Panjab, a second barometric depression was forming in the Bay. This, however, never developed to any extent, but merely advanced in a west-north-westerly direction, and filled up over Berar and the southern districts of the Central Provinces on the 9th.

Again this small depression partially drew away the monsoon current from Bengal, and rainfall became much lighter than usual, while at this time also the monsoon blowing in the centre and north of the Bay was feeble, and hence for the second week of September (ending the 15th) the general rainfall over the province only equalled about 55 per cent. of the normal amount.

In the south of the Bay, however, after a period during which the monsoon current was decidedly feeble, another rather strong advance appeared to take place, and this gradually passed up the Bay until by the 13th or 14th this was probably reaching the northern part of the Bay. In front of this advance the third very feeble barometric depression of the month was formed.

*Very feeble barometric depression of September 14th to September 17th.*—On the 14th pressure had fallen briskly round the head of the Bay and over the western half of the province, and a feeble low pressure area appeared in the north-west angle of the Bay, which was accompanied by a decided circulation of winds. On the 15th it had advanced inland, and was in the south of Chota Nagpur, probably to the south-east of Chaibassa, and was still accompanied by a distinct cyclonic circulation of winds. It had not, however, increased in depth, for pressure had increased over the whole of Bengal except in the immediate neighbourhood of the depression. With the inland advance of the feeble low pressure area, the monsoon current began to advance more freely over Bengal, and from the 15th fairly general rain was reported over the province. On the 16th the very feeble low pressure area appeared to have advanced into the west of Bihar, where it gave heavy rain to the northern stations, and general moderate rain over the remainder of the province. On the 17th the very shallow depression with its feeble cyclonic circulation still seemed to exist over Bihar and part of Chota Nagpur, but there was no clear evidence of its existence on the 18th instant.

Ordinary monsoon conditions accompanied by general, and in many cases heavy, rain then continued over Bengal up to the 22nd, and for the week ending on this day the general rainfall received over the whole province equalled no less than 177 per cent. of the normal. On the 23rd, however, the area of lowest pressure had passed to the north-west angle of the Bay, where also a feeble form of wind circulation was beginning to set up. Rainfall then began to fall off in the interior of the province, and at this period the fourth barometric depression (or feeble cyclonic storm) of the month was formed. This was a more influential storm than either of the preceding three, and it gave squally weather over a large part of the Bay.

*Barometric depression or feeble cyclonic storm of September 23rd to October 2nd.*—On the 23rd pressure had fallen slowly over the whole province, and was in defect by amounts ranging up to about 0.15" in the south and south-east of the province, and the lowest pressures were in South-West Bengal. At the head of the Bay and in South Bengal winds were distinctly

cyclonic in direction, but rather light in force, and the depression was giving disturbed weather in South Bengal, though the only general rainfall which was being received was in the north of the province. On the 24th pressure had fallen in Orissa and at some of the south-western and western stations, and the barometric depression on this day was in the north-west angle of the Bay at some little distance from the Orissa coast, where it was attended by a very complete cyclonic circulation of winds. The depression on the 24th was, therefore, rather more clearly pronounced, though it was still very feeble, and it had caused rainfall to recommence over a large part of the province, and the only districts which received no rain were parts of Bihar and Chota Nagpur. On the 25th pressure had risen slowly over the whole province except at Gopalpur, and the feeble barometric depression in the north-west of the Bay remained practically unchanged in character and position, and though the cyclonic circulation of winds attending it was very complete, yet the winds were not strong. On the 26th pressure had fallen briskly in the north-west angle of the Bay, the fall at False Point equalling 0.05", and it had also fallen slowly elsewhere, except over parts of Bihar and Chota Nagpur. The depression in the north-west angle of the Bay had, therefore, distinctly intensified, but it had remained almost stationary. The perfect cyclonic circulation of winds on this day had extended over the whole province, but still the winds reported at the land stations were only light to moderate in force. On the 27th pressure had again fallen in Orissa and risen elsewhere, the increase being rapid at the eastern stations, and in addition to the depression having again intensified slowly, it had commenced to move in a westerly direction and was close to the coast of Orissa. On this day it was probably a small cyclonic storm, for the cyclonic circulation continued very perfect, and strong monsoon winds were feeding into the small storm from the east and south. During the afternoon of the 27th, the centre of the small storm passed inland, crossing the coast not very far from Puri, and moving with considerably increased rapidity in a west-north-westerly direction, and on the 28th the centre was well inland in the Central Provinces, and was midway between Sambalpur and Raipur. In its advance over Orissa it gave only moderate to rather strong winds, and the rainfall also accompanying it was much lighter than usual, and much lighter than was to be expected by the very considerable depression at its centre. It, however, brought up another advance of monsoon winds over the whole of Bengal, and good general rain was again received. From the 28th to the 29th the storm commenced to recurve, and it began to move in a north-westerly or even north-north-westerly direction at the rate of about ten miles an hour, and on the 29th the centre was between Jubbulpur and Seoni. The storm was fed mainly by the monsoon current blowing from the Bay of Bengal, and this hence was flowing rather freely over Bengal, and on the 29th again fairly general rain was received in practically all districts of the province. On the 30th the storm had advanced about 100 miles in a northerly direction, and its centre was between Saugor and Sutna. It then began to move in a north-easterly direction, and from the 30th of September to the 1st of October it had advanced over 150 miles, and was midway between Sutna and Benares, while on the 2nd it had again advanced in a north-easterly direction and had broken up against the Himalayas.

Hence the storm in the later portion of its path again approached towards Bihar and the north-western and western districts of the province generally, and hence it again brought rather disturbed weather and rainfall to the western and northern parts of the province.

Practically, therefore, the whole of the province was receiving more or less general monsoon rainfall almost up to the end of the month.

*Pressure.*—For the greater part of the first week of the month pressure was above the normal, and the mean excess averaged from 0.07" to 0.09", the excess being largest at the northern stations and smallest in the south-west of the province. This excess to a great extent disappeared in the second week, when pressure was almost normal, while in the third week a decided defect had been established, and pressure was below the normal by from about 0.04" to 0.05" at the northern stations to very small amounts in the extreme south of the province.

In the last week of the month, owing to the gradual formation of the small cyclonic storm in the north-west angle of the Bay and its advance through Orissa, and then in a direction varying from north-westerly at first to north-easterly in the end, the mean pressure was considerably below the normal, and the defect was naturally largest in the south-western districts. The mean pressure for that week was in defect by from 0.05 inch at such stations as Dinajpur and Jalpaiguri to 0.126 inch at False Point, and about 0.12 inch at Cuttack and Balasore. The pressure over the whole province was also in defect by about 0.08 inch. In Assam the mean pressure for the week was 0.086 inch below the normal.

The mean pressure for the whole month has varied from about 29.67" in the extreme west of the province to 29.76" at Sibsaigar, thus giving a very slight gradient only over the province. The variations from the normal at the beginning and end of the month, it will have been seen, were of opposite nature, and hence the mean pressure for the month has been almost normal, and at most stations a defect of about a hundredth of an inch only has been registered.

*Temperature.*—At the beginning of the month the mean temperature was about half a degree above the normal. In the second week owing to the partial break in the rains, which then occurred, the mean temperature of the province became 0.7° above the normal. In the third week, as the rainfall was still light in the western and south-

western divisions, temperature continued in slight excess, but in the north and east of the Province decidedly low temperatures were recorded, the defects averaging more than a degree and-a-half. Again, in the last week of the month these conditions were almost reversed, and for the whole province there was an excess in the general mean temperature of more than half a degree.

For the whole month the mean temperature has hence not varied much from the normal. Very slight excess temperatures, usually of about half a degree, have been registered in the extreme west, south-west and south of the province, while elsewhere defects of about similar amounts have been recorded. Hence the average mean temperature of the whole of Bengal for September has been almost absolutely normal, the actual variation being only about a twentieth of a degree. In Assam, on the other hand, the average mean temperature has been  $1\cdot6^{\circ}$  in defect.

In dealing with the day and night temperatures, however, it is found that the day temperatures of Bengal averaged about a degree in defect of the normal, while the night or minimum temperatures were in excess by about similar amounts.

*Rainfall.*—The actual rainfall in the month has varied from about 40 inches in and near the hills in North Bengal, as represented by such stations as Bhagatpur (Jalpaiguri district), Buxa (Darjeeling district), Dinhatta (Kuch Bihar district), and Matabhanga (Kuch Bihar district),—all of which have received from 40 to 41 inches, to the small fall of about 2 to 4 inches in the south, &c., of Chota Nagpur, as represented by the stations Gbatsila in the Singhbhum district (2·50 inches), Monoharpur, also in the Singhbhum district (3·92 inches), Raghunathpur in the Manbhum district (3·73 inches), Hosanabad in the Palamau district (3·07 inches), Gariwa, also in the Palamau district (3·54 inches), and Gangpur in the Lohardaga district (2·65 inches). Hence the falls, it will be seen, have been heaviest in the north-eastern districts, and lightest in the south-western districts of the province. If a line is drawn from the south-east to the north-west of the province, dividing the province into about two equal sections, on the north of the line roughly the falls vary from 10 up to 40 inches, and to the south of it from about 10 down to 3 inches. In some parts of East Bengal, however, there are some areas of unusually low rainfall, and thus at Manikganj (Dacca district), Atia (Mymensingh district), and Daudkandi (Tippera district), falls of rather less than 4 inches have been received. Another area of exceptionally light rainfall is shown in South-West Bengal, and falls of four inches or less have been registered at Mohesreka (Howrah district), Saugor Island, Jessore and Magura and Bangaon in the Jessore district. Comparing the actual falls with the normal, the southern half of the province has received a largely defective fall, and the northern half generally very considerable excess falls. The areas of largest defect are in the extreme southern and south-eastern parts of Bengal, where the rainfall has been in defect by from seven to eight inches at Chittagong and Cox's Bazar, by nearly six inches at Noakhali, by nearly nine inches at Saugor Island, by nearly seven inches at Contai, by eight inches at Soro (Balasore district), and by about five inches at Tajpur (Cuttack district) and Bhadrak (Balasore district). Other largely defective falls of about four to six inches have been reported from Chuadanga and Kushtia in the Nadia district, at Jessore, Magura and Bangaon in the Jessore district, at Satkhira in the Khulna district, at Nator in the Rajshahi district, at Pabna and Sirajganj in the Pabna district, at Munshiganj and Manikganj in the Dacca district, at Mymensingh and Jamalpur in the Mymensingh district, at Chandpur in the Tippera district, at Motihari in the Champaran district, and at Naya Dumka in the Sonthal Parganas.

On the other hand, a very large area in North Bengal has received from 10 to 20 inches in excess of the normal, and some parts more than 20 inches, and again there is a centre of very heavy rainfall in Bihar, where excess falls of more than 10 inches have been received at such stations as Patna and Dinapore. A similar excess fall is reported at Chanchal in the Malda district.

Indeed, the rainfall in September has been distributed very irregularly, and in the midst of districts receiving excess falls some stations report defects, and thus, while Chanchal, as before stated, has received an excess fall of 10·48 inches, Malda, the sadar station of the district, has reported a defect of 2·65 inches. Or to take another instance of this irregularity, the general fall in Champaran has been 3·2 inches in defect, while the district of Darbhanga has received 4·43 inches in excess, and the district of Patna 7·62 inches in excess.

When, however, the average divisional rainfalls are compared with the normal, it is seen that considerable or large excess falls have been received in North Bengal and Bihar, moderately defective falls in South-West Bengal and Chota Nagpur, and largely defective falls in East Bengal and Orissa.

While, however, only two divisions show excess falls in the month, the number of rainy days, on the other hand, has been decidedly larger than usual in all divisions except East Bengal and Chota Nagpur, and hence the defective rainfall appears to be due rather to the lightness of the falls than to want of actual rainy days.

The comparison of the actual rainfall of the various large divisions of the province during the month is most accurately shown in the form of a percentage. The figures representing the rainfall for the month calculated in this way are included in the following table under the heading of September. This table really gives a condensed summary of the rainfall statistics of the present year up to date for each meteorological division, the first nine columns giving the actual average falls in each division for each month expressed as a percentage of the normal, while the tenth column gives the actual rainfall of the first nine months as a percentage of the normal rainfall for that period:—

METEOROLOGICAL DIVISIONS.										Actual rainfall of first nine months of 1894 expressed as a percentage of the normal fall for the period.
	January.	February.	March.	April.	May.	June.	July.	August.	September.	
South-West Bengal ...	0	55	42	97	58	104	121	89	82	92
North Bengal ...	0	64	16	177	83	77	80	111	136	97
East Bengal ...	0	87	164	79	70	95	118	112	76	97
Bihar ...	3	163	24	98	29	121	108	126	128	112
Orissa ...	30	19	27	128	20	137	164	82	69	100
Chota Nagpur ...	3	110	4	144	31	149	138	126	86	117

For the whole year up to the end of September, it will be noticed, the falls have been almost equal to the normal in South-West, North and East Bengal and in Orissa, while over the remainder of the province the falls have been in excess.

The following table contains full data for the comparison of the actual and normal rainfall of the month of September in all districts of the province. The figures are derived from the average and actual rainfall of the rain-recording stations in each district, due allowance or weight being made for the area which each station represents. This gives a more accurate average than the arithmetical means given in the weekly and monthly meteorological tables. The first column gives the normal or actual average district rainfall as determined from the rainfall observations of the past fifteen years; the second column gives the actual district rainfall as determined from the weighted actual rainfalls of the month at the reporting stations in each district; the third column expresses the ratio of the actual district fall of the past month to the normal rainfall as a percentage, and the fourth column states as a percentage how much the district rainfall for the month varied from the normal:—

Percentage Table for September 1894.

DIVISION.	DISTRICT.	Normal district rainfall for September.	Actual district rainfall for September 1894.	Percentage of actual to normal rainfall.	Percentage ex- cess (+), defect (-).
South-West Bengal	Burdwan	7.87	6.12	78	- 22

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; t, thunder; <, lightning; d, drizzling rain; p, passing temporary showers; , dew; , fog.

METEOROLOGICAL OFFICE, GOVT. OF INDIA;  
Calcutta, the 22nd October 1894.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-  
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATUR-  
DAY, THE 20TH OF OCTOBER 1894.**

At the close of the previous week a diffused low pressure area covered the central and southern districts of Bengal. This probably represented the area of minimum pressure which was making its retreat southwards. The low pressure area was giving disturbed rainy weather over a large part of the province, and it was accompanied by light irregular winds, rather heavily clouded skies, and high humidity. On the 14th instant the general pressure distribution was changing, the area of lowest pressure was retreating southwards and comparatively high pressure was establishing itself in the north of the province. Hence more or less northerly winds were setting in at the north-western and western stations in the province, and these were driving back the more or less easterly and moist winds which had been previously blowing. Weather therefore became fine and almost rainless in Bihar and Chota Nagpur, though local showers were rather numerous in the remaining districts. On the 15th the pressure changes were small, and the lowest pressures were reported in the extreme south of the province, and fine settled weather prevailed over the north-western and western districts, though it remained showery elsewhere. On the 16th pressure had risen slowly over the whole province, the rise being largest in Assam and North-East Bengal, and the highest pressures were reported in the north-east and north of the province, and the lowest in the south of Orissa. Weather was usually fine except at the south-western and western stations, where showers were reported, and in Assam where rainfall was general. A slight increase in the easterly element in the wind directions, however, had taken place on this day, so that conditions had become slightly more favourable for rainfall. On the 17th pressure had risen briskly over practically the whole province, and it had become for the first time for a considerable period in excess of the normal, though the excess amounts were usually small. The area of lowest pressure had again retreated southwards over the Bay. The easterly winds partially retreated from Bengal, and weather became decidedly more settled over the province, though still rather numerous showers were reported in South-West and North Bengal and Orissa. In the centre and south of the Bay, however, conditions had become suspicious, and were favourable for the development of a storm. On the 18th pressure had again risen slowly over the whole province, and hence became moderately above the normal, and weather became fine with passing clouds over all divisions except Orissa, where light general rain had fallen. Light northerly winds also prevailed at most stations. In the south of the Bay, however, the disturbed conditions appeared to have concentrated into a diffused cyclonic storm at a long distance from the Madras coast, and the centre of which was probably a little to the south of the latitude of Madras. On the 19th pressure was usually falling slowly over Bengal, though it still continued above the normal. Light irregular winds generally prevailed, but weather was fine at practically all stations. In the south of the Bay the diffused cyclonic storm appeared to have moved slowly in a west-north-westerly direction, but the centre was still at a considerable distance from the coast. On the 20th pressure had again fallen slowly to moderately over the whole province, and pressure had become almost normal. Winds were rather variable in direction and light in force, and small local storms with rain had become more numerous, so that showers were reported over a large part of the province. In the south of the Bay the diffused cyclonic storm had again advanced slowly towards the Coromandel coast in a west-north-westerly direction. The disturbance was a large one, and it was giving strong winds and squally weather as far north as Coconada, and in connection with these disturbed conditions in the Bay weather in Bengal was becoming a little less settled on the 20th.

*Pressure.*—The variation of the mean pressure from the normal for the week has been exceedingly small. At the great majority of stations pressure has been above the normal, but the excess has not averaged more than about a hundredth of an inch. The largest excess pressures have been registered in South-East Bengal and Cachar, while on the other hand very slightly defective pressures have been recorded in the extreme west of the province.

In Assam the mean pressure has shown an excess of 0.016 inch.

*Temperature* has been above the normal almost throughout the week, and the excess in the average mean temperature has equalled 1.4°. In North Bengal and Bihar, indeed, the excess has averaged from two to two and-a-half degrees. In Assam, on the other hand, the average excess in the mean temperature has only equalled 0.9°.

*Rainfall.*—An average fall of about one inch and-a-half has been recorded in North Bengal and Orissa, and of about an inch in South-West and East Bengal, while in Bihar and Chota Nagpur the falls have only averaged about half an inch. The falls have hence been in moderate excess in North Bengal, Bihar and Orissa, and a little below the normal in Chota Nagpur and South-West Bengal, but in East Bengal the defect has been large. In the present week again, however, the number of rainy days has far exceeded the normal number even in the districts which have received defective falls except in Chota Nagpur, and in such divisions as North Bengal, Bihar, and Orissa, the number of rainy days has been about twice as large as usual.

Comparing the actual with the normal falls for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following:—South-West Bengal 89 per cent., North Bengal 138 per cent., East Bengal 71 per cent., Bihar 145 per cent., Orissa 115 per cent., and Chota Nagpur 82 per cent. Taking the various divisions to have an equal value in the calculation, the rainfall of the week may be said to have been equal to 107 per cent. of the normal.

In Assam during the week Silchar has received 0.81 inch of rain, Dhubri 0.22 inch, and Sibsagar 0.85 inch.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 20th of October 1894:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.		Of week.		Rainy days.		Since 1st of month.		Since 1st of October 1894.

## NOTICES TO MARINERS.

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 193.

[First Publication.]

#### CAUTION.

*Intended publication of a Weekly Summary of Notices to Mariners, by the Board of Trade.*

THE following Notice to Mariners (No. 375 of 1894), issued by the Board of Trade, is republished for general information :—

A Weekly Summary of Notices to Mariners, containing all the Notices received at the Board of Trade subsequently to the date of publication of the latest Monthly Summary respecting any alterations in Lights, Buoys or Beacons, any newly discovered danger, or any alterations in or additions to the Admiralty charts, will be published by the Board of Trade, on or about the 7th, 14th, 21st, and 28th, of each month.

A Monthly Summary containing all the Notices received at the Board of Trade during the preceding eight months is also published on the first of each month.

Copies of these Summaries are supplied at all the Mercantile Marine Offices in the United Kingdom to Masters of "Foreign-going ships," and at all the Custom Houses, to Masters of "Home Trade" and Coasting Vessels, free of charge.

Copies of the Monthly Summary are also sent to the Government Shipping Offices at each Colonial and Indian Port, and to the British Consulate at each Foreign Port, for the inspection of Mariners who may not be in possession of the latest Summary.

In addition to the above, all the "Notices to Mariners," immediately they are published, are posted at all the Mercantile Marine Offices and Custom Houses in the United Kingdom for the inspection of Mariners and others interested.

If the information contained in these Notices is not made use of by Masters, Owners and Agents of ships, the responsibility rests with the parties who neglect to make use of the information gratuitously offered and abundantly circulated.

By direction of the Government of Bengal.

H. B. HOOPER, Comdr., R.I.M.,

*Acting Port Officer of Calcutta.*

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 194.

[First Publication.]

CHINA SEA—PHILIPPINE ISLANDS.

(1) *Flashing light on Guimaras island.*

THE British Admiralty has given Notice (No. 505 of 1894) that on 1st October 1894 a light will be exhibited from a light-house recently erected on the south-west extreme of Guimaras island, southern approach to Ilo Ilo :—

Guimaras light is a *group flashing* light, elevated 111 feet above the sea, showing *three white flashes* in quick succession, followed by a *red flash* every fifteen seconds, between the

bearings S. 9° W. through south, east, and north and N. 26° W., visible in clear weather from a distance of 16 miles.

The apparatus is catadioptric of the fourth order.

The light-house, 58 feet high, is of iron, cylindrical in shape and painted white and grey.

Approximate position on Admiralty Chart, No. 2578, lat. 10° 28' 20" N., long. 122° 28' W.

(2) *Cabezas shoal off the south point of Luzon.*

Also, that a rocky shoal upon which a least depth of 6 feet was found, lies off the south extreme of Luzon, one-third of a mile N. 20° W. from Kalantes bank. The shoal is circular in shape, and about one-third of a mile in diameter.

Approximate position on Admiralty Chart No. 2577, lat. 12° 30' 45" N., long. 124° 8' 50" E.

(Variation 1° Easterly in 1894.)

[First Publication]

NEW ZEALAND—HAURAKI GULF.

*Beacon on reef in approach to Mahurangi harbour.*

THE British Admiralty has given notice (No. 507 of 1894) that a beacon has been placed on the reef off the mouth of Puhoi river, approach to Mahurangi harbour.

This beacon (named Brasier beacon) consists of an iron perch 12 feet high, surmounted by a black cage, and stands on the eastern part of the reef, with the south extreme of Horora island bearing N. 28° E., distant 1½ miles.

Approximate position : lat. 36° 32' 25" S., long. 174° 44' 55" E.

(Variation 14° Easterly in 1894.)

**Subordinate Educational Service.**

*The 22nd October 1894.*—Maulavi Amjad Ali, B.A., third master of the Patna Collegiate School, acted in class V from the 12th March to the 15th May 1894, both days inclusive, *vice* Babu Bhagwan Chandra Datta, promoted.

Maulavi Abdul Hai, fifth master of the Patna Collegiate School, acted in class VI from the 12th March to the 15th May 1894, both days inclusive, *vice* Babu Bihari Lal Chaube, promoted.

A. CROFT,  
*Director of Public Instruction.*

**Office Memo.**

*Rules for appearing at the F.A. and B.A. Examinations for candidates from the Rajshahi and Burdwan Circle, who are not students of any affiliated institution.*

DEPUTY INSPECTORS OF SCHOOLS, Sub-Inspectors of Schools, and *bona fide* Masters of English Schools, who have served as such for the full period of two academical years, or of six months in the case of those only who were admitted to a former examination of the same class, will be admitted to the above-mentioned examinations. The applications of schoolmasters should be accompanied by a certificate of length of service from the Secretaries or Managers of the schools in which they are employed, and should reach this office not later than the 1st January. The application of a schoolmaster for permission to appear at the F.A. or B.A. Examination should be signed by him in the presence of the Secretary or a member of the Managing Committee of the school in which he is employed. The application should be forwarded to this office for countersignature, and it will be sent back to him (the candidate), who will have to send it, together with the examination fee, to the Registrar of the University direct. Schoolmasters are not required to pay any fee for

getting their application for permission to appear at either of the above-mentioned examinations countersigned by this office.

2. Candidates for the B.A. Examination who are schoolmasters must also send in the Registrar's certificates showing that they have passed the F.A. Examination.

3. Candidates should read carefully the form of the certificate which this office is required to sign, and should be careful to supply all information and documents required, including the Registrar's receipt in the case of those schoolmasters who have been admitted to a former examination of the same class, without which the Inspector must decline to sign the certificate.

4. By *bond fide* masters of schools are to be understood masters who hold regularly paid appointments in English schools.

C. A. MARTIN,

Inspector of Schools, Rajshahi and Burdwan Circle.

CHINSURA, the 12th September 1894

Rajshahi and Burdwan Circle Inspector's Office Memo.  
UNIVERSITY ENTRANCE EXAMINATION.

PRIVATE STUDENTS.

1. *Private students* are those who do not appear from any school, or who have been transferred from one school to another *after the 31st August* without the consent of the Inspector. The term private students includes *schoolmasters*.

2. Private students must appear at the test examination of one of the following institutions:—

Those from the	At the test examination of
1	2
Howrah district ...	Howrah Municipal School.
Hooghly „ ...	Hooghly Collegiate School.
Burdwan „ ...	Burdwan Raj Collegiate School.
Bankura „ ...	Bankura Zilla School.
Birbhum „ ...	Birbhum ditto.
Midnapore „ ...	Midnapore Collegiate School.
Rajshahi „ ...	Rajshahi ditto.
Pabna „ ...	Pabna Zilla School.
Bogra „ ...	Bogra ditto.
Rangpur „ ...	Rangpur ditto.
Dinajpur „ ...	Dinajpur ditto.
Jalpaiguri „ ...	Jalpaiguri ditto.
Darjeeling „ ...	Darjeeling High School.

The examinations will begin on the 3rd of December 1894, and each private student will pay a fee of Rs. 2 to the head of the institution at which he appears for examination. The balance after payment of expenses (stationery) will go as remuneration to the examiners.

3. Applications for permission to appear must be sent so as to reach *this office* not later than the 10th November with the following information, &c.—

*From private candidates proper.*

- (a) The name of the school in which the candidate last studied.
- (b) The transfer certificate (in original) granted to the candidate from the same;
- or (c) (In the case of the candidate who previously appeared at the Entrance examination) the Registrar's receipt (in original) for the fee paid.
- (d) Age of the candidate.

*From schoolmasters.*

- (e) A certificate from the Secretary or proprietor of the school in which the candidate is serving to the effect that he has been a *paid* teacher of the school in which he teaches and has been so ever since the 1st June 1894. In case of a schoolmaster who has served *in more than one school*, he must produce certificates from the several schools in proof of his having been a *bond fide paid* teacher all along since the 1st June 1894.

Failing to produce the above certificate or certificates a schoolmaster will be subject to the rules applicable to *bond fide* private candidates.

4. If this office is satisfied that all is in order, the Inspector will countersign and return the application, and this then will be the candidate's passport for admission to the test examination.

5. The head-master of an institution (one of those named above) should direct private students to appear before him not later than the 15th December with their applications for admission to the Entrance examinations, and in the case of those candidates who have satisfied the test he will cause them to sign their application forms in his presence and will grant the necessary certificates, and then forward the applications to this office for countersignature, after which they will be sent by the Inspector *direct* to the candidates.

6. Expedition is necessary in carrying out all these instructions, and candidates should be *most careful* to give their names and addresses written legibly and distinctly, so that no mistake may be likely to occur.

7. *Under no circumstances should the entrance fee be sent to this office.*

8. Private students will understand that the test examination of any schools other than those named above will not be accepted by this office.

DATED ON TOUR,  
The 18th August 1894.

C. A. MARTIN,  
*Inspector of Schools, Rajshahi and Burdwan Circle.*

## NOTICE.

### *Entrance Examination.*

A TEST examination of private students for admission to the ensuing Entrance Examination will be held at the Office of the Inspector of Schools, Presidency Circle, 4, Dalhousie Square, Calcutta, on Friday, the 7th, and Saturday, the 8th, December 1894. Only candidates residing in any of the districts of the Presidency and Chota Nagpur Divisions will be admitted to the examination.

2. Only those candidates who have not studied in any institution since the 1st September 1894, will be recognized as private students. They will be required to furnish satisfactory proof that they have not read in any school from that date. They must also produce certificates of conduct and progress in studies from the authorities of the last school where they read, or, in the case of those who have not been in any school for more than a year, from some other reliable authorities.

3. *Bond fide* teachers employed in any of the schools in the Presidency Circle may be admitted to the examination, if they can produce certificates of service and character from their employers or from the Deputy Inspector of the district concerned.

4. Each candidate should submit to this Office, not later than the 27th November 1894, his application for admission to the test examination, stating the following particulars:—

(1) Age; (2) residence; (3) father's name; (4) second language besides English; and (5) whether he appeared at any previous Entrance Examination.

5. The admission-fee for the examination is Rs. 4 for each candidate, and is to be remitted with the application within the prescribed date, after which a fine of Rs. 2 is to be imposed for each week's delay.

6. Every private candidate must be accompanied for the purpose of identification by some person known to this Office, otherwise he will not be admitted to the test examination.

7. Candidates who are sent up by this Office must appear at the Calcutta Examination Centre.

8. Those that reside at a distance from Calcutta are to present themselves at the test examination held by the head-master of the local zillah school, on condition that they appear at the centre selected by the candidates from that institution.

### *F. A. and B. A. Examinations.*

Deputy Inspectors, Sub-Inspectors, and *bond fide* teachers of recognized English schools, in the Presidency and Chota Nagpur Divisions, who have served as such for full two academical years, or for six months in the case of those who have been admitted to a former examination of the same class, will be admitted to the above examinations on production of certificates of character and length of service (with dates) from their employers. Their applications must reach this Office on or before the 1st December 1894.

RADHIKA PRASANNA MUKHERJI,

*Inspector of Schools, Presidency Circle.*

4, DALHOUSIE SQUARE, CALCUTTA,  
The 3rd October 1894.

## NOTIFICATION.

"Nutan Path," by Babu Chandra Nath Basu, M.A., B.L., is substituted for the late Pandit Iswar Chandra Vidyasagar's "Bodhodaya" as the authorised text-book in Bengali for the Lower Primary Scholarship Examination of 1896 and subsequent years until further orders.

A. CROFT,  
*Director of Public Instruction, Bengal.*

## Sheriff's Office, the 19th September 1894.

NOTICE is hereby given that the Fifth Criminal Sessions of the year 1894 of the High Court of Judicature at Fort William in Bengal, for the Town of Calcutta and Factory of Fort William, and the places subordinate thereto, will be holden at the Court-house, in the Town of Calcutta, on Wednesday, the 5th day of December next, at 11 o'clock in the forenoon, and so on from day to day, until the said Sessions be over. And it is hereby proclaimed that all persons who will prosecute any of the prisoners to be brought up for trial at the said Sessions be present then and there to prosecute.

E. TRELAWNY, *Sheriff*.

Total	...	...	3,105

2nd.—The general conditions of the sale now advertized will be the same as usual. They may be ascertained by reference to the Notification issued on the 25th November 1893 and published in the *Government and Exchange Gazettes*, or on personal application at the Office of the Board of Revenue.

3rd.—The latest dates for deposit and clearance will be the 8th and 18th December 1894 respectively, that is to say, no Bank of Bengal Receipts, Government Promissory Notes or other Public Securities that may be tendered for deposit in redemption of Promissory Notes given by purchasers in the Sale-room will be received after 1-30 P.M. of Saturday, the 8th December 1894, and no Bank of Bengal Receipts in full payment of lots will be accepted after 3-30 P.M. of Tuesday, the 18th December 1894.

By order of the Board of Revenue, L.P.,

N. K. Bose, *Offg. Secretary.*

BOARD OF REVENUE, L.P., FORT WILLIAM, the 30th October 1894.

The following revised notification should be substituted for the notification of the same date published at page 1021, Part I, of the *Calcutta Gazette* of the 26th September 1894.

N. K. Bose, *Secretary.*

BOARD OF REVENUE, L. P., CALCUTTA, the 30th October 1894.

## NOTIFICATION.

The 25th September 1894.—In supersession of the rules made under the provisions of section 75 of the Sea Customs Act, VIII of 1878, and published under notification of the 2nd March 1887, at page 149, Part I of the *Calcutta Gazette* of the 9th idem, the following rules are notified under the said section. The fee to be charged under rule 6 has been sanctioned by the Lieutenant-Governor—

1. Baggage includes all packages imported by a passenger for his own use or that of his family, which are not part of the cargo and are not manifested.

Baggage is not exempt from duty except under the circumstances mentioned below.

2. Baggage is exempt from duty only when it consists of articles free from duty or of *bond fide* wearing apparel and other articles of personal use, the property of the person whose baggage is being passed, or of any members of his family such as are in actual use at time of importation, or have been actually in use previously. It is in the discretion of the proper officer of Customs to determine, subject to the above rules, whether any goods shall be treated as baggage exempt from duty, or as goods liable to duty.

3. In Calcutta baggage officers will examine on board only such free baggage, not contained in soldered or nailed-down cases, as the passenger offers for examination; all other baggage will be sent to the baggage shed at the jetties in the case of vessels lying at the jetties; at the close of the day on which the vessel arrives, baggage landed from her will be sent to the Custom House. In the case of other vessels, baggage will be sent direct to the Custom House if unexamined.

4. It is optional with the proper officer of Customs to allow the cases of persons about to proceed up-country immediately to be passed without being opened. This discretion will never be exercised except on personal application of the owner of the baggage, or his or her representative: a detailed statement of contents and value, signed by the owner, must always accompany the application.

5. The Preventive officer should report at once whenever he detains any dutiable articles in order that a peon may be deputed to convey them to the Custom House.

6. A landing fee of eight annas per package will be charged on goods sent into the Custom House.

7. Preventive officers will, as far as practicable, see baggage put over the ship's side immediately after examination.

8. Preventive officers posted to passenger vessels are directed to land, with as little delay as possible, all baggage intended for the Custom House or import shed.

9. Preventive officers are not authorised to pass passengers' baggage after it has been placed in the jetty shed.

10. Officers are authorised to pass from on board all firearms in reasonable quantities and other dutiable goods belonging to passengers from a British Indian port, upon signature of the following declaration, reporting the number and nature of the articles so passed:—

"I hereby declare that my baggage includes no firearms or other dutiable articles belonging to a passenger from a foreign port, that is, from a port other than a British Indian port."

Name.

**Address\_**

The above order does not apply to ammunition, which Preventive officers are not authorised to pass.

11. They are further authorized to pass from on board ship, reporting having done so, (1) uniform and accoutrements belonging to a public servant for his personal use, (2) arms forming part of the equipment of an officer entitled to wear diplomatic, military or police uniform, &c., upon signature of the following declaration :—

"I hereby declare I am a officer serving in India."

12. Passengers' baggage need not be detained owing to arms and ammunition or other dutiable articles being found in their boxes, unless they have in any way attempted to conceal them: in such cases the articles should not be passed.

13. Shipping bills are not required for the shipment of *bond fide* passengers' baggage.

14. Preventive officers should examine baggage brought for shipment to China, the Straits, Mauritius and Ceylon, and should report for orders any case in which they have good reasons to suppose that baggage for other ports contain dutiable or contraband articles.

**15. Passengers are allowed to embark and disembark at Diamond Harbour.**

(a) It will be the duty of the Preventive officer in charge of the station to see that neither opium nor ganja is taken on board of outward-bound vessels.

(b) Passengers landing at Diamond Harbour may be allowed to take their open baggage containing free articles only. Passengers desirous of leaving inward-bound vessels with the intention of embarking on board outward-bound ones will not be permitted to take with them any other than personal baggage, which must be examined in the usual way.

(c) No nailed-down packages, arms, ammunition, spirits or dutiable articles of any kind will be allowed to be transhipped. Any articles transhipped in defiance of this order will be seized and detained.

By order of the Board of Revenue, L.P.,

N. K. BOSE, *Offg. Secretary.*

## ELECTION OF MUNICIPAL COMMISSIONERS.

It is hereby notified for general information that at the bye-election held in Ward No. I of the Jainagar Municipality, in the district of the 24-Parganas, on the 26th September 1894, Babu Bhupendra Narain Dutta was duly re-elected a Commissioner for that ward.

BANGSI DHUR BANERJEE, *Personl. Asst., for Comr. on tour.*

COMM'R'S. OFFICE, PRESY. DIVN., *Calcutta, the 23rd October 1894.*

**NOTIFICATION.**

It is hereby notified for general information that at the bye-election held in Ward No. V of the Baduria Municipality in the district of the 24-Parganas, on the 26th September 1894, Babu Chandra Nath Roy, zamindar, was duly elected a Commissioner, *vice* Babu Abani Nath Roy, deceased.

II. C. WILLIAMS, *Offg. Commissioner.*

COMM'R.'S OFFICE, PRESV. DIVN., CALCUTTA, the 27th October 1894.

# The Calcutta Gazette.

WEDNESDAY, OCTOBER 31, 1894.

PART I A.

## Orders and Notifications by the Government of India, &c.

[Reprinted from the "Gazette of India."]

The following order, issued by the Government of India, Home Department, is re-published for general information.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

### EXAMINATIONS.

*The 26th October 1894.*

No. 327. --With reference to Rules 5 and 10 of the Rules published with Home Department Resolution No. 218x.—188-199, dated 5th June 1894, and to Rules 2 and 6 published with the Resolution of the Government of Bengal, dated 10th instant, it is hereby notified that the examination prescribed for filling up vacancies in the Lower Division of the Secretariat Clerical Service of the Government of India and attached offices, and in the Clerical Establishments of the offices subordinate to the Government of Bengal, will be held at Calcutta, in the Senate House of the Calcutta University, and at Allahabad and Lahore, at the places to be appointed by the Governments of the North-Western Provinces and Oudh and the Punjab, respectively, in January 1895. The exact dates will be notified hereafter. The hours of examination will be from 10 A.M. to 1 P.M., and from 1-30 P.M. to 4-30 P.M. daily.

The probable number of vacancies in the Lower Division of the Secretariat Clerical Service of the Government of India and attached offices to be competed for is sixteen. Of these, eight will be reserved for candidates domiciled in the North-Western Provinces and Oudh, the Punjab, the Central Provinces, Rajputana, Central India and Baluchistan, provided that a sufficient number of such candidates, duly qualified, appear for the examination to be held at Allahabad and Lahore. The remaining eight vacancies will be offered for competition among the candidates examined at Calcutta, and such candidates, temporarily resident, but not domiciled in any of the Provinces enumerated above, as may be permitted to present themselves for examination at Allahabad and Lahore.

The probable number of vacancies in the offices subordinate to the Government of Bengal is ten. These will be reserved for candidates examined at Calcutta.

Candidates should pay the prescribed fee (Rs. 10) into the nearest Treasury, and forward the Treasury receipt to the Secretary to the Board of Examiners, Calcutta. Candidates paying their fees in Calcutta should pay them into the Bank of Bengal.

Application for permission to appear at the examination should be made to the Secretary to the Board of Examiners, Calcutta, between the date of this Notification and the 15th December next (inclusive).

\* (1) Evidence that the candidate at the date of making his application is not less than 18 and not more than 24 years of age. The date of the candidate's birth must be stated.

(2) In case the candidate has been educated at a school in which students' good conduct registers are kept, the candidate's register for the last year of his attendance at school when a year has not elapsed since he left school. In other cases, a certificate that the candidate is of good moral character from the head of the institution in which he has last been educated, or from some respectable householder to whom he is well known in private life, and who is himself known to a District or Sub-divisional Magistrate or to the head of some Government Office,—this last fact being certified by the countersignature of the officer in question.

The attention of intending candidates is called to Rule 9 of the Rules published with the Home Department Resolution of the 5th June 1894, prescribing the particulars\* and documents which should accompany the application for permission to appear at the examination.

J. P. HEWETT,  
*Offg. Secy. to the Govt. of India.*

The following orders, issued by the Government of India in the Home Department, are published for general information.

H. J. S. COTTON,  
*Chief Secy. to the Govt. of Bengal.*

### NOTIFICATIONS.

#### ESTABLISHMENTS.

*Simla, the 25th October 1894.*

No. 579.—Mr. W. E. Ward, C.S.I., on return from privilege leave, resumed charge of the office of Chief Commissioner of Assam from Mr. C. J. Lyall, C.S.I., C.I.E., on the forenoon of the 17th instant.

#### ECCLESIASTICAL.

*The 25th October 1894.*

No. 290.—The Reverend W. P. G. Field, a Chaplain on probation, is appointed to be a Junior Chaplain on the Bengal (Calcutta) Ecclesiastical Establishment, with effect from the 21st March 1894.

*The 26th October 1894.*

No. 296.—In continuation of the Notification of the Government of India in the Home Department, No. 1173, dated the 19th July 1888, the Governor-General in Council is pleased to publish the following rules under section 36(a) of the Births, Deaths and Marriages Registration Act No. VI of 1886:

1. The following fees shall be payable under section 35 of the said Act, namely:

	Fees.		
	Rs.	A.	P.
For inspection of the descriptive list of registers or records delivered to the Registrar-General by Commissioners appointed under Chapter V of the said Act ...	1	0	0
For each copy of an entry in any register or record described in the abovementioned descriptive lists ...	1	0	0

Provided that soldiers and non-commissioned officers of Her Majesty's Regular forces and all seamen shall be exempted from the payment of the foregoing fees, when the same are payable to a Registrar-General or a Government servant who is not a Minister of Religion.

2. When fees payable under the foregoing rule are received by a Registrar-General or any person being a Government servant and not a Minister of Religion, having the custody of any such registers or records as aforesaid, they shall be entered in a register and otherwise treated as if they were fees realized under the rules published under the Notification No. 1173, dated 19th July 1888, above referred to. When such fees are received by any other person, they may be retained by such person.

J. P. HEWETT,  
*Offg. Secy. to the Govt. of India.*

*Chief Secy. to the Govt. of Bengal.*

### NOTIFICATION.

#### FORESTS.

*Simla, the 19th October 1894.*

No. 1048-F.—Mr. E. P. Dansey, Conservator of Forests, 2nd Grade, is, on return from furlough, posted to the Punjab in charge of the provincial Forest Circle.

DENZIL IBBETSON,  
*Offg. Secy. to the Govt. of India.*

The following orders, issued by the Government of India in the Military Department, are republished for general information.

H. J. S. COTTON,  
*Chief Secy. to the Govt. of Bengal.*

*Simla, the 26th October 1894.*

#### JUDICIAL.

No. 980.—In exercise of the powers conferred by section 3 of the Madras and Bombay Armies Act, 1893 (56 and 57 Vic., c. 62), the Governor-General of India in Council is pleased to fix the 1st day of April 1895 as the date on which the said Act shall come into operation.

## ORGANIZATION.

No. 981.—In pursuance of the Madras and Bombay Armies Act, 1893 (56 and 57 Vic. c. 62), under which the military control hitherto exercised by the Governors in Council of the Presidencies of Madras and Bombay will cease, the Governor-General in Council hereby announces the changes in the administration and organization of the Army of India, which will be carried out with effect from the 1st April 1895.

2. The Bengal Army will, for purposes of administration, be organized in two portions—the Bengal Command and the Punjab Command.

3. The Army of India will consist of the following Commands:

Punjab.		Madras.
Bengal.		Bombay.

These Commands will be under Lieutenant-Generals who will be styled the Lieutenant-Generals Commanding the Forces, Punjab, Bengal, Madras and Bombay, respectively, and will all be under the direct command of the Commander-in-Chief in India and the control of the Government of India.

4. Each Lieutenant-General Commanding will be invested with the powers detailed in Special India Army Circular of this date, and will be assisted by the Army and Departmental Staff specified in paragraph 9. The business now transacted by the Military Departments of the Governments of Madras and Bombay will be transacted by the Military Department of the Government of India, whenever, under the regulations in Special India Army Circular of this date, it cannot be disposed of by the Lieutenant-General Commanding, or by the Commander-in-Chief in India.

## COMMANDS.

5. In accordance with these arrangements, the district commands as now sanctioned with existing staffs will be distributed as follows—

## PUNJAB COMMAND.

*Head-Quarters—\**

1st class Districts.

Lahore.

Punjab Frontier Force.

Rawal Pindi.

2nd class Districts.

Peshawar.

Sirhind.

## BENGAL COMMAND.

*Head-Quarters—\**

1st class Districts.

Meerut.

Oudh.

2nd class Districts.

Allahabad.

Assam.

Bundelkhand.

Narbudda.

Presidency.

Rohilkhand.

## MADRAS COMMAND.

*Head-Quarters Ootacamund.*

1st class Districts.

Burma,

Secunderabad.

2nd class Districts.

Bangalore.

Belgaum.

Madras.

Mandalay.

Rangoon.

Southern.

## BOMBAY COMMAND.

*Head-Quarters Poona.*

1st class Districts.

Mhow.

Poona.

Quetta.

2nd class Districts.

Aden.

Bombay.

Deesa.

Nagpur.

Sindh.

## TROOPS.

6. The composition of the several forces will be as follows:

## BRITISH TROOPS.

The regiments, batteries, battalions, and companies stationed within the Command.

## NATIVE TROOPS.

*Punjab Command.*

*Cavalry.*—15 Regiments, viz., the 9th, 10th, 11th, 12th, 13th, 15th, 16th, 17th, 18th and 19th Bengal Cavalry; the four Regiments of the Punjab Frontier Force, and the Cavalry of the Corps of Guides.

\* Will be notified hereafter.

*Artillery.*—5 Batteries of the Punjab Frontier Force.

*Infantry.*—37 Regiments (40 Battalions), viz., the 14th, 15th, 19th, 20th, 21st, 22nd, 23rd, 24th, 25th, 26th, 27th, 28th, 29th, 30th, 31st, 32nd, 33rd, 34th, 35th, 36th, 37th, 38th, 40th, and 45th Bengal Infantry; the nine Infantry Regiments of the Punjab Frontier Force, the Guides Infantry, and the 1st, 4th, and 5th, Regiments of Gurkhas.

*Bengal Command.*

## APPOINTMENTS, PROMOTIONS, ETC.

10. The appointments to 1st class district commands of officers of the British service will be made under existing rules, these officers being appointed by His Royal Highness the Commander-in-Chief, with the concurrence of the Secretary of State for India.

11. Appointments to 1st class district commands of officers of the Indian service, to all 2nd class district commands, and appointments of Colonels on the Staff, will be made under existing rules by the Governor-General in Council on the nomination of the Commander-in-Chief in India.

12. The Adjutant-General in India and Quartermaster-General in India will be nominated by the Commander-in-Chief in India; these nominations will be forwarded, with the approval of the Governor-General in Council, to the Secretary of State for India for confirmation, and for the concurrence in the case of an officer of the British service, of His Royal Highness the Commander-in-Chief. Officers of all four Commands will be eligible for appointment to the Staff at the Head-Quarters of the Army in India.

13. Staff appointments which are not reserved for any particular branch of the service will, as far as possible, be equally divided between the British and Indian services, and an officer serving in one Command may be appointed to the Staff in any other. All appointments that may carry the rank of substantive Colonel will be made by the Governor-General in Council on the recommendation of the Commander-in-Chief in India, and in the case of officers of the British service, with the approval of His Royal Highness the Commander-in-Chief. Other appointments to the General Staff will, as a rule, be made by the Commander-in-Chief in India on the nomination of Lieutenant-Generals Commanding, subject to the approval of the Government of India. Station and other minor Staff appointments will be made by the Commander-in-Chief in India on the nomination of Lieutenant-Generals Commanding. All regimental promotions of British Officers in Native corps will be made by the Commander-in-Chief in India on the recommendation of the Lieutenant-General to whose Command the corps permanently belongs.

14. First appointments of British officers to native regiments will be made by the Commander-in-Chief in India. The first appointment or promotion of a Native

\* For the Madras and Bombay Commands.

commissioned officer will be made on the nomination of the Lieutenant-General, and be subject to the approval of the Commander-in-Chief in India and the Government of India, and will be published in the General Orders of the Government of India.

15. All appointments in the—

Medical Department of the Army,  
Judge Advocate-General's Department,  
Veterinary Department,  
Ordnance Department,  
Military Works Department,  
Military Accounts Department,  
Commissariat-Transport Department,  
Clothing Department,  
Remount Department,

will be made under existing rules, except where otherwise specified. Departmental promotions will be notified in the *Gazette of India* or *London Gazette* in accordance with existing practice.

16. The Principal Medical Officer, Her Majesty's Forces in India, and the Principal Medical Officers of the several Commands and districts, if of the Army Medical Staff, as well as the Principal Veterinary Officer in India and Inspecting Veterinary Officers, will be appointed as at present by His Royal Highness the Commander-in-Chief with the concurrence of the Secretary of State for India; officers belonging to the Indian Medical Service will be appointed by the Government of India.

FURLOUGH AND LEAVE.

17. Furlough or leave, other than privilege leave, will be granted to Lieutenant-Generals, General Officers Commanding districts, Deputy Adjutants-General of Commands, and officers at the head-quarters of the Army in India by the Commander-in-Chief. In the case of Lieutenant-Generals the approval of the Government of India is necessary. Furlough or leave to other officers will be sanctioned within the regulations by the Lieutenant-General Commanding the Forces with which the applicant is serving. The grant of furlough or leave will be notified in the General Orders of the Government of India, the General Orders of the Commander-in-Chief, or in the orders of the Command, as the case may be. Departmental officers, other than officers of the Military Accounts and Army Remount Departments, will submit their applications through the local head of the Department to the Lieutenant-General, who will grant the leave with the previous concurrence of the head of the department with the Government of India. When the furlough or leave is not provided for by regulations, the application will be referred for the orders of the Commander-in-Chief or Government of India as the case requires. In urgent cases the grant may be made in anticipation of sanction. Details of procedure for the grant of furlough and leave will be found in Appendix I of the General Orders of the Commander-in-Chief in India of this date.

PENSIONS AND RETIREMENTS.

18. Pensions and retirements of commissioned officers of the Staff Corps and Indian Army who may retire in India, will be granted by the Government of India.

DISPOSAL OF BUSINESS NOW PERFORMED BY THE MILITARY DEPARTMENTS OF THE GOVERNMENTS OF MADRAS AND BOMBAY.

19. Questions which have hitherto been referred by the Commanders-in-Chief of the Madras and Bombay Armies to the Military Departments of the Governments of those presidencies will, in future, be decided locally or referred, where necessary through the Commander-in-Chief in India, to the Government of India. Business relating to estates of deceased commissioned and warrant officers, hitherto transacted by the Military Secretaries to the Governments of Madras and Bombay, will in future be conducted by the Secretary to the Government of India, Military Department.

RELATIONS OF THE STAFF AT THE HEAD-QUARTERS OF THE ARMY IN INDIA TO LIEUTENANT-GENERALS AND ADMINISTRATIVE DEPARTMENTS UNDER THE GOVERNMENT OF INDIA.

20. The Adjutant-General in India will issue to the army in India all orders of the Commander-in-Chief relating to the *personnel*, duties, training, discipline, equipment, and general efficiency of the troops. The Quartermaster-General in India will continue to issue circulars and executive orders on matters customarily dealt with in his department. All decisions and instructions of the Government of India and of the Commander-in-Chief will be communicated to Lieutenant-Generals Commanding by the chief officer of the department concerned.

21. In all departmental matters affecting a department exclusively, which may necessitate reference to the Commander-in-Chief, the head of the department concerned will submit the matter to the Commander-in-Chief personally, or by minute paper or office note, and he will communicate the instructions received to the head of the department with the Command concerned, who will, under the orders of the Lieutenant-General, give effect to the same. Papers on which the Commander-in-Chief may have passed decisions will be communicated to the Adjutant-General, Quartermaster-General, or Principal Medical Officer to be noted. All questions involving military as apart from departmental matters should be

discussed with the Adjutant-General, Quartermaster-General, or Principal Medical Officer, as the case may be, in order that military considerations or those affecting general military policy may be fully weighed before submission to the Commander-in-Chief.

22. When the Commander-in-Chief is on tour, heads of departments will forward all papers for submission to His Excellency to the Adjutant-General, or the Quartermaster-General in India, according to the nature of the business, who will communicate the Commander-in-Chief's orders thereon to the head of the department concerned.

23. There will be a Controller of Military Accounts with each Command who will be the financial adviser of the Lieutenant-General Commanding, as well as of the Government of India in the Military Department. The Controller will not be under the orders of the Lieutenant-General as regards his departmental duties, but only in matters of Military discipline.

24. All matters of primary importance, or which affect the Army at large or more than one Command, changes in regulations, in organization, or those in which a principle is involved, will be submitted by Lieutenant-Generals to the Commander-in-Chief in India. Other matters (which will be defined in the subsidiary orders of the Commander-in-Chief) of particular application or of purely local concern, but which may require to be submitted to the Government of India, will be dealt with by Lieutenant-Generals in direct communication with the Government of India.

The procedure here indicated will be adopted in Madras and Bombay as regards original references, which do not concern individual officers, from the 1st March 1895.

25. The Deputy Adjutant-General will be the channel through which all orders of the Lieutenant-General will be issued to the forces under his command. Departmental questions affecting troops in the Command should be discussed with the Deputy Adjutant-General before submission to the Lieutenant-General Commanding. On all purely departmental matters on which local heads of departments have taken their orders direct from the Lieutenant-General, they will issue them to their departments. On questions relating to the troops and departments generally, orders will be issued through the Deputy Adjutant-General.

26. All departmental matters of purely local concern affecting the troops in the Command, that the Lieutenant-General Commanding cannot himself dispose of will, subject to the reservations in paragraph 24 above, be dealt with by the local head of the department under the orders of the Lieutenant-General, in direct communication with the head of the department with the Government of India, who will, if necessary, refer the question to the Government of India.

27. The heads of departments with the Lieutenant-General Commanding will, under regulations detailed in Special India Army Circular of this date, communicate with the heads of their departments with the Government of India, or with the Commander-in-Chief in India, as the case may require.

Officers in charge of departments of military administration with each Command, except Controllers of Military Accounts, will act in regard to their executive duties in subordination to the Lieutenant-General Commanding.

28. Subsidiary instructions relating to the changes introduced by the reorganization of the Army herein announced, are detailed in the Special India Army Circular and the General Orders of the Commander-in-Chief in India of this date.

#### RESERVE OF OFFICERS.

No. 985.—M. H. C. Sterndale, Gentleman, to be Second-Lieutenant in the Infantry Branch of the Indian Army Reserve.

WEDNESDAY, OCTOBER 31, 1894.

PART IB.

ORDERS BY THE LIEUT.-GOVERNOR OF BENGAL.

MUNICIPAL AND LOCAL.

## NOTIFICATION.

*No. 4092½M.—The 22nd October 1894.*—It is hereby notified for general information that under section 6, clause (c) of the Bengal Ferries Act I of 1885, the Lieutenant-Governor is pleased to establish a public ferry at Santipur over the Subarnarekha river in the district of Balasore.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION.

*No. 5140M.—The 24th October 1894.*—Whereas a notification, No. 488M., dated the 2nd February 1894, was published at page 23, Part IB of the *Calcutta Gazette* of the 7th idem, sanctioning the extension of the provisions of Part IX of the Bengal Municipal Act, III of 1884, to the Wards Nos. II, III, IV, and V of the Kumarkhali Municipality, in the district of Nadia, and whereas the Municipal Commissioners did not take action under section 222 of the Act to bring the provisions of such Part into operation within the said wards of the Municipality within 15 days of the publication of the notification in the *Calcutta Gazette*, it has become necessary to renew the sanction then accorded. It is therefore notified for general information that, in exercise of the power vested in the Local Government by section 221 of the Act, and in accordance with the recommendation of the Commissioners of the Kumarkhali Municipality, made at a meeting, the Lieutenant-Governor sanctions the extension of the said Part IX of the Municipal Act, as amended by Bengal Act IV of 1894, to the aforesaid wards of the Municipality, and the levy under section 86 (f) of fees for the cleansing of all private latrines within those wards.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION.

*No. 5143M.—The 24th October 1894.*—It is hereby notified for general information that the Lieutenant-Governor intends, in the exercise of the power vested in the Local Government by section 221 of the Bengal Municipal Act III of 1884, as amended by Bengal Act IV of 1894, and in accordance with the recommendation of the Commissioners of the Bhagalpur Municipality, made at a meeting, to extend the provisions of Part IX of the said Act to Wards IV, V and VI of the said municipality, unless good reasons are shown to the contrary within one month from the date of the publication of this notification within the municipality.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION.

*No. 5148M.—The 26th October 1894.*—It is hereby notified that, under section 59 of the Bengal Municipal Act III of 1884, as amended by Acts IV and VI of 1894, the Lieutenant-Governor approves the election by the Commissioners of the Roserah Municipality, in the district of Darbhanga, of Mr. C. J. Robertson to be their Chairman.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION.

*No. 5169M.—The 27th October 1894.*—In exercise of the power conferred on the Local Government by section 53, clause 3 of the Calcutta Hackney Carriage Act II of 1891, the Lieutenant-Governor is pleased to confirm the following bye-laws which have been framed by the Commissioners of the Rampur Boglia Municipality under clause I of the said section:—

1. No carriage shall receive a second class or third class license unless it be in a clean and safe condition, have sufficient room to seat four persons, and have stout axles, springs and wheels and two good lamps. Carriages of the description known as *Tom-tom* or *Dog-cart* shall be registered in the third class, and shall have one light on the right side.

2. When the carriage is drawn by a single pony or a pair of ponies, each pony must be in a fit condition and at least three years old.

3. No animal shall be deemed fit for its work, unless it is so in respect of age, muscle and condition, and equal to the work of drawing the carriage.

4. Fitness of the carriages and animals referred to in the above bye-laws shall be decided by the registering officer.

5. Every place where any hackney carriage, horse or pony is kept shall be open to the inspection of the officer of the Department at any time between sunrise and sunset.

6. The owner, driver or person in charge of a public conveyance in which any person suffering from small-pox or other infectious disease has been carried, shall immediately provide for the disinfection of the same to the satisfaction of the Commissioners.

7. No person who is suffering from small-pox or any other infectious disease shall enter a public conveyance without previously notifying to the owner or driver or person in charge of such conveyance that he is so suffering.

Notwithstanding anything contained in any Act relating to the public conveyance for the time being in force, no owner, driver, or person in charge of a public conveyance shall be bound to carry any person suffering as aforesaid in such conveyance unless the demand made by him for sufficient compensation for the loss and expense he must incur in disinfecting such conveyance is first of all settled.

8. Under section 54 of the Calcutta Hackney Carriage Act of 1891, whoever infringes any of these bye-laws shall be liable to a fine not exceeding Rs. 20.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION.

*No. 5181M.—The 30th October 1894.*—It is hereby notified that under section 17 of the Bengal Municipal Act III of 1884, as amended by Acts IV and VI of 1894, the Lieutenant-Governor is pleased to appoint the following gentlemen to be Commissioners of the Jhalda Municipality, in the district of Maubhum:—

Babu Kedar Krishna Banerjee.  
Ramtarak Ghosh.  
Kali Prasad Kundu.  
Jogendra Dutta.

Babu Bichuk Lal.  
Puran Marwari.  
Behari Lal Chowdhury.  
Kali Charan Chakravarti.

Babu Banwari Lal Hazra.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## NOTIFICATION.

*No. 5183M.—The 30th October 1894.*—It is hereby notified that under section 23 of the Bengal Municipal Act III of 1894, as amended by Acts IV and VI of 1894, the Lieutenant-Governor is pleased to appoint Babu Kedar Krishna Banerjee to be the Chairman of the Jhalda Municipality in the district of Maubhum.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

## DECLARATION.

*No. 5145M.—The 26th October 1894.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Calcutta Municipality for a public purpose, viz., for a public recreation ground, it is hereby declared that for the above purpose pieces of land Nos. 129-4, 129-5, and 129-6, Machooa

Bazar Road, in the town of Calcutta, district 24-Parganas, measuring more or less 3 bighas 10 cottahs and 3 square feet, are required. The boundaries of the land are as follows :—

*Plot marked E-1 on plan.*—On the North No. 129-3, Machooa Bazar Street; on the South a new road; on the East partly a new public road and partly No. 129-3, Machooa Bazar Road; on the West Machooa Bazar Bye-Lane.

*Plot marked F.*—On the North, South, and East new public roads; on the West Machooa Bazar Bye-Lane.

*Plot marked G on plan.*—On the North, South and East new public roads, and on the West Machooa Bazar Bye-Lane.

*Plot marked H on plan.*—On the North and East new public roads; on the South Machooa Bazar Road; on the West Machooa Bazar Bye-Lane.

A plan and specification of the land to be acquired are filed in the office of the Municipal Commissioners of Calcutta for public inspection.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

#### DECLARATION.

*No. 5151 Med.—The 27th October 1894.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Monghyr District Board for a public purpose, viz., for constructing a dispensary building at Jamalpur in the village of Jamalpur, pargana Pharkia, zilla Monghyr, it is hereby declared that for the above purpose a piece of land measuring, more or less, 2 bighas 15 cottahs and 11 dhooors of standard measurement, is required. The land is bounded on the East by the jote of Chandiprosad, on the South by that of Olubila Dhanook and Chandi Prosad, on the West by Jagir Berj Mohan, and on the North by the District Board road Gogri to Bhatkar.

A plan has been made of the plot in question, and it may be inspected by any one concerned at the Monghyr Collectorate Office.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

C. W. BOLTON,  
*Offg. Secy. to the Govt. of Bengal.*

#### DECLARATION.

*No. 5176 M.—The 30th October 1894.*—Whereas it appears to the Lieutenant-Governor of Bengal that land is required to be taken up by Government at the expense of the Baidyabari Municipality for a public purpose, viz., for the construction of a road leading from Sheoraphuli to Pearapur (khas mahal) in the village of Sheoraphuli, pargana Boroe, zilla Hooghly, it is hereby declared that for the above purpose a piece of land measuring, more or less, sixteen cottahs and one chi ak of standard measurement, is required. The land is bounded on the North by a part of Pearapur road, mal lands of Srimati Patitbabani Dassi, Ekadashi Jele, Adyata Das, lakhraj lands in jote of Kobul Jele and the khas mahal lands of Raghu Nath Jele; on the East by Sheoraphuli Municipal road; on the South by lakhraj lands of Sasi Bhusan Mukerjee and others and jote lakhraj of Kobul Jele, mal lands of Adyata Das, Ekadashi Jele, and Srimati Patitbabani Dassi and Khetter Das which are not to be acquired; on the West by jote of Nufar Majee.

This declaration is made, under the provisions of section 6 of Act I of 1894, to all whom it may concern.

C. W. BOLTON,  
*Under-Secy. to the Govt. of Bengal.*

## Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated in the district of Muzaffarpur, will be put up to sale at 10 o'clock on the 1st November 1894 at the Muzaffarpur Collectorate.

The purchasers of the several plots of land will be subject to the following conditions:—

## Conditions.

- 1st.—The amount of bid should not be less than the price shown against each lot. The lots will be sold to the highest bidders with or subject to an annual revenue shown against each lot.
- 2nd.—One-fourth of the amount of bid must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled (the sum deposited being forfeited to Government), and the lot again put up for sale at the risk of the defaulting purchaser after issue of advertisement, as in the case of original sale.
- 3rd.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale:—

Name of district.	Pargana and estate.	Number of mile.	NUMBER AND AREA OF EACH PLOT.		Boundary of each sale lot.	Total area of each sale lot in local bighas.	Price of each sale lot.	Annual revenue of each sale lot.
			Number.	Area in local bighas.

## No. 41.

**SEALED** tenders for the supply to the Madras Commissariat of country-manufactured matured rum at the stations and in the quantity noted in the memorandum at foot will be received by the Commissariat Storekeeper-General at Madras, up to 12 noon on the 11th December 1894, and then and there opened in the presence of all parties who may choose to attend.

2. No tenders will be received except on forms obtainable from the Commissariat Storekeeper-General at Madras, which, as well as any information required regarding the contract, will be given on application to the Commissariat Storekeeper-General at Madras up to 4 o'clock p.m. on the 10th December 1894. No addition or alteration must be made in the tender forms.

3. Seals of tenderers will not be accepted; they should have their marks verified by witnesses.

4. Covers to be superscribed "Tender for the supply of rum."

5. The tender may be in part or for the whole requirement, but the term of contract must be as noted below, and the rate an average for the whole period. Government shall have the power to accept a tender in whole or in part, or to reject a tender without assigning any cause for so doing; but, in the event of the tender being accepted in part only, and the tenderer failing to take up the contract, the whole earnest-money deposited will be confiscated.

6. Each tender must be accompanied with earnest-money in Government promissory notes or Bank of Bengal or Madras or Treasury receipt\* for Rs. 1,255. Tenders without earnest-money will not be attended to.

\* The receipt may be for currency notes or cash.

7. Earnest-money will be confiscated if the tenderer withdraws from his tender.

*Memorandum of stations and quantities referred to in paragraph 1.*

Station.	Estimated quantities.	REMARKS.
1	2	3
Madras Commissariat Storekeeper-General.	32,143 Imperial gallons of country manufactured and matured rum at 5° over-proof, being the equivalent of 45,000 Imperial gallons at 25° under-proof.	Delivery to commence from the date of acceptance and to be completed by 28th February 1895.

B. GOMPERTZ, Lieut.-Col., Asst. Comy.-Genl.,

*Commissariat Storekeeper-General.*

Commissariat Storekeeper-General's Office, Madras, 12th October 1894.

## No. 42.

**SEALED** tenders for the supply to the Madras Commissariat of country-manufactured cotton cloth for barrack and hospital mattresses and pillow-cases for one year, from 1st April 1895 to 31st March 1896, at the stations and in the quantities noted in the memorandum at foot, will be received by the Commissariat Storekeeper-General at Madras, up to 12 noon on the 21st November 1894, and then and there opened in the presence of all parties who may choose to attend.

2. No tenders will be received except on forms obtainable from the Commissariat Storekeeper-General's Office at Madras, which, as well as any information required regarding the contract, will be given on application to the Commissariat Storekeeper-General at Madras up to 4 o'clock p.m. on the 20th November 1894. No addition or alteration must be made in the tender forms.

3. Seals of tenderers will not be accepted; they should have their marks verified by witnesses.

4. Covers to be superscribed "Tender for the supply of country manufactured cotton cloth."

5. The tender may be in part or for the whole requirement, but the term of contract must be as noted above and the rate an average for the whole period. The Commissary-General shall have the power to accept a tender in whole or in part or to reject a tender without assigning any cause for so doing, but in the event of the tender being accepted in part only and the tenderer failing to take up the contract, the whole earnest-money deposited will be confiscated.

6. Each tender must be accompanied with earnest-money in Government promissory notes or Bank of Madras or Bengal or Treasury receipt\* for an amount equal to 2 per cent. of the value at

the tendered rate of one year's supply of the quantity tendered for, but the earnest-money of any one tender need not exceed Rs. 605. Tenders without earnest-money will not be attended to.

7. Earnest-money will be confiscated if the tenderer withdraws from his tender.

8. A sample of the cloth to be supplied can be inspected at, or had for inspection on application from, the Commissariat Storekeeper-General at Madras.

Station.	ESTIMATED QUANTITIES—		
	For barrack and hospital mattresses, 59" wide, in lengths of 28½ yards each.	For barrack and hospital pillow-cases, large, 30" wide, in lengths of 31 yards each.	For hospital pillow-cases, small, 26" wide, in lengths of 29½ yards each.

**SCANTLINGS**—From 12 to 20 feet, at Rs. 2.8 per c. ft.

Under 2 and over 7 " 2.4 "  
Under 7 feet " 2 "

The above prices are for ordinary building purpose.

For *Planking Sleepers, &c.*, special rates will be fixed by agreement.

The Department will still take orders for buildings all over at Rs. 2.4 per cubic foot, provided the scantlings are taken in fair proportion.

*Second and Third Class Timber* will be sold at price fixed by agreement.

*Auction Sales* will be held from time to time to clear off stock.

For further particulars apply to the Officer in charge.

By order of the Conservator of Forests, N.-W.F. and Oudh, Oudh Circle.

KANHYA LAL,

Sub-Assistant Conservator of Forests,  
Barhamghat Division.

Barhamghat, the 1st April 1888

## Pure Sulphate of Quinine.

MANUFACTURED AT THE BENGAL GOVERNMENT  
CINCHONA PLANTATION.

THE price of this quinine is as follows:—

1 pound tin, Rs. 16, or, post free, Rs. 16.12.

8 " " " 8, " " " 8.8.

4 " " " 4, " " " 4.8.

Analysis shows this quinine to be of the purest manufacture; and it is guaranteed to be free from wilful mixture with the inferior alkaloids Cinchonine and Cinchonidine. It is for sale only to Government officers, and only for cash, and may be had from the Superintendent, Botanical Garden, Sibpur, near Calcutta. It can be had either white or coloured pink.

## Cinchona febrifuge.

Cinchona Febrifuge can be purchased by all Government officers and by any one taking *six pounds* at a time, from the Superintendent, Botanic Garden, Calcutta, at the following rates—per four-ounce tin, Rs. 2, *ana*, 8; per eight-ounce tin, Rs. 5; per pound tin, Rs. 10. The general public can be supplied by the Superintendent, Botanic Garden, for *Cash only* at the undernoted rates—per four-ounce tin, Rs. 3; per eight-ounce tin, Rs. 6; per pound tin, Rs. 12. This medicine is also sold by the principal European and native druggists in Calcutta. Postage four annas per 4 oz. tin, eight annas per 8 oz. tin, and twelve annas per pound tin, in addition to the foregoing rates.

## Notice.

THE public are hereby informed that the Kartik Bani Fair, which is held every year on the banks of the Daleswari river, near Munshiguri in the district of Dacca, will commence on the 20th November 1894 A. D., corresponding with 1st Ashvayan 1301 (B.S.), and continue up to 5th January 1895. Trade-men, dealers and others may buy and sell during these six weeks.

C. J. S. FAULDER, Chairman.

Dacca District Board's Office, the 17th September 1894.

## Notice.

THE Public are hereby informed that the general power-of-attorney, dated the 27th Baisak 1288 (B.S.), granted by us in favour of Babu Guno Madhab Roy, son of Haranankar Roy, deceased, of Bairampur in the district of Jessore, has been revoked from the 10th Ashar 1301 (B.S.), corresponding with the 23rd June 1894.

MANMATHA NATH MITTRA.  
NARENDRA NATH MITTRA.

(711—3)

## Partially destroyed notes.

THE Government Promissory Note No. 039181 of the four per cent. of 1854-55 for Rs. 500, standing in the name of Gunesham Mitter, the proprietor, by whom it was never endorsed to any other person. Payment of the above note and the interest thereon have been stopped at the Public Debt Office, Bank of Bengal, and application is about to be made for the issue of duplicates in favour of the proprietor.

GHUNESHAM MITTER, Uia, P. O. Nadia.  
(12—3)

BABU PREBENDRO CHANDRO MULICK, B.L.,  
intends to be enrolled as a Vakeel of the High Court, Calcutta  
(713—4)

WANTED a qualified Sub-Overseer for the District Board of Birbhum on a monthly salary of Rs. 30 rising to Rs. 45 by biennial increment of Rs. 5, and horse allowance of Rs. 15 per month. Applications, with copies of testimonials, will be received up to the 7th November 1894. The applicants should state their age.

C. G. MUSTAPHI,  
Vice-Chairman, District Board, Birbhum.  
(706—2)

## Notice.

WANTED four temporary Surveyors on a consolidated pay of Rs. 40 a month, and a temporary Overseer at Rs. 30 a month as pay and Rs. 15 as horse allowance. Applications, with copies of testimonials, will be received by the undersigned up to the first week of November next. None need apply for Surveyors' posts who has not passed as Upper Subordinate from the Sibpur Engineering College, or passed in the first division from a survey school; and for the Overseer's post none need apply who is not qualified under rule 2(2), Part IX of the Bengal Local Self-Government Act III (B.C.) of 1885, with sufficient experience in road and bridge works.

A. K. MUKERJEE, District Engineer,  
Dumajpur.

The 17th October 1894. (708—2)

## Wanted.

NATIVE Surveyors and Ameens on Rs. 40 and 35 respectively per mensem for 7 months for the survey of 100 lands in the Western Dums district Jalpaiguri. Applications will be received by the undersigned up to 7th of November 1894.

The Native Surveyors must be qualified to survey with theodolite, plane-table and prismatic compass. They must be able to plot neatly and to calculate areas both in acres and bighas.

The Ameens will be required to survey with plane-table and prismatic compass. They must also be able to plot maps and calculate areas as above.

R. H. RENVY, Deputy Commissioner, Jalpaiguri.

Deputy Commr's Office, Jalpaiguri, the 18th October 1894.

## Currency Notes.

THE following Currency Notes of the Calcutta Circle are stated to have been destroyed, and payment of their value has been claimed by the person whose name is placed against the numbers; any other person claiming a right to them, is warned to communicate at once with the undersigned:—

Binning, have been lost and the transfer of the shares has been stopped and application has been made for the issue of duplicates, and failing any notice before the 30th November next, duplicate scrips will be issued.

By order of the Board,  
Per pro. Ernsthausen Limited,  
WILLIAM BLECKE, Agents.

Calcutta, 26th October 1894.

(719—2)

## Kinmond and Company, Limited.

**PROCEEDINGS** of an Extraordinary General Meeting of the Shareholders of the Company, held at its Registered Office, No. 4, Strand Road, on Wednesday, the 26th day of September 1894, at 4-30 P.M.

## PRESENT:

Mr. J. S. Fraser in the Chair.

" Shirley Fremearno.

" P. Blaney.

Mrs. A. M. Kinmond, Executrix to the Estate of the late W. O. Kinmond.

Mr. C. T. Geddes, by his attorney Mr. C. W. Foley.

" Edward Cowie, by his proxy Mr. J. S. Fraser.

The notice convening the meeting having been read—

It was proposed by Mr. Shirley Fremearno, and seconded by Mr. P. Blaney—

"That the following resolution, which was passed at the Extraordinary General Meeting of Shareholders held on 24th August, be and is hereby confirmed as a special resolution:—

"That the Company be wound up voluntarily, and that Messrs. J. S. Fraser and Edward Cowie be and they are hereby appointed the Liquidators of the Company at a remuneration of Rs. 250 each, with all the powers conferred by the Indian Companies Act, 1882, and that they be at liberty to give Mr. Bonerjee, on completion of the liquidation, such sum as they may think fit as remuneration for the services rendered by him to the Company."

Carried unanimously.

(714—1)

J. S. FRASER, Chairman.

## Estate O. F. Medham.

**HAVING** received letter of administration to the above estate, all parties having claims against this estate will send in a notice of their claims before the 20th November 1894, after which date no claims will be entertained.

TRIPURA CHURN CHATTERJEE,

(717—3)

Mangaldai, Assam

## Notification.

**IT** is hereby notified, under section 5 of the Indian Treasure Trove Act (VI of 1878), that on or about 1st July 1894 the following articles were found under ground by Petta Sanni and Dana Ammanna while erecting a wall forming the boundary of the sites of Nittan Subbanna and Magapa Munalashani in the village of Magam, Amalapur taluk, Godavari district:—

M. J. NORMAN, C.E.,

Exc. Engr., Nadia Rivers Division.

Berhampore, the 22nd October 1894.

THE following Weather Reports of the Bengal Meteorological Department, issued by orders of the Government of Bengal, can be supplied to the public at the prices annexed:

1st.—Bay of Bengal Daily Report, giving meteorological observations taken at 28 stations on or near the coast of the Bay, with a chart and summary. This is published in connection with the Bay of Bengal Storm Signal Service. The report giving 8 A.M. observations of the day is distributed by peon in Calcutta soon after 11 A.M. Price to subscribers in Calcutta Rs. 2 per monsoon.

2nd.—Bengal Daily Report, containing observations taken at 48 meteorological stations in Bengal and Assam, and transmitted to Calcutta by weather telegrams, with a brief summary of the weather in Bengal during the preceding 24 hours. The report giving the 8 A.M. observations of each day is printed in time for the evening mail, and is distributed to subscribers in Calcutta the same evening. This report for the present is only published during the south-west monsoon, i.e., from about May 15th to November 15th, or thereabouts. Price Rs. 2-8 per monsoon, including postage.

3rd.—A Weekly and Monthly Statement of Meteorological Observations taken at 49 observing stations, and of rainfall recorded at 276 subdivisional and other stations, together with summaries of the more important features of the meteorology of the past week or month of the province, and of the distribution of the rainfall and its variation from the normal. Price of the Weekly Report, including postage, Rs. 6 per annum, payable in advance and of the Monthly Summary Rs. 2 per annum payable in advance.

Subscriptions payable to the Meteorological Reporter to the Government of Bengal, 5, Russell Street, Calcutta, for the Bay of Bengal Daily Report, and to the Accountant and Treasurer, Bengal Secretariat, for the other reports.

ALEX. PEDLER,  
Meteorological Reporter to the Govt. of Bengal.

## The Indian Law Reports.

Published under Authority.

THE Indian Law Reports, published under the authority of the Governor-General in Council, appear in monthly parts, published as soon as possible after the first of each month at Calcutta Madras, Bombay, and Allahabad, and comprise four series—one, for the Calcutta High Court, a second for the Madras High Court, a third for the Bombay High Court, and a fourth for the Allahabad High Court. The cases heard by the Privy Council on appeal from each High Court are reported in the Series for that High Court. Cases heard by the Privy Council on appeal from Provinces in India not subject to any High Court are reported in the Calcutta Series.

The Calcutta Series is distributed by the Bengal Secretariat, and the Madras, Bombay, and Allahabad Series are distributed direct from Madras, Bombay, and Allahabad respectively.

In supersession of the previous advertisements, on and from the 1st January 1889 the terms of subscription and sale will be as follows for current issues as well as for back numbers of the Reports from 1876:—

*Terms of subscription payable annually in advance.*

For the complete series, including postage, Rs. 22-8.

	Without postage.	With postage.

" part of each of the Madras, Bombay, and Allahabad Series purchased separately (inclusive of postage in India) ...	.....	1 0 0

The following is the rate at which deductions will be made for parts out of print and at which duplicate copies will be supplied of subscribers when required in place of copies lost in transit:—

For town. For mofussil.

	Rs. A. P.	Rs. A. P.
For the Calcutta Series, per copy ...	0 8 9	0 10 3
" each of the Madras, Bombay, and Allahabad Series, per copy ...	0 5 3	0 5 9
" the Calcutta Series. For the year ...	7 2 6	8 6 3
" each of the Madras, Bombay and Allahabad Series. For the year ...	4 4 6	4 11 3

Persons desiring to subscribe for or purchase the Report should apply to—

Superintendent, Government Press, Madras.

The Superintendent, Government Central Press, Bombay.

" Curator of Government Books, North-Western Provinces and Oudh.

" Superintendent of Government Printing, Bengal.

Orders and subscriptions for 1894 should be at once registered and remitted by money-order payable to the Accountant and Treasurer, Bengal Secretariat, Calcutta.

ADVERTISEMENTS will be received for publication on the wrappers of the Indian Law Reports, Calcutta Series, at the following rates, payable in advance—

	One page	Half page	Quarter page
	Rs.	Rs.	Rs.
For one issue ...	20	14	9

Bengal Secretariat Press, 10, Lyon's Range, Calcutta.		
Remittances to be forwarded to the Accountant and Treasurer Bengal Secretariat, Writers' Buildings, Calcutta.		

All the wanting parts of the INDIAN LAW REPORTS (complete series) having now been reprinted, the complete Reports from 1876 to 1893 may be purchased for all the years, or for any particular year, on application to the Superintendent of Government Printing in Bengal, 10, Lyon's Range, Calcutta.

The subscription, Rs. 22-8 per annum, should be remitted in advance to the Accountant and Treasurer, Bengal Secretariat.

## Notice.

It is hereby notified, for general information, that subscription to the complete series of the Indian Law Reports should be registered during the first three months of each calendar year. Subscribers are therefore requested to send in their subscriptions of the complete series before the 31st March in each year. Those who register their names after that date will understand that copies will be supplied only if available.

INDIAN LAW REPORTS,  
NOTICE TO SUBSCRIBERS.

int of non-receipt of any number is made to the Publisher of the series within three months of the date of publication, the benefits of the subscription rates for copies lost in transit will not be allowed, and full rates will be charged. The price per copy of each of the four series at subscription rates and at full rates is shown below:—

Each of the Madras, Bombay and Allahabad Series ...	1 0 0	1 0 0

Annual Statement of the Seaborne Trade and Navigation of the Bengal Presidency and of its Chief Port (Calcutta), and each of its Subordinate Ports (Chittagong, Balasore, Cuttack, Pooree, and Narain-gunge), Volumes I and II. Price Rs. 20 for 1893-94. Published at the Calcutta Custom House. Previous years' volumes can also be obtained at the same price.

## Notice.

NOTICE is hereby given that the terms for the purchase of publications from the Bengal Secretariat Press, except for Government offices or offices under the control of Government Officers are strictly cash, and on no other terms will any publication be supplied, or advertisement, notice, &c., inserted in either of the Gazettes.

In the case of insolvency notices, cash must be sent with such notices when forwarded by Mofussil courts or offices, and for those forwarded by the Official Assignee cash must be paid on presentation of memorandum of cost by the Accountant and Treasurer, Bengal Secretariat.

Remittances in postage stamps should be accompanied by an addition of one anna in the rupee on account of discount.

Applications for Acts of the Bengal Legislative Council required on the public service should be addressed to the REGISTRAR, Office of the Legislative Department, Government of Bengal. Copies are available for purchase at MESSRS. THACKER, SPINK & Co., Government Place, Calcutta.

## PART VI.

### Bills introduced into the Council of the Governor General for making Laws and Regulations, or published under Rule 22.

#### GOVERNMENT OF INDIA.

#### LEGISLATIVE DEPARTMENT.

The following Bill was introduced in the Council of the Governor General of India for the purpose of making Laws and Regulations on the 18th October, 1894:

NO. 15 OF 1894.

*A Bill to amend Act V of 1861 (an Act for the Regulation of Police).*

WHEREAS it is expedient to amend Act V of 1861 (*an Act for the Regulation of Police*); it is hereby enacted as follows:

**1.** In section 1 of the said Act the following

Addition to interpretation-clause, section 1, Act V, 1861. shall be inserted between the interpretations of the words "general police-district" and the word "property," namely:

"The words 'District Superintendent' and 'District Superintendent of Police' shall include any Assistant District Superintendent or other person having charge of the administration of the police of a district in pursuance of a general or special order of the Local Government."

**2.** In section 7 of the said Act, in lieu of the

Addition to section 7, Act V, 1861, respecting minor punishments. words beginning "or fine any police-officer" down to the end of the section, the following shall be substituted, namely:

"or may award to him any of the following punishments, namely:

- (a) fine to any amount not exceeding one month's pay;
- (b) confinement to quarters for a term not exceeding fifteen days, with or without punishment-drill, extra guard, fatigue or other duty;
- (c) deprivation of good-conduct pay;
- (d) removal from any office of distinction or special emolument."

**3.** For the second paragraph of section 8 of

Amendment of section 8, Act V 1861, respecting certificates and suspension. the said Act, beginning with the words "Such certificate shall cease to have effect" and ending with the words "officer empowered to receive the

same," the following shall be substituted namely:

"Such certificate shall cease to have effect whenever the person named in it ceases for any reason to be a police-officer, and, on his ceasing to be such an officer, shall be forthwith surrendered by him to his superior officer or some other officer empowered to receive the same.

"A police-officer shall not by reason of being suspended from office cease to be a police-officer. During the term of such suspension the powers, functions and privileges vested in him as a police-officer shall be in abeyance, but he shall continue subject to the same responsibilities, discipline and penalties, and to the same authorities, as if he had not been suspended."

Substitution of new section for section 15, Act V, 1861.

**4.** For section 15 of the said Act the following shall be substituted, namely:

"15. It shall be lawful for the Inspector General of Police, with the sanction of the Local Government, to be notified by proclamation in the official Gazette, and in such other manner as the Local Government shall direct, to employ any police-force in excess of the ordinary fixed complement to be quartered in any part of the general police-district which shall be found to be in a disturbed or dangerous state, or in any part of the general police-district in which, from the conduct of the inhabitants or of any of them, he may deem it expedient to increase the number of police.

"The cost of such additional police-force shall be borne, as the Magistrate of the district may direct,—

- (a) by the inhabitants of, or persons having interest in land in, the local area described in the notification, or both, or
- (b) by any such inhabitants or persons, or class or classes of such inhabitants or persons, or both, as aforesaid, as in the opinion of such Magistrate have caused or contributed to the disturbance or other cause which led to the quartering of the additional police-force, and no portion of such cost shall be payable by any person or class of persons who, in the opinion of the Magistrate, have been free from blame;

and such Magistrate, after enquiry if necessary, shall apportion such cost according to his judgment of their respective means among the inhabitants and other persons who are as aforesaid liable to bear the same."

5. After section 15 of the said Act the following shall be inserted, namely:  
Addition of new sections after section 15 of Act V, 1861.

"15A. If in any part of the general police-district as aforesaid, in which, under the provisions of the last foregoing section, an additional police-force might be quartered, death or grievous hurt or damage to property has been caused by or ensued from the misconduct of the inhabitants of, or persons having interest in land in such part, or both, and if no additional police-force has been quartered therein, it shall be lawful for the Magistrate of the district, with the previous sanction of the Local Government, to—

- (a) make an award fixing the amount of compensation payable to the sufferers from the injury caused by or which has ensued from such misconduct;
- (b) make an order determining the persons or class or classes of persons, being inhabitants of or having interest in land in such part as aforesaid, by whom the amount so awarded shall be paid; and
- (c) make an order assessing the proportion in which the same shall be paid by each such person or class of persons according to his judgment of their respective means:

Provided that no portion of the compensation so awarded shall be payable by any person or class of persons whom the Magistrate shall, in such order, declare to be innocent of complicity with the misconduct.

"15B. An order made under section 15, clause (b), or an award or order made under section 15A shall not take effect until it has been confirmed by the Commissioner of the division or, where there is no Commissioner, by the Local Government.

Confirmation of orders and award under sections 15, clause (b), and 15A.

"15C. When an assessment made under section 15A has been confirmed under the last foregoing section, the amount assessed shall be recoverable, under the warrant of the Magistrate of the district, in the manner provided by sections 386 and 387 of the Code of Criminal Procedure for the recovery of fines."

6. In section 29 of the said Act, after the words "for the period of two months" the following shall be added, namely:  
Addition to section 29, Act V, 1861, respecting overstay of leave.

"or who, being absent on leave, shall fail, without reasonable cause, to report himself for duty on the expiration of such leave."

7. To section 30 of the said Act the following shall be added, namely:  
Addition to section 30, Act V, 1861.

And may also in the case of any assembly or procession which in the judgment of the Magistrate of the district would, if uncontrolled, be likely to cause a breach of the peace, issue a license for the purpose of defining the conditions on which alone the assembly or procession is to be permitted to take place and otherwise giving effect to this section."

8. To section 31 of the said Act the following shall be added, namely:  
Addition to section 31, Act V, 1861.

"It shall be competent to any Magistrate or police-officer not below the rank of an Inspector to stop any procession, and call on it or any assembly which violates the conditions of a license granted under the last foregoing section to disperse."

9. For sections 37, 38, 39 and 40 of the said Act the following section shall be substituted, namely:  
Substitution of new section for sections 37, 38, 39 and 40, Act V, 1861.

"37. The provisions of sections 64 to 70, Recovery of penalties and fines imposed by Magistrates. both inclusive, of the Indian Penal Code, and of sections 386, 387 and 389 of the Code of Criminal Procedure, 1882, with respect to fines, shall apply to penalties and fines imposed under this Act on conviction before a Magistrate."

## STATEMENT OF OBJECTS AND REASONS.

THE object of this Bill is to amend Act V of 1861 (*An Act for the Regulation of Police*). The Bill is partly based upon recommendations submitted by the Government of the North-Western Provinces and Oudh and the Committee appointed in those Provinces for the reform of the police-force. It is also designed to remedy certain defects in the Act of 1861 which have been brought to notice by judicial interpretations of that Act, and to supply provision for some contingencies which the Act does not at present meet.

2. Section 1 of the Bill is intended to remove any doubts as to the legal powers vested in an Assistant District Superintendent of Police or other person whom the Local Government may find it necessary to appoint to the charge of the police of a district.

3. By section 2 certain disciplinary punishments, recommended by the North-Western Provinces and Oudh Police Committee, are added to the punishments specified in section 7 of the Act.

4. It has been held by two High Courts that at present a policeman when suspended, even temporarily, ceases to be a member of the police-force and is no longer amenable to

the provisions of Act V of 1861. Section 3 of the Bill will enact that a police-officer shall not by reason of being suspended from office cease to be a police-officer or to be subject to responsibilities and discipline as such.

5. Section 4 will allow a discretion, which has been recognized as desirable, to levy the cost of an additional police-force from those persons only whose conduct has rendered the employment of the additional force necessary. Landholders, though not in person resident in the area affected, will unless exempted also be liable to contribute. It is proposed by section 5 that in some cases, where an additional police-force is not imposed, those who would be liable for its maintenance should pay compensation to persons injured.

6. In section 6 is embodied a recommendation submitted by the Government of Bengal that a police-officer who fails to return to duty after leave should be subjected to the penal provisions of section 29 of the Police Act, which apply to an officer who withdraws from his duties without permission or without giving previous notice for the period of two months.

7. Section 32, Act V of 1861, renders liable to fine any person who violates the conditions of a license granted by the District Superintendent or Assistant District Superintendent of Police for the use of music or for the conduct of assemblies and processions: but the provision empowering these officers to grant the license is not distinct. Section 7 of the Bill will expressly authorize the superior police-officers, in the case of any assembly or procession which requires control, to issue a license specifying the conditions on which it may take place. Section 8 will empower any Magistrate or police-officer not below the rank of Inspector to call on any procession or assembly to disperse which violates the conditions of a license granted as above.

8. The general provisions of the Code of Criminal Procedure and the Indian Penal Code, in respect to the levy of fines, being sufficient to meet the case of penalties and fines imposed under the Police Act on conviction before a Magistrate, are substituted by section 9 of the Bill for the sections relating to distress in the Act of 1861, which are now not wholly appropriate for the purpose in view.

### RESOLUTION ON THE REPORT OF THE COMMITTEE FOR THE MANAGEMENT OF THE ZOOLOGICAL GARDEN, CALCUTTA, FOR THE YEAR 1893-94.

REVENUE DEPARTMENT—MISCELLANEOUS No. 903T.—R.

*Darjeeling, the 22nd October 1894.*

#### RESOLUTION.

#### READ—

The Report of the Honorary Committee for the Management of the Zoological Garden, Calcutta, for the year 1893-94.

The total receipts of the Garden, excluding the opening balance of Rs. 5,240, amounted to Rs. 43,193, against Rs. 42,144 in the previous year, and the total expenditure increased from Rs. 41,202 in 1892-93 to Rs. 43,521 during the year under report. The increased receipts were chiefly due to the unusual influx of pilgrims into Calcutta during the year, many of whom also visited the garden. The increase in expenditure was caused by larger sums being spent on repairs of roads and buildings than in the previous year. The closing balance in favour of the Garden decreased from Rs. 5,240 to Rs. 4,912.

2. The number of visitors who were admitted to the Garden on payment of entrance fees was the highest on record since its foundation, being 162,449, against 139,173 in 1892-93, thus showing an increase of 23,276 entrances. In addition, a large number of students and children were admitted free of charge.

3. Altogether 317 additions were made to the collection (including 102 mammals, 89 birds, and 126 reptiles), of which 12 were born in the Garden, 24 were captured, and the rest were obtained either by presentation, or by purchase or exchange. Among the more important acquisitions were a large consignment of valuable animals, consisting of a pair of zebras, one jaguar, a pair of chacma baboons, five crested cranes from Africa, four common rheas, one imperial eagle, one crested screamer, and some other animals, received in exchange from Mr. Carl Hagenbeck of Hamburg; a fine pair of pumas obtained from the Zoological and Acclimatization Society of Melbourne; a Mississippi alligator and a rattle-snake, also acquired by exchange, being the first of their kinds ever seen in India; a rare carnivorous animal *Cynogale bennette* from Borneo acquired by purchase; and a fine specimen of a hunting leopard from Rajputana, presented by His Highness the Maharaja of Jeypur.

4. A series of experiments on the efficacy or otherwise of various alleged remedies for snake-bite was conducted during the year in the Joy Gobind Law Laboratory, and a report of the results was submitted to Government by the President of the Committee, Dr. D. D. Cunningham. A copy of this report has been forwarded to the Government of India for information.

Another series of experiments was undertaken in the same Laboratory at the instance of the "Hemp Drugs Commission." As the enquiry is being continued in the current year, the Committee will deal with the subject in their next report.

5. The Lieutenant-Governor notices with pleasure the liberal donation of Rs. 8,000 made by Maharaja Bahadur Sir Jotendra Mohan Tagore, K.C.S.I., for the construction of a Zoological Library and Lecture-room. This building will shortly be ready for use. The Committee observe that a hall without furniture and books will be useless for the purpose for which it has been intended, and express the hope that public-spirited and enlightened gentlemen and noblemen will come forward to provide funds for the purpose.

6. The Lieutenant-Governor tenders his thanks to the members of the Committee for their efficient management of the Garden during the year.

ORDER.—Ordered that a copy of the Resolution be forwarded to the Honorary Secretary to the Committee for information, and that it be published in the Gazette.

By order of the Lieutenant-Governor of Bengal,

C. E. BUCKLAND,

Secretary to the Government of Bengal.

PROCEDURE FOR THE RENEWAL OF EXPIRED LICENSES UNDER  
THE INDIAN ARMS ACT, 1878.

POLICE.

*Dated Darjeeling, the 27th October 1894.*

RESOLUTION No. 2086J.D.

Read again—

The Circular of this Government, No. 890J., dated the 13th February 1894, to all Commissioners of Divisions, regarding the provision of facilities for the renewal of expired licenses under the Indian Arms Act.

Read also the following replies:—

Letter from the Commissioner of the Bhagalpur Division, No. 770J., dated the 14th April 1894.

Letter from the Commissioner of the Chittagong Division, No. 264M., dated the 14th April 1894.

Letter from the Commissioner of the Rajshahi Division, No. 1Jct., dated the 19th April 1894.

Letter from the Commissioner of the Presidency Division, No. 39J.G., dated the 21st April 1894.

Letter from the Commissioner of the Burdwan Division, No. 137J.G., dated the 8th May 1894.

Letter from the Commissioner of the Orissa Division, No. 344J., dated the 19th June 1894.

Letter from the Commissioner of the Patna Division, No. 359G., dated the 21st June 1894.

Letter from the Commissioner of the Chota Nagpur Division, No. 337J., dated the 19th July 1894.

Letter from the Commissioner of the Dacca Division, No. 1412J., dated the 28th July 1894.

UNDER rule 13 of the rules under the Arms Act, licenses to possess arms, &c., are granted by the Magistrate of the district, and under rule 19 the currency of a license may be renewed on payment of a second fee by the same authority. It was brought to the Lieutenant-Governor's notice that inconvenience was occasioned to the public by the delay involved under this procedure for the renewal of a license, and it was accordingly suggested to the Government of India that rule 19 of the rules under the Arms Act might be modified so as to empower Subdivisional Officers as well as the authority granting the licenses to grant renewals on the prescribed fee being paid. This proposal was, however, not accepted by the Supreme Government. Commissioners of Divisions were then invited, in the circular of this Government, No. 890J., dated the 13th February 1894, to suggest any other procedure which might appear appropriate for the removal of the difficulties complained of. They were also asked their opinion as to the best existing procedure, and the average delay in having a license renewed. From the replies received it appears that there is a general consensus of opinion in favour of allowing applications for renewals to be made by post, and that the best existing procedure is that in force in the Noakhali district, where applications for renewal are either sent by post or presented personally, together with registration envelopes stamped and ready addressed. The average delay in obtaining a renewal is said to vary from two to three days in the Birbhum district, to three months in the Tippera district.

2. The existing practice in the matter of the renewal of expired licenses appears to be as follows:—Having regard to clause 9 of the conditions under which a license in Form VIII is granted, the license-holder files before the end of the year for which it is issued an application for its renewal on a piece of four-anna stamped paper. The old license is annexed to the application. This application may be made either at the head-quarters of the district, or at a subdivision. In the latter case the Subdivisional Officer transmits it to head-quarters for orders. As a rule the renewal is accorded without objection, and the new form lately prescribed by the Government of India provides for recording a memorandum of renewal on the license. The applicant is then left to call for his license himself and take it away. If he does not call before the lapse of the old license on the 31st December, he renders himself liable to the penalties for holding an unlicensed gun.

3. It seems to the Lieutenant-Governor that the existing procedure, if intelligently and considerably worked, is not open to much objection, but as a fact there is reason to believe that there is often great delay in Magistrates' offices owing to want of method and proper supervision. Sir Charles Elliott therefore desires to prescribe general instructions for the guidance of Magistrates and police officers, which it is hoped may obviate the inconvenience now felt by the public. The following procedure is accordingly laid down in order to ensure this object:—A list of all persons holding licenses under the Arms Act within the area of the thana should be maintained at every police-station. This is prescribed under Rule 72, Chapter XVI, Volume I of the Bengal Police Code, but it is doubtful whether in all cases the rule is complied with. The Inspector-General of Police will take measures to ensure that this list is kept, and will issue orders that shall make it incumbent on every officer in charge of a police-station to report to the Magistrate of the district, on or before the 1st December, whether there is any objection to the renewal of any of the licenses within his jurisdiction. As licenses are granted for one year only, and the duration of the license expires on the 31st December, the holder of a license, if he desires to renew it, must apply before the close of the year for renewal. This application he must make on stamped paper of the value of four annas either in person or by agent or through the post, and he may make it either at the police-station or to the Subdivisional Officer in whose jurisdiction he resides, or to the District Magistrate. The permission to apply at the police-station will, it is expected, prove a boon to the public. The application must be accompanied by the current license. If the papers are received by the officer in charge of the police-station or the Subdivisional Officer, he will transmit them without delay to the District Magistrate. The District Magistrate having already received the police reports, will be in a position to decide at once upon the question of renewal, and the simple forms lately prescribed by the Government of India will in all cases of renewal enable him to give effect to the orders passed in each case without any waste of time. Within a week's time the license, with the order of renewal recorded on it, should be ready for return to the holder. In cases where enquiry is found to be necessary, some delay must be unavoidable, but such cases are the exception. The holder of the renewed license will then gain possession of it either by applying for it personally or by agent at the thana, or subdivisional or sadar office wherever the application was filed, or, if he prefers, he can attach a registered and stamped envelope bearing his own address to his application, and the renewed license will then be sent to him by post from the Magistrate's office.

4. His Honour apprehends that there is no other way of insisting upon the renewal of licenses than by the institution of prosecutions. It should, therefore, be made the duty of some clerk in the Magistrate's office to report, immediately after the 1st January of each year, what licenses have not been presented for renewal. It is desirable to prosecute for neglect to apply for a renewal, not with rigor, but firmly, in order that it may be clearly understood that the provisions of the law will be enforced.

5. In conclusion the Lieutenant-Governor takes this opportunity of drawing the attention of District Magistrates to the necessity of numbering and marking guns for which a license is given. It is feared that this precaution, which is obviously necessary for purposes of identification, has been generally neglected in Bengal districts. His Honour will not go so far as to insist that the gun itself should be produced and identified on every occasion when the license for it is renewed, although this may be found necessary in some localities where the misuse of gun licenses is shown to exist: but it must be laid down as an invariable rule of practice that guns should always be marked and numbered before an original license is granted for their possession, and that the number should be entered on the license when it is originally granted.

ORDER.—Ordered that copies of the above Resolution be forwarded to all Commissioners of Divisions and to the Inspector-General of Police, for information.

Ordered also that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. J. S. COTTON,

*Chief Secretary to the Govt. of Bengal.*

DISTRICT ROAD FUND.

No. 4963R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

*Dated Calcutta, the 22nd October 1894.*

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 600L.F., dated 28th September 1894, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 30th June 1894.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal for the 1st quarter of the year 1894-95 be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded to the Commissioners of the Rajshahi, Chittagong, Bhagalpur and Chota Nagpur Divisions, to the Superintending Engineers of the Northern and Western Circles, to the Inspector of Works, Eastern Circle, and to the Financial Department of this Government, for information.

By order of the Lieutenant-Governor of Bengal,

F. J. JOHNSTONE,

*Secretary.*

CHITTAGONG DIVN.	24 Noakhali	...	...
	25 Chittagong	...	...

Weather—first part of the week rainy; latter portion dry and seasonable. Condition of *aman* rice is excellent, the rain of the week having done immense good. No more rain is wanted. Lands are being prepared for *rabi* cultivation, and rain would do harm in this direction. There is no cattle-disease. Fodder and water-supply ample. Price of rice varies from 11 to 14 seers per rupee.

Weather—mornings and evenings cool and hot during day with occasional rain. *Aman* progressing. Cultivation of *rabi* crops going on. Fodder and drinking water sufficient. Common rice selling from 11 to 12 seers per rupee.

Weather—very wet and quite unseasonable for this season of the year, very cloudy still and getting cold. The rain has benefited the winter rice crop which is expected to yield a full crop, but it has thrown back to some extent the sowing of the *rabi* crops. Price of common rice varies from 10 to 13 seers per rupee. Cattle-disease is pretty prevalent everywhere.

Weather—rainy; cold weather setting in. *In the Hills*:—*Aghani dhan*, *bara mara* and *kalai* coming to perfection. Potatoes and *phaphur* progressing favourably. *In the Terai*:—Prospects of *aghani dhan* favourable. Paddy in ear. Land being ploughed for mustard and *kalai*. Prices of coarse rice:—

				Srs.
Hills	...	...	...	9 to 10 }
Terai	...	...	...	10 to 12 }

per rupee.

Heavy rain during the week. Jute steeping continues. *Aman* rice doing well. Lands under preparation for tobacco, &c. The late rain will not be beneficial. Common rice 8 to 13 seers per rupee.

Weather—seasonable. Prospects of *aman* favourable; an outturn of 16 annas expected. Price of common rice stationary (12 seers for the rupee). Fodder and water sufficient.

Weather—variable. Prospects of *aman* good. Sowing of *rabi* crops in progress. Common rice selling at 12 seers per rupee and jute at Rs. 4 to 5 a maund. Fodder and water-supply sufficient.

Report not received.

Weather—cloudy with occasional heavy showers. State and prospects of standing crops good. Common rice sells at 11½ seers per rupee. Condition of cattle good. Supply of fodder and water sufficient.

Weather—hot. Prospects of crops good. *Aman* harvest commenced in Gosalundo. Rice 11½ to 12½ seers per rupee.

Weather—seasonable. Prospects of crops good. Common rice sells from 9 to 13 seers per rupee. Fodder and water sufficient.

Report not received.

Ditto.

Ditto.

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
<b>BIHAR.</b>			
PATNA DIVISION.	26 Patna Oct. 27, '94	5.42	Weather—very cloudy and rainy. Prospects of rice up to now very good, but the continued rain will injure it hereafter. The present wet weather is retarding <i>rabi</i> sowings which have been already delayed. Prices continue normal. Common rice selling at—
	Barh ...	3.28	
	Bihar ...	2.94	
	Dinapur ...	3.14	
	27 Gaya „ 27, '94	2.36	Weather—rainy and unsettled. The rain has done considerable damage to the winter rice crop, and unduly retarded <i>rabi</i> sowings, which means a poor harvest in the spring. Sugarcane pressing has begun in parts. Price unaltered and about normal. Supply of fodder and water ample.
	Aurangabad ...	2.88	
	Nawada ...	2.49	
	Jahanabad ...	2.12	
	28 Shahabad „ 27, '94	3.57	Weather—rainy and cloudy. Prospect of paddy good; but if the rain continues the crop will suffer. <i>Rabi</i> sowings being retarded owing to rain.
	Buxar ...	2.70	
	Rhabua ...	0.85	
	29 Saran „ 27, '94	3.88	Weather—colder and seasonable. The rainfall has injured the paddy crop to some extent. The sowing of the <i>rabi</i> crop is being retarded. Fodder and water abundant. Prices of common rice:—
	Siwan ...	3.77	
	Gopalganj ...	2.51	
	30 Champaran „ 27, '94	3.01	Weather—cloudy. <i>Aghani</i> rice in fair condition. <i>Rabi</i> sowings progressing. Common rice selling at 16 seers per rupee. Fodder and water sufficient.
	31 Muzaffarpur „ 27, '94	2.05	
	Hajipur ...	1.48	
	Sitamarhi ...	3.44	
BHAGALPUR DIVISION.	32 Darbhanga „ 27, '94	2.62	Weather—cloudy with heavy showers on 25th. <i>Aghani</i> rice is doing well, but the rain of this week has been somewhat injurious to paddy in blossom and also to <i>rabi</i> sowings. A break in the rains is very necessary for <i>ral</i> cultivation. Fodder for cattle sufficient. Prices normal and stationary.
	33 Monghyr „ 27, '94	2.86	
	Begusarai ...	5.41	
	Janui ...	Not reported.	
			Weather—rainy and cloudy. The rain which has recently fallen has retarded the <i>rabi</i> sowings and has also done some injury to the paddy crop. It has also washed out the <i>wrid</i> , <i>kalai</i> and <i>kurthi</i> sown on the flooded area. Otherwise prospects good. Fodder sufficient. Prices of common rice:—
	34 Bhagalpur „ 27, '94	1.34	Sky continues overcast and there has been a good deal of rain on some days. It is cooler. The rain has done some harm to <i>aghami</i> paddy and to <i>kalai</i> and <i>kurthi</i> , and has delayed sowing of some <i>rabi</i> crops. Prospects, however, continue to be good. Prices normal and practically stationary. Price of common rice 12½ to 15½ seers per rupee for old rice and 20 seers for new <i>bhadoi</i> rice. Fodder and water sufficient.
	Banka ...	2.82	
	Madhipura ...	2.65	
	Supaul ...	3.10	
	35 Purnea „ 27, '94	4.20	Weather—cloudy but cool. The recent rain has probably done some damage to paddy in the ear and in the Kishanganj subdivision to potatoes, and will retard <i>rabi</i> sowings. Average price of rice 15 seers per rupee.
	Kishanganj ...	3.78	
	Araria ...	3.66	

No.	District and date of return.	Rainfall at Sadar Station in inches.	Character of the weather and state and prospects of the crops.
BIHAR—consolid.			
BHAGALPUR DIVY—consolid.	36 Malda Oct. 27, '94	9.42	Weather—hot and cloudy with some heavy rain. Winter paddy coming into ear and promising well. <i>Kabai</i> pulse thriving. Lands are being prepared for wheat and other winter crops. Coarse rice selling at from 12 to 18½ seers per rupee. Fodder and water sufficient.
	Chanchal ...	1.35	
	Shibganj ...	4.28	
	Gazole ...	1.91	
	37 Sonthal Parganas „ 27, '94	3.64	Weather—too wet for the time of year. Rice crop excellent; the heavy rain has done a very little harm and is delaying sowings of winter crops to some extent.
	Deoghur ...	2.30	
	Godda ...	2.89	
	Jamtara ...	4.18	
	Pakour ...	2.42	
	Rajmahal ...	2.07	
ORISSA.			
ORISSA DIVY.	38 Cuttack „ 27, '94	0.07	Weather—warm. Harvesting of <i>beali</i> nearly over. <i>Laghu sarad</i> attaining maturity. <i>Guru sarad</i> in ear. Prospects good. <i>Rabi</i> crops being sown. Condition of cattle good. Fodder-supply sufficient. Prices of common rice :—

Khurda ...	0.62		
CHOTA NAGPUR.			
South-West Frontier Agency.			
CHOTA NAGPUR DIVY.	41 Hazaribagh Oct. 27, '94	5.50	Weather—unsettled. Rice and other crops continue to do well. <i>Rabi</i> sowings are being retarded by rain. Fodder-supply plentiful. Common rice selling at from 12 to 16 seers per rupee.
	42 Lohardaga „ 27, '94	0.99	Weather—cloudy. Prospect of winter paddy continues good; sixteen annas outturn expected. Sowing of mustard finished. Potatoes being sown. Common rice is selling at 16 seers per rupee. Fodder and water sufficient.
	43 Palamau „ 25, '94	3.10	Weather—very unsettled. Heavy local storms which are most unusual at this time of year. Prospects of crops good, but cessation of the rains would be very beneficial. <i>Rabi</i> crops being sown. Rice selling at 13 to 22½ seers per rupee.
44 Manbhum „ 27, '94	0.53	Weather—stormy early in the week. Now seasonable. Prospects of <i>aman</i> rice continue excellent. Price of common rice 12 to 20 seers per rupee.	
45 Singhbhum „ 27, '94	1.08	It rained day before yesterday (25th); sky still not free from clouds. Prospects of standing crops not affected by the rain; but more rain may cause harm. Cutting of paddy going on. Rice selling from 18 to 22 seers per rupee.	

Published for general information.

the week to less than the corresponding normal mean, and positive when greater.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS  
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVA-  
TIONS TAKEN IN ASSAM, FOR THE WEEK ENDING 8 A.M., SATUR-  
DAY, THE 27TH OF OCTOBER 1894.**

DURING the previous week a diffused but rather large cyclonic storm had formed in the south of the Bay, which had advanced slowly in a west-north westerly direction, and on the 20th, or the last day of that week, was lying off the Coromandel coast with a centre probably in about the latitude of Madras. The diffused storm continued its advance, and the centre passed inland a little to the north of Madras, and probably between that station and Nellore, in the early morning of the 21st, or the first day of the week under review. The disturbance was of feeble strength near its centre, but at considerable distances from it, it was accompanied by very strong winds, specially to the north of the centre, and at such stations as Cocanada, Masulipatam, and even in Ceylon at Galle, very strong winds, and at certain times a severe gale of wind, were reported. Decidedly heavy rain was also brought up to the Madras coast during the approach and passage of the depression over the land. The diffused storm apparently either broke up on striking the coast, or it may perhaps have passed across the peninsula in a feeble form, and have afterwards developed into a storm which advanced up the Bombay coast, and filled up in Guzerat on the 27th. At all events, in so far as the weather in the Bay of Bengal is concerned, on the 22nd it had practically ceased to exist. It had, however, brought up with it a moderately heavy wave of monsoon winds, and when the depression had passed away this wave began to spread northwards along the west coast of the Bay. On the 22nd moderate general rain was received in Orissa. On the 23rd, south-westerly or more or less monsoon winds set in over Bengal, and winds became moderate in force at the head of the Bay. Pressure also began to fall on the 23rd. The fall of pressure continued on the 24th, and the fairly steady south-westerly wind current affected practically the whole province, while rainfall, which had been more or less local up to this date, except in Assam and Orissa, began to increase in amount, and became more general, and in Bihar in particular on the 24th the falls were heavy. On the 25th, a rapid fall of pressure took place over the northern half of the province, the fall equalling 0.07" over parts of Bihar, and a very distinct barometric depression had formed over this area, the defect ranging up to 0.14" at Bhagalpur, round which as a centre there was a distinct, though rather irregular, cyclonic circulation of winds. With the formation of the depression very heavy general rain fell over the whole of the northern half of the province, and lighter and also rather general rain over the south half. On the 26th pressure had fallen rather rapidly at the extreme northern, eastern, and southern stations, and pressure had become in defect by amounts ranging up to 0.234" at Sibsagar, 0.212" at Jalpaiguri, and 0.207" at Darjeeling. A strong westerly element in the wind, and direction, however, began to set in over the greater part of the province on this day, and hence, though the depression in the north of the province was still very prominent, it became more diffused, and the cyclonic circulation of winds in connection with it disappeared. Fairly general rain had again fallen in connection with the depression, moderate amounts were only heavy at the eastern stations on the 26th. On the 27th, a rapid increase of pressure occurred, the increase ranging from 0.17" at Silchar to 0.04" in South Bengal. Hence the barometric depression was rapidly filling up at all stations, and was still in defect and winds had become westerly at the great majority of stations, and in some cases north-westerly and northerly. Hence weather was becoming much more settled, and on the 27th only a few unimportant showers were reported over the province.

*Pressure.*—Owing apparently to the effects of the storm in the Bay, and the subsequent advance of monsoon winds over Bengal, and to the development of another depression in the north of the province, the mean pressure has been very considerably below the normal, and the defects have usually ranged from about 0.04" at the southern stations up to about 0.08" at the extreme north of the province. In Assam the defect averaged 0.064".

*Temperature* has been decidedly high almost throughout the week, and the general excess has averaged 1.1°. The largest excess has been recorded in Orissa, where it has equalled 2°.

In Assam, on the other hand, temperature has been in defect and the average defect has equalled 1.7°.

*Rainfall* has been unusually heavy and frequent during the week. The falls in North Bengal and Bihar have averaged no less than between three and four inches, and Chota Nagpur and East Bengal have received about 6 and a-half inches. The smallest falls have been received in South-West Bengal at Orissa, but even these districts have received falls which have averaged about an inch. In all cases, except in Orissa and South-West Bengal, the falls have been largely above the normal. The number of rainy days has also been exceptionally large, and in all divisions they have largely exceeded the normal.

Comparing the actual with the normal fall for the period, and expressing the actual falls as percentage amounts, the falls during the week have equalled the following:—South-West Bengal 105 per cent., North Bengal 64 per cent., East Bengal 225 per cent., Bihar 583 per cent., Orissa 75 per cent., and Chota Nagpur 486 per cent. Taking the various divisions to have an equal value in the calculation the rainfall of the week may be said to have been equal to 353 per cent. of the normal.

In Assam during the week Silchar has received 12.12 inches of rain, Dhubri 4.35 inches, and Sibsagar 3.67 inches.

The following table gives the summary of the temperature and rainfall data of each of the six meteorological divisions of the province for the week ending Saturday, the 27th of October 1894:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.									
	Highest observed during week.	Lowest observed during week.	Averages for week.			Average mean of week above or below normal mean of week.	Of week.			Rainy days.			Since 1st of month.		Since 16th October 1894.

The average fall of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	...	45.39
The total fall from 1st January to 27th October 1894	...	...	...	...	64.45
The average fall of the corresponding period for 24 years, Surveyor-General's Office	...	...	...	...	...

The mean pressure, temperature, &c., are deduced from the ... of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h. and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shelter open at the sides and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; g, gloomy; d, drizzling rain; p, passing temporary showers;  $\Delta$ , dew.

APPENDIX TO

# The Calcutta Gazette.

WEDNESDAY, OCTOBER 31, 1894.

## NOTICES TO MARINERS.

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 200.

[First Publication.]

AUSTRALIA—WIDE BAY BAR.

*Alterations in direction of North Channel.*

THE Port-Master, Brisbane, has given notice (No. 15 of 1894) that the square beacons on Hook Point, which led through the North Channel, must now be kept open to the northward twice their own width.

B. P. OREAGH, *Comdr., R.I.M.,*  
*Port Officer of Calcutta.*

Published for general information.

CALCUTTA, the 23rd October 1894.

G. C. MACONCHY,  
*Under-Secretary, Marine Department.*

### GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 193.

[Second Publication.]

#### CAUTION.

*Intended publication of a Weekly Summary of Notices to Mariners, by the Board of Trade.*

THE following Notice to Mariners (No. 375 of 1894), issued by the Board of Trade, is republished for general information:—

A Weekly Summary of Notices to Mariners, containing all the Notices received at the Board of Trade subsequently to the date of publication of the latest Monthly Summary respecting any alterations in Lights, Buoys or Beacons, any newly discovered danger, or any alterations in or additions to the Admiralty charts, will be published by the Board of Trade, on or about the 7th, 14th, 21st, and 28th, of each month.

A Monthly Summary containing all the Notices received at the Board of Trade during the preceding eight months is also published on the first of each month.

Copies of these Summaries are supplied at all the Mercantile Marine Offices in the United Kingdom to Masters of "Foreign-going ships," and at all the Custom Houses, to Masters of "Home Trade" and Coasting Vessels, free of charge.

Copies of the Monthly Summary are also sent to the Government Shipping Offices at each Colonial and Indian Port, and to the British Consulate at each Foreign Port, for the inspection of Mariners who may not be in possession of the latest Summary.

In addition to the above, all the "Notices to Mariners," immediately they are published, are posted at all the Mercantile Marine Offices and Custom Houses in the United Kingdom for the inspection of Mariners and others interested.

If the information contained in these Notices is not made use of by Masters, Owners and Agents of ships, the responsibility rests with the parties who neglect to make use of the information gratuitously offered and abundantly circulated.

H. B. HOOPER, *Comdr., R.I.M.,*  
*Acting Port Officer of Calcutta.*

Published for general information.

CALCUTTA, the 16th October 1894.

G. C. MACONCHY,  
*Under-Secretary, Marine Department.*

## GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 194.

[Second Publication.]

CHINA SEA—PHILIPPINE ISLANDS.

(1) *Flashing light on Guimaras island.*

THE British Admiralty has given Notice (No. 505 of 1894) that on 1st October 1894 a light will be exhibited from a light-house recently erected on the south-west extreme of Guimaras island, southern approach to Ilo Ilo:—

Guimaras light is a *group flashing* light, elevated 111 feet above the sea, showing *three white flashes* in quick succession, followed by a *red flash* every fifteen seconds, between the bearings S. 9° W. through south, east, and north and N. 26° W., visible in clear weather from a distance of 16 miles.

The apparatus is catadioptric of the fourth order.

The light-house, 58 feet high, is of iron, cylindrical in shape and painted white and grey.

Approximate position on Admiralty Chart, No. 2578, lat. 10° 28' 20" N., long. 122° 28' W.

(2) *Cabezas shoal off the south point of Luzon.*

Also, that a rocky shoal upon which a least depth of 6 feet was found, lies off the south extreme of Luzon, one-third of a mile N. 20° W. from Kalantes bank. The shoal is circular in shape, and about one-third of a mile in diameter.

Approximate position on Admiralty Chart No. 2577, lat. 12° 30' 45" N., long. 124° 8' 50" E.

(Variation 1° Easterly in 1894.)

H. B. HOOPER, Comdr., R.I.M.,

Acting Port Officer of Calcutta.

Published for general information.

G. C. MACONCHY,

Under-Secretary, Marine Department.

CALCUTTA, the 20th October 1894.

## GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

NOTICE TO MARINERS—No. 195.

[Second Publication.]

NEW ZEALAND—HAURAKI GULF.

*Beacon on reef in approach to Mahurangi harbour.*

THE British Admiralty has given notice (No. 507 of 1894) that a beacon has been placed on the reef off the mouth of Puhoi river, approach to Mahurangi harbour.

This beacon (named Brazier beacon) consists of an iron perch 12 feet high, surmounted by a black cage, and stands on the eastern part of the reef, with the south extreme of Horora island bearing N. 28° E., distant  $1\frac{1}{6}$  miles.

Approximate position: lat. 36° 32' 25" S., long. 174° 44' 55" E.

(Variation 14° Easterly in 1894.)

H. B. HOOPER, Comdr., R.I.M.,

Acting Port Officer of Calcutta.

Published for general information.

G. C. MACONCHY,

Under-Secretary, Marine Department.

AUSTRALIA, EAST COAST—PORT JACKSON.

*Amended sounding in East channel.*

THE British Admiralty has given notice (No. 501 of 1894) that attention is drawn to the fact, that on certain Admiralty charts of Port Jackson, a sounding of  $3\frac{1}{2}$  fathoms is shown in the position,  $1\frac{1}{2}$  cables S.  $88^{\circ}$  W. from the Obelisk on Green point East channel.

The sounding in the above position should read  $5\frac{1}{2}$  fathoms, and not  $3\frac{1}{2}$  fathoms, as charted.

Approximate position, lat.  $33^{\circ} 50' 35''$  S., long.  $151^{\circ} 16' 30''$  E.Variation  $9^{\circ}$  Easterly in 1894.

H. B. HOOPER, Comdr., R.I.M.,

Acting Port Officer of Calcutta.
